maintenance care (formerly Nursing Home Type care) means treatment and care of an admitted patient in which the treatment goal is to prevent deterioration in the patient's health or ability to function and where care over an indefinite period, but not further complex assessment or stabilisation, is required;

Manual means the most current *Australian Refined Diagnosis Related Groups Definitions Manual*, released by the Commonwealth Department of Health and Ageing;

Private and public admitted compensable patients - patients will be seen as a public or private admitted compensable patient in accordance with hospital practices in a similar way as applied to Medicare eligible patients;

rehabilitation, or **rehabilitation care**, means the treatment and care of a patient with an impairment, disability or handicap in which the treatment goal is to improve the ability of the patient to function;

rounded to the nearest hour, in relation to the determination of a number of hours, means that where a number of hours includes a fraction of an hour, the number is to be rounded up to the nearest whole hour if the fraction consists of 30 minutes or more and rounded down to the nearest whole hour (or, where necessary, to zero) if the fraction consists of less than 30 minutes;

- (2) For the purposes of this Schedule—

- (a) AR-DRG reference numbers or descriptions are as set out in the Manual; and
- (b) terms and abbreviations used in AR-DRG descriptions have the meanings given by the Manual.

- (3) A reference in this Schedule to a Table of a specified number in this Schedule is a reference to the Table of that number in clause 9.

2—Determination of applicable AR-DRG

For the purposes of this Schedule, the AR-DRG applicable to a patient must be determined in accordance with the guidelines contained in *South Australian Morbidity Coding Standards and Guidelines (Inpatients)*, effective 1 July 2006, published by the Department of Health.

3—Standard fee for admitted patients

Subject to this Schedule, the fee to be charged by a public hospital site for a period of treatment, care and accommodation of an admitted patient to whom an AR-DRG specified in the first and second columns of Table 3 in this Schedule is applicable must be calculated as follows:

$$\text{Fee} = \text{Price} \times \text{Cost Weight}$$

where—

- (a) the **Price** is the price specified in the second column of Table 1 in this Schedule; and
- (b) the **Cost Weight** is the cost weight specified in the third or fourth column of Table 3 in this Schedule according to the patient classification (public or private) specified in those columns for the AR-DRG applicable to the patient.

4—Fee for rehabilitation or maintenance care

Despite clause 3, the fee to be charged by a public hospital site for a period of treatment, care and accommodation of an admitted patient where the treatment and care consists of rehabilitation or maintenance care must be calculated as follows:

$$\text{Fee} = \text{Price} \times \text{LOS}$$

where—

- (a) the **Price** is the price specified in the third column of Table 2 in this Schedule according to the patient classification (public or private) specified in the first column and the type of treatment or care specified in the second column of the Table; and
- (b) the **LOS** (length of stay) means the number of hours (rounded to the nearest hour) between—
 - (i) the admission of the patient to the public hospital site or, where the patient receives maintenance care, the commencement of maintenance care, whichever is the later; and
 - (ii) the discharge of the patient from the public hospital site, excluding any leave hours (rounded to the nearest hour) for the patient during that period, expressed as a figure in days (including parts of days) and rounded up to the nearest whole day.

5—Medical or diagnostic services not included in fees for private patients

In the case of a private patient, a fee determined in accordance with this Schedule does not include a fee for the cost of medical or diagnostic services provided by a medical practitioner selected by the patient.

6—Retrieval fee (admitted patients)

Where a retrieval team provided by a public hospital site or SA Ambulance Service monitors and treats a seriously ill or seriously injured admitted patient of that or any other public hospital site during the transportation of the patient to a the public hospital site or to another facility of the public hospital site, the fee to be charged by the public hospital site or SA Ambulance Service providing the retrieval team is as follows:

Provision of retrieval team—\$2 856.00

7—Transportation fee

- (1) Where, in addition to providing a service referred to in this Schedule, a public hospital site transports, or arranges for the transportation of, a patient to or from (or between different facilities of) the public hospital site, the public hospital site may charge an additional fee equal to the cost to the public hospital site of providing, or arranging for the provision of, that transportation.
- (2) Subclause (1) does not apply to the transportation of a patient with a retrieval team provided by the public hospital site.

8—Other fees

- (1) Pharmaceutical Reform arrangements

For public hospital sites participating in the pharmaceutical reform arrangements under the agreement between the South Australian and the Australian Government the following fees apply for pharmaceuticals provided to admitted patients on discharge:

- (i) For compensable patients:
 - (a) For the supply of Pharmaceutical Benefit Scheme items (per item) the community co-payment rate for pharmaceuticals as set under the Commonwealth *National Health Act 1953* each year on 1 January.
 - (b) For the supply of non-Pharmaceutical Benefit Scheme items (per item) an amount that is the cost to the public hospital (using a full cost recovery principle) for supply of that item.

MINING ACT 1971

NOTICE is hereby given in accordance with Regulation 86 (1), (3), (4) and (7) of the Mining Regulations 2011 determining the reporting periods and minimum information required to be provided in a compliance report for exploration operations conducted on an exploration licence (EL), mineral claim (MC) or retention lease (RL).

COMPLIANCE REPORTS

The compliance report for exploration operations will be termed an 'exploration compliance report'.

The exploration compliance report should summarise your own compliance monitoring activities, and provide evidence that exploration activities are compliant with the approved program for environment protection and rehabilitation (PEPR), licence or lease conditions, and the *Mining Act 1971*.

The exploration compliance report will replace exploration rehabilitation photo reports, annual exploration rehabilitation status reports and exploration environmental management reports previously requested as a condition of the drilling/use of declared equipment approval.

REQUIREMENT FOR SUBMISSION AND REPORTING PERIOD*Exploration Licences*

Exploration compliance reports will be required for all exploration activities conducted on ELs (including activities conducted by joint venture partners) where a PEPR has been approved pursuant to Part 10A of the *Mining Act 1971*.

Where activities have been conducted in accordance with the Generic program for environment protection and rehabilitation—low impact mineral exploration in South Australia (generic PEPR; Ministerial Determination 001, available on the Department of State Development, (DSD), Minerals website), an exploration compliance report is not required. However, the Minister (or delegate) reserves the right to request an exploration compliance report for activities conducted in accordance with the generic PEPR for audit purposes, or where there may be reason to believe that the generic PEPR outcomes are not being achieved.

Where an exploration PEPR has been approved for activities not covered by the generic PEPR, an exploration compliance report must be submitted for:

- each individual EL;
- or
- a single report covering all tenements included within joint reporting arrangements agreed to with the Minister (or delegate).

For information on joint reporting arrangements refer to the Mineral exploration reporting guidelines for South Australia, Minerals Regulatory Guidelines MG13, available on the DSD Minerals website. If no joint reporting arrangements exist, then an exploration compliance report must be submitted for each individual tenement (as specified above).

Exploration compliance reports for individual ELs must be submitted annually within 60 days after the expiry of 12 calendar months from the date an EL was granted, and 60 days after the expiry or surrender of an EL. Exploration compliance reports submitted for tenements covered by joint reporting must be submitted within 60 days of the joint reporting due date.

Mineral claims and retention leases

Exploration compliance reports will be required for all exploration activities conducted on MCs or RLs where a PEPR has been submitted in accordance with the ministerial determination Format of and minimum information required to be provided in a program for environment protection and rehabilitation (PEPR) for exploration operations on an exploration licence (EL), retention lease (RL) and mineral claim (MC) not within the scope of the Generic program for environment protection and rehabilitation—low impact mineral exploration in South Australia (exploration PEPR) and approved pursuant to Part 10A of the *Mining Act 1971*.

Exploration compliance reports for authorised exploration activities conducted on MCs and RLs must be submitted within 60 days after the expiry of 12 calendar months from the date the tenement was granted.

Note: Where an approved PEPR has been submitted in accordance with a ministerial determination on a mineral lease, the compliance report must be submitted in accordance with Reporting periods and minimum information required to be provided in a compliance report for a mineral lease and any associated miscellaneous purposes licence for metallic and industrial minerals (excluding extractive minerals, coal and uranium) (Ministerial Determination 009, available on the DSD Minerals website).

CONTENT OF EXPLORATION COMPLIANCE REPORT

The exploration compliance report must include the following elements of Regulation 86 (4) (a, b, d, e, h and i). The following sections specify the content required to satisfy these elements and any other additional information required.

Exploration compliance reports must be submitted using the exploration compliance reporting template provided on the DSD Minerals website.

DESCRIPTION OF THE ENVIRONMENT (r. 65 (1) (a))

Each of the elements of the environment must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed operations. If the element is not likely to be affected by the operation, a statement to that effect must be included.

Where possible, photographs and other relevant information obtained during site visits should be used when describing relevant environmental aspects.

DESCRIPTION OF EXPLORATION OPERATIONS (s. 70B (2) (a))

The document should provide a detailed description of proposed exploration operations and any activities ancillary to exploration (e.g. drilling water bores or conducting pump tests).

The following elements (Sections 4.1 to 4.12) must be described only to the extent that they apply to the particular proposal. If the element is not applicable, the element description may be omitted.

Equipment and personnel requirements

Indicate drillsite locations, preparation methods, drilling method(s) and requirements for drilling sumps (number and size of sumps at each drillsite). State whether levelling or vegetation removal is required. If drill pad construction is required, detail the volume of material to be excavated at each site.

For PEPRs approved for an ongoing period of time, describe in detail all drilling methods that may be used and methods used to prepare sites, including vegetation clearance requirements, site levelling and digging of sumps.

For both 12 month and ongoing approval periods, describe how drillholes will be constructed, including casing material to be used, depth of casing, if the casing will be cemented, cementing intervals and the class of driller that will install the casing.

Describe drillhole decommissioning requirements, including the materials to be used, stratigraphic intervals where cement plugs will be placed, if the casing will be removed and when decommissioning will occur after drilling is completed.

Where confined or artesian conditions are expected, include a schematic diagram demonstrating how drillholes will be constructed and decommissioned.

Note: Construction and abandonment requirements must be compliant with *Mineral exploration drillholes—general specifications for construction and backfilling*, Earth Resources Information Sheet M21, available on the DSD Minerals website.

Costeans and bulk sample disposal pits

For PEPRs approved for 12 months, indicate the number and location, size (length, width and depth), excavation method, and maintenance and safety requirements for proposed costeans or bulk sample disposal pits. State whether vegetation removal is required and include the total area of disturbance.

For PEPRs approved for an ongoing period of time, indicate the maximum dimensions (length, width and depth) of costeans or bulk sample disposal pits, and describe site preparation methods, vegetation clearance, and safety and maintenance requirements.

Sample management

Describe the size of samples collected (including bulk sampling), collection methods, materials used when collecting the sample, sample disposal methods (including removal of sample bags) and any other sample management requirements at the exploration site (e.g. tarps or matting used to contain cuttings). Include requirements for on-site geological sample management (splitting of archive samples, bag farms, core processing and storage).

Access routes to work areas

Indicate planned access routes on a locality plan and distinguish between existing and proposed new access tracks. Detail the method for gaining access if existing tracks are not available. Indicate if vegetation clearance is required and the method to be used to clear the vegetation. Include the total area of disturbance for all new access tracks (i.e. length and width).

Campsites, storage and equipment laydown areas

Describe the layout and the number of facilities such as tents, caravans, transportables, amenities, waste disposal and management procedures (including sewage and hydrocarbon management). Indicate whether any vegetation clearance and/or earthworks are required and include the total area of disturbance (environmental footprint). For camps, include the maximum number of people that will use the site.

Show the location of laydown areas and campsites on the locality plan, where possible.

Campsites that are outside of the scope defined in the generic PEPR must use ablution facilities endorsed by the Department of Health. Confirmation of this must be included within the PEPR.

Other exploration methods and/or ancillary activities

Describe in detail any other proposed exploration methods (e.g. seismic) and/or ancillary exploration activities, including site preparation, vegetation clearance, and safety and maintenance requirements.

Water supply and management

Describe how and where water will be sourced for drilling, track maintenance and camping purposes (e.g. groundwater, surface water, mains). Provide details on the volume of water required and how wastewater or runoff water will be managed.

Groundwater drilling and investigation activities

Describe any proposed water drilling and investigation activities (e.g. pump testing, water monitoring sites, water storage, turkey nests/dams), including site preparation, vegetation clearance, safety and maintenance requirements, and permits/licences required in accordance with the *Natural Resources Management Act 2004*.

Water affecting activities

Indicate if any water affecting activities (refer to s. 127 of the *Natural Resources Management Act 2004*) will be undertaken and whether permits have been obtained. Where water affecting activity permits are required, outline site preparation, vegetation clearance, and safety and maintenance requirements.

Management of hazardous material

Indicate if exploration activities will be conducted in areas of known uranium or thorium mineralisation and identify other hazardous materials that are likely to be encountered.

Where exploration is located within an area of known uranium or thorium mineralisation a radiation management plan endorsed by the Environment Protection Authority (SA) (EPA) must be submitted to DSD along with the PEPR. Confirmation of EPA endorsement must also be provided with the PEPR.

For all other hazardous material identified, provide a plan on how the materials will be managed.

RETENTION LEASES

Where the RL includes specific conditions that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant) or demonstrates how otherwise they have or will be complied with.

MANAGEMENT OF ENVIRONMENTAL IMPACTS (r. 65 (1))

The applicant is required to conduct an impact assessment to identify all of the environmental, social and economic potential impact events that are likely to occur as a result of the proposed exploration activities, how each of the identified impacts will be managed, and the level of risk remaining (residual risk) after implementing control and management strategies. Identified potential impact events should be developed based on the aspects of the environment that may be impacted on and the proposed operational details.

Potential impact events

Identify the actual and/or credible potential impact events associated with the proposed mineral exploration program based on the environment components identified in Section 3 (includes all environmental factors, i.e. social, natural and economic) and proposed exploration activities described in Section 4.

The impact event analysis should take into account the:

- Source—the source of the potential impact event which alone or in combination has the potential to cause harm to an environmental receptor.
- Pathway—the potential pathway, means or route (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be affected by an identified source.
- Environmental receptor—the environmental receptors that may reasonably be expected to be adversely affected by the source, taking into account considerations for the aspect of the environment.
- Impact likelihood and consequences.

Control and management strategies

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation where necessary.

Where uncertainty exists regarding the effectiveness of proposed control measures, provide a description of the degree of uncertainty, including (but not limited to) the lack of site-specific information and quality of data.

The description of rehabilitation measures must demonstrate that final rehabilitation will be completed within 3 months after the time allocated to complete the approved program, or 3 months after the time allocated in the program notification.

Risk assessment

Where a potential impact event has been identified, determine the risk after the implementation of control and management strategies. Both the likelihood and severity of the consequences of impact events must be estimated.

The risk of the potential must take into account any uncertainty pertaining to the likely effectiveness of proposed control measures.

Where risks are moderate to extreme, justify why the risk is acceptable or develop additional control strategies to further lower the risk.

Proposed environmental outcome(s)

An outcome(s) must be developed to address each identified potential impact event.

These must describe the expected impact on the environment caused by the proposed or current exploration activities subsequent to control strategies being implemented and must meet other applicable legislative requirements.

Measurement criteria

Provide a draft statement of the criteria to be adopted to measure each of the proposed environmental outcomes. The draft criteria must, as far as practical, comply with Regulation 65 (1) (e).

Where appropriate, recognised industry standards, codes of practice or legislative provisions from other Acts can be used as criteria.

Outcome measurement criteria must identify the following key aspects:

- what will be measured;
- how it will be measured;
- frequency of measurement.

Note: DSD has developed an environmental management table within the online exploration PEPR application template which includes potential impacts, outcomes and measurement criteria common to most exploration programs. Proponents are required to conduct an impact assessment, including a risk analysis of each potential impact event and how each impact will be managed (i.e. control and management strategies). In some cases additional potential impacts events may be identified which require corresponding environmental outcomes and measurement criteria to be developed. Instructions on how to fill out the table are provided in the template.

Alternate or modified potential impacts events (and their receptors), environmental outcomes and measurement criteria may be provided by the proponent; however, this may increase the time DSD requires to assess the application.

PUBLIC RELEASE (r. 88 (3) (a))

Indicate if you consent to the public release of the approved PEPR. Where consent is not provided, clearly specify with reasons each section of the PEPR that should not be released in the public interest. Objections will be considered by the Minister (or delegate) before a determination is made on the release of the PEPR.

Determinations allowing for the public release of a PEPR will be made in accordance with the procedures outlined within the *Guidelines for conducting mineral exploration in South Australia*, Minerals Regulatory Guidelines MG22, available on the DSD Minerals website.

The following information required in an application is already deemed not to be in the public interest and will not be released:

- maps, plans or GPS coordinates identifying the exact location of specific exploration sites;
- any attachments in addition to those outlined within the exploration PEPR determination (e.g. tenement holder and/or operator policies, procedures, agreements and management plans);
- landowner and third party contact details and the results of any consultation undertaken;
- program notifications.

DECLARATION OF ACCURACY (r. 65 (8))

The exploration proposal must include a signed (digital signatures allowed) statement by the applicant in accordance with Regulation 65 (8) declaring that the content of the PEPR has been reviewed and is accurate.

MAPS AND PLANS

All maps and sections must conform to the following standards:

- state the relevant datum (e.g. GDA94, WGS84);
- use metric units;
- include a title, north arrow, scale bar, text and legend;
- state the date prepared and author;
- be of appropriate resolution and scale to show the represented information.

The exploration proposal must be accompanied by a map(s) showing the following information, where applicable:

- tenement boundaries;
- cadastral information;
- existing surface contours;
- existing vegetation;
- proposed exploration operations (includes drillholes, existing and new access tracks, drill traverses, campsites, laydown areas and other applicable information) and/or the target exploration area(s);
- existing ephemeral and permanent rivers, creeks, swamps, streams or watercourses and water management structures;
- towns, houses and homesteads, existing roads, rails, fences, transmission lines, buildings, dams and pipelines;
- known sightings of listed species;
- location and extent of all environmentally sensitive areas;
- any relevant land use types (e.g. parks and reserves, Aboriginal freehold land, Woomera Prohibited Area).

FORMAT AND SUBMISSION OF APPLICATIONS (r. 65 (9))

Applications must be submitted electronically (PDF preferred) using the exploration PEPR template(s) provided on the DSD Minerals website. A hard copy of the PEPR together with an electronic version can be submitted if the file size is too large to email. The information in both the hard copy and electronic version must be identical.

Unless an agency agreement or other document evidencing a legal authority is provided:

- the mining operator (tenement holder) must lodge all PEPR applications;
- all correspondence regarding the proposal will be through the mining operator; and
- PEPR approvals will be issued to the mining operator.

Submissions should be marked 'Attention: Exploration Regulation' and forwarded by email, post or courier:

NATURAL RESOURCES MANAGEMENT ACT 2004
SECTION 106

*Notice of Assessment of Quantity of Water Taken when
Metre Readings are Not Used*

I, IAN HUNTER, Minister for Sustainability, Environment and Conservation, hereby declare pursuant to Section 106 (3) of the Natural Resources Management Act 2004 (the Act) that, if meter readings are not used, the quantity of water taken during the 2015-2016 water use year will be determined on the basis and the method set out in Schedule 1.

SCHEDULE 1

Basis

1. For the purpose of Section 106 (1) (c) of the Act, the quantity of water taken will be assessed:

- on the basis of crop area; or
- if the Minister is satisfied that crop area is not a reasonable basis to determine the quantity of water taken, on the basis of pump capacity; or
- if the water was not taken for the purpose of irrigating a crop, on the basis of pump capacity.

2. For the purpose of Section 106 (1) (e) of the Act, the quantity of water taken for firefighting will be assessed on the basis of pump capacity.

Method

3. The method that will be used in assessing the quantity of water on the basis of crop area will be as follows:

The method by which the estimation of water requirements for crops will be used is the methodology of Doorenbos and Pruitt (1977), as refined by Allen *et al.* (1998) and set out in the Primary Industries and Regions SA Technical Report No. 263, second edition (the Report). Crop factors will be calculated from Kc (crop coefficient) values from Food and Agriculture Organisation of the United Nations, Rome Irrigation and Drainage Paper 56 (Allen, Pereira *et al.*, 1998) (FAO 56) and using site specific monthly Kp (pan coefficient) values and average monthly Kg values (bird guard coefficient) set out in the Report.

The methodology incorporates the use of Bureau of Meteorology evaporation data, the application of crop specific factors to evaporation figures to calculate crop evapotranspiration for the crop and location in question, subtraction of effective rainfall and an allowance for leaching for salinity control and irrigation efficiency.

The water requirement calculated by this method is expressed as depth of water required in millimetres for a particular crop grown over a particular season. Depth multiplied by the number of hectares of that crop grown (in each specified season for short season crops), multiplied by 10 gives the volume of water required for each crop in kilolitres.

A copy of each of the Report and FAO 56 is obtained through the GEO Science Library at the Department of Primary Industries and Regions SA. The reference number for the Report is ISBN No 07308-4349-1 and the reference number for FAO 56 is Kinetica/Amicus No 000020037000 or ISBN No 92-5-104219-5.

4. The method that will be used in assessing the quantity of water on the basis of pump capacity will be as follows:

Details of the duration of pumping and the normal operating capacity of the pump will be provided by:

- (a) the holder of the water management authorisation or their authorised representative; or
- (b) the person who took water without licence or authority. The duration of pumping will be multiplied by the normal operating capacity of the pump.

The maximum capacity of the pump will be considered by the Minister if assessed to be appropriate in the circumstances.

This notice has effect in relation to the financial year commencing on 1 July 2015.

RETURN TO WORK CORPORATION OF SOUTH AUSTRALIA ACT 1994

RETURN TO WORK ACT 2014

Return to Work Premium Review Panel Determination 2015

The Board of the Return to Work Corporation of South Australia ('the Corporation') determines as follows pursuant to Section 17 of the Return to Work Corporation of South Australia Act 1994, Section 157 of the Return to Work Act 2014 ('the Act') and all other enabling powers:

Part 1—Preliminary Matters

1. This determination may be cited as the Return to Work Premium Review Panel Determination 2015.
2. This determination commences on 1 July 2015 ('Commencement Date') and applies to any application for review lodged under Section 157 of the Act after the Commencement Date, subject to Part 9 of this determination.

Continuation of WorkCover Premium Review Panel as Return to Work Premium Review Panel

3. The WorkCover Levy Review Panel established by the Board's determination of 29 June 2000 (see *South Australian Government Gazette*, 29 June 2000, page 3472) and continued by the Board's determination of 26 April 2012 (see *South Australian Government Gazette*, 10 May 2012, page 1617) as the WorkCover Premium Review Panel, is hereby continued as the Return to Work Premium Review Panel ('the Panel').

Functions and powers under Section 157 of the Act

4. The function of the Panel shall be to perform the functions of the Board under Section 157 of the Act as delegate of the Board under that section in reviewing decisions of the Corporation pursuant to Section 140 (2), sections 141 (2), 141 (3), and 141 (4), Section 145 (1), Sections 147 (1), 147 (2), 147 (3) (a), (b) and (c), Section 147 (4), Section 149 (3) (a), Section 150 (3), Section 151 (1), Section 152 (1), Section 154 (1), (2), (3) and (4), Section 155 (1) and 155 (3) of the Act and subject to the proceeding clauses of this determination, the powers of the Board under Section 157 of the Act (other than the power to review a decision of the Corporation on a matter of law going to the validity of that decision) are delegated to the Panel for that purpose.

Part 2—Constitution of Panel

5. The Panel shall comprise four members appointed by the Board consisting of:
 - 5.1 a President, who shall be a legal practitioner (wherever in Australia admitted), and who shall decide any questions of law falling within the delegated functions of the Panel; and
 - 5.2 a member with expertise in the interests of registered employers; and
 - 5.3 a member with expertise in the interests of workers; and
 - 5.4 a member with expertise in the interests of the Corporation.
6. Where the anticipated unavailability of appointed members or the anticipated volume of work necessitates, deputy members may be appointed by the Board.
7. A Deputy President or other Deputy Member has the powers and duties of the position held by the President or Member respectively.
8. The President may sit alone:
 - 8.1 to give directions;
 - 8.2 to determine procedural matters;
 - 8.3 for the promotion of conciliation;
 - 8.4 to seek evidence; or
 - 8.5 to dispose of an application on a matter of law falling within the delegated functions of the Panel involving no disputes of fact and no exercise of discretion.
9. Except as provided for in clause 4 of this Part, the Panel shall otherwise sit as a panel of four.
10. A decision of a majority of members of the Panel, other than a decision as to a matter of law falling within the delegated functions of the Panel, shall be the decision of the Panel, but a member not agreeing with a decision of the majority may give reasons for not agreeing.
11. In the event of the Panel being equally divided in opinion as to the decision to be made, the Panel's decision shall be in accordance with the opinion of the President or Deputy President.
12. A quorum of the Panel shall be three members, provided that members representing each interest referred to in Clause 1 of this Part or (where applicable) deputies thereof have been offered, in the opinion of the President, a reasonable opportunity to sit.
13. If a member of the Panel becomes unavailable after the commencement of a hearing, the application must be heard again by the Panel properly constituted or (with the concurrence of the parties) adjourned until the absent member becomes available again, unless the decision of the remaining members is unanimous.
14. However, no hearing may commence or continue without the President or a Deputy President.

Part 3—Indemnity of Members

15. Any liability attaching to a member of the Panel (including a deputy member appointed under Clause 2 of this determination) for an act or omission by the member, or by the Panel, in good faith and in the exercise or purported exercise of a power or function, or in a discharge or purported exercise of a duty, of the member or the Panel is assumed by the Corporation.

Part 4—Tenure of Members

16. Members (other than the President) shall be appointed for a term of two years, except in the event of a casual vacancy, where a member may be appointed for two years or for the balance of the term of the former member at the option of the Board.
17. The President of the Panel shall be appointed for a term of five years.
18. A deputy of a member shall be appointed for a term specified by the Board in the instrument of appointment, not exceeding the balance of the term of the member for whom the deputy is to deputise or, where that member continues to sit under Clause 19 then the appointment will not exceed that period of continuation.
19. A member of the Panel whose term has expired may, if a new appointment has not been made, continue to sit as a member of the Panel until a new appointment is made.

20. A former member of the Panel may sit as a member of the Panel for the purpose of completing the hearing and determination of part-heard proceedings in which they were involved.

Part 5—Reconsideration and Conciliation

21. Upon receipt of any application lodged under Section 157 (1) of the Act, the registry of the Panel will forward a copy to the Corporation, which will reconsider the decision (disregarding any question of whether the application is out of time) and must inform the Panel and the applicant within 14 days of the result of the reconsideration (and its attitude to any question of an extension of time).
22. Where:
- 22.1 the applicant has sought an extension of time for the making of the application or, in the opinion of the Corporation, the application for review is out of time; and
- 22.2 the Corporation intends to oppose an extension of time, and
- 22.3 the Corporation considers proper reason exists for considering the extension of time before undertaking reconsideration, the Corporation may request the application to be referred to the President of the Panel to consider the extension of time.
23. Neither the President nor the Panel will consider an extension of time made in respect of a decision made more than three years after the employer was given notice of that decision.
24. If an application is referred to the President under Clause 2 of this Part, the President may grant a provisional extension of time and make such other procedural directions as the President thinks appropriate, but only if the President agrees that proper reason exists for departing from the usual practice under Clause 1 of this Part. A provisional extension of time does not prevent the Panel from refusing an extension of time, if appropriate, when dealing with the application for review on the merits.
25. If the President refuses to make a provisional extension of time, the applicant may request that the extension of time be referred to the Panel for final determination. A finding by the President that proper reason does not exist for departing from the usual practice under Clause 1 of this Part is not a refusal.
26. In this Part, consideration of an extension of time includes consideration of the question whether an application is in fact out of time.
27. Where the Corporation considers it impracticable to complete reconsideration within 14 days (and gives the registry of the Panel appropriate reasons for so considering), the registry may grant an extension of time for the reconsideration.
28. Before granting an extension of time for reconsideration that exceeds seven days, the registry must invite the applicant to indicate whether it has any objections to the proposed extension of time for reconsideration and the reasons for any objections. If there is any such objection, the registry must refer the question to the president of the Panel to determine.
29. If:
- 29.1 the Corporation, on reconsideration of a disputed decision, confirms the decision; or
- 29.2 the Corporation, on reconsideration of a disputed decision, varies the decision and the applicant expresses dissatisfaction with the variation,
- the registry of the Panel must refer the dispute for conciliation by a conciliator who will use his or her best endeavours to bring the applicant and the Corporation to an agreed resolution of the matters referred to in the application, and the Panel may not hear and determine any application unless it is satisfied that conciliation has been attempted and failed or it is satisfied that such attempts have no realistic prospects of success.
30. If, during the hearing of any matter, it appears to the Panel that there is a realistic prospect of a negotiated outcome being achieved, it may refer the matter back for further conciliation or the Panel may make such other attempts to promote conciliation as it thinks appropriate.
31. In this Part ‘conciliation’ includes:
- 31.1 counselling;
- 31.2 mediation;
- 31.3 neutral evaluation;
- 31.4 case appraisal;
- 31.5 conciliation;
- 31.6 any combination of the above,
- and the format of conciliation in any particular case shall be at the discretion of the conciliator in consultation with the parties, with the proviso that any confidential information provided during conciliation may be withheld from the Panel if the provider of that information so requests;
- and ‘the Corporation’ includes:
- 31.7 the operating unit of the Corporation that made the reviewable decision to which an application for review relates; and
- 31.8 the Director Scheme Legal, Senior Lawyer or other legal practitioner employed by the Corporation.

Part 6—Principles of Operation of Panel

32. The Panel shall be bound by and is hereby directed to follow the principles of natural justice.
33. Subject to clause 1 of this Part, the Panel:
- 33.1 shall act according to equity, good conscience and the substantial merits of the case, without regard to technicalities and legal forms; and
- 33.2 is not bound by the rules of evidence, but may inform itself by such means and such material as it thinks fit; and
- 33.3 shall act as expeditiously as the circumstances of a particular case permit.
34. The Panel must ascertain whether the parties to any proceedings desire to be heard by way of oral evidence or submissions and must in that event give at least 14 days notice of the date, time and place of hearing, but if both parties to particular proceedings wish to have the application determined on the documents, the Panel need not hold a hearing but must give the parties at least 14 days notice to make final written submissions before proceeding to make it a determination.

35. If only one party to proceedings desires to submit oral evidence or submissions, the Panel must give the other party at least 14 days notice of the hearing and inform that party that there is a danger that at the hearing the Panel may hear things from the first party that the other party will be unable to respond to if it does not attend.
36. A party may appear in person or (if a body corporate) by any proper officer or may be represented by counsel or by any duly appointed and authorised agent.
37. A party engaging representation must do so at its own cost.

Part 7—Powers of President of Panel

38. The President of the Panel, or a Deputy President acting in that office may, while so acting, exercise the powers of, and is hereby appointed as, an authorised officer under the Act. For the purposes of this Part, operating units of the Corporation and its agents are directed to comply with any requirements of the President or Deputy President as though they were subject to Section 183 of the Act.

Part 8—Reservation of Board's Discretion to Decide

39. Subject to the terms of this determination the Panel is required to determine all applications that fail to resolve through reconsideration or at conciliation, unless the Corporation, advises the Board that the particular dispute is of unusual significance and the Board or its relevant Board Committee, prior to the hearing of the application by the Panel, serves notice on the Panel and the applicant that the Panel is to make a recommendation only and refer the matter to the Board or relevant Board Committee.

Part 9—Revocation and Transitional Provision

40. The WorkCover Premium Review Panel Determination 2014 (the Revoked Determination) as published in the *South Australian Government Gazette* on 10 July 2014 at pages 3200 to 3204 is revoked, save and except that an Application for Review lodged before the Commencement Date shall be dealt with under the Revoked Determination.

I confirm that this is a true and correct record of the decision of the Board of the Corporation made on the 22nd day of May 2015.

Dated 9 June 2015.

- (3) the lesser of Step 2 is charged on the property.
