DEVELOPMENT ACT 1993: SECTION 48

Decision by the Development Assessment Commission as Delegate of the Governor

Preamble

1. A proposal for the development of a marina facility, the creation of housing blocks and upgrading of public boating facilities, immediately south of the township of Tumby Bay on the Eyre Peninsula has been under consideration under Division 2 of Part 4 of the Development Act 1993.

2. The development has been the subject of an environmental impact statement (being an environmental impact statement officially recognised under the Planning Act 1982) and amended under section 47 of the Development Act 1993.

3. Application has now been made to the Development Assessment Commission as the Delegated Authority under section 48 of the Development Act 1993, for the approval of the development with a modified layout. The application, dated 9 April 1998 (amended by plans dated 7 May 1998 and 7 April 1999), comprises the following plans:

- (a) Drawing Number 996335-3B (January 1998)—‘TYPICAL X-SECTION’
- (b) Drawing Number 996335-14 (7 May 1999)—‘AMENDED DESIGN CONTOUR OVERLAY’
- (c) Drawing Number 996335-4C (7 May 1998)—‘CONSTRUCTION UNSTAGED’

4. The Development Assessment Commission is satisfied that an appropriate Environmental Impact Statement, and an Assessment Report, have been prepared in relation to the development in accordance with the requirements of Division 2 of Part 1 of the Development Act 1993.

5. The Development Assessment Commission has, in considering the application, had regard to all relevant matters under section 48(5) of the Development Act 1993.

6. It has been decided to grant various development authorisations at this stage with a view to various matters being considered for further decision-making at a later stage or stages.

Decision

PURSUANT to the delegation notice dated 29 October 1998 in relation to works associated with the development of a marina facility, the creation of housing blocks and upgrading of public boating facilities (excluding the proposed toilet block) in the area immediately south of the township of Tumby Bay on the Eyre Peninsula, as described in an application dated 9 April 1998 (amended by plans dated 7 May 1998 and 7 April 1999) submitted on behalf of the District Council of Tumby Bay, the Development Assessment Commission grants the following:

1. *Development Approval* of the amended proposal for the excavation/formation of land for the entrance channel, marina basin and waterways (including the installation of edge treatments and culverts) and for the public boat ramp facility, boat repair yard facility and residential lots subject to the following conditions:

CONDITIONS FOR DEVELOPMENT AUTHORISATION

- (1) The works must be carried out as shown on plans in the application (Drawings Numbered 996335-3B dated January 1998, 996335-14 dated 7 April 1999 and 996335-4C dated 7 May 1998), except where varied by conditions described below.
- (2) Construction activities must be suitably managed to minimise and/or mitigate impacts on the community (especially noise and dust) and the natural environment as outlined in the 1990 EIS, especially the scheduling of major works during times when impacts on tourism can be minimised.
- (3) During construction, the temporary boat ramp and stockpiles of earth must be located to avoid damage or disturbance to native vegetation (including mangroves and seagrasses) and sand dunes.
- (4) The land to be used for land-based allotments must be formed to prevent stormwater flows entering into the waterways. To the extent that this is not practicable, stormwater must not be released into the waterways unless treated in accordance with the EPA Stormwater Pollution Prevention Codes of Practice.
- (5) Signs indicating the depth of the channel and other appropriate navigational aids must be erected in prominent locations to advise users of the marina facility of the navigational hazards associated with the limited channel depth, prior to use of the facility for boating purposes. Contingency plans must be prepared, in consultation with Transport SA, for minimising navigational risks, especially for visiting craft, prior to use of the facility for boating purposes. Council must monitor the extent of any hazard to navigation to determine whether it needs to increase the depth of the channel in the future to address any unacceptable risk.

- (6) The final design of modifications to the existing culvert on the Graham Smelt Causeway must allow for the reinstatement of the natural flow capacity of First Creek (at high tide). This may necessitate at least a three-fold increase in the cross-sectional area of the existing culvert and the incorporation of floating booms and trash racks for pollution control into the culvert design. The final design must be independently certified by a registered engineer to the satisfaction of Planning SA, prior to the commencement of construction of the modifications.
- (7) The final design of the northern culvert must allow water flow into the basin only.
- (8) Any proposed culvert under the Graham Smelt Causeway must be designed to pass beneath the existing 200 mm water main.
- (9) The Council (as proponent), or the developer, and all subsequent agents, such as construction crews, must be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Division of Aboriginal Affairs in the event archaeological items (especially skeletal material) are uncovered during earthmoving. The Biringa Inc. Aboriginal group must be consulted in regard to any known sites of significance in the area.
- (10) A monitoring program must be prepared and implemented, in accordance with the requirements of the EPA and the Amendment to the Assessment Report (Section 6), to the satisfaction of Planning SA, prior to construction works commencing.
- (11) Edge treatments and other waterway related structures must be independently certified by a registered engineer to the satisfaction of Transport SA, prior to the commencement of construction.
- (12) If any work constitutes building work under the Development Act 1993, the work must be certified by a private certifier, or where relevant by a registered engineer, as complying with the Building Rules prior to any building work commencing.
- (13) If a private developer undertakes the construction of the development, a legal agreement delineating the management and monitoring responsibilities of each party must be prepared to the satisfaction of Planning SA, prior to the commencement of construction.

NOTES TO THE APPLICANT:

1. The Environment Protection Authority will require approved monitoring programs to satisfy the Authority's licensing requirements for earthworks drainage. As part of licensing the proponent may need to prepare a Soil Erosion & Drainage Management Plan (prior to works commencing) to address the control of run-off to ensure water quality is not detrimentally affected. In addition the proponent would need to adopt or comply with the following:

- Environment Protection (Marine) Policy 1994;
- Draft Environment Protection (Water Quality) Policy; and
- Stormwater Pollution Prevention Codes of Practice.

2. The proponent must comply with the Public and Environmental Health Act 1987 in regard to the maintenance of suitable water quality within the marina basin to protect public health and amenity.

3. If gravel traps on stormwater outlets are to be installed the layout design must be refined to indicate the area of land to be provided for such works.

2. *Provisional Development Plan Consent* for the future use of the subject land, formed up in accordance with the approval referred to in the preceding paragraph 1, for the marina facility, a boat ramp and refuelling facility, marine toilet pump-out and treatment facility, hardstand and parking areas on proposed allotments, a boat repair yard, slip-way and dry storage area, residential allotments on proposed allotments 1-22, 24-30 and 32-65 and medium density allotments for aged care or tourist accommodation facilities on proposed allotments 23 & 31, generally in accordance with the plans comprising the application.

CONDITIONS FOR DEVELOPMENT AUTHORISATION

The final location and design of the boat repair yard must be determined taking into account the impact of air emissions on adjoining residents.

NOTES TO THE APPLICANT:

1. Development authorisation (for buildings) is required for structures associated with the marina facility, public boat ramp (including the refuelling facility and marine toilet pump-out/treatment facility) and boat repair yard (including the slip-way and dry storage area). Detailed design plans and cross-sections need to be provided for consent.

2. Development authorisation (for the division of land) is required for the division of land into the proposed allotments. A detailed description of service infrastructure, easement and open space reserve requirements needs to be provided as part of a subsequent Land-division application. It is intended that any land-division approvals be conditional on no Certificates of Title being issued until management, maintenance and monitoring responsibilities are appropriately identified and allocated to the satisfaction of the Minister for Transport and Urban Planning.

3. The Environment Protection Authority will require approved monitoring programs to satisfy the Authority's licensing requirements for the operation of the marina facility (for 50 or more berths). As part of licensing the proponent may need to prepare a Waste Management Plan, which should encompass both the marina facilities and residential component. In addition the proponent would need to adopt or comply with the following:

- Environment Protection (Marine) Policy 1994 (by following the Best Practice Guidelines for Waste Reception Facilities at Ports, Marinas and Boat Harbours in Australia and New Zealand);
- Draft Environment Protection (Water Quality) Policy; and
- Stormwater Pollution Prevention Codes of Practice.

4. The marina mooring structures must be designed in accordance with the Australian Standard AS3962—1991 Guidelines for Design of Marinas and be independently certified by a registered engineer, to the satisfaction of Transport SA.

5. The public boat ramp facility must be generally designed in accordance with the South Australian Boating Advisory Committee's Guidelines for Planning, Design and Construction of Boat Launching Facilities and be independently certified by a registered engineer, to the satisfaction of Transport SA (Marine Facilities), prior to construction commencing. Final design and construction of the boat ramp facility shall ensure any run-off or accidental spills are prevented from entering the basin without suitable prior treatment to reduce pollutants.

6. The boat refuelling dock and marine toilet pump-out/treatment facility must be designed and constructed in accordance with the requirements of the EPA and Transport SA and be located within allotments 57 and 58 to minimise impacts on adjacent land. For effluent disposal the marine toilet pump-out/treatment facility must be designed and constructed in accordance with the requirements of the South Australian Health Commission.

8. If foreign vessels are allowed to berth in the marina the proponent would need to consult with Transport SA (Marine Safety Section) to address any requirements of the Australian Quarantine Inspection Service (AQIS) and Australian Customs Service.

G. HOLLAND-BROOKER, Secretary, Development Assessment Commission.

FISHERIES ACT 1982: SECTION 59

TAKE notice that, pursuant to section 59 of the Fisheries Act 1982, J. Makris, 10 Fisher Place, West Lakes, S.A. 5021, or his nominated replacement approved by the Director of Fisheries (hereinafter referred to as the 'fisher') is exempt from section 41 of the Fisheries Act 1982, subject to the conditions contained in Schedule 1, in that they shall not be guilty of an offence when using a fine mesh purse seine net as described in Schedule 2 for the taking of pilchards (*Sardinops neopilchardus*) and other species within the Families Clupeidae and Engraulididae (hereinafter referred to as the 'permitted species') for the purpose of trade or business in marine waters of South Australia as described in Schedule 3 as Area A and Area B (hereinafter referred to as the 'permitted activity').

SCHEDULE 1

1. The fisher may engage in the permitted activity from the date of gazettal of this notice until 31 July 1999, or until revoked by the Director of Fisheries.

2. This exemption is valid only in respect of the fishing vessel *Maria Louisa* (hereinafter referred to as the 'permitted boat') registered on the fisher's Marine Scalefish Fishery Licence No. M285.

3. The fisher must be on board the permitted boat at all times while the boat is being used for the purpose of engaging in the permitted activity.

4. Whilst using a nominated master to take pilchards pursuant to this notice, no other fishing activity shall be undertaken by the licence holder pursuant to Marine Scalefish Fishery Licence No. M285.

5. Whilst engaged in the permitted activity the fisher shall not use any of the devices registered on the fisher's Marine Scalefish Fishery Licence.

6. The fisher must not take or be in possession of any other species of fish, other than the permitted species, while engaging in the permitted activity.

7. Any fish, which are not permitted species, taken as by-catch by the fisher during the permitted activity must be immediately returned to the water.

8. The fisher shall not, during the period 1 January 1999 to 31 July 1999, take a quantity of permitted species which exceeds his quota of 43.45 units at 7.712 tonnes per unit (which is equal to 335.09 tonnes).

9. The fisher may with the prior approval of the Director of Fisheries transfer uncaught units of quota during the period of this notice.

10. Fish taken pursuant to this notice as the result of a transfer of quota must be taken in the area as described (and disposed of as described) in the permit conditions of the holder of the initial allocation.

11. The fisher may transfer catch taken pursuant to this notice to a carrier boat at sea subject to nominating the boats in advance.

12. The fisher may nominate no more than two carrier boats at any one time. Notification of boat name must be provided to the person or agency responsible for conducting quota monitoring operations.

13. Where the fisher transfers all or part of his catch to a carrier boat that portion of the catch must be accompanied by a South Australian Pilchard Fishery Log Book, completed as required by condition 16 of this notice.

14. The fisher must notify the person nominated for quota monitoring, by telephone, of the intended place of any unloading and the estimated weight of the catch at least one hour prior to the unloading taking place.

15. The fisher must provide the person nominated for quota monitoring with reasonable access to boats and vehicles for the purpose of enabling inspection of the catch and any record relating to the South Australian Pilchard Fishery Log Book required to be completed under this notice.

16. The fisher must complete the South Australian Pilchard Fishery Log Book as described below:

(a) Unloading to a shore based processing plant:

- (i) The fisher shall complete all columns of the South Australian Pilchard Fishery Log Book **up to but not including** the column titled **PILCHARD TONNAGE CAUGHT**.

The fish can then be dispatched to the shore based processing plant. It is the responsibility of the fisher to make certain that all fish are accurately weighed within 24 hours of the consignment to the processor:

- (ii) The fisher shall upon being notified by the processor of the total weight of fish unloaded complete the columns headed, **PILCHARD TONNAGE CAUGHT, OTHER SPECIES, TONNAGE CAUGHT (This refers to other species) and REMARKS**.

For any unloading, if fishing has taken place on more than one day then this should be noted and the verified weight split as close as possible to reflect the actual quantities taken on each day of fishing.

(b) Unloading at sea or direct to a tuna cage:

The fisher shall complete all columns of the South Australian Pilchard Fishery Log Book immediately after capture and include an **estimated** tonnage in the column marked **PILCHARD TONNAGE CAUGHT**. The estimated tonnage should be based on a recorded number of boxes of a certain capacity (weight) filled.

17. The fisher then shall either by **facsimile or in person** deliver the completed (South Australian Pilchard Fishery Log Book) form to the person nominated for quota monitoring within **48 hours** of the unloading.

18. The fisher must provide regular samples of the permitted species for research analysis and assist in any other South Australian Research and Development Institute (SARDI) sponsored pilchard fishery research program as required by the Chief Scientist, Aquatic Sciences, SARDI.

19. The fisher must complete a monthly return within 14 days of the end of the previous month and forward it to SARDI. This return must be completed regardless of whether the fisher took fish or not, i.e. nil returns are required.

20. While engaged in the permitted activity the fisher must:

- (a) have in his possession the copy of this notice with which the Director of Fisheries has supplied him; and
(b) produce that notice to a Fisheries Officer forthwith, if and when a Fisheries Officer requests him to produce it.

6. (1) A board of directors is established as the governing body of the subsidiary.

(2) Anything done by the board in the administration of the subsidiary's affairs is binding on the subsidiary.

Composition of board

7. (1) The board consists of three members appointed by the Treasurer.

(2) One director will be appointed by the Treasurer to chair meetings of the board.

(3) The Treasurer may appoint a director to be the deputy of the director appointed to chair meetings of the board and the deputy may perform or exercise the functions and powers of that director in his or her absence.

(4) On the office of a director becoming vacant, a person may be appointed in accordance with this regulation to the vacant office.

(5) The Treasurer may appoint a suitable person to be deputy of a member of the board during any period of absence of the member (and any reference to a director in these regulations will be taken to include, unless the contrary intention appears, a reference to a deputy while acting as a member of the board).

Conditions of membership

8. (1) A director will be appointed for a term, not exceeding three years, specified in the instrument of appointment and, at the expiration of a term of appointment, will be eligible for reappointment.

(2) The Treasurer may remove a director from office by written notice on any ground that the Treasurer considers sufficient.

(10) If the board considers that a matter dealt with at a meeting attended by a representative of the Treasurer should be treated as confidential, the board may advise the Treasurer of that opinion giving the reason for the opinion and the Treasurer may, subject to subregulation (11), act on that advice as the Treasurer thinks fit.

(11) If the Treasurer is satisfied on the basis of the board's advice under subregulation (10) that the subsidiary owes a duty of confidence in respect of a matter, the Treasurer must ensure the observance of that duty in respect of that matter, but this subregulation does not prevent a disclosure as required in the proper performance of ministerial functions or duties.
