REMUNERATION TRIBUNAL

REPORT RELATING TO DETERMINATION NO. 1 OF 2002

THE Electoral Districts Boundaries Commission's Order of 17 November 1998 becomes effective from 9 February 2002 which is the date of the next election.

The Tribunal is therefore required to consider the effect of the new electoral districts to apply also from the date of the next election.

Eight of the districts have been renamed as follows:

- Coles to Morialta;
- Hanson to Ashford;
- Hart to Port Adelaide;
- Peake to West Torrens;
- Price to Cheltenham;
- Ross-Smith to Enfield;
- Spence to Croydon; and
- Gordon to Mount Gambier.

Additionally the reduction in the size of Hammond has resulted in the placement in a different category.

Changes in size to a number of other districts have not been sufficiently significant to justify altering their category.

An election has been called to be held on 9 February 2002 and this Determination reflects the above changes to take effect from 9 February 2002.

This Determination does not change the monetary amounts which will be reviewed later in the year.

Dated 24 January 2002.

WATER RESOURCES ACT 1997

Notice of Intent to Prescribe the surface water, wells and watercourses of the Marne River and Saunders Creek Catchments in the Eastern Mount Lofty Ranges, pursuant to Section 8 of the Water Resources Act 1997

I, MARK KENNION BRINDAL, Minister for Water Resources in the State of South Australia, give notice that I propose to recommend to the Governor that she declare, by regulation, that the surface water, wells and watercourses within the area defined by a bold solid line and shading on GRO Plan No. 589/2001 (the 'defined area') be a prescribed water resources area pursuant to section 8 of the Water Resources Act 1997 (the Act).

I propose that the 'defined area' be known as the Marne-North Rhine-Saunders Prescribed Water Resources Area. Under the proposal all surface water, wells and watercourses in the defined area will be prescribed water resources.

I also propose that the regulation will not apply to the taking of water pursuant to section 7 (5) of the Act for domestic purposes or watering stock (other than stock subject to intensive farming) or for firefighting purposes or for public road making in the 'defined area'.

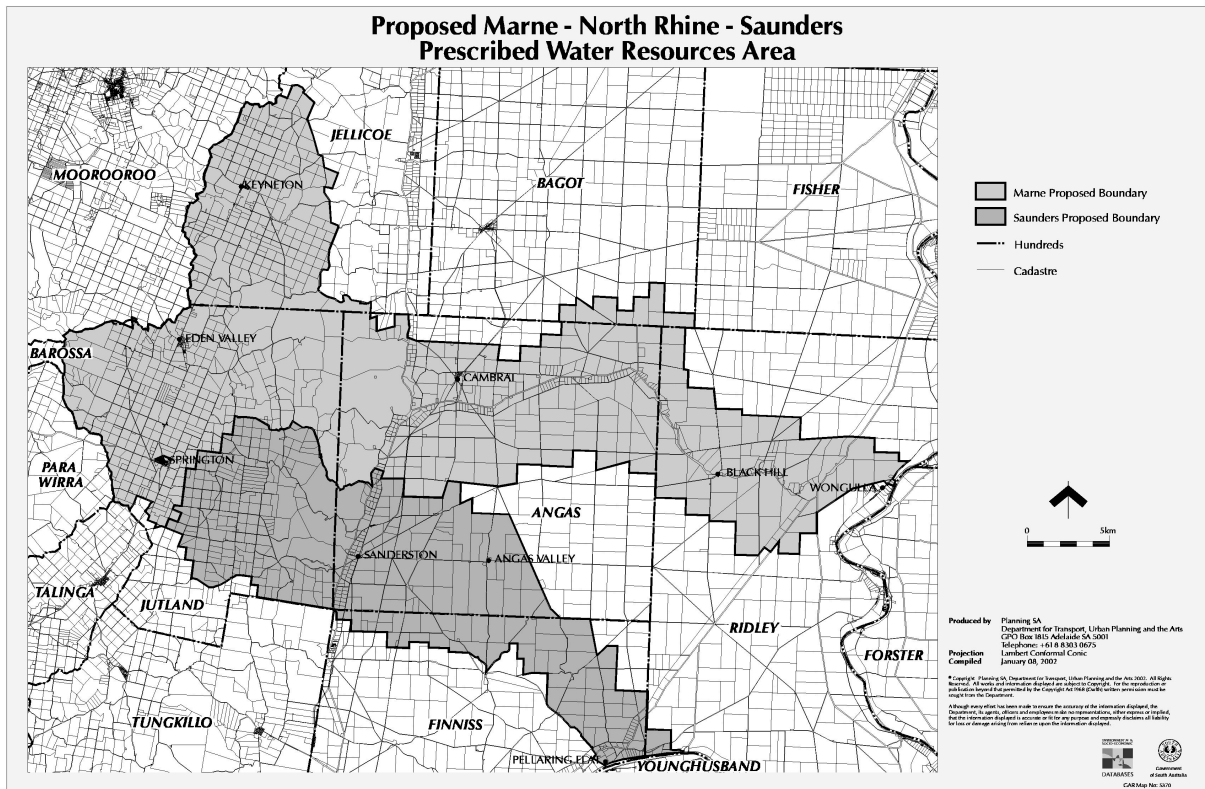

The proposal will enable the surface water, groundwater and watercourses in the 'defined area' to be managed and used in accordance with the Object of the Act. Achieving this outcome will sustain the physical, economic and social well being of the community and facilitate the economic development of the State while:

- ensuring that those resources are able to meet the reasonably foreseeable needs of future generations; and
- protecting the ecosystems (including their biodiversity) that depend on those resources.

I invite all interested persons to make written submissions to me in relation to this proposal. The closing date for submissions will be Friday, 10 May 2002.

All submissions and enquires should be addressed to:

Mark Faulkner
 Senior Policy Officer, Murray-Darling Division
 Department for Water Resources
 G.P.O. Box 2834

Dated 15 January 2002.

WATER RESOURCES ACT 1997

Notice of Restriction on Water Use in the Saunders Creek Catchment Area

PURSUANT to section 16 (1) of the Water Resources Act 1997, I, Mark Kennion Brindal, Minister for Water Resources, being of the opinion that the rate at which water is being taken from surface water, watercourses and from wells accessing the upper unconfined aquifer in the Murray Group Formation and the lower confined aquifer in the Renmark Beds in the area described in Schedule 1, is likely to affect the quality of water in the surface water, watercourses and those underground aquifers, and is such that there is a risk that the available water will not be sufficient to meet future demand, hereby prohibit the taking of water from surface water, watercourses and wells, subject to the exceptions specified in Schedule 2.

SCHEDULE 1: AREA

The Saunders Creek catchment as indicated in the GRO Plan No. 590/2001.

SCHEDULE 2: EXEMPTIONS

1. A person who took water between 1 January 1999 to the date of this notice (the 'defined period') may continue to take water for the same purpose or purposes but only at a rate which does not exceed the pre-existing rate and/or in accordance with the terms of a written authorisation granted by me, or any person authorised in writing by me, pursuant to this notice.

2. Any other person may take water from surface water, watercourses or wells in accordance with the terms of a written authorisation granted by me, or any person authorised in writing by me, pursuant to this notice.

3. Any written authorisation to take water from surface water, watercourses or wells will be issued by the Minister in accordance with the Guidelines for Authorisation of the taking of water in the Saunders Creek Catchment (the 'Guidelines').

4. Any authorisation to take water from surface water, watercourses or wells may be varied by further written authorisation issued by the Minister or any person authorised in writing by me in accordance with the Guidelines.

5. All water taken must be taken through a flow recording meter.

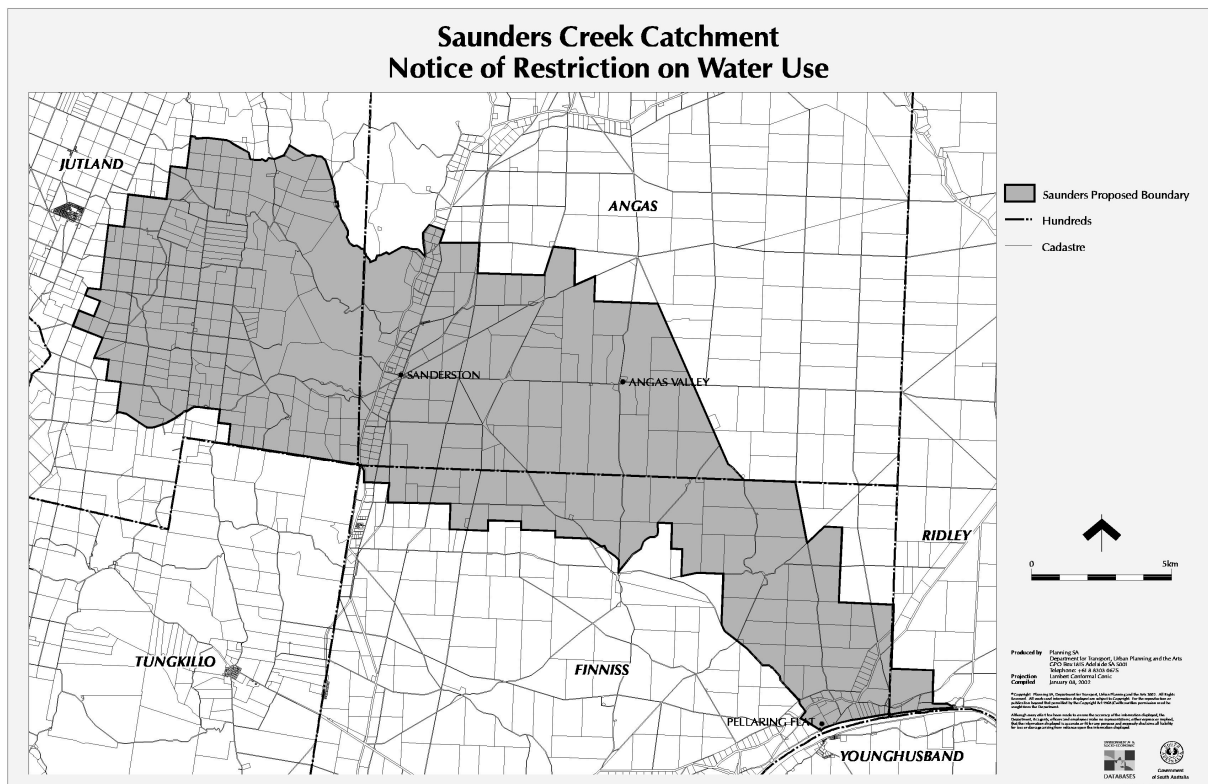

6. This prohibition does not apply to the taking of water pursuant to section 7 (5) of the Act for domestic purposes or watering stock (other than stock subject to intensive farming) or to taking of water for firefighting or public road making purposes in the area.

In this notice:

'pre-existing rate' means the average amount of water used during the defined period.

The period of this restriction will commence at the expiration of seven days from the publication of this notice in the *Gazette* or newspaper (whichever is the later).

This notice will remain in effect for two years unless earlier varied or revoked.

Dated 15 January 2002.

MARK BRINDAL, Minister for Water Resources

WATER RESOURCES ACT 1997

*Guidelines for Authorisation of the Taking of Water in the Saunders Creek Catchment Area*1. *Introduction*

- 1.1 These guidelines form the basis on which decisions will be made for the grant of authorisations to take water in the Saunders Creek Catchment Area (refer to map, Appendix 1) under the Notice of Restriction ('the Notice') published in the *Government Gazette* on 24 January 2002 under Section 16 (1) of the Water Resources Act 1997.
- 1.2 Authorisation will be provided in the form of a letter signed by me, or any person authorised in writing by me, which shall state:
- the name(s) of the person or persons to whom the authorisation is granted;
 - the capacity, number and location of dams authorised and or number and location of wells;
 - either the amount of water or the area of crop that may be irrigated; this may also refer to the water source (i.e. surface water, watercourse or well) and be expressed in terms of volume, or irrigation equivalents;
 - the parcel(s) of land on which the water can be used;
 - the purpose or purposes for which water can be used; and
 - the date by which all diversions from dam, well or watercourse must be metered.
- 1.3 The restriction does not apply to the taking of water for stock and/or domestic purposes, firefighting or for public road making purposes.

2. *Criteria for the Issue of Authorisations for the Taking of Water in the Saunders Creek Catchment Area*

An authorisation may be granted at the discretion of the Minister or his authorised agent on the basis of any one or more of the following criteria:

2.1 *Existing water use*

Existing water use refers to existing irrigation carried out in the years from 1 January 1999 to the date of the notice in the *Government Gazette*, as established by land-use survey and/or aerial photography. The amount of water authorised for use during the period of the restriction will be based upon the average crop area of each crop grown and the irrigation water requirements of the respective crop(s), and/or the irrigation capacity of the irrigation equipment. The authorisation may be issued in the form of the area of crop(s) to be irrigated, volume of water or irrigation equivalents.

For the purposes of these guidelines:

Average crop area for a particular crop means the average of the maximum areas of land planted to a particular crop over the period 1 January 1999 to the date of publication of the notice in the *Government Gazette*.

Irrigation water requirement of a crop means the reasonable rate of irrigation (expressed as a volume of water per hectare) to properly produce that crop.

Irrigation capacity of irrigation equipment means the amount of water that can be applied by the usual operation of that equipment (in its condition at the date of publication of the notice in the *Government Gazette*) under usual pumping rates, hours of operation and seasonal fluctuations.

2.2 *New or additional water use*

An authorisation may be granted for the taking and use of such amount of water as is reasonably required for a new or additional purpose, to those who can demonstrate to my satisfaction either of the following:

(a) *Purchase of land*

That the applicant has entered into a binding agreement after 1 January 1999 and prior to the date of publication of the notice in the *Government Gazette* to purchase land where there is written evidence that the land was purchased with the specific intention to develop water use on the land during the period of the Notice of Restriction.

(b) *Significant legal or financial commitments*

Evidence of a significant legal or financial commitment entered between 1 January 1999 and prior to the date of publication of the notice in the *Government Gazette* for the establishment of new water using activities, or the expansion of existing water use activities.

2.3 *Impact on Stock and Domestic Dams and Wells*

An authorisation for an amount of water for a new or additional use shall not be granted where:

- (a) the taking of that amount of water may have a detrimental effect on the ability of downstream water users or occupiers of adjoining land to obtain water for domestic purposes or the watering of stock (other than stock subject to intensive farming);
- (b) the taking of that amount of water may have a detrimental effect on the ability of occupiers of adjoining land to obtain water from wells on that land for domestic purposes or the watering of stock (other than stock subject to intensive farming).

Terms used in this clause that are defined in the Water Resources Act 1997, have the meanings therein defined.

3. *Transfer of Property*

- 3.1 Where the holder of an authorisation transfers the property on which the water is used the Minister, or his authorised agent, may issue an authorisation to the person to whom the property is transferred. The authorisation would be granted on the same terms as the authorisation granted to the transferor of the property.

4. *Change of Purpose of Water Use*

- 4.1 An authorisation to take and use water for a specific purpose may be varied by further written authorisation as long as the amount of water endorsed on the new authorisation does not exceed the amount taken for the purpose under the previous authorisation.

5. *Change of Land*

- 5.1 An authorisation to take and use water may be varied by written authorisation to allow the rotation of irrigated crops required for proper agricultural and farm management practices on land parcels of a contiguous property or property within close proximity owned or leased by a person who holds an authorisation.

Dated 15 January 2002.
