## 1. The Economic Context

The Australian and South Australian economies grew strongly in 1997-98 (with State Final Demand (SFD) in South Australia experiencing growth of 6%), and this momentum has carried through to 1998-99, despite an unfavourable regional economic environment. The national economy is expected to slow somewhat in the second half of 1999, and because of the degree of trade between South Australia and the other States, this downturn is likely to also affect South Australia. Growth in State Final Demand in South Australia is expected to continue to be higher than for Gross State Product (GSP) over the period to 2000-01 because of the detraction from growth due to a fall in net exports, resulting from economic difficulties faced by our major trading partners. Projections for 2001-02 are based on the expected performance of the Australian economy over the medium-term and relative population growth rates, indicating a 3 per cent per annum GSP and SFD growth rate for South Australia.

Forecasts for economic activity in 1998-99 are generally stronger than predicted at the time of the last Budget, but are weaker in 1999-2000.

Employment estimates for South Australia for 1997-98 as published by the ABS have exhibited sampling problems, although this seems to have been confined to estimates of self-employment. Trends in wage and salary employment (which account for over 80% of total employment) are considered more indicative of underlying conditions in the State's labour market. As such, the forecasts in Table 1 are for movements in wage and salary earner employment. Employment is expected to grow by 1% in 1998-99 but the expected slower growth in the State economy in 1999-2000 is likely to result in more subdued employment growth in that year.

Inflation trends remain subdued, and have been revised down since Budget. In turn, wages growth is expected to remain moderate over the forecast period.

Table 1 below provides a summary of key economic parameters in the next few years, for both South Australia and Australia.

## 2. Revised 1998-99 Budget and Forward Estimates

### Overview

The 1998-99 Budget marked the beginning of the Government's next four year financial plan with sustainable balanced budgets in the non commercial sector being the principal fiscal target.

Table 2 provides details on revised non commercial sector budget aggregates exclusive of the net proceeds from the sale of government businesses. The mid year budget review shows a slight deterioration in the financial position over the forward estimates period – underlying deficit of \$14 million in 1998-99 rising to \$63 million by 2001-02 – mainly reflecting a revision to revenue/grant estimates.

The major factors contributing to the slight deterioration are:-

- smaller growth in Commonwealth financial assistance grants due to CPI estimates being lower than forecast at budget time; and
- downward revisions to returns from public sector financial institutions and to the net operating result for some non commercial public trading enterprises;

offset in part by -

- stronger growth in taxes, fees and fines revenue over the course of the forward estimate period.

The Government is presently exploring opportunities to return the 1998-99 budget outlook and forward estimates to a balanced position in accordance with the original plan.

### Outlays

Against the original financial plan published in the 1998-99 Budget, *total outlays* are forecast to increase by \$52 million in 1998-99 and \$113 million by the end of the forward estimates period. The increases mainly reflect:-

- growth in Commonwealth specific purpose payments principally in the Education and Health sectors; and
- reclassification effects, where revenue previously offset against outlays are now shown under 'other revenue'.

The increases in outlays do not have an adverse impact on the non commercial sector financial position as there are corresponding revenue/grant offsets. Apart from these adjustments the forward estimates outlook with regard to growth in outlays is consistent with the budget time estimates.

The estimates still assume the realisation of net financial benefits from the prospective sale or lease of the electricity utilities.

## Revenue

*Total revenue and grants received* have been revised up by \$28 million in 1998-99 increasing to \$39 million by 2001-02. After removing classification changes (referred to above), the underlying improvement in total revenue is \$6 million in 1998-99 and \$18 million in 2001-02.

*State own source revenues* (net of reclassification effects) have been revised down. Higher than expected taxation receipts (mainly on account of revenue replacement grants for tobacco franchise fees and higher gambling tax receipts) are more than offset by lower distributions from SAFA (reflecting the impact of a reduction in SAFA's capital and lower interest rates) and a downward revision to the net operating result of non-commercial public trading enterprises (mainly reflecting an increase in depreciation expenses for TransAdelaide due to asset revaluations).

The forward estimates make no allowance for the proposed introduction of the GST. Consistent with a no policy change approach, the taxation estimates have been prepared on the basis of the existing range of State taxes.

*Commonwealth grants* are now projected at higher levels. Upward revisions to *specific purpose grants* mainly reflect the new Australian Health Care Agreement (AHCA) and additional funding for Education. These increases more than offset the impact of lower inflation on the indexation arrangements applying to *general purpose financial assistance grants*.

The forward outlook for *financial assistance grants* will be affected by the results of the 1999 Update of relativities by the Commonwealth Grants Commission due for public release in early March.

- (1) Outlays less revenue/grants received less provisions.
- (2) Excludes statutory marketing authorities, universities and central borrowing authorities.
- (3) Memorandum items are used to adjust the ABS deficit/surplus to include in LCAs certain transactions that have many of the characteristics of public sector borrowings but do not constitute formal borrowings. They are also used, where appropriate, to deduct from the ABS deficit/surplus certain transactions that Loan Council has agreed should not be included in LCAs.
- (4) Increase/(decrease) in the net present value (NPV) of operating leases with an NPV of \$5 million or greater.
- (5) Due to differences in the reporting of the superannuation memorandum item across jurisdictions, the December 1998 Heads of Treasuries meeting clarified that it should include both 'payments in excess of emerging costs of superannuation' and 'interest earnings on employer balances'. As South Australia had previously only reported its 'excess over emerging costs', the revised memorandum item has increased substantially.
- (6) Data on universities is no longer available.
- (7) The change in the home finance schemes figure from budget reflects the June 1998 imposition of a borrowing limit on Homestart Finance and the consequential excess of principal repayments over new borrowings.
