PURSUANT to section 48 of the *Development Act 1993* and with the advice and consent of the Executive Council, I, in relation to works associated with the development of a marina facility and the creation of residential allotments and sites for various commercial, public boating and commercial fishing facilities, immediately north of the township of Wallaroo on the Yorke Peninsula, as described in an application dated 24 July 1998 (and amended Environmental Impact Statement, dated September 1998) submitted on behalf of Crystalmede Pty Ltd, grant the following:

1. Development Approval for the excavation/formation of land for the following purposes:

- entrance channel (that part not already approved), marina basin and waterways (including the installation of edge treatments and stormwater discharge outlets);
- public boat ramp facility;
- commercial fishing site at the entrance facility;
- commercial shopping site adjacent to the marina facility;
- hotel/motel/restaurant complex site adjacent to the marina facility;
- retirement village; and
- residential development,

subject to the following conditions:

CONDITIONS FOR DEVELOPMENT AUTHORISATION

- (1) The works must be carried out as shown on plans in the application (Drawings Titled Figure 2.2 dated 7 July 1998, Figure 2.3 dated 7 July 1998 and Figure 2.4 dated 16 July 1998), except where varied by conditions described below.
- (2) Construction activities must be suitably managed to minimise and/or mitigate impacts on the community (especially noise and dust) and the natural environment as far as practicable.
- (3) The land to be used for land-based allotments must be formed to prevent stormwater flows entering into the waterways (as outlined in Section 4.5 of the Second Amendment to the Assessment Report). To the extent that this is not practicable, stormwater must not be released into the waterways unless treated in accordance with the EPA Stormwater Pollution Prevention Codes of Practice.
- (4) Existing stormwater drains affected by the construction work must be incorporated into the design of the entrance facility or suitably redirected, to the reasonable satisfaction of the District Council of the Copper Coast.
- (5) A Soil Erosion and Drainage Management Plan to address the control of run-off from earthworks (to ensure water quality is not detrimentally affected) must be prepared by the proponent and approved by the Environment Protection Authority, prior to construction commencing, and the works must be undertaken in accordance with that plan.
- (6) Further engineering designs for edge treatments must be prepared, to the reasonable satisfaction of Transport SA, to identify suitable locations for stormwater discharge outlets. Edge treatments and other waterway related structures must be independently certified by a registered engineer to the reasonable satisfaction of Transport SA, prior to the commencement of construction.
- (7) The proponent must ensure that allotment owners and the District Council of the Copper Coast (which will be responsible for the maintenance of edge treatments) are made aware of the possibility that the sill level of waterways may be over topped by water in extreme events.
- (8) The closure of Heritage Drive for excavation of the remainder of the entrance channel must only occur once the construction and opening of Heritage Way for traffic is completed.
- (9) All existing services (including sewerage, water and power supplies) affected by the cutting of Heritage Drive for the construction of the entrance channel must be relocated to the reasonable satisfaction of the relevant authorities.

Existing lease arrangements should be incorporated into the new lease.

4. It is recommended that the District Council of the Copper Coast should consider the enactment of by-laws to manage activities associated with the entrance channel and waterways to ensure safe navigation and to protect water quality.

5. The proponent, and all subsequent agents, such as construction crews, must be conversant with the provisions of the *Aboriginal Heritage Act 1988*, particularly the requirement to immediately contact the Division of Aboriginal Affairs (DEHAA) in the event that archaeological items (especially skeletal material) are uncovered during earthmoving.

2. Development Approval for the establishment of the marina facility (including the ferry landing) and for the commercial fishing berths, unloading wharf area, public boat ramp (including associated car parking and access), boat repair yard, boat refuelling facility and marine toilet pump-out/treatment facility located at the proposed entrance facility, in accordance with the plans comprising the application, subject to the following conditions:

CONDITIONS FOR DEVELOPMENT AUTHORISATION

- (1) Access systems for all floating boat moorings must be capable of adjustment or be readily adaptable to projected long-term sea level rise.
- (2) The design of the public boat ramp facility must include a hard stand and wash down area. The finished level must be determined to the satisfaction of the District Council of the Copper Coast and take account of coastal flooding and the slope of the ramp. Final design and construction of the boat ramp facility must ensure any run-off or accidental spills are prevented from entering the basin without suitable prior treatment to reduce pollutants.
- (3) A set-back distance of 2 metres from the top of waterway edge treatments must be provided for the construction of further coastal protection works if required in the future.

A minimum of 115 parking spaces for the marina facility, 120 car/trailer parking spaces for the public boat ramp facility and 15 parking spaces for the commercial fishing berths must be provided. All single car parking spaces must have a minimum dimension of 5.5 m deep x 2.6 m wide.
- (6) The proponent must ensure satisfactory oil spill and fire fighting facilities and contingencies, determined in consultation with Transport SA (Marine Safety Section) and the Metropolitan Fire Service (MFS) and/or the Country Fire Service (CFS) respectively, are in place prior to commencement of operation of the marina.
- (7) The waterways must not be flooded unless and until the proponent and the District Council of the Copper Coast have entered into a binding agreement, to the satisfaction of the Development Assessment Commission, which specifies the party responsible for the management, maintenance and monitoring of the activities and impacts of the marina facility, commercial fishing berths, unloading wharf area, public boat ramp, boat repair yard, boat refuelling facility and marine toilet pump-out/treatment facility.

- (10) Any work that constitutes building work under the *Development Act 1993*, must be certified by a private certifier or the District Council of the Copper Coast, as complying with the Building Rules prior to any building work commencing, unless such work has been independently certified under Condition (8).

NOTES TO THE APPLICANT:

1. Development authorisation (for buildings) is still required for structures associated with the marina facility, commercial fishing berths, unloading wharf area, public boat ramp, boat repair yard, refuelling facility and marine toilet pump-out/treatment facility. 2. Development authorisation (for the division of land) is still required for the creation of public and commercial allotments at the entrance facility. A detailed description of service infrastructure, easement and open space reserve requirements needs to be provided as part of a subsequent land-division application. It is intended that any land-division approvals be conditional on no Certificates of Title being issued until management, maintenance and monitoring responsibilities are appropriately identified and allocated to the satisfaction of the Minister for Transport and Urban Planning.

3. Pursuant to the *Harbors and Navigation Act 1993*, the proponent would need to gain a registered, long-term lease (for the commercial fishing berths) and Freehold Title (for commercial activities) for the area associated with the entrance works from the Minister for Transport and Urban Planning, prior to the start of construction in this area. Existing lease arrangements should be incorporated into the new lease.

4. The Environment Protection Authority will require approved monitoring programs to satisfy the Authority's licensing requirements for the operation of the marina facility (for 50 or more berths). As part of licensing the proponent may need to prepare a Waste Management Plan, which should encompass the marina/berthing facilities, boat ramp facility and commercial components. In addition the proponent would need to adopt or comply with the following:

- Environment Protection (Marine) Policy 1994 (by following the Best Practice Guidelines for Waste Reception Facilities at Ports, Marinas and Boat Harbours in Australia and New Zealand);

3. Development Approval for the division of land into allotments for residential and public uses and the construction of associated roads, in accordance with the plans comprising the application and subject to the following conditions:

CONDITIONS FOR DEVELOPMENT AUTHORISATION

- (1) A Soil Erosion and Drainage Management Plan to address the control of run-off from earthworks and hard surfaces (to ensure water quality is not detrimentally affected during construction and from the completed development) must be prepared by the proponent and approved by the Environment Protection Authority, prior to the construction of roads, engineering services and reserves commencing, and the works must be undertaken in accordance with that plan.

- (2) Road and associated kerbing must be designed and constructed to avoid stormwater flows entering into the waterways by directing flows to inland disposal areas, or where this is proven not to be possible, to ensure adequate treatment of stormwater prior to any release into the waterways (in accordance with the objectives outlined in Section 4.5 of the Second Amendment to the Assessment Report).
- (3) Further detailed engineering designs that provide a range of measures for managing stormwater run-off (having particular regard to the EPA Codes of Practice) must be prepared, to the reasonable satisfaction of the Development Assessment Commission, for inclusion in an EPA approved Soil Erosion and Drainage Management Plan.
- (4) The final design of the stormwater drainage and detention system located within reserves (esp. proposed holding ponds) must not compromise more than reasonably necessary the availability or function of useable open space for the community, to the reasonable satisfaction of the District Council of the Copper Coast.
- (5) The two proposed stormwater ponds located on the outside of the area of the application (corner of North Beach and Alford Roads) must be designed and constructed by the proponent as part of the stormwater drainage and detention system for the entire site, prior to application to the Registrar General for the issue of new Certificates of Title.
- (6) A set-back distance of 2 metres from the top of waterway edge treatments must be provided for the construction of further coastal protection works if required in the future.
- (7) The proponent must satisfy SA Water Corporation's financial and easement requirements for the provision of an adequate water supply, prior to construction commencing.
- (8) Designs for the proposed effluent disposal system for the development site and connection to the town's STED scheme must be finalised and implemented, prior to application to the Registrar General for the issue of new Certificates of Title.
- (9) The construction of Stage 2 must not commence unless and until the proponent and the District Council of the Copper Coast have entered into a binding agreement, to the reasonable satisfaction of the Development Assessment Commission, which specifies arrangements for the expansion of the town's effluent lagoons to cater for the increased demand from Stage 2 of the development. (Note: The proponent must consult with District Council of the Copper Coast and the South Australian Health Commission (Waste Water and Control) to ensure suitable standards and facilities (with adequate capacities) are adopted and located for effluent disposal, including the potential long-term demand from the possible commercial facilities, the Hotel/Motel and Retirement Village).
- (10) Road, drainage, footpath and intersection designs (ie. engineering construction plans) must be finalised in accordance with the requirements of Transport SA and the District Council of the Copper Coast, prior to construction commencing. Drainage arrangements for existing roads (esp. Alford Road) must not be altered unless agreed by the owner of the road. Road and drainage designs must include water table levels, drainage inverts and pavement details. The roads and drainage works must be built in accordance with these designs.
- (11) There must be no direct access onto Alford Road from adjoining allotments where a buffer reserve (ie. 0.5 m in width) must be created.
- (12) Final road names shall be to the satisfaction of the District Council of the Copper Coast.
- (13) The proponent must provide undergrounded public lighting, power supply, water supply, television antenna and telephone supply to each allotment in accordance with, and to engineering design standard plans approved by the electricity, mains water and telephone public utility authorities.
- (14) Suitable fencing must be erected along the common boundary of the Coastal reserve to the north of the site to the reasonable satisfaction of the District Council of the Copper Coast.
- (15) The access easement should be wholly on the proponents side of the boundary fence required under Condition (14).
- (16) Any additional filling of land to that approved in development approval number 1 must be conducted under a suitable compaction testing program to the reasonable satisfaction of the District Council of the Copper Coast.
- (17) The proponent should develop and landscape all proposed reserves, to the satisfaction of The District Council of the Copper Coast (Note: This is in lieu of the full quota of open space (or a cash contribution) for the residential land division component not being fulfilled).
- (18) Binding legal arrangements (as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar General for the issue of new Certificates of Title, to specify design standards and to set out responsibilities for the privately owned land within the development to comply with approvals for the site and for the avoidance of pollution of waterways abutting residential allotments. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.
- (19) Binding legal arrangements (eg. easements, encumbrances, charge-back arrangements etc. as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar General for the issue of new Certificates of Title, to ensure financial and management responsibilities related to the maintenance of edge treatments, the design and appearance of structures and the installation of future coast protection works are clearly allocated. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.
- (20) The proponent and the District Council of the Copper Coast must enter into a binding agreement, to the reasonable satisfaction of the Development Assessment Commission, which specifies the party responsible for the management, maintenance and monitoring for infrastructure/services/roads, open space reserves and for the stormwater drainage and detention system, prior to application to the Registrar General for the issue of new Certificates of Title.
- (21) The District Council of the Copper Coast must be given seven days notice, prior to the commencement of works, and be provided with the name and contact facilities for the person responsible for coordinating site works covered by this approval.

NOTES TO THE APPLICANT:

1. Two copies of certified survey plans, as required under the Real Property Act, must be lodged with the Development Assessment Commission for the issue of a certificate of title, prior to titles for residential allotments being granted. The plans must show all easements and reserves.

2. The reuse of stormwater collected in any holding ponds to irrigate reserves and landscaped areas should be further investigated as a viable management option.

3. Information regarding estimated traffic movements will be required for finalising road designs to comply with Condition 10.

4. The proponent, and all subsequent agents, such as construction crews, must be fully conversant with the provisions of the *Aboriginal Heritage Act 1988*, particularly the requirement to immediately contact the Division of Aboriginal Affairs (DEHAA) in the event that archaeological items (esp. skeletal material) are uncovered during earth-moving.

5. It is recommended that the District Council of the Copper Coast should consider the enactment of by-laws to manage activities associated with the residential development (public access and recreation in the Coastal Reserve) and reserves (including stormwater holding ponds).

6. It is recommended that the District Council of the Copper Coast should consider revising the policies in the relevant Development Plan to reflect any development approved by the Governor.

7. The proponent must comply with the *Public and Environmental Health Act 1987* in regard to the maintenance of suitable water quality within stormwater holding ponds to protect public health and amenity.

8. To comply with Condition (18) it is recommended that a Waste Management Plan for the residential development (inc. the stormwater management system) should be prepared, in consultation with the District Council of the Copper Coast and the EPA, prior to the consideration of applications for dwellings.

9. It is recommended that the District Council of the Copper Coast should consider the preparation and implementation of a Management Plan (as required under the *Local Government Act 1934*) for the Coastal Reserve immediately north of the proposed development to manage off-site impacts (to include the control of access, potential disposal of run-off, minimising fire risk, removal of pest plant and animals, provision of walking tracks etc).

10. It is recommended that the District Council of the Copper Coast would need to ensure all external run-off (excluding that from the Caravan Park) is redirected away from the site and suitably treated and disposed of, in consultation with the EPA.

11. If the marina facility is to be further divided into allotments then appropriate arrangements should be put in place, prior to the issue of titles, to clearly regulate the activities of the marina to avoid detrimental impacts on water quality and adjacent amenity (inc. avoidance of water pollution, litter, oil/fuel spills, navigability) and, where possible, allocate responsibility for remedial measures.

12. Further design and infrastructure/service plans (ie. subject to separate applications in the future) would be required should further development approval be sought for the Retirement Village, Hotel/Motel/Restaurant complex, Commercial Fishing and Shopping Areas.

PURSUANT to section 48 (7) of the *Development Act 1993*, I specify that the matters of protection of water quality and stormwater management relevant to these authorisations are matters in relation to which the Governor may vary or revoke conditions of these authorisations or attach new conditions to them.

WATER RESOURCES ACT 1997

Notice of Intent to Prescribe Surface Water in the Clare Valley Prescribed Wells Area and Watercourses, Pursuant to Section 8 (4) of the Water Resources Act 1997

TAKE notice that, I, DOROTHY KOTZ, Minister for Environment and Heritage in the State of South Australia, hereby give notice that I propose to recommend that the surface water within the area bounded by the bold line in G.R.O. Plan No. 368/96 (the 'defined area') be a prescribed surface water area, pursuant to section 8 (2) of the Water Resources Act 1997 (the 'Act').

I also propose that the 'defined area', known as the Clare Valley Prescribed Wells Area and Watercourses, be known as the Clare Valley Prescribed Water Resources Area. The 'defined area' will include all prescribed wells, lakes and watercourses, and the proposed prescribed surface water area.

The proposal will enable the surface water, groundwater and watercourses in the 'defined area' to be managed and used in accordance with the Object of the Act in a manner which sustains the physical, economic and social well being of the community and facilitates the economic development of the State while:

- ensuring that those resources are able to meet the reasonably foreseeable needs of future generations; and
- protecting the ecosystems (including their biodiversity) that depend on those resources.

I invite all interested persons to make written submissions to me in relation to this proposal. The closing date for submissions will be 18 June 1999.

Dated 3 March 1999.

D. C. KOTZ, Minister for Environment and Heritage

WATER RESOURCES ACT 1997

Notice of Restriction on the Taking of Surface Water in the Clare Valley Prescribed Wells Area and Watercourses, Pursuant to Section 16 (1) (c) of the Water Resources Act 1997

PURSUANT to sections 16 (1) (c) of the Water Resources Act 1997, I, DOROTHY KOTZ, Minister for Environment and Heritage in the State of South Australia, being of the opinion that the rate at which surface water is being taken in the area bounded by the bold line in G.R.O. Plan No. 368/96 (the 'defined area') is having a serious effect on watercourses in the 'defined area' that depend on the surface water for replenishment, hereby prohibit the taking of surface water in the 'defined area' except:

- (a) by a person who takes the water for a pre-existing purpose but only if the rate at which he or she takes the water does not exceed the pre-existing rate; or
- (b) for domestic purposes or for watering stock (other than stock subject to intensive farming within the meaning of the Water Resources Act 1997); or
- (c) pursuant to an authorisation granted by me or my delegate, pursuant to this notice.

In this notice:

'pre-existing purpose' in relation to a person means a purpose for which the person took surface water in the 'defined area' since 1 July 1992.

'pre-existing rate' means the amount of water used or stored annually since 1 July 1992 but not exceeding the maximum amount of water used or stored in any one year within the period 1 July 1992 until the effect of this notice.

'surface water' means naturally occurring water that is flowing over land other than in a watercourse.

This notice comes into effect at the expiration of seven days from the publication of this notice in the *Gazette* and in a newspaper, which ever is the latter. This notice will remain in effect for 16 months unless earlier varied or revoked.

Dated 3 March 1999.
