'watercourse' means a river, creek or other natural watercourse (whether modified or not) and includes:

- (a) a dam or reservoir that collects water flowing in a watercourse; and
- (b) a lake through which water flows; and
- (c) a channel (but not a channel declared by regulation to be excluded from the ambit of this definition) into which the water of a watercourse has been diverted; and

- (d) part of a watercourse;

'well' means:

- (a) an opening in the ground excavated for the purpose of obtaining access to underground water;
