3. Application has now been made to the Governor under section 48 of the Development Act 1993 for the approval of the development. The application, as it relates to the proposed wind farm, lodged with the Development Assessment Commission on 13 June 2002, was amended on 23 July 2002, expanded upon by the Public Environmental Report dated 10 March 2003 and further amended by the Response Document and Amendment to Proposal dated 14 July 2003:

Documents:

- (a) Development Application and Environmental Assessment dated 13 June 2002.
- (b) Amendment to Development Application and Environmental Assessment dated 23 July 2002.
- (c) Public Environmental Report dated 10 March 2003.
- (d) Response Document and Amendment to Proposal dated 14 July 2003.

4. I am satisfied that an appropriate Public Environmental Report, and an Assessment Report, have been prepared in relation to the development, in accordance with the requirements of Division 2 of Part 4 of the Development Act 1993.

5. I have, in considering the application, had regard to all relevant matters under section 48(5) of the Development Act 1993.

Decision

PURSUANT to section 48 of the Development Act 1993 and with the advice and consent of the Executive Council, I grant a development authorisation for the proposal submitted by TrustPower Ltd for the development of a wind farm on the Sellicks Hill Range near Myponga, subject to conditions.

CONDITIONS OF APPROVAL

1. The Myponga/Sellicks Hill Wind Farm shall be developed in accordance with:

- The Site Layout Plan;
- The Access Route Plan; and
- The Electrical Layout & Connection Routes Plan;

as provided for Appendix D of the Response Document and Amendment to the Proposal dated 14 July 2003.

2. Construction must not be commenced until:

- (a) an Environmental Management and Monitoring Plan (EMMP) has been developed to the satisfaction of the Environment Protection Authority. The EMMP must include those additional matters set out in Section 7 of the Assessment Report; and
- (b) a private certifier or the District Council of Yankalilla has certified to the Development Assessment Commission that all work that constitutes building work under the Development Act, 1993, complies with the Building Rules.

3. Clearance of remnant native vegetation on the site or adjacent public roads for access during construction shall be minimised and be in accordance with the Native Vegetation Council requirements.

4. A compliance officer whose sole responsibility is verification of compliance shall be on-site at all times during construction to ensure all environmental management and monitoring is being conducted in accordance with the approved Environmental Management and Monitoring Plan and provide reports on any issue or variance with the prescribed requirements to the Environment Protection Authority.

5. Compliance checking of noise level measurements shall be carried out by a specialist noise consultant in accordance with the Environment Protection Authority Wind Farms Environmental Noise Guidelines to confirm the predictions made in Bassett Acoustics report A8185, dated February 2003, within two months of commissioning of the wind turbine installation.

6. Analysis of any variations to the assessed turbine layout, or turbine model, that occurs during the detailed design or construction phase of the project shall be carried out by a specialist noise consultant and shall be confirmed as being in accordance with the EPA Wind Farms Environmental Noise Guidelines prior to any construction of the affected turbines taking place. Any variations require further approval.

Note: For the purposes of these conditions a specialist noise consultant is taken to be one eligible for membership of both the Institution of Engineers Australia and the Australian Acoustical Society.

7. A public viewing platform with associated car parking and landscaping shall be established on Reservoir Road in accordance with the plan shown in the Public Environmental Report dated 10 March 2003, Appendix I, subject to the approval of the District Council of Yankalilla and Transport SA as land owners, with all costs borne by the proponent.

8. Screen planting shall be established on the Main South Road verge in accordance with Figures B & D in Appendix F of the Response Document and on the northern edge of Reservoir Road up to the end of the first left hand bend from the Main South Road intersection. The screen planting shall commence prior to the operation of the project and in consultation with the District Council of Yankalilla and Transport SA, with costs borne by the proponent.

9. Any costs associated with changes to the overtaking lane on Main South Road (heading south) that may be required by Transport SA, following its proposed review of the operation of the overtaking lane, shall be borne by the proponent.

10. Any additional measures required by Transport SA to minimise the potential for driver distraction shall be implemented to the satisfaction of the District Council of Yankalilla and Transport SA with all costs being borne by the proponent.

11. Signs directing traffic to the proposed viewing platform shall be erected on Main South Road and Reservoir Road in consultation with Transport SA with all installation and on-going maintenance costs being borne by the proponent. All signs shall be in accordance with Australian Standards for Tourist Signing and the South Australian Tourist Sign Posting Policy.

12. All access points used during construction and maintenance shall be designed and constructed to Transport SA standards, with all costs being borne by the proponent.

13. The wind turbines shall be painted matt off-white/grey to minimise the visual impact and any potential for glare or reflection and shall not display any signs, logos or other advertising displays.

14. The wind turbines and associated infrastructure and site shall be kept clean and tidy and serviced regularly with any graffiti being removed and with all repairs to rectify breakdown or damage being effected as soon as is practicable.

15. Any new stobie poles for transmission lines shall be colour treated to reduce their visual impact and, where possible, new lines shall use a flat line configuration.

16. Upon decommissioning of the wind farm, the site shall be returned, as far as is possible, to its condition prior to the commencement of the development, with the turbines and all above ground electrical infrastructure no longer required for electricity transmission being removed.

17. If development is not commenced by substantial work on the site with two years of the date of this authorisation, the Governor may cancel the authorisation by written notice.

18. A landscaping and revegetation plan will be required for the construction and operational stages. Pest plant and animal control aspects will need to be addressed. The plan should be prepared in consultation with the Department for Environment and Heritage and the Native Vegetation Council, and shall be incorporated into the Environmental Management and Monitoring Plan.

NOTES TO APPLICANT

- The applicant is reminded of its general environmental duty, as required by Section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that its activities on the whole site, including during construction, do not pollute the environment in a way which causes or which may cause environmental harm. In particular, an appropriate soil erosion and drainage management plan, prepared in accordance with the Environment Protection Authority Stormwater Pollution Prevention Code of Practice for the Building and Construction Industry, will be required to be submitted and approved before construction commences (as part of the Environmental Management and Monitoring Plan).
- The applicant shall liaise with Transport SA's Murray Bridge Office Customer Liaison and Safety Officer (presently Ms Alison Allen, (08) 8532 8122) prior to any works being undertaken on or adjacent to Main South Road and Reservoir Road.
- The Environmental Management and Monitoring Plan requires further work before it will receive approval, by the addition of those matters outlined in Section 7 of the Assessment Report dated November 2003.
- The development shall proceed in accordance with all relevant State and Commonwealth law (as amended from time to time).

- If, during construction or operation of the development, the proponent discovers evidence of an Aboriginal site or any Aboriginal objects or remains, the proponent is required, pursuant to the Aboriginal Heritage Act 1988, to report particulars to of such discovery to the Minister for Aboriginal Affairs and Reconciliation and thereafter comply with any directions given by the Minister Aboriginal Affairs and Reconciliation.
- The proponent shall negotiate with the District Council of Yankalilla and the City of Onkaparinga on any matters arising from the development where the Councils have responsibilities under the Local Government Act 1999, and Roads (Opening and Closing) Act 1991.

Given under my hand at Adelaide on 20 November 2003.
