- The letter from Leighton Contractors Pty Limited to Planning SA dated 4 October 2001.
- Letter from Resource Developments Pty Ltd Dated 27 March 2003 and report 'Application for Approval' dated May 2003.

Unless varied by the following conditions:

2. No works may be commenced unless and until:

- (a) a private certifier or the Light Regional Council has certified to the Development Assessment Commission that all work that constitutes building work under the Development Act complies with the Building Rules, and
- (b) A Construction Environmental Management Plan (CEMP) to address management issues during construction has been prepared by the proponent to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Agency (a branch of the Department for Environment and Heritage).

The matters addressed in the CEMP shall include, but not be limited to:

- Dust control during demolition and construction;
- Stormwater management during demolition and construction;
- Waste water disposal;
- Site clean up during demolition and construction;
- Disposal of all waste;
- Measures for controlling noise impacts from all activities and equipment; and
- Hours of work.

3. Prior to the commencement of Stage II a detailed flood and stormwater management plan be prepare to the reasonable satisfaction of the Development Assessment Commission. Such Plan should consider water sensitive water design aspects and 'best practice' measures for progressively treating run-off prior to disposal, such as the use of vegetated swales, retention basins (eg. ephemeral wetlands), gross pollutant traps, oil/grease traps and silt traps. The disposal of run-off and use of 'treated' water, such as for irrigating landscape/amenity plantings or use in plant processes, should also be addressed. In particular, such plan must include measures to ensure that:

- Development does not increase the flood risk to any other property by provision being made to ensure that stormwater runoff leaving the site post development does not exceed that which would be expected in its natural state for a 100 year ARI flood event.
- Development is designed to adequately manage stormwater by provision being made to ensure that runoff from the site post development is suitably collected, treated and disposed of. This shall be achieved by adopting the following principles:
 - o the peak rate of stormwater runoff from the development should not exceed that which would be expected from the site in its natural state for all storms up to and including a 20 year ARI event. This will require runoff detention and storage.
 - o the volume of stormwater runoff from the development shall not exceed that which would be expected from the site in its natural state, for all storms up to and including a 20 year ARI event. This will require runoff retention including reuse and/or other means of depletion as may be necessary.
 - o provision for stormwater runoff treatment should be incorporated to ensure that all stormwater runoff from the development meets appropriate quality standards.

4. All landscaping indicated on Drawing V627/D/L/1801 shall be established within six (6) months of the date of this approval and shall be maintained and nurtured at all times with any diseased or dying plants being replaced.

5. The main vehicle entrance gate adjacent Argent Road is to be moved a sufficient distance inside the property boundary to ensure that there is sufficient space so that no part of any vehicle extends onto the road or road reserve.

6. All carparking areas are to be clearly line marked and numbered within three (3) months of the date of this approval.

7. Buildings must be clad in a light colorbond colour, such as 'Marino'.

8. Noise associated with the operation of the proposed development must not exceed an equivalent noise level of 38 dB(A) at any noise sensitive receiver, when measured in accordance with the Environment Protection (Industrial Noise) Policy 1994. This condition shall be achieved for neutral weather conditions.

9. The environmental noise assessment must be repeated by the proponent following final selection of the plant and equipment. The extent and technical details of the noise reduction measures to achieve condition 8 shall be provided with this assessment. The report shall be submitted to the EP Authority for approval prior to construction.

10. An environmental noise assessment associated with the construction phase of the project must be submitted as part of an approved Construction Environment Management Plan (as described in condition 2 (b)). The environmental noise assessment shall identify the noise reduction measures that are reasonable and practicable. The report shall be submitted for approval prior to construction. The relevant content of the assessment must be shown to have been included within an approved construction plan.

11. A particulate monitor must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of particulate emissions from the stack.

12. A continuous NO_x sampler must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of NO_x emissions from the stack. Installation in the recuperative section is recommended, being before ambient air dilution.

13. If the stack NO_x samplers are installed after the ambient air inlet (not in the recuperative section) then two gas flow velocities (total gas out, furnace gas or ambient air in) must be continuously measured, to determine the dilution factor.

14. On each stack that does not contain the particulate and NO_x samplers from each furnace, the flow velocity, temperature and pressure must be continuously monitored.

15. The stack monitoring equipment and sampling ports shall be installed in accordance with the Environment Protection Authority 'Monitoring Manual—Emission Testing Methodology for Air Pollution Manual' (1996).

16. During construction, stormwater management must ensure:

- Surface stormwater from outside the construction site is diverted around all disturbed areas;
- Surface stormwater on the construction site is intercepted and redirected to protect all exposed areas;
- Erosion and sediment control structures are installed prior to the commencement of all site disturbance and construction works;
- All stockpiles/spoil heaps are surrounded by a silt fence at the down-slope toe of the stockpile; and

- Provision is made on site for the collection and temporary storage of all site debris and waste. Storage facilities used to store waste materials must be located away from all drainage paths to prevent litter and debris from entering the stormwater system, be covered to prevent the entry of stormwater or dispersal by wind, and be sealed to prevent leakage.

17. Areas containing materials such as fuels and chemicals that have the potential to contaminate stormwater must be adequately banded. (This requirement would be satisfied by compliance with Australian Standards (AS3780.8) for storage tank and bund design).

NOTES TO THE APPLICANT

The Environment Protection Authority recommended that the attached notes be included in any decision notification that may be issued.

Licensing Requirements

The proposed facility will require licensing under the Environment Protection Act 1993. Scheduled activities under the Act (Schedule 1 Activities of Environmental Significance) that would occur as a result of this proposal includes, but may not be limited to:

- 1 (1) Chemical Storage and Warehousing Activities
- 2 (4) Ceramic works
- 3 (4) Activities producing Listed Waste
- 8 (2) Fuel Burning
- 7 (6) Earthworks Drainage (may be required during the construction phase)

It should be noted that the onus is on the person proposing to undertake an activity of environmental significance to seek an environmental authorisation (works approval and/or licence) before undertaking any such activity (Refer to Schedule 1 of the Environment Protection Act 1993).

It is recommended that any licence required under the Environment Protection Act be applied for at least six months prior to the planned commencement of commissioning of the plant.

The Environment Protection Authority may attach any relevant conditions to any licence granted under the Environment Protection Act 1993. Licence conditions would include the following, as indicated above;

Recommended Licence Condition 1: Noise monitoring shall occur during commissioning and annually thereafter at positions nominated by the EP Authority. The indices L_{Amax} , L_{Aeq} and L_{A90} shall be measured as a minimum over consecutive 15 minute periods to record at least the equivalent of 7 days of data. Weather conditions sufficient to determine the Pasquill-Gifford stability category shall be recorded for the measurement period. Attended measurements of the above indices shall occur on two separate occasions during the automatic logging night period. The attended measurements shall also include measurements of the indices in the 1/3 Octave band spectrum format. A report summarising the results of the noise monitoring shall be submitted to the nominated EP Authority Licence Co-ordinator within 14 days of completion of the monitoring.

Recommended Licence Condition 2: Where noise monitoring indicates that operation of the facility and ancillary equipment exceeds an equivalent noise level of 38 dB(A) when measured and adjusted in accordance with the Environmental Protection (Industrial Noise) Policy 1994, a noise reduction program shall be carried out. The noise reduction program will comprise identification of the responsible noise sources, determination of the reasonable and practicable measures available and implementation of these measures following approval of the report by the EP Authority. An acoustic engineer shall manage the program.

Recommended Licence Condition 3: Install aerators on the stormwater ponds if odorous conditions arise. Include the Gutteridge Haskins and Daveys (GHD) Report recommendations as part of the final design of the stormwater ponds, irrigation and landscaping plan. To be dealt with as a condition of licence.

General Environmental Duty

The applicant is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act, to take all reasonable and practical measures to ensure that its activities on the whole site, including during construction, do not pollute the environment in a way which causes or which may cause environmental harm.

Traffic Management

The applicant is advised to contact Transport SA in regard to proposed transport routes for the delivery of raw materials and the distribution of finished product, so that any possible traffic impacts on the Gawler township and the local road network are satisfactorily addressed and minimised.

Notes:

1. The distribution tariffs:

- (a) are inclusive of the GST imposed as at 1 July 2000; and
- (b) include the application of AD_i as defined in paragraph E2 of Schedule 7 of the Electricity Pricing Order 1999.

2. ETSA Utilities must assign each Distribution Network User to a distribution tariff in respect of each of its connection points in accordance with the following principles.

- (a) A Distribution Network User that has an agreed maximum demand of 250kW or more in respect of a connection point, must be assigned to a distribution tariff that includes a demand component in respect of that connection point.
- (b) A Sub-Transmission (kVA) Network User is a Distribution Network User taking supply at 66kV, or at 33kV outside of the Adelaide Metropolitan area. A minimum annual demand of 11.50MVA applies. A type 3 NEM meter or equivalent is required. Customers electing to switch to this tariff from 1 July 2002 must meet or exceed the minimum power factor requirements for their customer installation as set out in Part B of the Distribution Code (generally 0.90 pf). These tariffs are invoiced monthly.

- (c) A Zone Substation (kVA) customer is a Distribution Network User taking supply generally at 11kV from the low voltage transformer terminals. Supply may also be taken at lower voltages that exceed 1kV. A minimum annual demand of 5.75 MVA and a minimum annual usage of 25GWh apply. A type 3 NEM meter or equivalent is required. Customers electing to switch to this tariff from 1 July 2002 must meet or exceed the minimum power factor requirements for their customer installation as set out in Part B of the Distribution Code (generally 0.90 pf). These tariffs are invoiced monthly.
- (d) A High Voltage Demand (kVA) customer is a Distribution Network User taking supply generally at 11kV. Supply may also be taken at lower voltages that exceed 1kV or at 33kV in metropolitan Adelaide. A minimum annual demand of 1.15MVA applies. A type 3 NEM meter or equivalent is required. Customers electing to switch to this tariff from 1 July 2002 must meet or exceed the minimum power factor requirements for their customer installation as set out in Part B of the Distribution Code (generally 0.85 pf). These tariffs are invoiced monthly.
- (e) A High Voltage (kVA) (Obsolete) customer is a Distribution Network User taking supply generally at 11kV. NURSES BOARD OF SOUTH AUSTRALIA

Code of Ethics for Nurses In Australia

Background

This Code of Ethics has been developed for nursing in the Australian context and is relevant to all nurses in all practice settings.

The impetus for its development came at the Australasian Nurse Registering Authorities Conference (ANRAC) of 1990, when the research arising from the ANRAC Nursing Competencies Assessment Project indicated that there was not a clear focus on the ethical standards expected and required of nurses practising in the cultural context of Australia.

The Code of Ethics for Nurses in Australia was first developed in 1993 under the auspices of the Australian Nursing Council Inc., Royal College of Nursing, Australia and the Australian Nursing Federation. In 2000 these peak organisations agreed to undertake a joint project to review the Code of Ethics. It is recognised that the Code of Ethics could not have been realised without the participation of nurses and nursing organisations in Australia, whose many submissions and comments are acknowledged and appreciated.

The Code of Ethics outlines the nursing profession's intention to accept the rights of individuals and to uphold these rights in practice. The Code of Ethics is complementary to the International Council of Nurses (ICN) Code of Ethics for Nurses (2000).

Thus, the purpose of this Code of Ethics is to:

- identify the fundamental moral commitments of the profession,
- provide nurses with a basis for professional and self reflection on ethical conduct,
- act as a guide to ethical practice, and
- indicate to the community the moral values which nurses can be expected to hold.

Introduction

The nurse's primary professional responsibility is to people requiring nursing care. In fulfilling this responsibility nurses provide care and support before and during birth and throughout life, and alleviate pain and suffering during the dying process. Nurses enable individuals, families and groups to maintain, restore or improve their health status, or to be cared for and comforted when deterioration of health has become irreversible.

A traditional ideal of nursing is the concern for the care and nurture of human beings giving just and due consideration to their ethnicity, culture gender, spiritual values, sexuality, disability, age, economic, social or health status, or any other grounds. Nurses respect and uphold the rights of Australian Indigenous peoples. The profession also acknowledges the cultural diversity in contemporary Australian society.

Nursing care is based on the development of a therapeutic relationship and the implementation and evaluation of therapeutic processes. Therapeutic processes include health promotion and education, counselling, nursing interventions and empowerment of individuals, families or groups to exercise maximum choice in relation to their health care.

Nursing practice is undertaken in a variety of settings. Any particular setting will be affected to some degree by processes which are not within a nurse's control or influence. The processes affecting nursing practice can include government policies, laws, resource constraints, institutional policies, management decisions, and the practice of other health care providers. Nurses also recognise the potential for conflict between one person's needs and those of another, or of a group or community.

Such factors may affect the degree to which nurses are able to fulfill their moral obligations and/or the number and type of ethical problems they may face.

The Code contains six broad value statements. Nurses are encouraged to use these statements as a guide in reflecting on the degree to which their practice demonstrates those values. As a means of assisting in interpretation of the six values, a number of explanatory statements are provided. These explanatory statements are not intended to cover all the aspects a nurse should consider, but can be used to assist further exploration and consideration of ethical concerns in nursing practice.

Nurses are also encouraged to undertake discussion and educational opportunities in ethics in order to clarify for themselves issues related to the fulfilment of their moral obligations. This Code of Ethics is not intended to provide a formula for the resolution of ethical problems, nor can it adequately address the definitions and exploration of terms and concepts which are part of the study of ethics.

Nurses are autonomous moral agents and sometimes may adopt a personal moral stance that would make participation in certain procedures morally unacceptable to them. Nurses have a right to refuse (conscientious objection) to participate in procedures, which they judge on strongly held

moral beliefs to be unacceptable. In exercising their conscientious objection nurses must take all reasonable steps to ensure that quality of care and patient safety is not compromised.

Nurses accepting employment positions where they foresee they may be called on to be involved in situations at variance with their sincerely held beliefs, have a responsibility to acquaint their employer or prospective employer with this fact within a reasonable time. Nurses, however, should consider seriously whether it is appropriate for them to accept employment positions where they see these situations may arise, particularly if this is likely to be more than a rare occurrence.

Employers and colleagues have a responsibility to ensure that such nurses are not overtly or covertly discriminated against in their workplace.

The Code of Ethics is supported by the Code of Professional Conduct for Nurses in Australia. While the Code of Ethics focuses on the ethics and ideals of the profession, the Code of Professional Conduct identifies the minimum requirements for practice in the profession and focuses on the clarification of professional misconduct and unprofessional conduct. The two Codes, together with published practice standards, provide a framework for nursing.

Code of Ethics

VALUE STATEMENT 1

Nurses respect individual's needs, values, culture and vulnerability in the provision of nursing care.

Explanatory Statements

1. Nurses acknowledge the diversity in contemporary Australian society. Nursing care for any individual or group should not be compromised because of ethnicity, culture, aboriginality, gender, spiritual values, sexuality, disability, age, economic, social or health status, or any other ground.
2. Respect for an individual's needs includes recognition of the person's place in a family and community. Nurses should, therefore, facilitate the participation of significant others in the care of the individual if, and as, the person and the significant others wish.
3. Respect the individuals needs, beliefs and values includes culturally informed and appropriate care, and the provision of as much comfort, dignity, privacy and alleviation of pain and anxiety as possible.

4. Respect includes the development of confidence and trust in the relationship between nurses and the people for whom they care.
5. Nurses acknowledge that there is a power imbalance in the relationship between a person or group receiving nursing care and health care provider. To promote a trusting and professional relationship, and to prevent any exploitation of individuals, nurses have an ethical responsibility always to maintain appropriate professional boundaries between themselves and persons to whom they provide care.

VALUE STATEMENT 2

Nurses accept the rights of individuals to make informed choices in relation to their care.

Explanatory Statements

1. Individuals have the right to make decisions related to their own health care, based on accurate and complete information given by health care providers. Nurses must be satisfied that they have the person's consent for any care or treatment they are providing. If individuals are not able to provide consent for themselves, nurses have a role in ensuring that valid consent is obtained from the appropriate substitute decision-maker.
2. Nurses have a responsibility to inform people about the nursing care that is available to them, and people are entitled morally to accept or reject such care. Nurses have a responsibility to respect the decisions made by each individual.
3. Illness and/or other factors may compromise a person's capacity for self-determination. Where able, nurses should ensure such persons continue to have adequate and relevant information to enable them to make informed choices about their care and treatment and to maintain an optimum degree of self-direction and self-determination.

VALUE STATEMENT 3

Nurses promote and uphold the provision of quality nursing care for all people.

Explanatory Statements

1. Quality nursing care includes competent care provided by appropriately prepared nurses.

2. Promotion of quality nursing care includes valuing life long learning and engaging in continuing education as a means of maintaining and increasing knowledge and skills. Continuing education refers to all formal and informal opportunities for education.
3. Nurses research and evaluate nursing practice in order to raise standards of care, and to ensure that such standards are ethical.
4. Research should be conducted in a manner that is ethically responsible and justified. Nurses should not participate in any research or experimental treatment on human subjects, which has not been approved by an Institutional Ethics Committee and which is not conducted in a manner consistent with the requirements of the National Health and Medical Research Council's national statements relating to ethical conduct in research involving humans.
5. Nurses contribute to the development and implementation of policy to make the best use of available resources and to promote quality care for individuals.

VALUE STATEMENT 4

Nurses hold in confidence any information obtained in a professional capacity, use professional judgement where there is a need to share information for the therapeutic benefit and safety of a person and ensure that privacy is safeguarded.

Explanatory Statements

1. The nurse respects a person's rights to determine who will be provided with their personal information and in what detail. Exceptions may be necessary in circumstances where the life of the individual may be placed in danger or where disclosure is required by law.
2. When personal information is required for teaching, research or quality assurance purposes, care must be taken to protect the person's autonomy, anonymity and privacy. Consent must always be obtained from the person or their lawful advocate.
3. Nurses protect persons in their care against breaches of privacy by confining their verbal communications to appropriate personnel and settings, and for professional purposes.
4. Nurses have an obligation to adhere to legislative guidelines limiting access to personal records (whether paper or electronic).

VALUE STATEMENT 5

Nurses fulfill the accountability and responsibility inherent in their roles.

Explanatory Statements

1. As morally autonomous professionals, nurses are accountable for their clinical decision making and have moral and legal obligations for the provision of safe and competent nursing care.
2. Nurses contribute with other health care providers in the provision of comprehensive health care, recognizing and respecting the perspective and expertise of each team member.
3. Nurses have a right to refuse to participate in procedures, which would violate their reasoned moral conscience (ie conscientious objection). In doing so, they must take all reasonable steps to ensure that quality of care and patient safety is not compromised.
4. Nurses have an ethical responsibility to report instances of unsafe and unethical practice. Nurses should support colleagues who appropriately and professionally notify instances of unsafe and unethical practice.

VALUE STATEMENT 6

Nurses value environmental ethics and a social, economic and ecologically sustainable environment that promotes health and well being.

Explanatory Statements

1. Nursing includes involvement in the detection of the ill effects of the environment on the health of persons, the ill effects of human activities on the natural environment, and assisting communities in their actions on environmental health problems aimed at minimizing these effects.
2. Nurses value participation in the development, implementation and monitoring of policies and procedures, which promote safe and efficient use of resources.
3. Nurses acknowledge that the social environment in which a person resides has an impact on their health, and in collaboration with other health professionals and consumers, initiate and support action to meet the health and social needs of the public.

DETERMINATION AND REPORT OF THE REMUNERATION
TRIBUNAL*Electoral Districts Boundaries Commission*

No. 3 OF 2003

1. The Constitution Act 1934 provides for the establishment of an Electoral Districts Boundaries Commission to review and carry out periodic redistribution of the boundaries of the State's House of Assembly electoral districts. The Commission has perpetual succession and the functions of a Royal Commission.

2. The members of the Commission are:

- 2.1 the most senior Supreme Court puisne judge available, appointed by the Chief Justice, to be the Chairman;
- 2.2 the Electoral Commissioner; and
- 2.3 the Surveyor-General.

3. Section 78 (7) of the Constitution Act 1934 states that 'The members of the Commission (other than the Chairman) are entitled to remuneration determined by the Remuneration Tribunal.'

4. When the Remuneration Tribunal determined the remuneration for the Electoral Commissioner it decided (refer to Report relating to Determination No. 2 of 1997) that any remuneration determined in the separate inquiry under Section 78 (7) of the Constitution Act would be in addition to the Electoral Commissioner's salary.

5. The Tribunal received from the Chairman, the Honourable Justice Prior, copies of the 2003 Report of the Electoral Districts Boundaries Commission and a summary of the Commissioner's hours spent at formal meetings and public hearings for the period February 2001 to March 2003. This information did not include the hours Commissioners spent reading relevant materials, preparing for meetings and hearings, or travelling time in attending country hearings.

6. The Tribunal notes the request from the Chairman of the Electoral District Boundaries Commission inviting the Tribunal to make a separate determination for the Deputy Electoral Commissioner, Mr David Gully, pursuant to Section 7 of the Electoral Act for 'his knowledge and expertise in the setting up and operation of the computer systems that assist the Commission with its deliberations'.

The Tribunal has considered this request and considers it more appropriate to address this matter as part of the annual review process for Statutory Officers, which is due to commence in September 2003. Accordingly the Tribunal invites further submissions relating to this matter as part of that process.

7. Having regard to the nature and extent of the additional work and responsibility of the two Commissioners, the Tribunal determines that an allowance of \$14 000 shall be paid to the Electoral Commissioner and the Surveyor-General.

REMUNERATION TRIBUNAL

REPORT RELATING TO DETERMINATION NO. 4 OF 2003

1. Introduction

1.1 In February 2003 the Remuneration Tribunal issued Determination No. 1 of 2003. The salaries prescribed in Clause 2 were operative from 1 November 2002 on an interim basis. The Tribunal stated it would give further consideration to the salaries of the Judiciary and other Statutory Officers following further movement in other States and the Commonwealth Tribunal Determination passing through Parliament without motion for disallowance.

1.2 In May 2003 the Tribunal was advised that the time periods had elapsed for any disallowance motions regarding the Commonwealth Determination and that no such disallowance motions were made within the Commonwealth Parliament, either from within the Senate or the House of Representatives.

1.3 On 7 May 2003, the Tribunal wrote to the interested parties, advising of the further review process and the Tribunal's intentions to proceed with making a final determination in relation to this matter. The Tribunal indicated that it would also inform itself on any further determinations made in other States since the Commonwealth Tribunal determination in relation to Judicial Officers was made in December 2002. The parties were invited to make any further written and oral submissions to the Tribunal for consideration. The parties included the Minister and members of the judiciary and statutory office holders whose offices are listed under Section 13 of the Remuneration Act 1990, as well as those covered by relevant sections of the Industrial and Employee Relations Act 1994.

1.4 On 3 June 2003 the Tribunal met to review and finalise this Determination. The Tribunal had received a further written submission from the Judicial Remuneration Co-ordinating Committee (JRCC) on behalf of the State judiciary and heard oral submissions from Justice Bleby, Chair of the JRCC, Justice Sulan and Judge Rice in this regard.

1.5 The JRCC submissions discussed the further movement of judicial remuneration that had taken place in Western Australia and the current reviews taking place in Queensland and New South Wales. It was suggested to the Tribunal that this Determination be deferred for a short period to allow for any further movement in Queensland or New South Wales in the very near future to be considered. The submissions also discussed the use of the ABS survey of Average Weekly Earnings, judicial conditions of service, and the proposed operative date for any determined increase in salaries.

1.6 David Watts attended the Tribunal hearing on behalf of the Minister, however no instructions had been received from Government to put forward a position, and none was expected to be forthcoming.

2. Comparison of Federal and State Judicial Salaries

- 2.1 As in previous reviews the Tribunal has examined the Federal and other State judicial salaries. As stated earlier, the JRCC submissions presented to the Tribunal also referred to salaries presently payable in other relevant jurisdictions.
- 2.2 The Commonwealth Tribunal, in its major review of judicial and related offices' remuneration, awarded a three stage increase for High Court, Federal Court and Family Court judges, the first stage being 7% to operate from 1 July 2002.
- 2.3 The Tribunal was advised of the relevant judicial salaries (for the Puisne Judges in States and Territories), as at February 2003 and this was updated with further changes as at June 2003. They are as follows:

Court/State		Salary \$	Operative Date
New South Wales	February 2003	231 880	1.10.02

Western Australia	February 2003	234 170	1.1.03

Family Court	February 2003	237 100	1.7.02
	June 2003	258 920*	1.7.03*

* The new salary rates from the Commonwealth addition a new long leave allowance of \$6 170 is Tribunal (Determination 2003/12) were handed down on 12 June 2003, to be operative from 1 July 2003, however the time period for lodging disallowance motions regarding this determination is yet to lapse.

** These salaries are also likely to increase in the near future to align with the recent Commonwealth Determination (2003/12).

*** In payable to a Supreme Court Judge.

Other State Tribunals are currently considering the Commonwealth Tribunal Determinations and further reviews of State judicial remuneration are likely to be undertaken as a result.

Particular mention was made of the reviews that had recently taken place in Western Australia, Queensland and New South Wales. The salaries listed above reflect the reviews undertaken in these States. Victoria will consider the effect of the Commonwealth Tribunal's Determination in its next annual review of judicial salaries in that State.

The Tribunal also noted the recent Commonwealth Determination (2003/12) that provides for increased salaries that incorporate 5% as recommended in the previous 2002 review together with an additional 4% as part of the 2003 annual review.

This determination is a review of interim salaries set operative from 1 November 2002. The Tribunal has not taken the most recent New South Wales and Commonwealth Determinations (2003/12) into consideration as they are operative from 1 July 2003 and the time period for disallowance motions relating to Determination 2003/12 has not yet lapsed. The Tribunal believes it to be more appropriate that these Determinations be considered in the 2003 annual review process which is due to commence in October 2003.

3. Other Conditions

- 3.1 The JRCC submissions presented a number of other issues for consideration by the Tribunal including:

- the submission made in respect of Determination No. 1 of 2003 to remain relevant and relied on;
- to take into account the further 5% increase in the Commonwealth Determination from 1 July 2003, together with any further increase determined by the Commonwealth Tribunal based on relevant economic indices;
- reference and reliance on the Western Australian Tribunal's report dated 26 March 2003, where it states:

'In the Tribunal's considered opinion, particularly having regard to issues of recruitment and retention, there is no practical alternative but to maintain the longstanding relativities that have existed nationally in the area of judicial remuneration. Indeed a meeting of State Judicial Remuneration Tribunals held in Melbourne in mid February 2003, confirmed as essential the continuance of these relativities.'
- 'inferior conditions as justification for a benchmark salary at best equivalent to that of the Federal and other courts'. Inferior conditions were clarified as conditions of service that have a calculable effect on the total remuneration package and may include the value of annual leave, long service leave and judicial pensions as part of an annual remuneration package. The Tribunal was advised that the value of these components in South Australia was in the order of 65% of current salary, whilst the value of the equivalent benefits in most other jurisdictions exceeded 100% of current salary and the JRCC considered this to be a highly relevant factor in the fixation of judicial remuneration. The JRCC did not seek a special allowance, however requested consideration of this factor by the Tribunal when fixing proper remuneration for Judges in this State.
- any increases in salary now determined to be backdated to 1 November 2002 as Determination No. 1 of 2003 was an interim determination and as this will be a finalisation of that determination the date already determined should continue to operate.

- 3.2 The issue of 'inferior conditions' was discussed further at the Tribunal hearing and it is noted that the recent Queensland Determination has provided for a long leave allowance of \$6 170 per annum for Judges of the Supreme Court.

Whilst the Tribunal acknowledges this allowance and will take it into consideration when determining the remuneration payable to the judiciary, it is not prepared to determine allowances or provide for any other remuneration over which it has no control.

The Tribunal reiterates its previous comments from paragraph 5.2.4 of its last report where it stated:

'If South Australia is so out of line with other jurisdictions it seems more appropriate for these issues to be considered by Parliament or other determining authorities as appropriate. The Tribunal is concerned that this issue is continuously raised in lieu of it being addressed by Parliament or other appropriate authority.'

4. Revised Salaries Determination

- 4.1 Consequently, the Tribunal has now further considered the salaries of the judiciary in this State following consideration of:

- the finalisation of the Commonwealth Tribunal's Determination (2202/21) as a consequence of no disallowance motions being received;
- subsequent reviews which have been undertaken in other States relating to judicial remuneration;
- additional submissions from the JRCC; and

- information presented to the previous Tribunal hearings in relation to attraction and retention factors and the South Australian economic circumstances;

and pursuant to Part III of the Remuneration Act determines the salary of the Puisne Judge of the Supreme Court will be \$236 390 operative from 1 November 2002.

- 4.2 The salaries for all other judicial officers listed in this Determination have also been increased, from the same date to the annual amounts shown in the Determination being *pro-rata* increases.
- 4.3 The salaries of W. Chivell, State Coroner (for as long as he continues to perform this function with his current conditions of employment), lay Deputy Presidents and Commissioners of the Industrial Relations Commission and Commissioners of the Environment, Resources and Development Court have also been increased, from the same date to the annual amounts shown in the Determination being *pro-rata* increases.

Dated 20 June 2003.

Notice of Assessment of Quantity of Water taken when Meter Readings are not Used

Pursuant to section 126 of the Water Resources Act 1997 I, John David Hill, Minister for Environment and Conservation, hereby declare that the basis of assessment of water use rates and the method by which the assessment of water use where meter readings are not used or when water is taken without licence or authorisation will be as set out in Schedule 1.

SCHEDULE 1

The basis of the assessment of water use will be the estimation of water requirements for a crop.

The method by which the estimation of water requirements for crops will be used is the methodology of Doorenbos and Pruitt (1977), as refined by Allen et al. (1998) and set out in the PIRSA Technical Report No. 263, second edition ('the Report'). Crop factors will be calculated from Kc (crop coefficient) values from Food and Agriculture Organisation of the United Nations, Rome Irrigation and Drainage Paper 56 (Allen, Pereira et al, 1998) ('FAO 56') and using site specific monthly Kp (pan coefficient) values and average monthly Kg values (bird guard coefficient) set out in the Report.

The methodology incorporates the use of Bureau of Meteorology evaporation data, the application of crop specific factors to evaporation figures to calculate crop evapotranspiration for the crop and location in question, subtraction of effective rainfall and an allowance for leaching for salinity control and irrigation efficiency.

The water requirement calculated by this method is expressed as depth of water required in millimetres for a particular crop grown over a particular season. Depth multiplied by the number of hectares of that crop grown (in each specified season for short season crops), multiplied by 10 gives the volume of water required for each crop in kilolitres.

A copy of each of the Report and FAO 56 is obtained through the GEO Science Library at the Department of Primary Industries and Resources South Australia. The reference number for the Report is ISBN No. 07308-4349-1 and the reference number for FAO 56 is Kinetica/Amicus No. 000020037000 or ISBN No. 92-5-104219-5.

This notice has effect in relation to the financial year commencing on 1 July 2003.

Dated 24 June 2003.

and Conservation

Part 2—Variation of Water Resources Regulations 1997 (Gazette 26.6.1997 p 3221) as varied

Insertion of regulation 28

4. After regulation 27 insert:

Exemption in relation to the Tintinara Coonalpyn Prescribed Wells Area

28. (1) Subject to subregulation (2), a person who is the holder of a licence that—

- (a) has been granted in respect of a well in the prescribed area; and
- (b) is endorsed with a water (taking) allocation for irrigation purposes,

is exempt from section 124 of the Act to the extent that the levy declared for the 2002/2003 financial year in relation to the licence was based on the right to take water for irrigation purposes under the licence.

(2) An exemption under subregulation (1) is subject to the following conditions:

(a) that the holder of the licence pay to the Minister an amount calculated as follows:

$$A = NA \times LR$$

where

A is the amount to be paid

NA is the volume of water (expressed in megalitres) notionally allocated to the person for irrigation purposes for the area to which the licence relates taking into account the relevant circumstances referred to in Columns A, B and C of Table 1, being an amount determined by multiplying the notional volume of water allocated per hectare that applies under Column C of Table 1 (depending on the kind of crop identified in Column A of Table 1 and the irrigation system used by the holder of the licence identified in Column B of Table 1) by the number of hectares where water was authorised to be used for irrigation purposes in respect of the period of restriction

LR is the relevant levy rate (per megalitre) that applies under Column D of Table 1,

and if the holder of the licence was authorised to use water for more than one crop during the period of restriction, then there will be an amount payable with respect to each of the relevant circumstances that apply under Table 1;

(b) that any amount payable under paragraph (a) be paid by the holder of the licence to the Minister by a date and in a manner specified by the Minister by a notice served on the holder of the licence after the commencement of this regulation.

(3) Subject to subregulation (4), a person who is the holder of a licence that—

(a) has been granted in respect of a well in the prescribed area; and

(b) is endorsed with a water (taking) allocation for industrial purposes or for aquaculture,

is exempt from section 124 of the Act to the extent that the levy declared for the 2002/2003 financial year in relation to the licence was based on the right to take water for industrial purposes or aquaculture (as the case may be) under the licence.

(4) An exemption under subregulation (3) is subject to the following conditions:

(a) that the holder of the licence pay to the Minister the amount specified in Table 2 in relation to his or her licence;

- (b) that an amount payable under paragraph (a) be paid by the holder of the licence to the Minister by a date and in a manner specified by the Minister by a notice served on the holder of the licence after the commencement of this regulation.

(5) For the avoidance of doubt, if in respect of a particular area covered by a licence within the ambit of subregulation (1) or subregulation (3) there was no authorisation to use water during the period of restriction for the relevant purpose, then no amount is payable under subregulation (2) or (4) (as the case may be) in relation to water authorised to be used for that purpose.

(6) Subject to subregulation (7), a person who is the holder of a licence that—

- (a) has been granted in respect of a well in the prescribed area; and
- (b) is endorsed with a water (taking) allocation for irrigation purposes,
