9. In accordance with commitments by the applicant, wastewater shall not be stored in open storage ponds until it is first treated to reduce the potential for odours to occur.

10. The applicant shall ensure that stormwater, which does not comply with the Environment Protection (Water Quality) Policy 2003 criteria, is not discharged from the site without prior effective treatment.

11. Noise from the development shall be in accordance with the following:

Construction Activities—Mondays to Saturdays:

- (a) not exceed 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property;

12. The proponent shall, subject to obtaining the landowner's consent in relation thereto, install, operate and maintain frost fans on the property located north of the proposed development site either in accordance with the recommendations in the Development Report and assessed in the Acoustic Report on frost fan impacts and in accordance with the Environment Protection Authority's standards for their operation, siting and distance from potential receptors, or in accordance with any alternative arrangement negotiated with the landowner. If the landowner refuses consent for the establishment of frost fans on the property located to the north of the proposed development, the proponent is excused from compliance with this condition.

13. Landscaping of the site shall commence prior to construction of the proposed Major Development, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased.

14. In accordance with commitments by the applicant, building walls up to 3 m shall be clad in colorbond 'ironstone' (or similar), and walls above 3 m shall be clad in colorbond 'paperbark' (or similar).

- The Barossa Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including any Conditions or Notes that apply in relation to this provisional development authorisation).
- Should the applicant wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Development Report and Assessment Report referred to in this provisional development authorisation. If an application variation involves substantial changes to the proposal, pursuant to section 47 of the Development Act 1993, the applicant may be required to prepare an amended Development Report for public inspection and purchase. - It is recommended that the applicant ensure there are measures in place to promote staff vehicle access to the site from the northern end of Light Pass Road.
- The applicant is advised that a further development application and authorisation will be required pursuant to Part 4, Division 2 of the Development Act 1993, for the following matters:
  - Prior to commencement of Stage 2, if the applicant proposes to treat wastewater at the existing Wolf Blass winery wastewater treatment system.
  - For the establishment of any additional frost fans that may be required as part of Stage 2.
  - If the external advertising signage is amended from that indicated in the Development Report, or additional advertising signage is proposed.

No building works shall commence on a stage of the development, however, until a favourable decision in relation to building rules compliance in respect of that stage has been notified in writing to the applicant by me or my delegate.
6. A decision on building rules compliance will only be made after a Building Rules assessment and certification has been undertaken and issued by the Barossa Council, or a private certifier, in accordance with the provisions of the Development Act 1993, and after the Minister for Urban Development and Planning receives a copy of all relevant certification documentation, as outlined in Regulation 64 of the Development Regulations 1993 (refer to 'Notes to Applicant' below for further information).
7. The management and monitoring of the pre-construction, construction and operational phases of the wine bottling and storage facility shall be undertaken in accordance with the Environmental Management and Monitoring Plan, prepared by Parsons Brinckerhoff on behalf of Beringer Blass Wine Estates Limited (Report No. 2102542A-04-0600-02), dated October 2004, and as amended by the letter from Nolan Rumsby Planners dated 23 November 2004.
8. The wastewater collection and treatment system shall be designed to ensure that the general obligations of the Environment Protection (Water Quality) Policy 2003 are met, and to ensure that effluent does not overflow or escape from drains, pipes, sumps, tanks, storage/treatment basins into any watercourse, or into stormwater drains which do not drain into the effluent collection, treatment and disposal system, except where the effluent complies with criteria in the above Policy.
9. In accordance with commitments by the applicant, wastewater shall not be stored in open storage ponds until it is first treated to reduce the potential for odours to occur.
10. The applicant shall ensure that stormwater, which does not comply with the Environment Protection (Water Quality) Policy 2003 criteria, is not discharged from the site without prior effective treatment.

11. Noise from the development shall be in accordance with the following:

Construction Activities—Mondays to Saturdays:

- (a) not exceed 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property;
- (b) not exceed 45 dB(A) between the hours of 6 a.m. and 7 a.m. measured and adjusted at the nearest existing residential property;

- (d) site deliveries and other noisier construction activities shall be scheduled to minimise noise impacts;
- (e) all other aspects of construction activities shall be undertaken in accordance with the Environmental Management and Monitoring Plan.

Operation of the development:

- (a) shall not exceed 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) shall not exceed 45 dB(A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (c) a short term typical maximum noise level of 60 dB(A) when measured at the nearest existing residential property.

12. The proponent shall, subject to obtaining the landowner's consent in relation thereto, install, operate and maintain frost fans on the property located north of the proposed development site either in accordance with the recommendations in the Development Report and assessed in the Acoustic Report on frost fan impacts and in accordance with the Environment Protection Authority's standards for their operation, siting and distance from potential receptors, or in accordance with any alternative arrangement negotiated with the landowner. If the landowner refuses consent for the establishment of frost fans on the property located to the north of the proposed development, the proponent is excused from compliance with this condition.

13. Landscaping of the site shall commence prior to construction of the proposed Major Development, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased.

14. In accordance with commitments by the applicant, building walls up to 3 m shall be clad in colorbond 'ironstone' (or similar), and walls above 3 m shall be clad in colorbond 'paperbark' (or similar).

15. All lighting must be directed and shielded in such a way as to prevent glare from the site, and any lighting that is not in use for operational or security reasons must be switched off.

If an application variation involves substantial changes to the proposal, pursuant to section 47 of the Development Act 1993, the applicant may be required to prepare an amended Development Report for public inspection and purchase. An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to section 48 of the Development Act 1993.
- It is recommended that the applicant finalise the required water licence arrangements pursuant to the Water Resources Act 1997, for the construction of the proposed water storage dam and subsequent re-use of water, prior to construction of the proposed Major Development (in order for operations to proceed). - It is recommended that the applicant ensure there are measures in place to promote staff vehicle access to the site from the northern end of Light Pass Road.
- The applicant is advised that a further development application and authorisation will be required pursuant to Part 4, Division 2 of the Development Act 1993, for the following matters:

ROAD TRAFFIC ACT 1961  
*Transporting 2.9 m High Containers*

1. *Approval*

1.1 Pursuant to section 161A of the Road Traffic Act 1961, and Regulation 35 of the Road Traffic (Miscellaneous) Regulations 1999, I hereby approve:

1.1.1 Articulated Motor Vehicles, which exceed 4.3 m in height when carrying 2.9 m high containers to operate in South Australia subject to the conditions specified in this notice.

2. *Exemption*

2.1 Pursuant to section 163AA of the Road Traffic Act 1961, I hereby exempt:

2.1.1 Articulated Motor Vehicles carrying 2.9 m high containers from the following provisions of the:

(i) Road Traffic (Vehicle Standards) Rules 1999:

- Rule 72 (1)—Height

Subject to the conditions specified in this notice.

3. *Conditions Applying to this Approval and Exemption*

3.1 The containers shall have a maximum overall height not exceeding 2.9 m.

3.2 The overall height of the vehicle and load shall not exceed 4.6 m.

3.3 The overall width of all axles or axle groups of the vehicle carrying the load, excluding the front axle or front axle group, when measured between two vertical parallel planes located at the outer extremities of the tyres, shall not be less than 2.1 m.

3.4 The conditions set out in this notice apply to the vehicles operating under this notice and does not relieve the owner and/or driver of the duty to observe all other provisions of the Road Traffic Act and Regulations.

3.5 The conditions set out in this notice may be overridden by a limitation fixed at any time on a bridge, culvert, causeway road or road ferry.

3.6 When operating under this notice, the driver must carry a legible, current and complete copy of this notice and produce this document when requested by a Transport SA Inspector appointed under the Road Traffic Act 1961 and/or the Motor Vehicles Act 1959, or a Police Officer.

3.7 Except as otherwise specified in this notice, the Standard Form Conditions prescribed in the Road Traffic (Oversize or Overmass Vehicle Exemptions) Regulations 1999, for the purposes of section 115 of the Road Traffic Act 1961, shall not apply.

3.8 This notice shall stand alone. It cannot be used in conjunction with any other exemption, notice or permit.

4. *Commencement and Expiry of this Notice*

4.1 This notice is valid from 1 January 2005 and expires at midnight on 31 December 2006. The notice appearing in the *South Australian Government Gazette* dated 27 March 2003 is revoked at midnight on 31 December 2004.

Explanatory Notes

- Some parts of the road system, such as bridges, overhead services and wires, roadside furniture (signs, traffic lights etc.) and vegetation, may not provide sufficient clearance for a vehicle and load travelling under this notice.
- Section 106 of the Road Traffic Act, *Damage to roads and works*, requires the driver to notify the Police, Transport SA or Office of Public Transport if the driver causes damage to roads, bridges and culverts, or interferes with roadside furniture.
- If the driver causes anything to fall on to the road that may obstruct, damage or cause injury to people or vehicles, Australian Road Rule 293 requires the driver to remove it or take action to have it removed. Examples include tree branches or damaged traffic signs.
- This concession has been provided to allow time for the transport industry to re-equip with low profile vehicles so that these containers can be carried within an overall vehicle height limit of 4.3 m. However, this concession has been extended pending the national implementation of the Performance Based Standards Scheme, which may allow the long-term transport of these containers on some vehicles (up to a height of 4.6 m) that meet specified Performance Based Standards.

- (d) whether all persons entitled to participate in the distribution of the estate are *sui juris* and where any person so entitled is not *sui juris* then the date of birth of such person must be disclosed in the affidavit:

Provided that if there is any person who is not *sui juris*, and who may in the event of an accretion to the estate become entitled to participate in distribution, the proposed administrator must give an undertaking that in such a case he or she will forthwith provide a guarantee or make an application to the Registrar to dispense with a guarantee;

- (e) that all persons entitled to participate in the distribution of the estate are resident in South Australia, or if any such person is not so resident that such person has for the purposes of section 65 (1) (b) of the Act appointed an agent or attorney within the State in the Form No. 6B;
- (f) details of all liabilities of the estate and whether there are sufficient assets in the estate for payment of such liabilities.

49.13 Upon receiving the affidavit referred to in either Rule 49.11 or Rule 49.12 the Registrar may allow the grant to issue without a guarantee unless in the circumstances of the case the Registrar is of the opinion that a guarantee should be provided.
