FISHERIES MANAGEMENT ACT 2007: SECTION 79

TAKE note that the notice made under Section 79 of the Fisheries Management Act 2007, dated 12 January 2015, and published in the *South Australian Government Gazette* dated 15 January 2015, on page 280, being the first notice on that page, referring to the West Coast Prawn Fishery, is hereby varied such that it will not be unlawful for a person fishing pursuant to a West Coast Prawn Fishery Licence to use prawn trawl nets in the waters specified in Schedule 1, under the conditions specified in Schedule 2, during the period specified in Schedule 3.

SCHEDULE 1

The waters of the West Coast Prawn Fishery adjacent to Coffin Bay and Ceduna.

SCHEDULE 2

1. Each licence holder must ensure that a representative sample of the catch (a 'bucket count') is taken at least three times per night during the fishing activity.

2. Each 'bucket count' sample must be accurately weighed to 7 kg where possible and the total number of prawns contained in the bucket must be recorded on the daily catch and effort return.

3. Fishing must cease if one of the following limits is reached:

- (a) a total of 14 nights of fishing are completed;
- (b) the average catch per vessel, per night (for all three vessels) drops below 300 kg for two consecutive nights;
- (c) the average prawn 'bucket count' for all three vessels exceeds 240 prawns per bucket on any single fishing night in the Coffin Bay area; or
- (d) the average prawn 'bucket count' for all three vessels exceeds 270 prawns per bucket on any single fishing night in the Ceduna area.

4. The fleet must nominate a licence holder to provide a daily update by telephone or SMS message to the PIRSA Fisheries Manager, to report the average prawn catch per vessel and the average prawn 'bucket count' information.

5. No fishing activity may be undertaken after the expiration of 30 minutes from the prescribed time of sunrise and no fishing activity may be undertaken before the prescribed time of sunset for Adelaide (as published in the *South Australian Government Gazette* pursuant to the requirements of the Proof of Sunrise and Sunset Act 1923) during the period specified in Schedule 3.

SCHEDULE 3

Commence at sunset on 4 November 2015 and end after the expiration of 30 minutes from sunrise on 19 November 2015.

Dated 3 November 2015.

A. JONES, Acting General Prawn Fisheries Manager

FISHERIES MANAGEMENT ACT 2007: SECTION 115

TAKE notice that pursuant to Section 115 of the Fisheries Management Act 2007, the holder of a Northern Zone Rock Lobster Fishery licence issued pursuant to the Fisheries Management (Rock Lobster Fisheries) Regulations 2006 (the 'exemption holders') are exempted from the provisions of Regulation 4 the Fisheries Management (Vessel Monitoring Scheme) Regulations 2007, but only insofar as the exemption holder shall not be guilty of an offence when using a registered boat that is endorsed on the licence without a fitted and approved vessel monitoring unit (the 'exempted activity'), subject to the conditions specified in Schedule 1, from 1 November 2015 until 31 May 2016, unless this notice is varied or revoked earlier.

SCHEDULE 1

1. The registered boat used pursuant to this exemption must be 7.5 metres or less in length.

2. The exemption holder may only conduct the exempted activity when fishing for species other than southern rock lobster (*Jasus edwardsii*) and giant crabs (*Pseudocarinus gigas*).

3. The exemption holder must ensure that only a master registered on their Northern Zone Rock Lobster Fishery licence undertakes the exempted activity on his or her behalf. Exemption No. 9902809.

4. The exemption holder must notify PIRSA Fisheries and Aquaculture by calling 1800 065 522 prior to engaging in the exempted activity and providing the following information:

- the name of the licence holder making the call;
- the fishery licence number of the licence on which the registered boat is endorsed;
- the name of the boat and the commercial boat registration number;
- the time and date the exempted activity will commence; and
- the time and date the exempted activity will cease.

5. An exemption holder must ensure that no rock lobster pots are on board the registered boat at any time during the exempted activity.

6. An exemption holder must not take or have on board the registered boat any rock lobster during the exempted activity.

7. An exemption holder must not contravene or fail to comply with the Fisheries Management Act 2007, or any other regulations made under that Act, except where specifically exempted by this notice.

Dated 29 October 2015.

S. SLOAN, Director, Fisheries and Aquaculture Policy

FISHERIES MANAGEMENT ACT 2007: SECTION 115

TAKE notice that pursuant to Section 115 of the Fisheries Management Act 2007 ('the Act'), a registered master fishing pursuant to a Northern Zone Rock Lobster Fishery licence (the 'exemption holder') is exempt from Regulation 7 and Clause 18 of Schedule 6 of the Fisheries Management (General) Regulations 2007, but only insofar as the exemption holder, or a person acting as their agent, may take Southern Rock Lobster (*Jasus edwardsii*) pursuant to their licence using rock lobster pots that do not have escape gaps ('the exempted activity'), subject to the conditions in Schedule 1, during the period 1 November 2015 until 31 May 2016, unless varied or revoked earlier.

SCHEDULE 1

1. A person fishing pursuant to a Northern Zone Rock Lobster Fishery Licence may only undertake the exempted activity when an independent observer is on board the boat and that observer is undertaking catch sampling for research purposes, in accordance SA Northern Zone Rock Lobster Fishery 2015/16 Pot Sampling Strategy agreed to by the South Australian Northern Zone Rock Lobster Fishermen's Association and PIRSA in the 2015/16 cost recovery program.

2. Data generated from the exempted activity must be forwarded directly to SARDI Aquatic Sciences. Data may not be copied or provided to additional parties.

3. The independent observers for the purpose of this exemption must be either Mark Barwick, or Lisa Georgiou, of Eyre Logistics, 48 St Andrews Terrace, Port Lincoln, S.A. 6606.

4. The escape gaps on more than three rock lobster pots may only be closed while an observer is on board the boat undertaking the exempted activity.

5. With the exemption of three rock lobster pots, all escape gaps on rock lobster pots on board the boat must be opened as soon as the observer(s) leave the boat.

6. Before conducting the exempted activity, the exemption holder must contact the PIRSA FISHWATCH on 1800 065 522 and answer a series of questions about the exempted activity. You will need to have a copy of your exemption with you at the time of making the call, and be able to provide the following details:

- name of the person making the call;
- licence number;
- name of the boat and its registration number;
- the name of the Registered Master on board the boat;
- port of departure;
- number of days at sea; and
- Exemption No. 9902810.

7. While engaged in the exempted activity, the exemption holder must have in their possession a copy of this notice and produce a copy of this notice if requested by a Fisheries Officer.

8. The exemption holder shall not contravene or fail to comply with the Fisheries Management Act 2007, or any regulations made under that Act, except where specifically exempted by this notice.

This notice does not purport to override the provisions or operation of any other Act including, but not limited to, the Marine Parks Act 2007. The exemption holder and his agents must comply with any relevant regulations, permits, requirements and directions from the Department of Environment, Water and Natural Resources when undertaking activities within a marine park.

Dated 29 October 2015.

S. SLOAN, Director, Fisheries and Aquaculture Policy

FISHERIES MANAGEMENT ACT 2007: SECTION 115

TAKE notice that pursuant to Section 115 of the Fisheries Management Act 2007, the holder of a prawn fishery licence issued pursuant to the Fisheries Management (Prawn Fisheries) Regulations 2006, for the West Coast Prawn Fishery listed in Schedule 1 (the 'exemption holders') or their registered master are exempt from closure notices made under Section 79 of the Fisheries Management Act 2007, published in the *South Australian Government Gazette*, referring to the West Coast Prawn Fishery insofar as the exemption holder may take prawns using prawn trawl nets in accordance with the conditions of their fishery licence for the purpose of undertaking a prawn survey (the 'exempted activity') during the period specified in Schedule 2, subject to the conditions contained in Schedule 3. Ministerial Exemption No. ME9902818.

SCHEDULE 1

Licence No.	Licence Holder	Boat Name	Survey Area
D01	Nicholas Paleologoudias	<i>Bosanquet</i> Bay	Venus Bay
D02	Kontias Developments Pty Ltd	<i>Lincoln</i> Lady	Coffin Bay
D03	Konstantine Paleologoudias	<i>Limnos</i>	

SCHEDULE 2

Commence at sunset on 3 November 2015 and end at sunrise on 5 November 2015.

SCHEDULE 3

1. The exemption holder may only undertake the exempted activity within the trawl survey area nominated in Schedule 1.

2. The exempted activity must not take place in any waters of a habitat protection zone or sanctuary zone of any marine park established under the Marine Parks Act 2007.

3. The registered master must keep a 'skippers log' and record catch information during the survey.

4. The exemption holders must comply with all instructions of the SARDI Stock Assessment Coordinator and work within the allotted survey trawl stations.

5. All fish, other than King Prawns, Southern Calamari, Gould's Squid, Scallops, Octopus and Balmain Bugs taken during the exempted activity, are to be returned to the water immediately after capture.

6. While engaged in the exempted activity or unloading the survey catch, the exemption holder must have a copy of this notice on board the boat or near his person. This notice must be produced to a Fisheries Officer if requested.

This notice does not purport to override the provisions or operation of any other Act including, but not limited to, the Marine Parks Act 2007. The exemption holder and his agents must comply with any relevant regulations, permits, requirements and directions from the Department of Environment, Water and Natural Resources when undertaking activities within a marine park.

Dated: 2 November 2015.

Liquor Licensing (Dry Areas) Notice 2015

under section 131 (1a) of the *Liquor Licensing Act 1997*

1—Short title

This notice may be cited as the *Liquor Licensing (Dry Areas) Notice 2015*.

2—Commencement

This notice comes into operation on 31 December 2015.

3—Interpretation

(1) In this notice—

principal notice means the *Liquor Licensing (Dry Areas) Notice 2015* published in the Gazette on 5.1.15, as in force from time to time.

(2) Clause 3 of the principal notice applies to this notice as if it were the principal notice.

4—Consumption etc of liquor prohibited in dry areas

- (1) Pursuant to section 131 of the Act, the consumption and possession of liquor in the area described in the Schedule is prohibited in accordance with the provisions of the Schedule.
- (2) The prohibition has effect during the periods specified in the Schedule.
- (3) The prohibition does not extend to private land in the area described in the Schedule.
- (4) Unless the contrary intention appears, the prohibition of the possession of liquor in the area does not extend to—
 - (a) a person who is genuinely passing through the area if—
 - (i) the liquor is in the original container in which it was purchased from licensed premises; and
 - (ii) the container has not been opened; or
 - (b) a person who has possession of the liquor in the course of carrying on a business or in the course of his or her employment by another person in the course of carrying on a business; or
 - (c) a person who is permanently or temporarily residing at premises within the area or on the boundary of the area and who enters the area solely for the purpose of passing through it to enter those premises or who enters the area from those premises for the purpose of leaving the area.

Schedule—Robe Area 1

1—Extent of prohibition

The consumption of liquor is prohibited and the possession of liquor is prohibited.

2—Period of prohibition

From 12 noon on 31 December 2015 to 12 noon on 1 January 2016.

3—Description of area

The area in and adjacent to Robe bounded as follows: commencing at the western end of the northern boundary of Dawson Drive, then in a straight line by the shortest route to the low water mark of Guichen Bay on the eastern side of the entrance to Fox's Lake, then in a straight line by the shortest route (across the entrance) to the low water mark on the western side of the entrance, then generally westerly along the low water mark to the eastern side of the entrance to Lake Butler, then in a straight line by the shortest route (across the entrance) to the eastern boundary of the breakwater on the western side of the entrance to the lake, then northerly, north-easterly, westerly and south-westerly around the outer boundary of the breakwater back to the low water mark on the shore on the western side of the breakwater, then generally north-westerly and southerly along the low water mark to the point at which it is intersected by the prolongation in a straight line of the southern boundary of Evans Cave Road (the northern boundary of Section 363 Hundred of Waterhouse), then generally easterly along that prolongation and boundary of Evans Cave Road, and the prolongation in a straight line of that boundary, to the eastern boundary of Robe Street, then northerly along that boundary of Robe Street to the southern boundary of Beacon Hill Road, then generally easterly along that boundary of Beacon Hill Road to the point at which it meets the north-eastern boundary of Lot 5 of DP 78111, then generally south-easterly and easterly along that boundary of Lot 5 and easterly and north-easterly along the northern boundary of Section 289 Hundred of Waterhouse to the eastern boundary of Section 289, then in a straight line by the shortest route to the south-western corner of Lot 11 of DP 64831, then easterly along the southern boundary of Lot 11 and the prolongation in a straight line of that boundary to the point at which the prolongation intersects the eastern boundary of Nora Creina Road, then northerly along that boundary of Nora Creina Road to the point at which it meets the southern boundary of Wildfield Road, then generally easterly along that boundary of Wildfield Road and the prolongation in a straight line of that boundary to the point at which the prolongation intersects the northern boundary of Southern Ports Highway, then generally north-westerly and south-westerly along that boundary of Southern Ports Highway and the northern boundary of Main Road to the eastern boundary of Dawson Drive, then generally north-westerly and westerly along that boundary of Dawson Drive to the point of commencement. The area includes any wharf, jetty, boat ramp, breakwater or other structure projecting below low water mark from within the area described above (as well as any area beneath such a structure).

Schedule—Robe Area 2

1—Extent of prohibition

The consumption of liquor is prohibited and the possession of liquor is prohibited.

2—Period of prohibition

From 12 noon on 31 December 2015 to 12 noon on 1 January 2016.

3—Description of area

The area in and adjacent to Robe bounded as follows: commencing at the western end of the northern boundary of Dawson Drive, then in a straight line by the shortest route to the low water mark of Guichen Bay on the eastern side of the entrance to Fox's Lake, then generally north-easterly along the low water mark to the point at which it is intersected by the prolongation in a straight line of the northern boundary of Section 573 Hundred of Waterhouse, then easterly along that prolongation and boundary of Section 573 to the eastern boundary of the Section, then generally southerly and south-westerly along that boundary of Section 573 to the north-eastern boundary of Section 390 Hundred of Waterhouse, then south-easterly along that boundary of Section 390 to the point at which it is intersected by the prolongation in a straight line of the northern boundary of Dennis Avenue, then easterly along that prolongation and boundary of Dennis Avenue, and the prolongation in a straight line of that boundary, to the point at which the prolongation intersects the western boundary of Lot 223 of FP 205569, then generally south-westerly and southerly along that boundary of Lot 223 and the prolongation in a straight line of that boundary to the point at which the prolongation intersects the south-eastern boundary of Southern Ports Highway, then south-westerly along that boundary to the western boundary of Lot 2 of FP 9707, then southerly along that boundary of Lot 2 to the southern boundary of the Lot, then generally north-westerly and south-westerly along the northern boundary of Southern Ports Highway and the northern boundary of Main Road to the eastern boundary of Dawson Drive, then generally north-westerly and westerly along that boundary of Dawson Drive to the point of commencement.

Schedule—Beachport Area 1

1—Extent of prohibition

The consumption of liquor is prohibited and the possession of liquor is prohibited.

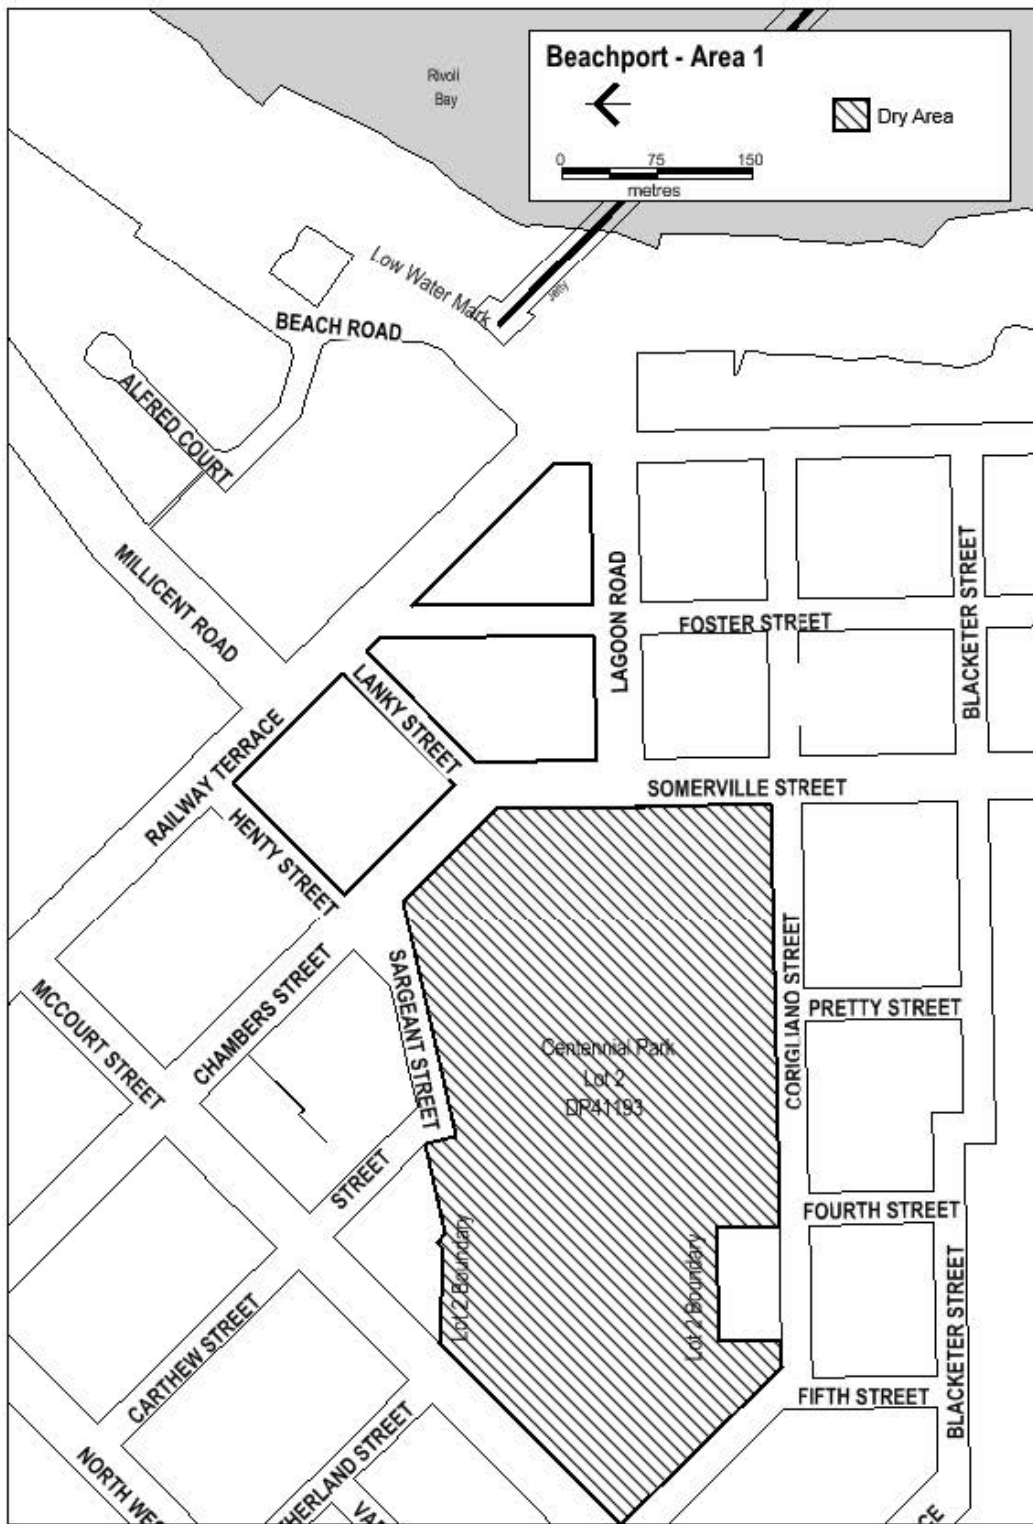

2—Period of prohibition

The prohibition applies during the following periods:

- (a) from 12.01 am to 7 am on each day, from 26 December 2015 to 31 December 2015 (inclusive);
- (b) from 12 noon on 31 December 2015 to 12 noon on 2 January 2016.

3—Description of area

The area in Beachport, generally known as Centennial Park, comprising Lot 2 DP 41193.

Schedule—Beachport Area 2

1—Extent of prohibition

The consumption of liquor is prohibited and the possession of liquor is prohibited.

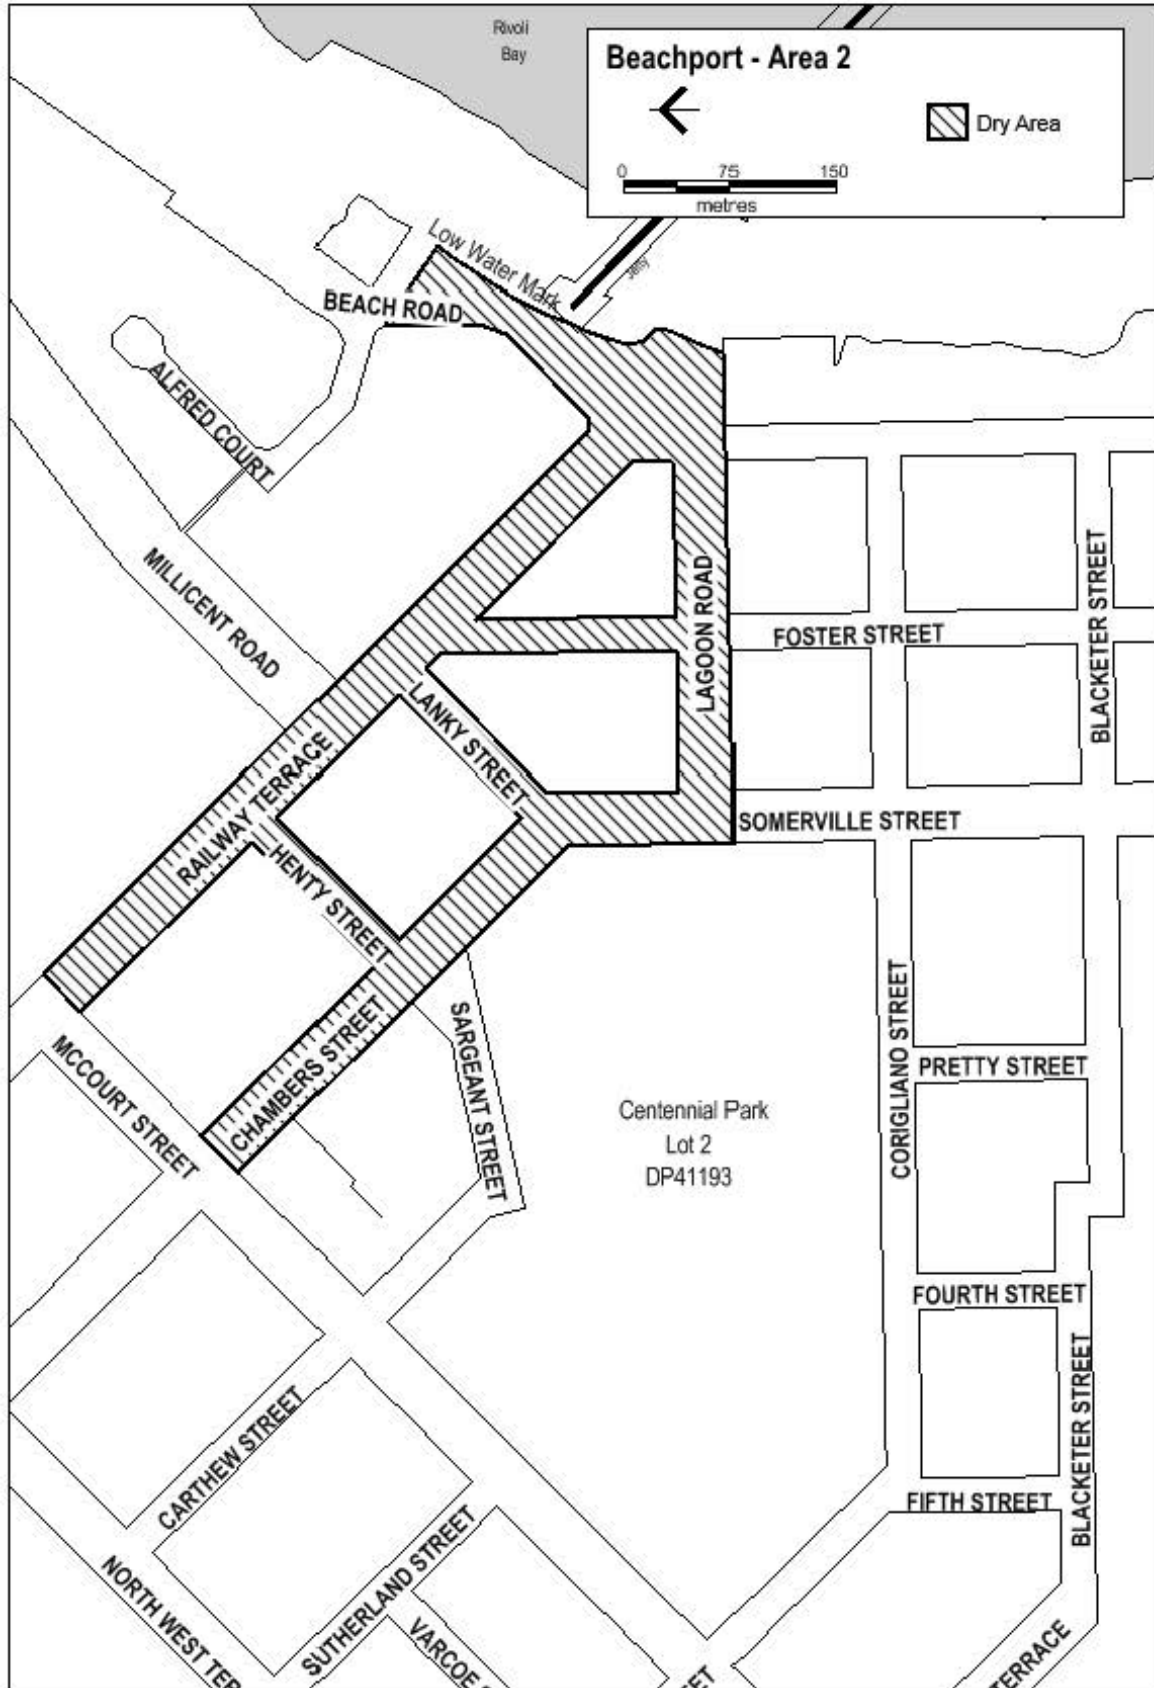

2—Period of prohibition

From 12 noon on 26 December 2015 to 12 noon on 2 January 2016.

3—Description of area

The area in and adjacent to Beachport comprising the following roads and other areas:

- (a) Railway Terrace between the south-eastern boundary of McCourt Street and the north-western boundary of Beach Road;
- (b) Chambers Street and Somerville Street between the south-eastern boundary of McCourt Street and the southern boundary of Lagoon Road;
- (c) Lagoon Road between the eastern boundary of Somerville Street and the western boundary of Beach Road;
- (d) Henty Street;
- (e) Lanky Street;
- (f) Foster Street between Railway Terrace and the southern boundary of Lagoon Road;
- (g) the area commencing at the point at which the prolongation in a straight line of the southern boundary of Lagoon Road intersects the low water mark on the western side of Rivoli Bay, then westerly along that prolongation to the western boundary of Beach Road, then generally northerly, north-easterly and northerly along that boundary of Beach Road to the southern boundary of Alfred Court, then along the prolongation in a straight line of that southern boundary of Alfred Court to the low water mark on the western side of Rivoli Bay, then generally south-westerly along the low water mark to the point of commencement.

1—Extent of prohibition

The consumption of liquor is prohibited and the possession of liquor is prohibited.

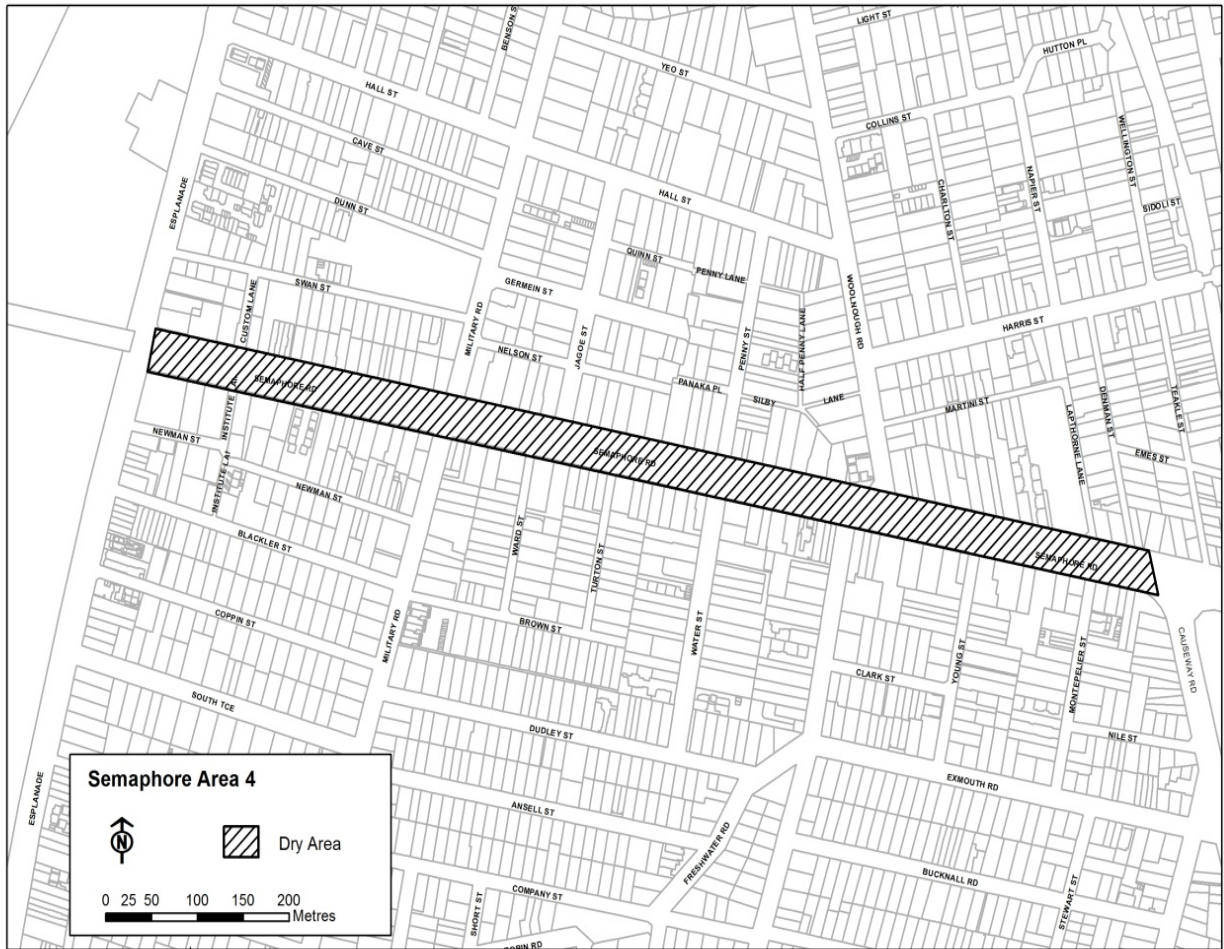

2—Period of prohibition

From 9 pm on 31 December 2015 to 8 am on 1 January 2016.

3—Description of area

The area in and adjacent to the town of Coffin Bay bounded as follows: commencing at the point at which the prolongation in a straight line of the northern boundary of Section 665 Hundred of Lake Wangary intersects the low water mark of Coffin Bay, then generally northerly, easterly, southerly, south-easterly and north-easterly along the low water mark to the point at which it is intersected by the prolongation in a straight line of the western boundary of Section 131 Hundred of Lake Wangary, then southerly along that prolongation and boundary of Section 131 to the northern boundary of Lot 57 DP 54186, then generally south-westerly and south-easterly along the northern and south-western boundaries of Lot 57 to the point at which the south-western boundary is intersected by the prolongation in a straight line of the north-western boundary of Section 273 Hundred of Lake Wangary, then south-westerly along that prolongation and boundary of Section 273 to the point at which it meets the eastern boundary of Section 295 Hundred of Lake Wangary, then south-westerly, north-westerly, north-easterly and north-westerly along the north-eastern and northern boundaries of Section 295 to the western boundary of the Section, then southerly along the western boundaries of Section 295, Lots 212 and 211 of DP 71703, Lot 101 of DP 56785 and Lot 6 DP 25759 to the northern boundary of Section 665 Hundred of Lake Wangary, then generally westerly, north-westerly, northerly and westerly along the northern boundary of that Section to the point at which it meets the eastern boundary of Section 667 Hundred of Lake Wangary, then westerly along the northern boundary of Section 667, the northern boundary of Section 665 Hundred of Lake Wangary and the prolongation in a straight line of the northern boundary of Section 665 to the point of commencement. The area includes the whole of any jetty, boat ramp or other structure that projects below the low water mark from within the area described above (as well as any area beneath such a structure).

MINING ACT 1971

Determination for a Mining Proposal and/or Management Plan for Metallic and Industrial Minerals

NOTICE is hereby given in accordance with Regulations 30 (3) and 49 (3) of the Mining Regulations 2011, determining the minimum information required to be provided in a mining proposal and/or management plan for a mineral lease (ML) and any associated miscellaneous purposes licence (MPL) applications for metallic and industrial minerals (excluding coal and uranium).

1. REQUIREMENT FOR DECLARATION OF ACCURACY

The mining proposal and/or management plan must include a signed statement by the applicant in accordance with Regulation 30 (4) and/or Regulation 49 (4) that the content of the mining proposal and/or management plan has been reviewed and is accurate.

Provide a summary of the steps undertaken to review the mining proposal and/or management plan and ensure its accuracy.

2. DESCRIPTION OF THE EXISTING ENVIRONMENT

Each of the elements of the existing environment listed in Sections 2.1–2.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed mining operations. If the element is not likely to be impacted by the operation, a statement to that effect must be included (note: the environment is defined in Section 6 (4) of the Mining Act 1971).

2.1 Topography and Landscape

Provide a description and map of the topography and landscape of the:

- application area; and
- general surroundings.

2.2 Climate

Provide:

- a summary of rainfall and temperature patterns, evaporation rates, and wind directions and speed (including maximum wind gusts); and
- details of the maximum average recurrence interval or annual exceedance probability rainfall event used for the operational and closure design of the project, and the justification for the value(s) selected.

2.3 Topsoil and Subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the application area (show this information on a map if there is a variation in soils over the application area); and
- identify any soil characteristics, including (but not limited to) erodibility, acid sulfate, sodic or non-wettable soils, that may require control measures to reduce environmental impacts during operations or rehabilitation.

2.4 Geology

Provide a description of the following, as a minimum:

- regional geology;
- geology within the application area, including but not limited to:
 - location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
 - composition of all rock types that are proposed to be disturbed;
 - interpretation of the stratigraphy of the rocks hosting the deposit as well as any overlying and adjacent rock units; and
 - a description and plan of potential for extension to the orebody;
- representative cross-sections, long projection and a geological map of the lease application area showing the location of rock types and rock units present; and
- the exploration data on which the geological interpretation was based on.

2.5 Geochemistry and Geohazards

Provide:

- a geochemical assessment of all rock types that are proposed to be disturbed, based on representative sampling and analysis that includes the identification and quantification of, but not limited to, sulfide minerals that have the potential to generate acid or mobilise metals into the environment; and
- a mineralogical assessment of all the rock types that are proposed to be disturbed, based on representative sampling and analysis for the presence and quantification of (but not limited to) radioactive minerals, asbestos or minerals that have the potential to produce respirable silica.

Describe the potential for any of the following natural geohazards to be present in the application area:

- structural instability, including slips, faults, karst features or geological discontinuities; and
- major seismic events (based on historical data).

2.6 Hydrogeology

Provide:

- a description of the local and regional hydrogeology, detailing both the stratigraphy and hydrostratigraphy;
- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations), recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer (shown on a plan) and static water level of any other known drillholes;
- the environmental value of the water resource(s) determined according to Australian and New Zealand guidelines for fresh and marine water quality (Australian and New Zealand Environment and Conservation Council & Agriculture and Resource Management Council of Australia and New Zealand, National Water Quality Management Strategy Paper No. 4, 2000) or as amended;
- a description of the existence, location and value of all Groundwater Dependent Ecosystems (GDEs) within the application area and within and immediately surrounding the extent of predicted hydrogeological impact of the proposed mine operations;
- an assessment of any current or historical use of local groundwater by the landowner(s) and other users which includes a baseline survey of bores, including water level, groundwater quality, bore construction details, status and purpose and collar/ground elevations;
- a statement describing if the application area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004, and provide details on the current availability of water resources within the prescribed area;
- a plan, to scale, identifying the application area, all drillholes and boreholes relevant to the identification of hydrogeology, GDEs, direction of groundwater flow, any potential paleochannels and recharge zones;
- if proposed mining operations are likely to intersect one or more aquifer units, provide a diagram of the potentiometric groundwater elevation contours for each aquifer and include the location of all drillholes and boreholes and supporting tabulated data used in developing the contours; and
- cross-section(s) of the interpreted hydrostratigraphy showing the known and inferred groundwater levels, and groundwater flow direction, recharge and discharge mechanisms (if applicable), application area, proposed mining operations, and relevant drillholes and boreholes used in developing the cross-section(s).

2.7 Hydrology

Provide a description and map of the current drainage patterns for the application area and water catchment including:

- location of watercourses, drains and dams;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- a statement describing if the application area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004, and provide details on the current availability of water resources within the prescribed area;
- a statement if the application area is within a water protection area including areas under the River Murray Act 2003; and
- groundwater—surface water interactions.

Provide water quality data for identified watercourses, where there is potential for discharge into that watercourse from the proposed mining operation (whether intentional or not). Should identified watercourses be ephemeral, and it is not possible to collect water samples, provide a characterisation of sediments sampled from the watercourse bed upstream and downstream of the application area.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the proposed mining operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

2.8 Vegetation, Weeds and Plant Pathogens

Provide:

- a description of existing flora (native and introduced) in the application area and surroundings, and display on a map;
- the State conservation status and habitat value of native vegetation present in the application area;
- a description of the presence of Commonwealth Environment Protection and Biodiversity Conservation Act 1999, listed species and ecological communities;
- a description of the extent the application area and adjoining land is affected or potentially affected by pathogens and weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation or natural regrowth arising from previous clearance.

2.9 Fauna

Describe the native and feral fauna that may be present in the application area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

2.10 Caves

Describe the presence of any caves in karst (limestone) areas within, or near to, the application area. A survey for the presence of caves must be performed if the application area is within, or near to, known caves or significant limestone formations. Provide a summary of the results of the survey.

2.11 Local Community

Provide:

- a description of the local population, the economy, services and employment; and
- details of nearest town or urban areas, with a summary of the demographics of the local population.

2.12 Landowners and Land Use

Provide a description of:

- land ownership for all titles within and adjacent to the application area;
- land use (historical, current and potential) for the application area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- any policies relevant to the application area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- a statement as to whether the application area falls within the Murray Darling Basin, Adelaide Dolphin Sanctuary or a Marine Park; and
- any other interests or restrictions on the application area, including:
 - public utility easements;
 - if the application is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the Mining Act 1971, or Petroleum and Geothermal Energy Act 2000;
 - any applicable exempt land under Section 9 of the Mining Act 1971, and any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the Mining Act 1971; and
 - the status of negotiations with Native Title holders or claimants, if the application area includes non-freehold land.

Provide information relating to the prospect of obtaining access to land required for the proposed mining operation.

2.13 Proximity to Infrastructure and Housing

Provide:

- information and maps identifying residences within and near the application area;
- information and maps identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, and telephone lines (both underground and above ground); and
- information and maps identifying public roads to be utilised or affected as part of proposed mining operations, including an estimate of the existing traffic movements.

2.14 Amenity

Provide a description of scenic or aesthetic values for the application area and immediate surrounds, including caves or karst features or other features of community, tourist or visitor interest.

2.15 Air Quality

Provide a description of the existing levels of dust and contributors to air quality including odour (both natural and anthropogenic).

2.16 Noise

Provide a description and measurement data of the existing levels of noise and contributors to noise (both natural and anthropogenic).

2.17 Heritage (Aboriginal, European, Geological)

Detail:

- any registered heritage sites in or adjacent to the application areas that are protected under legislation (in so far as may be permitted under the relevant legislation); and
- include a statement concerning whether or not an Aboriginal cultural heritage survey has been conducted by the proponent and, if so, the results of the survey.

2.18 Proximity to Conservation Areas

Provide information on proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

2.19 Pre-existing Site Contamination and Previous Disturbance

Provide information on any known existing contamination of the site and of any disturbance by previous mining operations or other activities.

3. DESCRIPTION OF THE PROPOSED MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.10 must be described only to the extent that they apply to the proposed mining operation. If the element (or part of the element) is not applicable to the proposed mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General Description and Maps/Plans of Operations

Provide:

- a summary description of all elements of the proposed mining operation, including mining, processing and waste management (include maps/plans).

3.1.1 *Options*

Provide:

- a summary description of relevant options considered for mining, processing and mine waste management strategies, and provide justification for the chosen strategies, including a description of any elimination or substitution strategies that have been adopted to control a hazard in order to protect the environment.

3.2 **Reserves, Products and Market**

3.2.1 *Ore Reserves and Mineral Resources*

Provide:

- a statement of the current ore reserve and mineral resource estimates in the application area and a brief description of the basis of this estimate; include Australasian Joint Ore Reserves Committee (JORC) compliant reserve and resource estimates (and categories) if available; and
- a statement of what reserve and/or resource forms the basis for the application;

or

- an estimate of the resource to be mined, the basis of this estimate, and demonstrate that the resource can be economically mined at current commodity prices;

and

- steps that have been taken to ensure proposed mining operations will not sterilise/prevent future extraction of mineral resources.

3.2.2 *Production Rate and Products*

Provide:

- a statement of the relevant commodities listed in Section 3.2.3 below that are proposed to be extracted, processed and sold, and the expected market or end use;
- a statement of any other commodities present in the application area that are not proposed to be recovered for sale, and the reasons for this decision;
- a quantitative estimate of production of mine gate product(s) for the life of mine, and a schedule of the annual production of mine gate product(s); and
- a statement if any extractive minerals (as defined by Section 6 of the Mining Act 1971) will leave the lease.

3.2.3 *Commodities List*

Refined Metals

Cobalt; Copper; Gold; Iron; Lead; Silver; Steel/pig iron; Thorium; Zinc.

Mineral Ores and Concentrates

Iron ore—hematite direct shipping ore (DSO); Iron ore—magnetite DSO; Iron ore—magnetite concentrate; Heavy mineral concentrate; Rare earth elements; Contained copper in ore, concentrate or cement; Contained gold in ore or concentrate; Contained silver in ore or concentrate; Contained lead in ore or concentrate; Contained zinc in ore or concentrate.

Gems and Semi-precious Stones

Amethyst; Calcite; Chrysoprase; Diamond; Jade; Opal; Quartz; Sapphire; Scholzite; Talc; Staurolite; Topaz.

Industrial Minerals

Alunite; Andalusite; Anatase; Barite; Calcrete (agricultural purposes); Celestite; Cement shale; Diamond; Dolomite (use either industrial or agricultural); Diatomite; Feldspar; Garnet; Graphite; Gypsum (use either plaster, cement or agricultural); Ilmenite; Kaolin; Kyanite; Leucoxene; Lime sand (calcareous dune sands; use either chemical, agricultural or flux); Limestone (use either chemical, agricultural, cement, flux or whiting); Magnesite; Marble (use either chemical, agricultural, cement or flux); Mica; Micaceous hematite; Monazite; Palygorskite; Peat; Phosphate; Potash; Rutile; Salt; Shell grit (use either industrial or agricultural); Silica (rocks containing mainly silica-quartzite, flint, vein quartz etc.); Silica sand (use either filter, foundry or glass); Sillimanite; Talc (use either pharmaceutical or filler); Vermiculite; Wollastonite; Xenotime; Zircon.

3.3 **Exploration Activities**

Provide information that details all exploration activities to be undertaken within the application area as a part of the proposed mining operation, including:

- purpose of the activities (i.e. resource drill-out or resource extension);
- types of drilling;
- geophysical techniques likely to be used;
- earthworks required to conduct exploration activities;
- equipment required to conduct exploration activities; and
- rehabilitation methods for exploration works (including that not yet rehabilitated from previous tenure).

3.4 **Mining Activities**

3.4.1 *Type or Types of Proposed Mining Operation to be Carried Out*

Provide a clear statement on the type or types of mining operation proposed to be carried out, such as:

- the mining method(s) to be adopted.

3.4.2 *Open Pit*

Describe proposed open pit workings, including (but not limited to):

- overall pit wall angles, bench height, berm width;
- dimensions and depth of pit;
- access ramps; and
- maps, plans and cross-sections.

3.4.3 *Underground Workings*

Describe proposed underground workings, including (but not limited to):

- proposed stoping methods;
- potential surface disturbance resulting from underground mining;
- declines, shafts, tunnels, bore holes, ventilation intakes and exhausts; and
- maps, plans and cross-sections.

Where underground fill is proposed, describe:

- type of fill to be used;
- the volume percentage of underground void to be filled;
- sequence of filling;
- source and proportion of fill; and
- maps, plans and cross-sections showing the proposed fill.

3.4.4 *Material Movements*

Provide:

- expected life of mine (including scope for extension);
- annual mine production rates and mine production schedule of ore and waste rock over the life of mine; and
- life of mine and annual strip ratios.

3.4.5 *Stockpiles*

Describe:

- location, size, shape and height of ore, product, subsoil and topsoil stockpiles;
- method of placement;
- method of stabilisation and erosion control of all stockpiles; and
- water movement through stockpiles.

The location, maximum height and extent of all stockpiles must be shown on a map.

3.4.6 *Use of Explosives*

If explosives are used, describe:

- type of explosives used on the site;
- proposed timing and frequency of blasting;
- size of blasts; and
- storage of explosives (amount, type, detailed location and method of storage).

3.4.7 *Type of Mining Equipment*

Provide a description of the equipment (fixed and mobile) proposed to be used in the mining operation in terms of:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.4.8 *Mine Dewatering*

Provide:

- estimated inflows of groundwater and stormwater and water from any other mining activities into mine workings;
- details of proposed mine dewatering infrastructure, and mine water management and disposal;
- contingency measures for greater than planned water inflows into mine workings; and
- a mine water balance of water inflows and water outflows during operations and at mine completion (if not included in the water balance in Section 3.5.4).

3.4.9 *Sequence of Mining and Rehabilitation Operations*

Provide the following information on the sequence of operations in both text and map form:

- description of the sequence of mining stages;
- proposed sequencing of progressive and final rehabilitation, including demonstration that progressive rehabilitation has been integrated with the mining plan;
- an estimation of the quantities of sulfide minerals that have the potential to generate acid or mobilise metals, or other hazardous minerals to be mined at each mining stage; and
- any mineral resource that may be sterilised from future mining by the proposed mining operations.

3.4.9.1 *Rehabilitation Strategies and Timing*

Describe all activities, strategies and designs relating to mine closure for rehabilitation of open pit and/or underground workings, stockpiles, explosives storage, mining equipment and mine dewatering infrastructure. Include timing of these activities and all opportunities for progressive rehabilitation. Include (but not limited to) the maximum area of land disturbed by proposed mining operations at any time, battering of mining faces and other earthworks, mine void backfilling, abandonment bunds, sealing of portals and ventilation shafts, soil management, revegetation and expected water infill rates.

3.4.10 *Modes and Hours of Operation*

State if the proposed mining operation will be worked on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the proposed mining operation is to be worked on a regular periodical basis, specify:

- proposed period(s) (daily, weekly and public holidays) to be worked; and
- proposed start and finish hours the site is to be worked per period.

If the operation is to be worked on a campaign basis, specify:

- minimum hours the site is to be worked per year;
- the minimum time of each campaign;
- the maximum and minimum time between campaigns;
- define the beginning and end of each campaign;
- hours of mining operations during campaign;
- days of mining operations during campaign;
- determining factors for initiating and ceasing a campaign;
- maximum and minimum tonnage of each campaign; and
- maximum and minimum tonnage of production per year.

3.5 **Crushing, Grinding, Processing and Product Transport**

3.5.1 *Crushing and Grinding Plant*

Provide a description of the crushing / grinding plant including:

- area, size, type of construction and location;
- throughput rate;
- a description of ore preparation for processing;
- grind size of the ore;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps and plans.

3.5.2 *Processing Plant*

Provide a description of the processing plant including:

- the methods and details of processing and value adding proposed;
- number, location, area, size, type of construction (including lining and drainage systems, as appropriate) of processing plant;
- any ancillary plant and infrastructure to be used for processing the minerals on site; examples of associated structures are concrete batching plants, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage/use, reverse osmosis plants and bore fields;
- if chemicals are to be used in the beneficiation or processing of ore, describe the nature and quantities of the chemicals to be used, their reactions with ore and their ultimate fate;
- noise sources;
- dust sources and composition;
- fire ignition sources;
- other potential air emissions (including odour) and their composition; and
- maps and plans.

3.5.3 *Heap Leach*

Provide a description of the Heap Leach Pad and process including:

- type, size and location of the Heap Leach Pad;
- construction and operating specifications for the Heap Leach Pad and process, including solution containment measures;
- geochemical and geotechnical assessment of the material placed on the Heap Leach Pad before and after leaching;
- method and rate of ore deposition and removal;
- chemical characteristics of the leach solution, pregnant liquor and raffinate solutions;
- solution application rates, and method of application;
- removal (where proposed) of the Heap Leach Pad at cessation of production and the method/location of disposal of leached material;
- method of stabilisation and erosion control of Heap Leach Pad;
- an assessment of the long term chemical and physical stability of the Heap Leach Pad post mine completion;
- the source, pathway and ultimate fate of any potential mobile contaminants; and
- maps and plans.

3.5.4 *Process Water Management*

If processing water is to be used, provide a water balance including:

- approximate water volumes required;
- a summary of the inputs and outputs (with consideration of any purge requirements);
- determination of net surplus or deficit; and
- process flowsheet showing all streams including stormwater management and mine dewatering where these are connected to the processing circuit.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods;
- chemical composition of the solution to be stored in each pond; and
- minimum freeboard to be maintained.

3.5.5 *Type of Mobile Equipment*

For mobile equipment to be used in crushing/grinding, processing ore and in transporting the mine product to the point of sale, describe:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.5.6 *Conveyors and Pipelines*

Provide a description of any conveyors or pipelines to be used for transporting material to or from the mine, processing facilities and the point of sale including:

- length, size (volumes to be transported), design and type of construction and location;
- the material being transported;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps, plans and cross-sections.

3.5.7 *Hours of Operation*

Describe the proposed hours of operation of crushing / grinding, processing and transport activities.

3.5.8 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure for removal, disposal and rehabilitation of processing facilities, and material transport systems, including timing of these activities.

3.6 Wastes

3.6.1 *Waste Rock and Tailings Storage Facilities*

For waste rock and tailings storage facilities (TSF) provide:

- the estimated tonnes and volumes of all waste rock and tailings to be stored;
- the reserve and any resource or potential resource that the estimated tonnes and volumes of waste rock and tailings is based on;
- the type, location, size, shape, height and method of construction of permanent and temporary waste storage facilities;
- a geochemical and geotechnical assessment of the waste rock and tailings based on the geochemical and geotechnical properties determined from the analysis of representative sampling of all waste rock types and tailings to be disposed;
- an assessment on the weathering and erosive potential of waste rock to be disposed;
- conceptual specifications, drawings and plans for the design, construction, operation and completion of all facilities;
- the method and rate of waste rock/tailings disposal;
- where relevant, a description of the placement and encapsulation of waste material deemed to be hazardous, including potentially acid forming material (PAF);
- the method of stabilisation and erosion control of waste storage facilities, both during operations and post completion;
- surface water runoff control on disturbed and rehabilitated areas;
- a geotechnical stability assessment and a factor of safety analysis;
- an assessment of seepage of liquids through the waste rock and tailings storage facilities;
- strategies for the containment of any seepage that has the potential to impact the environment;
- an assessment of the post completion chemical and physical stability of the structure following rehabilitation, including the expected extent of erosion; and
- an assessment of the source, pathway and ultimate fate of any potential mobile contaminants.

Include a water balance for the TSF (if not included in the water balance in Section 3.5.4).

3.6.2 *Other Processing Wastes*

Provide:

- the volumes and composition of all solid and liquid wastes produced;
- estimated volumes of waste processing water, reverse osmosis reject water, water content of solid wastes, and method of disposal or recycling;
- waste water composition;
- disposal and management of any hazardous material or contaminants within waste including radioactive, toxic, corrosive or flammable materials; and
- the source, pathway and ultimate fate of any potential mobile contaminants.

3.6.3 *Industrial and Commercial Wastes*

List any industrial and commercial wastes generated including, but not limited to:

- putrescible waste, including sewage;
- oils and other hydrocarbons; and
- tyres.

For each waste type, describe the method of disposal including:

- offsite disposal;
- on site waste disposal (including size, location and construction details);
- recycling (either on or offsite);
- the type, area and layout of sewage systems to be installed at the site; and
- describe what, if any approvals are required for the disposal of waste.

For each type of waste, describe any potential contaminants that may be generated from onsite storage, and the ultimate fate of those contaminants.

3.6.4 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure, including timing of these activities and all opportunities for progressive rehabilitation of waste rock and tailings and any other waste to be left on site.

3.7 Supporting Surface Infrastructure

3.7.1 Access

Describe:

- access route to the proposed mining operations;
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded;
- transport system(s) used to and from the proposed mining operations and the estimated number of vehicle movements per day; and
- airport/airstrips to be constructed.

3.7.2 Accommodation and Offices

Describe:

- number, area, size, type of construction and location of accommodation buildings, caravans or camp, and associated structures to be used on site; and
- state if temporary or permanent.

3.7.3 Public Services and Utilities Used by the Operation

Describe:

- sources of external services that are supplied to the proposed mining operations;
- proposed routes for connection if any new connections to public infrastructure are required; and
- any existing surface infrastructure that has been and/or the extent it may be affected by the proposed mining operations.

3.7.4 Visual Screening

Describe the type of screening, including existing or proposed vegetation (i.e. species and density of plantings).

3.7.5 Fuel and Chemical Storage

For all fuels and chemicals stored on site, detail:

- types of bulk chemicals and the volumes of each; and
- details on storage, bunding and containment for all chemical and fuel storage vessels.

3.7.6 Site Security

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including fencing, signage etc.

3.7.7 Stormwater, Silt Control and Drainage

Describe:

- location and design of silt management structures;
- runoff control on disturbed and rehabilitated areas;
- storage, diversion and disposal of clean water (discharge water must comply with the applicable Environment Protection Authority South Australia water quality policy); and
- a whole of site stormwater balance, if not included in the water balance in Section 3.5.4.

Provide a plan showing the surface water movement for the whole mine site.

3.7.8 Rehabilitation Strategies and Timing

Detail all activities, strategies and designs relating to mine closure for rehabilitation of supporting surface infrastructure. Provide details for timing of closure activities, including all opportunities for progressive rehabilitation.

3.8 Vegetation Clearance

3.8.1 Description of Vegetation Clearance

If clearing of native vegetation is proposed, a plan and description of the vegetation present in the application area must be provided, showing:

- the extent of any proposed vegetation clearance; and
- the likelihood of the presence of threatened flora.

3.9 Mine Completion

3.9.1 *Description of Mine Site at Completion*

Provide a description of the mine site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- potential land use options;
- landforms;
- proposed vegetation covers (including native vegetation that will not be disturbed due to proposed mining operations);
- natural contours of land not to be disturbed by proposed mining operations;
- any mining infrastructure that will remain on site and will become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas showing proposed surface contours and revegetation;
- mine voids (open pit and/or underground);
- location of stored and/or exposed PAF material and/or other hazardous materials;
- expected final water level and time to reach this level, and water quality of mine voids;
- location of surface water infrastructure including ponds and diversions; and
- representative plans and cross-sections that show:
 - pre-mining natural surface;
 - emplacement areas, waste disposal areas and disturbed areas;
 - final rehabilitated surface;
 - where relevant, backfilled and remaining underground workings;
 - predicted final groundwater levels; and
 - interpreted geology including all rock types.

Provide a description of the proposed mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.10 Resource Inputs

3.10.1 *Workforce*

For the proposed workforce (for all mining operations (mining, processing, waste management and supporting surface infrastructure) describe:

- how operations on the site will be managed;
- number and workforce breakdown by job type; and
- source of employees.

3.10.2 *Energy Sources*

For the proposed energy sources and usage provide:

- estimates of total annual energy usage (from all sources, including personnel transport and ore transport to point of sale);
- expected sources of energy;
- potential for efficiency gains;
- amount and percentage of zero emission energy to be utilised;
- equivalent annual CO₂ generated; and
- any carbon offsets proposed.

3.10.3 *Water Sources*

Provide details on the source(s) of water to be used at the mine, expected usage and any discharge, including:

- expected annual water usage by source;
- indicate if any water usage by source will be more than 5% of the total annual water withdrawal for that source;
- percentage of water that will be recycled; and
- water discharge by quality and destination.

4. DESCRIPTION OF POTENTIAL BENEFITS

4.1 Social

Describe:

- number of full-time employee positions that would be directly created by the proposal (not to include existing positions);
- the proportion of the workforce that would reside in the local community and the estimated impact on local employment;
- the proportion of the workforce that would reside in South Australia;
- any programs to target and assist Indigenous or local employment at the mine;
- training to be provided to employees and potential employees;
- approximate timelines for creation of the positions;
- potential for local business participation, and procurement of local goods and services;
- assistance or provision of infrastructure to isolated communities;
- public health benefits; and
- tourism or recreation opportunities.

4.2 Economic

Describe:

- revenue to be generated at the mine gate;
- the breakdown of capital and operating expenditures (spending in goods and services in local community, state and external to state);
- wages and other employee benefits;
- potential for value adding of a mined commodity;
- flow-on economic effects;
- economic benefits derived from local employment;
- potential to bring forward development of other mines in the area by utilising this mine's infrastructure; and
- approximate royalty payments and other direct state government taxes profile.

4.3 Environmental

Describe:

- voluntary, non-core environmental benefits associated with the proposal;
- potential environmental benefits associated with the proposal;
- environmental benefits over and above rehabilitation activities to be paid or made in association with native vegetation clearance; and
- acquisition of new baseline environmental data.

5. CONSULTATION

This section must summarise the results of any attempted consultation that has been undertaken on the proposed mining operation.

The summary must include:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the proposed mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders;
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns/issues raised; and
 - the response (if any) that is proposed to address those concerns.
- if any individual or group of similar affected persons were not able to be consulted, what steps were taken to consult with them; and
- the extent to which the outcomes proposed in Section 6.2.3 have been developed in consultation with the landowner and any other person who may be directly affected by the proposed mining operations.

6. MANAGEMENT OF ENVIRONMENTAL IMPACTS

6.1 Assessment of Environmental Impacts

6.1.1 *Elements of the Environment*

Describe the specific elements of the environment (the environment is defined in Section 6(4) of the Mining Act 1971) that may reasonably be expected to be impacted by the proposed mining operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, and any relevant legislated or recognised standards in relation to the element of the environment;
- describe all potential environmental receptors; and
- undertake an impact assessment of how the element could be potentially impacted by proposed mining operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 6.1.2.

6.1.2 *Potential Impact Events*

Describe potential impact events associated with each phase of the proposed mining operations (construction, operation and post mine completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 6.1.2, provide:

6.1.2.1 *Source*

A description of the source of the potential impact event which alone or in combination has the potential to cause harm to an environmental receptor.

6.1.2.2 *Pathway*

A description of the potential pathway, means or route (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

6.1.2.3 *Environmental Receptor*

A description of the environmental receptors that may reasonably be expected to be adversely impacted by the source, taking into account the considerations for the element of the environment described under 6.1.1

6.1.2.4 *Description of Uncertainty*

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

6.1.2.5 *Confirmation of Impact Events*

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, or if it remains uncertain, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

6.2 Control Measures, Uncertainty Assessment, Statement of Environmental Outcomes and Criteria

For each impact event confirmed in Section 6.1.2.5, the information listed in Sections 6.2.1 – 6.2.5 must be provided:

6.2.1 *Control Measures*

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

If native vegetation is proposed to be cleared, state the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the proposed clearance and describe how the SEB will be provided.

6.2.2 *Description of Uncertainty*

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

6.2.3 *Statement of Proposed Environmental Outcomes*

Provide a statement of the proposed environmental outcome(s) (including mine completion outcomes) for each impact event confirmed in Section 6.1.2.5.

The statement of environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the proposed mining operations subsequent to the implementation of the control measures described in Section 6.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are proposed, and third parties who may be directly affected by the proposed mining operations in the development of each environmental outcome.

Where clearance to native vegetation is proposed, the environmental outcome must state a commitment to compliance with the Native Vegetation Act 1991 and Native Vegetation Regulations 2003.

Mine completion outcomes must at least address the issues listed under Regulation 30(1) (d).

6.2.4 *Draft Measurement Criteria*

Provide a draft statement of the criteria to be adopted to measure each of the proposed environmental outcomes. The draft criteria must as far as practical, comply with Regulation 65(2) (d).

Where appropriate, recognised industry standards, codes of practice or legislative provisions from other Acts should be used as criteria.

Where native vegetation is proposed to be cleared, the criteria will include demonstration of the successful implementation of the significant environmental benefit.

6.2.5 *Draft Leading Indicator Criteria*

As required by Regulation 65(2) (e), where there is a high level of reliance on control measures to achieve an environmental outcome, provide a draft statement of leading indicator criteria that will be used to give an early warning that a control measure may fail or be failing.

7. **FORMAT OF THE MINING PROPOSAL**

Unless otherwise specified by the Director of Mines or delegate:

- five hardcopies and an electronic version of the mining proposal must be submitted; the information in all must be identical;
- each page, plan or other separate sheet must include the mineral claim number(s), date of the mining proposal preparation and sequential page numbering; and
- the electronic version must be submitted in one single Acrobat PDF file. Microsoft Word compatible files must be submitted if requested by the Director of Mines or delegate.

8. **MAPS AND PLANS**

Unless otherwise specified by the Director of Mines or delegate, the elements described in Sections 8.1–8.4 must be included where applicable to the proposed mining operation.

8.1 **General Requirements for Maps, Plans and Cross-sections**

All maps and plans must conform to the following standards:

- Australian Height Datum (AHD);
- state and show the relevant datum;
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission;

All cross-sections must conform to the following standards:

- Australian Height Datum (AHD);
- state and show the relevant datum;
- metric units;
- title, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

8.2 Location plan(s)

Provide location plan(s) of the existing environment showing:

- proposed tenement boundaries;
- cadastral information;
- location of existing roads, rails, fences, transmission lines, buildings and pipelines;
- land titles and ownership;
- existing surface contours;
- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams and any man-made water management structures;
- location and extent of all previously disturbed areas, including those associated with previous mining; and
- location and extent of any adjacent conservation reserves, Aboriginal and/or European heritage sites (in so far as may be permitted by the relevant legislation) or any other significant areas.

8.3 Proposed Mining Operations Plan(s)

Provide plan(s) of proposed mining operations showing

- tenement boundaries;
- existing or modified surface contours;
- geology within the application area, including but not limited to; location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
- location of all proposed extraction areas;
- location of existing ephemeral and permanent rivers, watercourses, creeks, dams and water management structures;
- location and extent of all areas proposed to be disturbed from mining (including waste rock and soil/subsoil stockpiles, silt/slimes dams, mine infrastructure, processing plant, waste disposal facilities and pits);
- location and extent of all areas proposed to be progressively rehabilitated during mining;
- sequence of mining and rehabilitation in appropriate time intervals, or per stages (depicting progressive rehabilitation); and
- final open pit and/or underground workings.

8.4 Vertical Sections/Cross-sections

Provide a series of representative cross-sections at appropriate time intervals or stages that adequately represent:

- pre-mining natural surface;
- the staged profile indicating the conceptual location and shape of the active mining area, emplacement areas and rehabilitated areas;
- the conceptual final rehabilitated surface; and
- final open pit and/or underground workings;

Show where the cross-sections are oriented to the mine plan.

In accordance with Regulation 30 (3) and 49 (3) of the Mining Regulations 2011, this notice will have effect from 2 November 2015.

Dated 2 November 2015.

G. MARSHALL, Director Mining Regulation

MINING ACT 1971

Determination for a PEPR for Metallic and Industrial Minerals

NOTICE is hereby given in accordance with Regulation 65 (7) of the Mining Regulations 2011 determining the minimum information required to be provided in a program for environment protection and rehabilitation (PEPR) for a mineral lease (ML) and any associated miscellaneous purposes licence (MPL) for metallic and industrial minerals (excluding coal and uranium).

1. REQUIREMENT FOR DECLARATION OF ACCURACY

The PEPR must include a signed statement by the tenement holder (or their agent) in accordance with Regulation 65 (8) that the content of the PEPR has been reviewed and is accurate.

Provide a summary of the steps undertaken to review the PEPR and ensure its accuracy.

2. DESCRIPTION OF THE ENVIRONMENT

Identify any changes to the environment, or updates to information about the environment, since the previous description of the environment was provided (be it as a mining proposal, management plan or current approved PEPR).

Where changes to the environment are identified, provide an updated description of the environment to describe the changes.

Include any new baseline environmental data relevant to the control strategies or criteria set out in Section 5.

Note:

Where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Section 10 must also be included.

3. DESCRIPTION OF THE MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.10 must be described only to the extent that they apply to the mining operation. If the element (or part of the element) is not applicable to the mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General Description and Maps/Plans of Operations

Provide:

- a summary description of all elements of the operation, including mining, processing and waste management (include maps/plans).

3.2 Reserves, Products and Market**3.2.1 Ore Reserves and Mineral Resources**

Provide:

- a statement of the current ore reserve and mineral resource estimates in the tenement area and a brief description of the basis of this estimate; include Australasian Joint Ore Reserves Committee (JORC) compliant reserve and resource estimates (and categories) if available; and
- a statement of what reserve and/or resource forms the basis for the mining operation;

or

- an estimate of the resource to be mined, the basis of this estimate, and demonstrate that the resource can be economically mined at current commodity prices;

and

- steps that have been taken to ensure mining operations will not sterilise/prevent future extraction of mineral resources.

3.2.2 Production Rate and Products

Provide:

- a statement of the relevant commodities listed in Section 3.2.3 below that are to be extracted, processed and sold, and the expected market or end use;
- a statement of any other commodities present in the tenement area that are not to be recovered for sale, and the reasons for this decision;
- a quantitative estimate of production of mine gate product(s) for the life of mine, and a schedule of the annual production of mine gate product(s); and
- a statement if any extractive minerals (as defined by Section 6 of the Mining Act 1971) will leave the lease.

3.2.3 Commodities List**Refined Metals**

Cobalt; Copper; Gold; Iron; Lead; Silver; Steel/pig iron; Thorium; Zinc

Mineral ores and concentrates

Iron ore—hematite direct shipping ore (DSO); Iron ore—magnetite DSO; Iron ore—magnetite concentrate; Heavy mineral concentrate; Rare earth elements; Contained copper in ore, concentrate or cement; Contained gold in ore or concentrate; Contained silver in ore or concentrate; Contained lead in ore or concentrate; Contained zinc in ore or concentrate

Gems and Semi Precious Stones

Amethyst; Calcite; Chrysoprase; Diamond; Jade; Opal; Quartz; Sapphire; Scholzite; Talc; Staurolite; Topaz

Industrial Minerals

Alunite; Andalusite; Anatase; Barite; Calcrete (agricultural purposes); Celestite; Cement shale; Diamond; Dolomite (use either industrial or agricultural); Diatomite; Feldspar; Garnet; Graphite; Gypsum (use either plaster, cement or agricultural); Ilmenite; Kaolin; Kyanite; Leucoxene; Lime sand (calcareous dune sands; use either chemical, agricultural or flux); Limestone (use either chemical, agricultural, cement, flux or whiting); Magnesite; Marble (use either chemical, agricultural, cement or flux); Mica; Micaceous hematite; Monazite; Palygorskite; Peat; Phosphate; Potash; Rutile; Salt; Shell grit (use either industrial or agricultural); Silica (rocks containing mainly silica-quartzite, flint, vein quartz etc.); Silica sand (use either filter, foundry or glass); Sillimanite; Talc (use either pharmaceutical or filler); Vermiculite; Wollastonite; Xenotime; Zircon

3.3 Exploration Activities

Provide information that details all exploration activities to be undertaken within the tenement area as a part of the mining operation, including:

- purpose of the activities (i.e. resource drill-out or resource extension);
- types of drilling;
- geophysical techniques likely to be used;
- earthworks required to conduct exploration activities;
- equipment required to conduct exploration activities; and
- rehabilitation methods for exploration works (including that not yet rehabilitated from previous tenure).

Any clearance of native vegetation due to exploration activities that had not been rehabilitated at the grant of the mining lease or licence must be included within the significant environmental benefit calculations detailed within the native vegetation management plan.

3.4 Mining Activities**3.4.1 *Type or Types of Mining Operation to be Carried Out***

Provide a clear statement on the type or types of mining operation to be carried out, such as:

- the mining method(s) to be adopted.

3.4.2 *Open Pit*

Describe, for the life of mine from inception to cessation, all open pit workings, including (but not limited to):

- overall pit wall angles, bench height, berm width;
- dimensions and depth of pit;
- access ramps; and
- maps, plans and cross-sections.

3.4.3 *Underground Workings*

Describe underground workings, including (but not limited to):

- stoping methods;
- potential surface disturbance resulting from underground mining;
- declines, shafts, tunnels, bore holes, ventilation intakes and exhausts; and
- maps, plans and cross-sections.

Where underground fill is used, describe:

- type of fill to be used;
- the volume percentage of underground void to be filled;
- sequence of filling;
- source and proportion of fill; and
- maps, plans and cross-sections showing the fill.

3.4.4 *Material Movements*

Provide:

- expected life of mine (including scope for extension);
- annual mine production rates and mine production schedule of ore and waste rock over the life of mine; and
- life of mine and annual strip ratios.

3.4.5 *Stockpiles*

Describe:

- location, size, shape and height of ore, product, subsoil and topsoil stockpiles;
- method of placement;
- method of stabilisation and erosion control of all stockpiles; and
- water movement through stockpiles.

The location, maximum height and extent of all stockpiles must be shown on a map.

3.4.6 *Use of Explosives*

If explosives are used, describe:

- type of explosives used on the site;
- timing and frequency of blasting;
- size of blasts; and
- storage of explosives (amount, type, detailed location and method of storage).

3.4.7 *Type of Mining Equipment*

Provide a description of the equipment (fixed and mobile) to be used in the mining operation in terms of:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.4.8 *Mine Dewatering*

Provide:

- estimated inflows of groundwater and stormwater and water from any other mining activities into mine workings;
- details of mine dewatering infrastructure, and mine water management and disposal;
- contingency measures for greater than planned water inflows into mine workings; and
- a mine water balance of water inflows and water outflows during operations and at mine completion (if not included in the water balance in Section 3.5.4).

3.4.9 *Sequence of Mining and Rehabilitation Operations*

Provide the following information on the sequence of operations in both text and map form:

- description of the sequence of mining stages;
- sequencing of progressive and final rehabilitation, including demonstration that progressive rehabilitation has been integrated with the mining plan;
- an estimation of the quantities of sulfide minerals that have the potential to generate acid or mobilise metals, or other hazardous minerals to be mined at each mining stage; and
- any mineral resource that may be sterilised from future mining by the planned mining operations.

3.4.9.1 *Rehabilitation Strategies and Timing*

Describe all activities, strategies and designs relating to mine closure for rehabilitation of open pit and/or underground workings, stockpiles, explosives storage, mining equipment and mine dewatering infrastructure. Include timing of these activities and all opportunities for progressive rehabilitation. Include (but not limited to) the maximum area of land disturbed by mining operations at any time, battering of mining faces and other earthworks, mine void backfilling, abandonment bunds, sealing of portals and ventilation shafts, soil management, revegetation and expected water infill rates.

3.4.10 *Modes and Hours of Operation*

State if the operation will be worked on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the operation is to be worked on a regular periodical basis, specify:

- period(s) (daily, weekly and public holidays) to be worked; and
- start and finish hours the site is to be worked per period.

If the operation is to be worked on a campaign basis, specify:

- minimum hours the site is to be worked per year;
- the minimum time of each campaign;
- the maximum and minimum time between campaigns;
- define the beginning and end of each campaign;
- hours of mining operations during campaign;
- days of mining operations during campaign;
- determining factors for initiating and ceasing a campaign;
- maximum and minimum tonnage of each campaign; and
- maximum and minimum tonnage of production per year.

3.4.11 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of the mine, should the mine suspend production, but not progress immediately to closure.

3.5 *Crushing, Grinding, Processing and Product Transport*

3.5.1 *Crushing and Grinding Plant*

Provide a description of the crushing / grinding plant including:

- area, size, type of construction and location;
- throughput rate;
- a description of ore preparation for processing;
- grind size of the ore;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps and plans.

3.5.2 *Processing Plant*

Provide a description of the processing plant including:

- the methods and details of processing and value adding;
- number, location, area, size, type of construction (including lining and drainage systems, as appropriate) of processing plant;
- any ancillary plant and infrastructure to be used for processing the minerals on site; examples of associated structures are concrete batching plants, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage/use, reverse osmosis plants and bore fields;
- if chemicals are to be used in the beneficiation or processing of ore, describe the nature and quantities of the chemicals to be used, their reactions with ore and their ultimate fate;
- noise sources;
- dust sources and composition;
- fire ignition sources;
- other potential air emissions (including odour) and their composition; and
- maps and plans.

3.5.3 *Heap Leach*

Provide a description of the Heap Leach Pad and process including:

- type, size and location of the Heap Leach Pad;
- construction and operating specifications for the Heap Leach Pad and process, including solution containment measures;
- geochemical and geotechnical assessment of the material placed on the Heap Leach Pad before and after leaching;
- method and rate of ore deposition and removal;
- chemical characteristics of the leach solution, pregnant liquor and raffinate solutions;
- solution application rates, and method of application;
- removal (where proposed) of the Heap Leach Pad at cessation of production and the method/location of disposal of leached material;
- method of stabilisation and erosion control of Heap Leach Pad;
- an assessment of the long term chemical and physical stability of the Heap Leach Pad post mine completion;
- the source, pathway and ultimate fate of any potential mobile contaminants; and
- maps and plans.

3.5.4 *Process Water Management*

If processing water is to be used, provide a water balance including:

- approximate water volumes required;
- a summary of the inputs and outputs (with consideration of any purge requirements);
- determination of net surplus or deficit; and
- process flowsheet showing all streams including stormwater management and mine dewatering where these are connected to the processing circuit.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods;
- chemical composition of the solution to be stored in each pond; and
- minimum freeboard to be maintained.

3.5.5 *Type of Mobile Equipment*

For mobile equipment to be used in crushing / grinding, processing ore and in transporting the mine product to the point of sale, describe:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.5.6 *Conveyors and Pipelines*

Provide a description of any conveyors or pipelines to be used for transporting material to or from the mine, processing facilities and the point of sale including:

- length, size (volumes to be transported), design and type of construction and location;
- the material being transported;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps, plans and cross-sections.

3.5.7 *Hours of Operation*

Describe the hours of operation of crushing / grinding, processing and transport activities.

3.5.8 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of processing facilities, and material transport systems, should the mine suspend production, but not progress immediately to closure.

3.5.9 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure for removal, disposal, and rehabilitation of processing facilities, and material transport systems, including timing of these activities.

For rehabilitation strategies and timing related to Heap Leach, provide:

- a Heap Leach detoxification strategy;
- identification of the volumes of process solution and flush water to be disposed of at closure; and
- a methodology for the disposal of residual process solution and flush water at closure.

3.6 **Wastes**

3.6.1 *Waste Rock and Tailings Storage Facilities*

For waste rock and tailings storage facilities (TSF) provide:

- the estimated tonnes and volumes of all waste rock and tailings to be stored;
- the reserve and any resource or potential resource that the estimated tonnes and volumes of waste rock and tailings is based on;
- the type, location, size, shape, height and method of construction of permanent and temporary waste storage facilities;
- a geochemical and geotechnical assessment of the waste rock and tailings based on the geochemical and geotechnical properties determined from the analysis of representative sampling of all waste rock types and tailings to be disposed;
- an assessment on the weathering and erosive potential of waste rock to be disposed;
- specifications, drawings and plans for the design, construction, operation and completion of all facilities;
- the method and rate of waste rock/tailings disposal;
- where relevant, a description of the placement and encapsulation of waste material deemed to be hazardous, including potentially acid forming material (PAF);
- the method of stabilisation and erosion control of waste storage facilities, both during operations and post completion;
- surface water runoff control on disturbed and rehabilitated areas;
- a geotechnical stability assessment and a factor of safety analysis;
- an assessment of seepage of liquids through the waste rock and tailings storage facilities;
- strategies for the containment of any seepage that has the potential to impact the environment;
- an assessment of the post completion chemical and physical stability of the structure following rehabilitation, including the expected extent of erosion; and
- an assessment of the source, pathway and ultimate fate of any potential mobile contaminants.

Include a water balance for the TSF (if not included in the water balance in Section 3.5.4).

3.6.2 *Other Processing Wastes*

Provide:

- the volumes and composition of all solid and liquid wastes produced;
- estimated volumes of waste processing water, reverse osmosis reject water, water content of solid wastes, and method of disposal or recycling;
- waste water composition;
- disposal and management of any hazardous material or contaminants within waste including radioactive, toxic, corrosive or flammable materials; and
- the source, pathway and ultimate fate of any potential mobile contaminants.

3.6.3 *Industrial and Commercial Wastes*

List any industrial and commercial wastes generated including, but not limited to:

- putrescible waste, including sewage;
- oils and other hydrocarbons; and
- tyres.

For each waste type, describe the method of disposal including:

- offsite disposal;
- on site waste disposal (including size, location and construction details);
- recycling (either on or offsite);
- the type, area and layout of sewage systems to be installed at the site; and
- describe what, if any approvals are required for the disposal of waste.

For each type of waste, describe any potential contaminants that may be generated from onsite storage, and the ultimate fate of those contaminants.

3.6.4 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of waste rock and tailings and any other waste left on site, should the mine suspend production, but not progress immediately to closure.

3.6.5 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure, including timing of these activities and all opportunities for progressive rehabilitation of waste rock and tailings and any other waste to be left on site.

3.7 **Supporting Surface Infrastructure**

3.7.1 *Access*

Describe:

- access route to the mining operations;
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded;
- transport system(s) used to and from the mining operations and the estimated number of vehicle movements per day; and
- airport/airstrips to be constructed.

3.7.2 *Accommodation and Offices*

Describe:

- number, area, size, type of construction and location of accommodation buildings, caravans or camp, and associated structures to be used on site; and
- state if temporary or permanent.

3.7.3 *Public Services and Utilities Used by the Operation*

Describe:

- sources of external services that are supplied to the mining operations;
- routes for connection if any new connections to public infrastructure are required; and
- any existing surface infrastructure that has been and/or the extent it may be affected by the mining operations.

3.7.4 *Visual Screening*

Describe the type of screening, including existing or planned vegetation (i.e. species and density of plantings).

3.7.5 *Fuel and Chemical Storage*

For all fuels and chemicals stored on site, detail:

- types of bulk chemicals and the volumes of each; and
- details on storage, bunding and containment for all chemical and fuel storage vessels.

3.7.6 *Site Security*

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including fencing, signage etc.

3.7.7 *Stormwater, Silt Control and Drainage*

Describe:

- location and design of silt management structures;
- runoff control on disturbed and rehabilitated areas;
- storage, diversion and disposal of clean water (discharge water must comply with the applicable Environment Protection Authority South Australia water quality policy); and
- a whole of site stormwater balance, if not included in the water balance in Section 3.5.4.

Provide a plan showing the surface water movement for the whole mine site.

3.7.8 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of supporting surface infrastructure, should the mine suspend production, but not progress immediately to closure.

3.7.9 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure for rehabilitation of supporting surface infrastructure. Provide details for timing of closure activities, including all opportunities for progressive rehabilitation.

3.8 **Vegetation Clearance**

3.8.1 *Description of Vegetation Clearance*

If clearing of native vegetation is to be undertaken, a plan and description of the vegetation present in the tenement area must be provided, showing:

- the extent of any vegetation clearance; and
- the likelihood of the presence of threatened flora.

3.9 **Mine Completion**

3.9.1 *Description of Mine Site at Completion*

Provide a description of the mine site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- final post completion land use;
- landforms;
- vegetation covers (including native vegetation that will not be disturbed due to mining operations);
- natural contours of land not to be disturbed by mining operations;
- any mining infrastructure that will remain on site and will become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas showing surface contours and revegetation;
- mine voids (open pit and/or underground);
- location of stored and/or exposed PAF material and/or other hazardous materials;
- expected final water level and time to reach this level, and water quality of mine voids;
- location of surface water infrastructure including ponds and diversions; and
- representative plans and cross-sections that show:
 - pre-mining natural surface
 - emplacement areas, waste disposal areas and disturbed areas
 - final rehabilitated surface
 - where relevant, backfilled and remaining underground workings
 - predicted final groundwater levels
 - interpreted geology including all rock types.

Provide a description of the mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.9.2 *Rehabilitation Liability Estimate*

Provide the maximum third party cost of rehabilitation at any time over the life of mine covered by the PEPR. The estimate must be based on reasonable third party costs of undertaking the rehabilitation strategies as outlined in Section 3 and include costs for project management, inflation, normal project variation, and contingency provision for risk associated with the strategies and uncertainty in the cost estimates.

3.10 Resource Inputs

3.10.1 Workforce

For the workforce for all mining operations (mining, processing, waste management and supporting surface infrastructure), describe:

- how operations on the site will be managed;
- number and workforce breakdown by job type; and
- source of employees.

3.10.2 Energy Sources

For the energy sources and usage provide:

- estimates of total annual energy usage (from all sources, including personnel transport and ore transport to point of sale);
- expected sources of energy;
- potential for efficiency gains;
- amount and percentage of zero emission energy to be utilised;
- equivalent annual CO₂ generated; and
- any carbon offsets proposed.

3.10.3 Water Sources

Provide details on the source(s) of water to be used at the mine, expected usage and any discharge, including:

- expected annual water usage by source;
- indicate if any water usage by source will be more than 5% of the total annual water withdrawal for that source;
- percentage of water that will be recycled; and
- water discharge by quality and destination.

4. CONSULTATION

This section must summarise the results of any attempted consultation that has been undertaken on the mining operation.

The summary must list:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders;
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns / issues raised; and
 - the steps taken, or that are proposed to be taken to address those concerns.
- if any individual or group of similar impacted persons were not able to be consulted, what steps were taken to consult with them.

An ongoing engagement plan with the landowner must be provided (if the landowner is not the tenement holder).

If required by the lease or licence, an ongoing community engagement plan must be provided that:

- identifies any community likely to be affected by mining operations authorised by the lease or licence;
- includes processes for:
 - identifying community attitudes and expectations;
 - providing information to the community;
 - receiving feedback from the community; and
 - analysing community feedback and considering community concerns or expectations in relation to mining operations authorised by the lease or licence.
- includes a process for registering, documenting and responding to complaints and other communications from members of the community in relation to mining operations authorised by the lease or licence.

5. ENVIRONMENTAL OUTCOMES, STRATEGIES, CRITERIA AND MONITORING

5.1 Environmental Outcomes

Set out environmental outcomes (including mine completion outcomes) as required by section 70B (2) (b) (i) of the Mining Act 1971 and Regulation 65 (2) (b), or as required by the lease/licence, or determined as a result of a review of a PEPR in accordance with Regulation 114 (9).

For each environmental outcome, the information described in Sections 5.2, 5.3, 5.4 and 5.5 must be provided.

5.2 Control and Management Strategies

5.2.1 Control and Management Strategies

Set out the control and management strategies adopted to demonstrate that the environmental outcomes can be and will continue to be achieved.

Demonstrate that the control and management strategies are commensurate with the impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

5.2.2 Uncertainty Assessment

Describe any significant degree of uncertainty pertaining to the likely effectiveness of control and management strategies, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

Provide a description and list of current and future works (for example (but not limited to) trials, test work, studies, modelling, validations) that are to be undertaken to address the identified uncertainty or assumption.

Provide a schedule of the timing that the future works will be undertaken and completed.

Based on the schedule of future works, state the timing for review of the PEPR in accordance with Section 70C (1) of the Mining Act 1971.

5.3 Measurement Criteria

Set out measurement criteria for each environmental outcome (including mine completion outcomes) and for each measurement criteria include all details listed in Regulation 65 (2) (d).

Measurement criteria must be developed separately for construction, operation and mine completion, as appropriate.

Where appropriate, recognised industry standards, codes of practice or legislative provisions from other Acts can be used as criteria.

All point-related measurement criteria, such as water bores, sampling points and photo points (including direction) must be included on a map.

When control or baseline data is used, this must be included in the PEPR.

Where groundwater modelling is to be relied upon to demonstrate achievement of groundwater completion outcomes, a process must be provided for validation of predictive modelling, including a description of the model and assumptions used.

Where native vegetation clearance is planned, criteria must demonstrate the successful implementation of the native vegetation management plan.

5.4 Leading Indicator Criteria

If required by the lease/licence and/or where there is a high level of reliance on control strategies to achieve an environmental outcome, set out leading indicator criteria as required by Regulation 65 (2) (e) that will be used to give an early warning that a control strategy may fail or be failing.

5.5 Operator Compliance Monitoring Plan

Provide a monitoring program which directly addresses the measurement criteria and leading indicator criteria in Sections 5.3 and 5.4 (as per Regulation 65 (2) (d) and 65 (2) (e)) and include:

- responsibility (who will measure);
- record keeping; and
- frequency of reporting to management and any external parties.

5.6 New Environmental Impacts

Where there has been a change in the description of the environment or a change in the description of operations from those detailed in the mining proposal, management plan or currently approved PEPR, the tenement holder must undertake an assessment of the environmental impacts for the site to determine if the current environmental outcomes (as included in the lease/licence and/or the currently approved PEPR) are appropriate and if new or modified environmental outcomes are required.

If new or modified environmental outcomes are required, additional information (as appropriate for the new environmental impact(s)) must be provided as specified in Section 11 and Section 5.5 of this Determination.

6. OPERATOR CAPABILITY

Sufficient information must be provided on each of the factors listed under Regulation 89 (1) (a-j) to demonstrate these have been implemented to an appropriate standard to provide confidence that the operator has appropriate experience, processes and procedures in place to be able to operate the tenement(s) to achieve compliance with the regulatory requirements and relevant environmental outcomes under the Act.

7. LEASE/LICENCE

Where the lease or licence includes specific conditions or requirements that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant) or demonstrates how otherwise they have or will be complied with.

8. FORMAT OF THE PEPR

Unless otherwise specified by the Director of Mines or delegate:

- three hard copies and an electronic version of the PEPR must be submitted; the information in all must be identical;
- each page, plan or other separate sheet must include the tenement number(s), date of the PEPR preparation and sequential page numbering;
- the electronic version must be submitted in one single Acrobat PDF file;
- Microsoft WORD compatible files must be submitted if requested by the Director of Mines or delegate; and
- a separate summary table of the outcomes and criteria must be submitted as a Microsoft WORD document or a Microsoft EXCEL spreadsheet.

If the PEPR being submitted is a review of an approved PEPR, provide a description or summary of all content changes made to the submitted PEPR.

The PEPR must be submitted by the holder(s) of the related mining tenements, or by a person acting on behalf of the tenement holder when accompanied by either a signed statement from the tenement holder endorsing the content, or a signed agency agreement that authorises the agent to provide a PEPR on behalf of the tenement holder.

Mark submissions 'Attention: Mining Assessments' and forward by email, post or courier:

9. MAPS AND PLANS

Unless otherwise specified by the Director of Mines or delegate, the elements described in Sections 9.1–9.4 must be included where applicable to the mining operation.

9.1 General Requirements for Maps, Plans and Cross-Sections

All maps and plans must conform to the following standards:

- Australian Height Datum (AHD);
- State and show the relevant datum;
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

All cross-sections must conform to the following standards:

- Australian Height Datum (AHD);
- State and show the relevant datum;
- metric units;
- title, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

9.2 LOCATION PLAN(S)

Provide location plan(s) of the existing environment showing:

- tenement boundaries;
- cadastral information;
- location of existing roads, rails, fences, transmission lines, buildings and pipelines;
- land titles and ownership;
- existing surface contours;
- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams and any man-made water management structures;
- location and extent of all previously disturbed areas, including those associated with previous mining; and
- location and extent of any adjacent conservation reserves, Aboriginal and/or European heritage sites (in so far as may be permitted by the relevant legislation) or any other significant areas.

9.3 Mining Operations Plan(s)

Provide plan(s) of mining operations showing:

- tenement boundaries;
- existing or modified surface contours;
- geology within the tenement area, including but not limited to; location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
- location of all extraction areas;
- location of existing ephemeral and permanent rivers, watercourses, creeks, dams and water management structures;
- location and extent of all areas to be disturbed from mining (including waste rock and soil/subsoil stockpiles, silt/slime dams, mine infrastructure, processing plant, waste disposal facilities and pits);
- location and extent of all areas to be progressively rehabilitated during mining;
- sequence of mining and rehabilitation in appropriate time intervals, or per stages (depicting progressive rehabilitation); and
- final open pit and/or underground workings.

9.4 Vertical Sections/Cross-Sections

Provide a series of representative cross-sections at appropriate time intervals or stages that adequately represent:

- pre-mining natural surface;
- the staged profile indicating the location and shape of the active mining area, emplacement areas and rehabilitated areas;
- the final rehabilitated surface;
- final open pit and/or underground workings; and

Show where the cross-sections are oriented to the mine plan.

In accordance with Regulation 114 (9), where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Sections 10 and 11 must also be included.

10. DESCRIPTION OF THE ENVIRONMENT

Each of the elements of the environment listed in Sections 10.1–10.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the operations. If the element is not likely to be affected by the operation, a statement to that effect must be included (note: the environment is defined in Section 6 (4) of the Mining Act 1971).

10.1 Topography and Landscape

Provide a description and map of the topography and landscape of the:

- tenement area; and
- general surroundings.

10.2 Climate

Provide:

- a summary of rainfall and temperature patterns, evaporation rates, and wind directions and speed (including maximum wind gusts); and
- details of the maximum average recurrence interval or annual exceedance probability rainfall event used for the operational and closure design of the project, and the justification for the value(s) selected.

10.3 Topsoil and Subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the tenement area (show this information on a map if there is a variation in soils over the tenement area); and
- identify any soil characteristics, including (but not limited to) erodibility, acid sulfate, sodic or non-wettable soils, that may require control measures to reduce environmental impacts during operations or rehabilitation.

10.4 Geology

Provide a description of the following, as a minimum:

- regional geology;
- geology within the tenement area, including but not limited to:
 - location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
 - composition of all rock types that are to be disturbed;
 - interpretation of the stratigraphy of the rocks hosting the deposit as well as any overlying and adjacent rock units; and
 - a description and plan of potential for extension to the orebody.
- representative cross-sections, long projection and a geological map of the tenement area showing the location of rock types and rock units present; and
- the exploration data on which the geological interpretation was based on.

10.5 Geochemistry and Geohazards

Provide:

- a geochemical assessment of all rock types that are to be disturbed, based on representative sampling and analysis that includes the identification and quantification of, but not limited to, sulfide minerals that have the potential to generate acid or mobilise metals into the environment; and
- a mineralogical assessment of all the rock types that are to be disturbed, based on representative sampling and analysis for the presence and quantification of (but not limited to) radioactive minerals, asbestos or minerals that have the potential to produce respirable silica.

Describe the potential for any of the following natural geohazards to be present in the tenement area:

- structural instability, including slips, faults, karst features or geological discontinuities; and
- major seismic events (based on historical data).

10.6 Hydrogeology

Provide:

- a description of the local and regional hydrogeology, detailing both the stratigraphy and hydrostratigraphy;
- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations, recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer (shown on a plan) and static water level of any other known drillholes);
- the environmental value of the water resource(s) determined according to Australian and New Zealand guidelines for fresh and marine water quality (Australian and New Zealand Environment and Conservation Council & Agriculture and Resource Management Council of Australia and New Zealand, National Water Quality Management Strategy Paper No. 4, 2000) or as amended;
- a description of the existence, location and value of all Groundwater Dependent Ecosystems (GDEs) within the tenement area and within and immediately surrounding the extent of predicted hydrogeological impact of the mine operations;
- an assessment of any current or historical use of local groundwater by the landowner(s) and other users which includes a baseline survey of bores, including water level, groundwater quality, bore construction details, status and purpose and collar/ground elevations;
- a statement describing if the tenement area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004, and provide details on the current availability of water resources within the prescribed area;
- a plan, to scale, identifying the tenement, all drillholes and boreholes relevant to the identification of hydrogeology, GDEs, direction of groundwater flow, any potential paleochannels and recharge zones;
- if mining operations are likely to intersect one or more aquifer units, provide a diagram of the potentiometric groundwater elevation contours for each aquifer and include the location of all drillholes and boreholes and supporting tabulated data used in developing the contours; and
- cross-section(s) of the interpreted hydrostratigraphy showing the known and inferred groundwater levels, and groundwater flow direction, recharge and discharge mechanisms (if applicable), water levels within each aquifer unit, tenement area, mining operations, and relevant drillholes and boreholes used in developing the cross-section(s).

10.7 Hydrology

Provide a description and map of the current drainage patterns for the tenement and water catchment including:

- location of watercourses, drains and dams;
- surface water catchment boundaries;
- direction of drainage and discharge from the tenement;
- a statement describing if the application area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004, and provide details on the current availability of water resources within the prescribed area;
- a statement describing if the application area is within a water protection area including areas under the River Murray Act 2003; and
- groundwater—surface water interactions.

Provide water quality data for identified watercourses, where there is potential for discharge into that watercourse from the mining operation (whether intentional or not). Should identified watercourses be ephemeral, and it is not possible to collect water samples, provide a characterisation of sediments sampled from the watercourse bed upstream and downstream of the application area.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

10.8 **Vegetation, Weeds and Plant Pathogens**

Provide:

- a description of existing flora (native and introduced) in the tenement area and surroundings, and display on a map;
- the State conservation status and habitat value of native vegetation present in the tenement area;
- a description of the presence of Commonwealth Environment Protection and Biodiversity Conservation Act 1999 listed species and ecological communities;
- a description of the extent the tenement area and adjoining land is affected or potentially affected by pathogens and weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation.

10.9 **Fauna**

Describe the native and feral fauna that may be present in the tenement area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

10.10 **Caves**

Describe the presence of any caves in karst (limestone) areas within, or near to, the tenement area. A survey for the presence of caves must be performed if the tenement area is within, or near to, known caves or significant limestone formations. Provide a summary of the results of the survey.

10.11 **Local Community**

Provide:

- a description of the local population, the economy, services and employment; and
- details of nearest town or urban areas, with a summary of the demographics of the local population.

10.12 **Landowners and Land Use**

Provide a description of:

- land ownership for all titles within and adjacent to the tenement area;
- land use (historical, current and potential) for the tenement area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- any policies relevant to the tenement area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- a statement as to whether the tenement area falls within the Murray Darling Basin, Adelaide Dolphin Sanctuary or a Marine Park; and
- any other interests or restrictions on the tenement area, including:
 - public utility easements;
 - if the tenement is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the Mining Act 1971 or Petroleum and Geothermal Energy Act 2000; and
 - any applicable exempt land under Section 9 of the Mining Act 1971, and any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the Mining Act 1971.

Provide information relating to the prospect of obtaining access to land required for the mining operation.

10.13 **Proximity to Infrastructure and Housing**

Provide:

- information and maps identifying residences within and near the tenement area;
- information and maps identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, and telephone lines (both underground and above ground); and
- information and maps identifying public roads to be utilised or affected as part of operations, including an estimate of the existing traffic movements.

10.14 **Amenity**

Provide a description of scenic or aesthetic values for the tenement area and immediate surrounds, including caves or karst features or other features of tourist or visitor interest.

10.15 Air Quality

Provide a description of the existing levels of dust and contributors to air quality including odour (both natural and anthropogenic).

10.16 Noise

Provide a description and measurement data of the existing levels of noise and contributors to noise (both natural and anthropogenic).

10.17 Heritage (Aboriginal, European, Geological)

Detail:

- any registered heritage sites in or adjacent to the tenement areas that are protected under legislation (in so far as may be permitted under the relevant legislation); and
- include a statement concerning whether or not an Aboriginal cultural heritage survey has been conducted by the tenement holder and, if so, the results of the survey.

10.18 Proximity to Conservation Areas

Provide information on proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

10.19 Pre-Existing Site Contamination and Previous Disturbance

Provide information on any known existing contamination of the site and of any disturbance by previous mining operations or other activities.

11. MANAGEMENT OF ENVIRONMENTAL IMPACTS**11.1 Assessment of Environmental Impacts****11.1.1 Elements of the Environment**

Describe the specific elements of the environment (the environment is defined in Section 6(4) of the Mining Act 1971) that may reasonably be expected to be impacted by the operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, including relevant legislated or recognised standards in relation to the element of the environment;
- describe all potential environmental receptors; and
- undertake an impact assessment of how the element could be potentially impacted by mining operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 11.1.2.

11.1.2 Potential Impact Events

Describe potential impact events associated with each phase of the mining operations (construction, operation and post mine completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 11.1.2, provide:

11.1.2.1 Source

A description of the source of the potential impact event which alone or in combination has the potential to cause harm to an environmental receptor.

11.1.2.2 Pathway

A description of the potential pathway, means or route (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

11.1.2.3 Environmental Receptor

A description of the environmental receptors that may reasonably be expected to be impacted by the source, taking into account the considerations for the element of the environment described under 11.1.1.

11.1.2.4 Description of Uncertainty

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

11.1.2.5 Confirmation of Impact Events

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

11.2 Control Measures, Uncertainty Assessment, Statement of Environmental Outcomes and Criteria

For each impact event confirmed in Section 11.1.2.5, the information listed in Sections 11.2.1–11.2.5 must be provided.

11.2.1 Control Measures

Describe the measures to manage, limit or remedy each impact event. Demonstrate that the measures are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation wherever possible.

If native vegetation is to be cleared, state the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the clearance and describe how the SEB will be provided.

11.2.2 Description of Uncertainty

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

11.2.3 Statement of Proposed Environmental Outcomes

Provide a statement of the proposed environmental outcome or outcomes (including mine completion outcomes) for each impact event confirmed in Section 11.1.2.5.

The statement of environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the mining operations subsequent to the implementation of the control measures described in Section 11.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are planned, and third parties who may be directly affected by the planned mining operations in the development of each environmental outcome.

Where clearance to native vegetation is planned, the environmental outcome must state a commitment to compliance with the Native Vegetation Act 1991 and Native Vegetation Regulations 2003.

Mine completion outcomes must at least address the issues listed under Regulation 30 (1) (d).

11.2.4 Measurement Criteria

Provide the information specified in Section 5.3 of this Determination.

11.2.5 Leading Indicator Criteria

Provide the information specified in Section 5.4 of this Determination.

In accordance with Regulation 65 (7) of the Mining Regulations 2011 this notice will have effect from 5 November 2015.

Dated 2 November 2015.

Motor Vehicles (Specified Event) Notice 2016

pursuant to Regulation 25 (4) of the Motor Vehicles Regulations 2010

1—Short title

This notice may be cited as the Motor Vehicles (Specified Event) Notice 2016.

2—Commencement

This notice comes into operation on the day it is published in the *Government Gazette*.

3—Specified event, period and conditions

In accordance with regulation 25 (4) of the Motor Vehicles Regulations 2010 and with the concurrence of the Minister for Transport and Infrastructure (as the Minister responsible for the operation of the Motor Vehicles Act 1959), I, the Minister for Tourism:

- (a) specify the Santos Tour Down Under as an event; and
- (b) specify the period commencing at 12.01 a.m. on 2 January 2016 and ending at 11.58 p.m. on 30 January 2016 as the period during which motor vehicles approved by me may be driven, or caused to stand, on a road in relation to the Santos Tour Down Under; and
- (c) specify that the following condition applies to driving such a motor vehicle, or causing such a motor vehicle to stand, on a road in relation to the Santos Tour Down Under:

All such vehicles must display number plate covers of a design approved by the Registrar of Motor Vehicles over their vehicle number plates at all times during the period specified in paragraph (b).

Leon Bignell,

Minister for Tourism

SOUTH AUSTRALIAN MOTOR SPORT REGULATIONS 2014 REGULATION 11—CONDITIONS IMPOSED ON TICKETS

Notice by the South Australian Tourism Commission

PURSUANT to Regulation 11 of the South Australian Motor Sport Regulations 2014, the Minister, to whom the administration of that Act has been committed, hereby imposes the following conditions in respect of each of the permits, authorisations and tickets to the event known as the 'Clipsal 500 Adelaide' (the 'Event') in addition to the terms and conditions contained on the back of each ticket:

In addition to the terms and conditions contained on the back of each ticket, the following conditions and rules shall apply:

- Except to the extent permitted by the, Competition and Consumer Act 2010 ('CCA'), including under the Australian Consumer Law as set out in Schedule 2 to the CCA and given effect under Part XI of the CCA, and under the same or similar provisions of the Fair Trading Act (SA) 1987, as amended from time to time, tickets cannot be exchanged or refunded after purchase. Tickets remain the property of The South Australian Tourism Commission (the Commission). The Commission reserves the right to confiscate and or return tickets to the purchaser during the Event. Tickets are non-transferable on the day or during the day of presentation and must be retained at all times and produced if requested. Patrons requesting a pass out must subject themselves to an indelible ink-stamp on their hand (or such other method at exit as the Commission directs), which together with a valid ticket validated for that day must be presented to regain entry. The Commission's authorised representative reserves the right to prohibit entry or evict persons under the influence of drugs or alcohol, who are disorderly, or engage in offensive or other inappropriate behaviour, vandalism or evade legal admission. The Commission's authorised representative has the right to refuse entry to patrons carrying prohibited items or confiscate those items. The Commission reserves the right to refuse admittance to or evict from the Event any person with reasonable cause.
- The Commission reserves the right to add, withdraw or substitute any drivers, performers, concert artists, acts and bands or activities associated with the Event, vary programs, seating arrangements, audience capacity, gate opening and closing times and determine and publish additional conditions from time to time.
- A person cannot make, reproduce or use any form of still or moving picture or any sound recording (footage) of the motorsport event as defined in the South Australian Motor Sport Act 1984 or any part of it for profit, gain, public advertisement, display or for any other purpose except for the private enjoyment of the person making the footage, without the consent of the Commission; and will on demand assign all rights thereto to the Commission or its nominees.

Any ticket purchased and the ticketholder's entry to and presence at the Event is subject to these conditions of sale, conditions of entry displayed at the Event entrances and the South Australian Motor Sport Act 1984 as amended and its Regulations. Details are freely available from www.clipsal500.com.au or Clipsal 500 Adelaide, P.O. Box V8, Kent Town, S.A. 5071.

CONDITIONS OF ENTRY

Patrons may not, without prior written consent of the Commission bring any of the following items into the Event: any alcoholic beverages; any glass bottles (excluding medical requirements) or containers or glass objects (excluding sunglasses, binoculars and prescription glasses); any beverage container with the manufacturer's seal broken; any drinks coolers or ice boxes (other than a soft walled style cooler bag); any structure or item that may be used to erect a structure, or which is capable of supporting the weight of a person including, without limitation, any chairs, lounges, benches or stools (other than a folding chair or stool); no animals or birds; no weapons of any kind; no fireworks, flares or explosives; signs/banners/clothing or any other items displaying commercial, political, religious or offensive messages or logos; any items which could reasonably be deemed to cause public nuisance or offence to any user of the venue.

The Commission reserves the right to conduct bag searches. Personnel will request that all patrons carrying bags into the Event open them for inspection. Patrons refusing to consent to a bag search will or may be refused entry into the venue.

The Commission may refuse entry, or remove you from the Event if in the Commission's opinion you breach these terms and conditions, interfere with the enjoyment or safety of other persons, or present a lost, stolen, counterfeit, damaged or unreadable ticket.

The ticketholder attending the Event hereby acknowledges and agrees as follows:

- The Ticketholder has read and understood the Conditions of Sale and Conditions of Entry (the 'Conditions') and agrees to be bound by the Conditions; and intends the Conditions to have full contractual effect.
- Where relevant, the Ticketholder and any third party who purchases a ticket on behalf of the Ticketholder ('the third party') each warrant that the third party had the Ticketholder's full authority to act as the Ticketholder's agent for the purposes of buying the ticket and accepting the Conditions.
- Where concessions or companion cards are applicable, suitable and valid identification must be provided for collection of tickets and at entry gate for admission to the venue. The Student Discount offer is only applicable to Trackside (General Admission) tickets and Pit Entry Grandstand. This offer is only available to full time students.
- The Family Grandstand Pass offer entitles patrons to purchase four reserved seats for the price of three and provides four-day reserved Grandstand seats for two adults and two children (aged 17 years and under) or one adult and three children (aged 17 years and under). Family Grandstand Passes are only applicable to Brabham Straight, Pit Entry and Barry Sheene Pit Straight (Sections I-J).
- Trackside (General Admission) tickets do not gain access or entry to any grandstand or reserved grandstand seating areas or the Gold Zone of the circuit.
- Oasis tickets provide access to a restricted area of the Clipsal 500 Adelaide circuit only. The Oasis is accessible from the city via Gate 6 on East Terrace and 7 on Dequetteville Terrace and located in Rymill Park, north of Bartels Road known as Park 14. Oasis tickets do not provide access to the whole Clipsal 500 event or any access south of Bartels Road—an upgrade ticket is required to be purchased at an additional cost to access the full event, including concerts and GoPro TrAction Zone.
- A Family Trackside (General Admission) ticket provides daily entry to the Event for two adults and two children (aged 17 years and under) or one adult and three children (aged 17 years and under).
- Platform tickets do not gain access or entry to any grandstand seating area.
- Access into grandstands and other facilities is with the appropriate ticket.

- Single day grandstand tickets are available for Barry Sheene Pit Straight Sections I-J, Chicane and Pirie Street Grandstands and only provide access to the venue and seat in said grandstand on the day identified on the single-day ticket.
- Junior Grandstand tickets are available for Pit Entry and Pirie Street Grandstands. Children must be 15 years and under to purchase this ticket type. A maximum of four junior tickets for one full paying adult may be purchased.
- Group Bookings of 10 or more of the same full price ticket type will be entitled to a 10% discount off each ticket. This offer excludes Family Grandstand tickets, Family trackside tickets, Student discounted tickets and Special seating/ Companion Cards. Excludes tickets purchased in advance of general public ticket sales.
- School Group Bookings may be made for School Groups attending the event on Thursday, 3rd March 2016 only. Students aged 13 years and older and teachers/parents/guardians will receive a Trackside (General Admission) tickets for \$10 each including GST. Students aged 12 years and younger and accompanied by a full paying adult will be admitted free.
- Selected seating areas for persons with a permanent disability and their carer holding a Companion Card have been made available at Clipsal 500 Adelaide. The areas accessible with a Companion Card are Trackside (inc. Multi-day Super Pass), Pit Entry and Pirie Street Grandstands. Special seating areas for persons who are wheelchair bound are available in the Chicane and Hairpin Grandstand areas.
- Advertised ticket pricing is only applicable up to and including 31 December 2015. The price will increase as advertised from 1 January 2016.

Children aged 12 years and under are provided with free access to the Event only provided:

- they are accompanied and supervised at all times by a paying adult guardian aged 18 and over into the Trackside (general admission) area; and
- Corporate and Event credential holders are ineligible for this offer.

For entry of a child aged three years and under into the same Grandstand or Gold Platform area with an accompanying paying adult guardian:

- when in a grandstand or Gold Platform, they sit at all times on the lap of the accompanying adult guardian and do not occupy their own seat; and
- if a child causes disruption to other patrons in a grandstand or reserved seating area they and their accompanying adult guardian will be required to exit the grandstand at the direction of the Commission.
- Corporate and Event credential holders are ineligible for this offer.

The Clipsal 500 Fair Go Policy applies to the offer of free entry to children 12 and under to ensure that all Clipsal 500 patrons can enjoy equal and safe access to the Event. The Commission reserves the right to refuse entry where the number of children accompanying any adult guardian is deemed by the Commission (or its authorised employees, contractors or agents) to be excessive for any operational, health, safety or other reason. In the ordinary course, not more than three complimentary children per adult guardian ticket would be appropriate.

For further information relating to entry terms and conditions, visit www.clipsal500.com.au.

Motorsport is dangerous. The South Australian Tourism Commission ('Commission') will not be liable for personal injury or property damage.

In exchange for being able to attend or participate in the event, (and as a condition of the purchase or issue of a ticket);

- You agree to release the Confederation of Australian Motorsport Ltd ('CAMS') and Australian Motorsport Commission Ltd, promoters, sponsor organisations, land owners and lessees, organisers of the event, their respective servants, officials, representatives and agents (collectively, the 'Associated Entities') from all liability for your death, personal injury (including burns), psychological trauma, loss or damage (including property damage) ('harm') howsoever arising from your participation in or attendance at the event, except to the extent prohibited by law; you agree that CAMS and the Associated Entities do not make any warranty, implied or express, that the event services will be provided with due care and skill or that any materials provided in connection with the services will be fit for the purpose for which they are supplied; and you agree to attend or participate in the event at your own risk.
- You acknowledge that the risks associated with attending or participating in the event include the risk that you may suffer harm as a result of: motor vehicles (or parts of them) colliding with other motor vehicles, persons or property; acts of violence and other harmful acts (whether intentional or inadvertent) committed by persons attending or participating in the event; and the failure or unsuitability of facilities (including grand-stands, fences and guard rails) to ensure the safety of persons or property at the event.
- You acknowledge that motorsport is dangerous and that accidents causing harm can and do happen and may happen to you. You accept the conditions of, and acknowledge the risks arising from, attending or participating in the event and being provided with the event services by CAMS and the Associated Entities.
- The ticketholder expressly consents to the recording and use of their image and/or voice (together 'Likeness') for the purposes of worldwide commercial exploitation of their Likeness by the Commission or any entity or person authorized by the Commission, in any form the Commission may decide or approve and without any payment or compensation to the Ticketholder. The recording of the ticketholder's Likeness may be undertaken using a variety of methods, including by television cameras and photography.

HIGH DANGER AREAS

The Ticketholder on entering into pit lane and/or pit paddock: is fully aware and recognises that pit lane and pit paddock are extremely dangerous and there is a real possibility of an accident causing injury, death, property damage or other losses in those areas; is fully aware that it is a condition of entry that they enter the pit lane and pit paddock and other high danger areas of the events ground at their own risk.

SEVERANCE

If anything in these Conditions of Entry is unenforceable, illegal or void then it is severed and the rest of the Conditions of Entry remain in force.

Dated 30 October 2015.

LEON BIGNELL, Minister for Tourism

Schedule 1—Transitional

- 1 Application of regulations
-

Part 1—Preliminary

1—Short title

These regulations may be cited as the *Marine Parks (Statutory Authorisation Compensation) Regulations 2015*.

2—Commencement

These regulations will come into operation 4 months after the day on which they are made.

3—Interpretation

In these regulations, unless the contrary intention appears—
Act means the *Marine Parks Act 2007*;

advisory panel means an advisory panel established under Part 2;

Court means the Environment, Resources and Development Court.

Part 2—Advisory panels

4—Advisory panels

- (1) The Minister may establish advisory panels for the purposes of these regulations.
- (2) An advisory panel is to consist of 3 members appointed by the Minister who together have extensive knowledge and experience in—
 - (a) law or public administration; and
 - (b) financial matters, economics or asset evaluation; and
 - (c) the industry in which holders of relevant statutory authorisations are participants.
- (3) The members of an advisory panel will hold office for a period, and on terms and conditions, determined by the Minister.
- (4) Subject to any directions of the Minister, an advisory panel may determine its own procedures.

Part 3—Applications

5—Applications for compensation under section 21 of Act

- (1) If, as a result of the creation of a zone or the imposition of a temporary prohibition or restriction of activities within a marine park, the rights conferred by a statutory authorisation under another Act are affected, the holder of the statutory authorisation may apply to the Minister for compensation under section 21 of the Act in accordance with this regulation.
- (2) The application must—
 - (a) be in writing; and
 - (b) identify the zone or the temporary prohibition or restriction to which the application relates; and
 - (c) identify the statutory authorisation in respect of which the application is made; and
 - (d) include details of how, and the extent to which, rights conferred by the statutory authorisation have been affected; and
 - (e) specify the amount of compensation claimed; and
 - (f) be accompanied by evidence supporting the claim and the calculation of the amount claimed (including any documentation of a kind required by the Minister); and

- (g) specify—
 - (i) a residential or (in the case of a corporation) registered address; or
 - (ii) a fax number or email address,for the purpose of giving notices to the applicant under these regulations; and
 - (h) provide details of an ADI account into which any payment of compensation resulting from the application should be made.
- (3) The Minister may, by written notice, request that an applicant provide further information, documents or records for the purpose of determining the application (but if the applicant fails to provide any such information, documents or records within 28 days after the request, or such longer period as the Minister may allow, the Minister may proceed to determine the application in the absence of such information, documents or records).
- (4) If the Minister is satisfied that, as a result of the creation of a zone or the imposition of a temporary prohibition or restriction of activities within a marine park, the rights conferred by a statutory authorisation under another Act are affected, the Minister—
- (a) must determine (in accordance with section 21 of the Act) whether or not it would be appropriate to compulsorily acquire the statutory authorisation, or any interest (or part of any interest) under the statutory authorisation; and
 - (b) may refer the application to an advisory panel for advice in relation to the amount of compensation—
 - (i) that should be paid in respect of the affected rights; or
 - (ii) that should be paid for a compulsory acquisition,(as the case may require).
- (5) The Minister must give the applicant written notice of the determination referred to in subregulation (4)(a).

6—Minister may pay compensation in absence of application

The Minister may pay compensation to a person under section 21 of the Act (being compensation in respect of affected rights or compensation for a compulsory acquisition) whether or not an application has been received from the person under this Part.

Part 4—Determination of claim

7—Report by advisory panel

- (1) An advisory panel must, at the request of the Minister, make recommendations as to what, in the opinion of the panel, would constitute fair and reasonable compensation in the particular case, having regard to—
- (a) the extent to which the rights have been affected; and
 - (b) the fair market value of the affected rights; and
 - (c) any other matters the panel thinks fit.

- (2) If the Minister makes a request to an advisory panel in accordance with subregulation (1), the Minister must provide the advisory panel with such information relating to the application as the panel might reasonably require for the purpose of making recommendations.

8—Determination of claim

- (1) The Minister must, on making a determination in relation to the payment of compensation to a person under section 21 of the Act (being compensation in respect of affected rights or compensation for a compulsory acquisition), give written notice of the determination to the person.
- (2) The written notice must—
 - (a) give reasons for the Minister's determination; and
 - (b) if a statutory authorisation or interest (or part of an interest) is to be compulsorily acquired—be accompanied by a notice of acquisition given in accordance with subregulation (3); and
 - (c) set out the rights of review and appeal under these regulations.
- (3) A notice of acquisition must—
 - (a) be in writing; and
 - (b) identify the zone or the temporary prohibition or restriction to which the notice of acquisition relates; and
 - (c) identify the statutory authorisation to which the notice relates; and
 - (d) specify whether the notice is for the acquisition of the statutory authorisation or a specified interest (or part of an interest) under the statutory authorisation; and
 - (e) specify the date on which the acquisition will take effect (subject to any decision of the Minister on a review, or order of the Court on an appeal, under Part 5).
- (4) A notice under this regulation may be combined with a notice required under regulation 5(5).

9—Obligation not to enter into transactions after notice of acquisition

- (1) If the holder of a statutory authorisation is given written notice (whether under regulation 5(5) or under regulation 8) of a determination to compulsorily acquire the statutory authorisation, or any interest (or part of any interest) under the statutory authorisation, the holder of the authorisation must not enter into any transaction in respect of the statutory authorisation without first disclosing that fact.
- (2) If any contract or agreement in relation to the statutory authorisation is entered into without the required disclosure, the contract or agreement is voidable at the option of the person to whom disclosure should have been made.

10—Acquisition

- (1) On the day on which an acquisition is to take effect (being the day specified in a notice in accordance with regulation 8(3) or some other day determined by the Minister on a review, or ordered by the Court on an appeal, under Part 5)—
 - (a) the authorisation or interest to which the notice relates is vested in the Minister; and
 - (b) if a residual interest remains after the acquisition, the interest is modified to the extent required by the acquisition.
- (2) A copy of the notice of acquisition must be given to the Minister responsible for the administration of the Act under which the statutory authorisation was issued and that Minister must—
 - (a) if the statutory authorisation was acquired pursuant to the notice—cancel the statutory authorisation; or
 - (b) if an interest (or part of an interest) under the statutory authorisation was acquired pursuant to the notice—cause any necessary adjustments to be made to the statutory authorisation, such that the interest (or that part of an interest) will cease to exist.

Part 5—Reviews and appeals

11—Review

- (1) The holder of a statutory authorisation may, within 21 days after being given a written notice by the Minister under regulation 8, apply to the Minister for a review of the determination in relation to the payment of compensation to which the notice relates.
- (2) The application for the review must be made in writing and must set out details of the grounds on which the review is sought.
- (3) The Minister may, by written notice, require the applicant for the review to provide further information, documents or records for the purpose of determining the review.
- (4) On a review, the Minister may affirm, vary or reverse the determination the subject of the review.
- (5) The Minister must give the applicant for the review written notice of the Minister's decision on the review and the reasons for the decision.

12—Appeal

- (1) The holder of a statutory authorisation who has applied for a review of a determination in relation to the payment of compensation under regulation 11 and who remains dissatisfied with the determination in relation to the payment of compensation following the review may appeal to the Court within 21 days after being given written notice of the decision on the review.
- (2) An appeal must be made in a manner and form determined by the Court, setting out the grounds of the appeal.
- (3) The Court may, if it is satisfied that it is just and reasonable in the circumstances to do so, dispense with the requirement that an appeal be made within the period fixed by this regulation.

- (4) Unless otherwise determined by the Court, an appeal must be referred in the first instance to a conference under section 16 of the *Environment, Resources and Development Court Act 1993* (and the provisions of that Act will then apply in relation to that appeal).
- (5) The Court may, on hearing an appeal under this regulation—
 - (a) confirm, vary or revoke the determination appealed against; and
 - (b) make any consequential or ancillary order or direction, or impose any condition, that it considers necessary or expedient.

Schedule 1—Transitional

1—Application of regulations

- (1) These regulations apply in relation to rights affected as a result of the creation of a zone, or the imposition of a temporary prohibition or restriction of activities, within a marine park whether the zone was created, or the prohibition or restriction imposed, before or after the commencement of these regulations.
- (2) If the Minister has, before the commencement of these regulations, received an application for compensation under section 21 of the Act, the Minister may, if he or she thinks fit, determine that the application should be treated as if it were an application under regulation 5 (and may do so regardless of whether the application complies with regulation 5(2)).
- (3) These regulations apply to an application the subject of a determination under subclause (2) as if the application had been made under these regulations.

DISTRICT COUNCIL OF ELLISTON

BY-LAW MADE UNDER THE LOCAL GOVERNMENT ACT 1999

By-law No. 1 of 2015—Permits and Penalties

A by-law to create a permit system for Council by-laws, to fix maximum and continuing penalties for offences, and for the construction of Council by-laws.

All previous by-laws made or adopted by the Council, prior to the date this by-law is made, are hereby repealed effective from the day on which this by-law comes into effect.

1. *Definitions*

In any by-law of the Council, unless the contrary intention is clearly indicated:

- 1.1 *person* includes a natural person, a body corporate, an incorporated association and an unincorporated association;
- 1.2 *Council* means District Council of Elliston; and
- 1.3 *permission* means the permission of the Council, or such other person as the Council may by resolution authorise for that purpose, given in writing prior to the act, event or activity to which it relates.

2. *Permits*

- 2.1 Where a by-law requires that permission be obtained, any person seeking the grant of permission must submit a written application to the Council in the form (if any) and accompanied by the fee (if any) prescribed by the Council.
- 2.2 The Council, or such other person as the Council may by resolution authorise for that purpose, may attach such conditions (including but not limited to time limits, renewals and transfer requirements) to a grant of permission as it thinks fit, and may vary or revoke such conditions or impose new conditions by notice in writing to the permit holder.
- 2.3 A permit holder must comply with every such condition.
- 2.4 The Council, or such other person as the Council may by resolution authorise for that purpose, may suspend or revoke such grant of permission at any time by notice in writing to the permit holder.
- 2.5 The Council may by resolution fix, vary or revoke fees or charges for the granting of permission for any of the activities requiring permission under the Council's by-laws.

3. *Offences and Penalties*

- 3.1 A person who contravenes, or fails to comply with, any by-law of the Council is guilty of an offence and shall be liable to a maximum penalty, being the maximum penalty referred to in the Local Government Act 1999, which may be fixed by by-law for any breach of a by-law.
- 3.2 A person who is convicted of an offence against any by-law of the Council in respect of a continuing act or omission is liable, in addition to the penalty otherwise applicable, to a further penalty for each day during which the act or omission is continued, such penalty being the maximum amount referred to in the Local Government Act 1999, which may be prescribed by by-law for offences of a continuing nature.

4. *Construction*

Every by-law of the Council shall be subject to any Act of Parliament and Regulations made thereunder.

The foregoing by-law was duly made and passed at a meeting of District Council of Elliston held on 22 October 2015, by an absolute majority of the members for the time being, constituting the Council, there being at least two-thirds of the members present.

P. CAMERON, Chief Executive Officer

DISTRICT COUNCIL OF ELLISTON

3.36 *Working on Vehicles*

perform the work of repairing, washing, painting, panel beating or other work of any nature on or to any vehicle, except for running repairs in the case of breakdown.

4. *Removal of Encroachment or Interference*

Any person who encroaches onto or interferes with local government land contrary to this by-law must, at the request in writing of an authorised person, cease the encroachment or interference and remove the source of the encroachment or interference, and reinstate the land to the same standard as the state of the land prior to the encroachment or interference.

5. *Council May Do Work*

If a person fails to remove an encroachment or interference on local government land in accordance with a request of an authorised officer pursuant to Clause 4 of this by-law, then the Council may:

5.1 undertake the work itself; and

5.2 recover the cost of doing so from that person.

6. *Removal of Animals and Directions to Persons**Animals*

6.1 If any animal is found on part of local government land in breach of a by-law any person in charge of the animal shall forthwith remove it from that part on the request of any authorised person.

6.2 An authorised person may remove the animal if a person fails to comply with the request, or if no person is in charge of the animal.

Directions

6.3 A person on local government land must comply with a reasonable direction from an authorised person relating to:

6.3.1 that persons use of the land;

6.3.2 that persons conduct and behaviour on the land;

6.3.3 that persons safety on the land; or

6.3.4 the safety and enjoyment of other persons on the land.

6.4 A person who, in the opinion of an authorised person, is likely to commit or has committed, a breach of this by-law must immediately comply with a direction of an authorised person to leave that part of local government land.

Recovery

6.5 If a person fails to comply with an order of an authorised person made pursuant to Section 262 of the Local Government Act 1999 in respect of a breach of this by-law, the Council may recover its costs and expenses of any action taken under Section 262 (3) of the Local Government Act 1999, from the person to whom the order was directed.

7. *Exemptions*

7.1 The restrictions in this by-law do not apply to any Police Officer, Council Officer or employee acting in the course and within the scope of that person's normal duties, or to a contractor while performing work for the Council and while acting under the supervision of a Council Officer, or an emergency worker when driving an emergency vehicle while driving that vehicle in relation to an emergency situation as defined in the Road Traffic (Road Rules—Ancillary and Miscellaneous Provisions) Regulations 2014 and the Australian Road Rules.

7.2 The restrictions in clauses 3.10 and 3.12 of this by-law do not apply to electoral matter authorised by a candidate and which is:

7.2.1 related to a Commonwealth or State election and occurs during the period commencing on the issue of the writ or writs for the election and ending at the close of polls on polling day; or

7.2.2 related to an election under the Act or the Local Government (Elections) Act 1999 and occurs during the period commencing four weeks immediately before the date that has been set (either by or under either Act) for polling day and ending at the close of voting on polling day; or

7.2.3 related to, and occurs during the course of and for the purpose of a referendum.

8. *Application*

Paragraphs 2.5.1, 2.5.2, 3.3.1, 3.3.2, 3.5.1, 3.5.2, 3.6, 3.7.1, 3.7.2, 3.7.3, 3.9, 3.11.1, 3.30 and 3.31 of this by-law shall apply only in such portion or portions of the area as the Council may by resolution direct in accordance with Section 246 (3) (e) of the Local Government Act 1999.

The foregoing by-law was duly made and passed at a meeting of District Council of Elliston held on 22 October 2015, by an absolute majority of the members for the time being constituting the Council, there being at least two-thirds of the members present.

P. CAMERON, Chief Executive Officer

DISTRICT COUNCIL OF ELLISTON

BY-LAW MADE UNDER THE LOCAL GOVERNMENT ACT 1999

By-law No. 4—Moveable Signs

TO set standards for moveable signs on streets and roads and to provide conditions for and the placement of such signs.

1. Definitions

In this by-law:

- 1.1 *authorised person* has the same meaning as in the Local Government Act 1999;
- 1.2 *banner* means a strip of cloth, plastic or other material hung or attached to a pole, fence or other structure;
- 1.3 *business premises* means the premises from which a business, trade or calling is conducted;
- 1.4 *footpath area* means:
 - 1.4.1 that part of a road between the property boundary of the road and the edge of the carriageway on the same side as that boundary; or
 - 1.4.2 a footway, lane or other place made or constructed for the use of pedestrians and not for the use of vehicles;
- 1.5 *moveable sign* has the same meaning as in the Local Government Act 1999;
- 1.6 *road* has the same meaning as in the Local Government Act 1999;
- 1.7 *road related area* has the same meaning as the Road Traffic Act 1961.

2. Construction and Design

A moveable sign must:

- 2.1 be of a kind known as an 'A' Frame or sandwich board sign, an 'inverted T' sign, or a flat sign, or, with the permission of the Council, a sign of some other kind;
- 2.2 be designed, constructed and maintained in good condition so as not to present a hazard to any member of the public;
- 2.3 be of strong construction so as to be stable when in position and to be able to keep its position in adverse weather conditions;
- 2.4 not contain sharp or jagged edges or corners;
- 2.5 not be unsightly or offensive in appearance or content;
- 2.6 not rotate or contain moving parts;
- 2.7 not contain flashing lights or be illuminated internally;
- 2.8 not have balloons, streamers or other things attached to it;
- 2.9 be constructed of timber, cloth, metal, plastic or plastic coated cardboard, or a mixture of such materials;
- 2.10 not have a display area exceeding one square metre in total or, if the sign is two-sided, one square meter on each side;
- 2.11 not exceed 1 200 mm in height, 800 mm in width or 800 mm in depth without permission;
- 2.12 in the case of an 'A' frame or sandwich board sign:
 - 2.12.1 be hinged or joined at the top;
 - 2.12.2 be of such construction that its sides shall be securely fixed or locked in position when erected;
- 2.13 in the case of an inverted 'T' sign, contain no struts or supports that run between the display area and the base of the sign.

3. Appearance

A moveable sign on a road must, in the opinion of an authorised person:

- 3.1 be painted or otherwise detailed in a competent and professional manner; and
- 3.2 be aesthetically appealing, legible and simply worded to convey a precise message; and
- 3.3 be of such design and contain such colours:
 - 3.3.1 as are compatible with the architectural design of the premises adjacent to the sign; and
 - 3.3.2 which relate well to the townscape and overall amenity of the locality in which it is situated; and
 - 3.3.3 which do not detract from or conflict with traffic, safety or direction signs or signals; and
- 3.4 contain combinations of colours and typographical styles which blend in with and reinforce the heritage qualities of the locality and the buildings where it is situated.

4. Banners

A banner must:

- 4.1 only be displayed on a road, footpath area or road related area;
- 4.2 be securely fixed to a pole, fence or other structure so that it does not hang loose or flap;
- 4.3 only advertise an event to which the public are invited;
- 4.4 not, without the Council's permission, be attached to any building, structure, fence, vegetation or other item owned by the Council on a road, or other improvement to a road owned by the Council;
- 4.5 not be displayed more than one month before and one week after the event it advertises;
- 4.6 not be displayed for a continuous period of more than one month and one week in any twelve month period;
- 4.7 not exceed 3m² in size.

5. Placement

A moveable sign must:

- 5.1 only be placed on the footpath area of a road;
- 5.2 not be placed on a footpath area that is less than 2.5 metres wide;
- 5.3 be adjacent to the premises of the business to which it relates;
- 5.4 not be placed closer than 400 mm to the kerb (or, if there is no kerb, to the edge of the carriageway of a road or the shoulder of the road, whichever is the greater);
- 5.5 in the case of a flat sign, be in line with and against the property boundary of the street or road;
- 5.6 be placed no less than 1.2 metres away from any structure, fixed object, tree, bush or plant (including another moveable sign);
- 5.7 not be fixed, tied or chained to or, leaned against any other structure, fixed object, tree, bush or plant (including another moveable sign);
- 5.8 not be placed on a sealed part of any footpath area, unless the sealed part is wide enough to contain the sign and still leave a clear thoroughfare at least 1.2 metres wide;
- 5.9 not be placed within one metre of the corner of a street or road;
- 5.10 not be placed on a landscaped area other than landscaping that comprises only lawn;
- 5.11 not be placed on a designated parking area or within 1 metre of an entrance to or exit from premises;
- 5.12 not be placed within 10 metres of an intersection;
- 5.13 not unreasonably:
 - 5.13.1 restrict the use of the footpath area or road; or
 - 5.13.2 endanger the safety of members of the public.

6. *Umbrellas*

An umbrella may only be installed on a road if it:

- 6.1 is securely fixed to a fence, base plate or structure so that it cannot be dislodged by gusts of wind;
- 6.2 is placed in such a manner that does not present an injury hazard or hindrance to public access.

7. *Restrictions*

A moveable sign displayed on a road must:

- 7.1 only display material which advertises a business being conducted on business premises adjacent to the sign, or the products available from that business;
- 7.2 not contain or display brand names of a product unless the name of the business is also displayed on the sign;
- 7.3 be limited to one per business premises;
- 7.4 only be displayed when the business is open to the public;
- 7.5 be securely fixed in position such that it cannot be blown over or swept away;
- 7.6 not be placed in such a position or in such circumstances that the safety of any user of the road is at risk;
- 7.7 not be displayed during the hours of darkness unless it is clearly visible;
- 7.8 not to be displayed on a median strip, traffic island or on a carriage way of a road.

8. *Exemptions*

- 8.1 Paragraphs 4.4, 5.1, 5.2 and 5.3 do not apply to a moveable sign which is used:
 - 8.1.1 to advertise a garage sale taking place from residential premises;
 - 8.1.2 as a directional sign to an event of less than three days run by an incorporated association or a charitable/community body;
 - 8.1.3 with permission of the Council.
- 8.2 Paragraphs 5.1, 5.2 and 5.3 do not apply to a flat sign, the message of which only contains newspaper headlines and the name of a newspaper.
- 8.3 This by-law does not apply to a moveable sign that is:
 - 8.3.1 placed on a road pursuant to an authorisation under the Local Government Act 1999 or another Act; or
 - 8.3.2 designed to direct people to the open inspection of any land or building that is available for purchase or lease within a township; or
 - 8.3.3 related to a State or Commonwealth election and is displayed during the period commencing on the issue of the writ or writs for the election and ending at the close of polls on polling days;
 - 8.3.4 related to an election held under the Local Government Act 1999 or the Local Government (Elections) Act 1999 and is displayed during the period commencing four weeks immediately before the date that has been set (either by or under either Act) for polling day and ending at the close of voting on polling day; or
 - 8.3.5 related to a referendum and is displayed during the course and for the purpose of that referendum.

9. *Removal of Unauthorised Moveable Signs*

9.1 If:

- 9.1.1 the design or construction of a moveable sign that has been placed on a road does not comply with a requirement of this by-law; or
- 9.1.2 the positioning of a moveable sign does not comply with a requirement of this by-law; or
- 9.1.3 any other relevant requirement of this by-law is not complied with; or

9.1.4 the moveable sign unreasonably:

- 9.1.4.1 restricts the use of the footpath area or road; or
- 9.1.4.2 endangers the safety of members of the public,

an authorised person may order the owner of the sign to remove the sign from the road.

9.2 A person must comply with an order of an authorised person made pursuant to subparagraph 9.1 of this by-law.

9.3 If the authorised person cannot find the owner, or the owner fails to comply immediately with the order of an authorised person, the authorised person may remove and dispose of the moveable sign.

9.4 The owner or other person entitled to recover a moveable sign removed pursuant to subparagraph 9.3 of this by-law must pay to the Council any reasonable costs incurred by the Council in removing, storing and attempting to dispose of the moveable sign before being entitled to recover the moveable sign.

10. *Removal of Authorised Moveable Signs*

10.1 The owner of, or other person responsible for, a moveable sign must remove or relocate the moveable sign at the request of an authorised person if, in the reasonable opinion of that authorised person, and notwithstanding compliance with this by-law, there is any hazard or obstruction or there is likely to be a hazard or obstruction arising out of the location of the moveable sign.

10.2 The owner of, or other person responsible for, a moveable sign must remove or relocate the moveable sign at the request of an authorised person for the purpose of special events, parades, road works or in any other circumstances which, in the reasonable opinion of the authorised person, requires relocation or removal of the moveable sign to protect public safety or to protect or enhance the amenity of a particular locality.

The foregoing by-law was duly made and passed at a meeting of District Council of Elliston held on 22 October 2015, by an absolute majority of the members for the time being constituting the Council, there being at least two-thirds of the members present.

P. CAMERON, Chief Executive Officer

DISTRICT COUNCIL OF ELLISTON

BY-LAW MADE UNDER THE DOG AND CAT MANAGEMENT ACT 1995 AND THE LOCAL GOVERNMENT ACT 1999

By-Law No. 5—Dogs

FOR the control of dogs within the area, to limit the number of dogs kept in premises and for the management of dogs in the Council's area.

1. *Definitions*

In this by-law:

- 1.1 *Act* means the Dog and Cat Management Act 1995;
- 1.2 *approved kennel establishment* means a building, structure or area approved by the relevant authority, pursuant to the Development Act 1993, for the keeping of dogs on a temporary or permanent basis;
- 1.3 *assistant dog* means a guide dog, hearing dog or disability dog as those terms are defined in the Act;
- 1.4 *authorised person* means a person appointed as a dog management officer under Section 27 of the Act and an authorised person under Section 260 of the Local Government Act 1999;
- 1.5 *council land* means all parklands, reserves, ornamental grounds, streets, roads, bridges, public places and other land owned or under the care, conduct and management of the Council;

- 1.6 *dog* has the same meaning as the Act;
- 1.7 *effective control* means a person exercising effective control of a dog either:
- 1.7.1 by means of physical restraint; or
- 1.7.2 by command, the dog being in close proximity to the person and the person being able to see the dog at all times;
- 1.8 *premises* means any domestic and non-domestic premises, except an approved kennel establishment;
- 1.9 *small dwelling* means a flat, a service flat, home unit, or a suite of rooms which is wholly occupied, or designed or intended or adapted to be occupied, as a separate dwelling, but does not include a detached, semi-detached or row dwelling house;
- 1.10 *working dog* means a dog used principally for the droving or tendering of stock.

2. Limit on Dog Numbers

- 2.1 The limit on the number of dogs shall be:
- 2.1.1 in a small dwelling, one dog; and
- 2.1.2 in premises other than a small dwelling, two dogs; and
- 2.1.3 in any premises outside a township, three dogs.
- 2.2 No person shall, without obtaining written permission of the Council, keep any dog on any premises where the number of dogs exceeds the limit:
- 2.2.1 unless the premises is an approved kennel establishment; or
- 2.2.2 unless the Council has exempted any premises from compliance with Clause 2 of this by law by the granting of an exemption; or
- 2.2.3 other than working dogs kept in rural areas.

3. Dog Free Areas

A person must not on any Council land to which this paragraph applies cause, suffer or permit any dog under that person's control, charge or authority to be in, or remain in that place.

4. Dogs on Leashes

A person must not on any Council land to which this paragraph applies cause, suffer or permit any dog under that person's control, charge or authority to be or remain in that place unless such dog is restrained by a strong leash not exceeding 2 metres in length and either tethered securely to a fixed object or held by a person capable of controlling the dog and preventing it from being a nuisance or danger to other persons.

5. Dog Exercise Areas

- 5.1 Any person may enter upon any part of Council land to which this paragraph applies for the purpose of exercising a dog under his or her effective control;
- 5.2 Where a person enters upon such part of Council land for that purpose, he or she shall ensure that the dog or dogs under his or her control remain under effective control while on the land;
- 5.3 Signs shall be erected to denote land to which this paragraph applies.

6. Orders

- 6.1 If a person engages in conduct that is in contravention of this by-law, an authorised person may order that person:
- 6.1.1 if the conduct is still continuing—to stop the conduct; and
- 6.1.2 whether or not the conduct is still continuing—to take specified action to remedy the contravention.
- 6.2 A person must comply with an order under this clause.
- 6.3 If a person does not comply with an order, the authorised person may take action reasonably required to have the order carried out, and the Council may recover its costs of any action so taken from the person to whom the order was directed.
- 6.4 However, an authorised person may not use force against a person under this clause.

7. Application of Paragraphs

- 7.1 Any of Paragraphs 3 and 4 and Subparagraph 5.1 of this by-law shall apply only in such portion or portions of Council land as the Council may by resolution direct in accordance with Section 246 (3) (e) of the Local Government Act, 1999.
- 7.2 The restrictions prescribed in Paragraphs 3 and 4 of this by-law shall not apply where the dog under the person's control, charge or authority is an assistant dog.
- 7.3 The limits prescribed in paragraph 2 of this by-law do not include any dog that is under three months of age.

The foregoing by-law was duly made and passed at a meeting of District Council of Elliston held on 22 October 2015, by an absolute majority of the members for the time being constituting the Council, there being at least two-thirds of the members present.
