- Assessment Report, Amcor Glass Bottle Plant Proposal, Minister for Transport and Urban Planning, dated April 2001.

2. No works may be commenced unless and until:

- (a) a private certifier or the Light Regional Council has certified to the Development Assessment Commission that all work that constitutes building work under the Development Act complies with the Building Rules, and

- (b) a Construction Environmental Management Plan (CEMP) to address management issues during construction has been prepared by the proponent to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Agency (a branch of the Department for Environment and Heritage).

The matters addressed in the CEMP shall include, but not be limited to:

- dust control during demolition and construction;

- stormwater management during demolition and construction;
- waste water disposal;
- site clean up during demolition and construction;
- disposal of all waste;
- measures for controlling noise impacts from all activities and equipment; and
- hours of work.

3. Landscaping of the site must be commenced within one month of the date of this authorisation, and when established must be maintained in good health and condition at all times.

A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased.

4. Buildings must be clad in a light colorbond colour, such as 'Marino'.

5. Noise associated with the operation of the proposed development must not exceed an equivalent noise level of 38 dB(A) at any noise sensitive receiver, when measured in accordance with the Environment Protection (Industrial Noise) Policy 1994. This condition shall be achieved for neutral weather conditions.

6. The environmental noise assessment must be repeated by the proponent following final selection of the plant and equipment. The extent and technical details of the noise reduction measures to achieve condition 5 shall be provided with this assessment. The report shall be submitted to the EP Authority for approval prior to construction.

7. An environmental noise assessment associated with the construction phase of the project must be submitted as part of an approved Construction Environment Management Plan (as described in condition 2 (b)). The environmental noise assessment shall identify the noise reduction measures that are reasonable and practicable. The report shall be submitted for approval prior to construction. The relevant content of the assessment must be shown to have been included within an approved construction plan.

8. A particulate monitor must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of NO_x emissions from the stack.

9. A continuous NO_x sampler must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of NO_x emissions from the stack. Installation in the recuperative section is recommended, before being ambient air dilution.

10. If the stack No_x samplers are installed after the ambient air inlet (not in the recuperative section) then two gas flow velocities (total gas out, furnace gas or ambient air in) must be continuously measured, to determine the dilution factor.

11. On each stack that does not contain the particulate and NO_x samplers from each furnace, the flow velocity, temperature and pressure must be continuously monitored.

12. The stack monitoring equipment and sampling ports shall be installed in accordance with the Environment Protection Authority 'Monitoring Manual—Emission Testing Methodology for Air Pollution Manual' (1996).

13. During construction, stormwater management must ensure:

- surface stormwater from outside the construction site is diverted around all disturbed areas;
- surface stormwater on the construction site is intercepted and redirected to protect all exposed areas;
- erosion and sediment control structures are installed prior to the commencement of all site disturbance and construction works;
- all stockpiles/spoil heaps are surrounded by a silt fence at the down-slope toe of the stockpile; and

- provision is made on site for the collection and temporary storage of all site debris and waste. Storage facilities used to store waste materials must be located away from all drainage paths to prevent litter and debris from entering the stormwater system, be covered to prevent the entry of stormwater or dispersal by wind, and be sealed to prevent leakage.

14. Areas containing materials such as fuels and chemicals that have the potential to contaminate stormwater must be adequately banded. (This requirement would be satisfied by compliance with Australian Standards (AS3780.8) for storage tank and bund design).

NOTES TO THE APPLICANT:

The Environment Protection Authority recommended that the attached notes be included in any decision notification that may be issued.

Licensing Requirements

1. The proposed facility will require licensing under the Environment Protection Act 1993. Scheduled activities under the Act (Schedule 1. Activities of the Environmental Significance) that would occur as a result of this proposal includes, but may not be limited to:

- 1 (1) Chemical Storage and Warehousing Activities;
- 2 (4) Activities producing Listed Waste;
- 3 (4) Activities producing Listed Waste;
- 8 (2) Fuel Burning;
- 7 (6) Earthworks Drainage (may be required during the construction phase).

It should be noted that the onus is on the person proposing to undertake an activity of environmental significance to seek an environmental authorisation (works approval and/or license) before undertaking any such activity (Refer to Schedule 1 of the Environment Protection Act 1993).

It is recommended that any license required under the Environment Protection Act 1993 be applied for at least six months prior to the planned commencement of commissioning of the plant.

The Environment Protection Authority may attach any relevant conditions to any licence granted under the Environment Protection Act 1993. Licence conditions would include the following, as indicated above:

Recommended Licence Condition 1: Noise monitoring shall occur during commissioning and annually thereafter at positions nominated by the EP Authority. The indices L_{Amax} , L_{Aeq} and L_{A90} shall be measured as a minimum over consecutive 15 minute periods to record at least the equivalent of 7 days of data. Weather conditions sufficient to determine the Pasquill-Gifford stability category shall be recorded for the measurement period. Attended measurements of the above indices shall occur on two separate occasions during the automatic logging night period. The attended measurements shall also include measurements of the indices in the 1/3 Octave band spectrum format. A report summarising the results of the noise monitoring shall be submitted to the nominated EP Authority Licence Co-ordinator within 14 days of completion of the monitoring.

Recommended Licence Condition 2: Where noise monitoring indicates that operation of the facility and ancillary equipment exceeds an equivalent noise level of 38 dB(A) when measured and adjusted in accordance with the Environmental Protection (Industrial Noise) Policy 1994, a noise reduction program shall be carried out. The noise reduction program will comprise identification of the responsible noise sources, determination of the reasonable and practicable measures available and implementation of these measures following approval of the report by the EP Authority. An acoustic engineer shall manage the program.

Recommended Licence Condition 3: Install aerators on the stormwater ponds if odorous conditions arise. Include the Gutteridge Haskins and Daveys (GHD) Report recommendations as part of the final design of the stormwater ponds, irrigation and landscaping plan. To be dealt with as a condition of licence.

General Environmental Duty

2. The applicant is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that its activities on the whole site, including during construction, do not pollute the environment in a way which causes or which may cause environmental harm.

Traffic Management

3. The applicant is advised to contact Transport SA in regard to proposed transport routes for the delivery of raw materials and the distribution of finished product, so that any possible traffic impacts on the Gawler township and the local road network are satisfactorily addressed and minimised.

Given under my hand at Adelaide, 10 May 2001.
