*Criteria for Assessment of Applications*

Winning bidders will be selected on the basis of the total five year work program bid, covering all six blocks. The work program must include a statement of exploratory operations the applicant proposes to carry out in the first five-year licence term. It is expected that at least one guaranteed exploration well will be included in the program.

Bids will be assessed taking account of the criteria listed below. It is important to note that the timing of well drilling and seismic acquisition will be taken into account. The most important criteria for assessment of CO2002-(A-F) work programs are:

- the number of exploration wells to be drilled, their timing and anticipated targets (Eromanga, Cooper and Warburton Basins);
- the extent to which proposed wells are supported by seismic data;
- the number of years the applicant is prepared to guarantee the program;
- adequacy of financial resources and technical expertise available to the applicant; and
- the applicant's past performance in fulfilling work program commitments elsewhere in Australia.

Secondary criteria that may be taken into account are:

- the amount and nature of seismic surveying to be carried out and its timing; and
- other data acquisition and seismic reprocessing to be carried out.

In addition to the above criteria, where bids are similar, the benefits of the introduction of new explorers into the area (including intention with regard to establishing an office in South Australia) may be taken into account. In the case of cascading bids, (i.e. multiple or hybrid bids by one applicant or joint venture), only the highest bid will be considered.

The grant of any ensuing licence will be subject to first satisfying the requirements of the Commonwealth Native Title Act 1993, in respect to the negotiation of an appropriate access agreement.

Dated 18 April 2002.

PETROLEUM (SUBMERGED LANDS) ACT 1967

*Notice of Invitation of Applications for Exploration Permits*

I, BARRY ALAN GOLDSTEIN, the Delegate of the Designated Authority in respect of the adjacent area in respect of South Australia and on behalf of the Commonwealth—South Australia Offshore Petroleum Joint Authority, acting pursuant to delegated powers dated 21 August 2001, *Gazetted* 30 August 2001, page 3441 and pursuant to section 20 (1) of the Petroleum (Submerged Lands) Act 1967 of the Commonwealth of Australia, hereby invite applications for the grant of an exploration permit in respect of each of the following areas as scheduled below:

SCHEDULE

(The references hereunder are to the names of the map sheets of the 1:1 000 000 series and to the numbers of graticular sections shown thereon).

The Commonwealth/State/Territory jurisdictional boundary in coastal waters is determined by the Australian Maritime Boundaries Information System Dataset of 2000, released in January 2001 by the Australian Surveying and Land Information Group (now Geoscience Australia National Mapping Division).

Section 5AAA of the Petroleum (Submerged Lands) Act 1967, provides that, where a change to the baseline of Australia's territorial sea would impact on the boundary of an existing petroleum title (in Commonwealth or State or Territory waters), there is in fact no such impact. The Commonwealth, State or Territory Act (as the case may be) under which the title has been granted, continues to apply to the title and the whole title area for as long as the title remains in force. Therefore, this Instrument does not apply to any such area that is already under title.
