In particular, such a plan must include measures to ensure that:

- Development does not increase the flood risk to any other property by provision being made to ensure that stormwater

run-off leaving the site post development does not exceed that which would be expected in its natural state for a 100 year ARI flood event.

- Development is designed to adequately manage stormwater by provision being made to ensure that run-off from the site post development is suitably collected, treated and disposed of. This shall be achieved by adopting the following principles:

- The peak rate of stormwater run-off from the development should not exceed that which would be expected from the site in its natural state for all storms up to and including a 20 year ARI event. This will require run-off detention and storage.

- The volume of stormwater run-off from the development shall not exceed that which would be expected from the site in its natural state, for all storms up to and including a 20 year ARI event. This will require run-off retention including reuse and/or other means of depletion as may be necessary.

- Provision for stormwater run-off treatment should be incorporated to ensure that all stormwater run-off from the development meets appropriate quality standards.

4. All landscaping indicated on Drawing V627/D/L/1801 Rev. A5 shall be established within 6 months of the date of this approval and shall be maintained and nurtured at all times with any diseased or dying plants being replaced.

5. The main vehicle entrance gate adjacent to Argent Road is to be moved a sufficient distance inside the property boundary to ensure that there is sufficient space so that no part of any vehicle extends onto the road or road reserve.

6. All carparking areas are to be clearly line marked and numbered within 3 months of the date of this approval.

7. Buildings must be clad in a light colorbond colour, such as 'Marino'.

8. Noise associated with the operation of the proposed development must not exceed an equivalent noise level of 38 dB(A) at any noise sensitive receiver, when measured in accordance with the Environment Protection (Industrial Noise) Policy 1994. This condition shall be achieved for neutral weather conditions.

9. The environmental noise assessment must be repeated by the proponent following final selection of the plant and equipment. The extent and technical details of the noise reduction measures to achieve condition 8 shall be provided with this assessment. The report shall be submitted to the EP Authority for approval prior to construction.

10. An environmental noise assessment associated with the construction phase of the project must be submitted as part of an approved Construction Environment Management Plan (as described in condition 2 (b)). The environmental noise assessment shall identify the noise reduction measures that are reasonable and practicable. The report shall be submitted for approval prior to construction. The relevant content of the assessment must be shown to have been included within an approved construction plan.

11. A particulate monitor must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of particulate emissions from the stack.

12. A continuous N0x sampler must be installed, to the reasonable satisfaction of the Development Assessment Commission in consultation with the Environment Protection Authority, on one of the stacks of each furnace for the purposes of monitoring the level of N0x emissions from the stack. Installation in the recuperative section is recommended, being before ambient air dilution.

13. If the stack N0x samplers are installed after the ambient air inlet (not in the recuperative section) then two gas flow velocities (total gas out, furnace gas or ambient air in) must be continuously measured, to determine the dilution factor.

14. On each stack that does not contain the particulate and N0x samplers from each furnace, the flow velocity, temperature and pressure must be continuously monitored.

15. The stack monitoring equipment and sampling ports shall be installed in accordance with the Environment Protection Authority 'Monitoring Manual—Emission Testing Methodology for Air Pollution Manual' (1996).

16. During construction, stormwater management must ensure:

- Surface stormwater from outside the construction site is diverted around all disturbed areas;
- Surface stormwater on the construction site is intercepted and redirected to protect all exposed areas;
- Erosion and sediment control structures are installed prior to the commencement of all site disturbance and construction works;
- All stockpiles/spoil heaps are surrounded by a silt fence at the down-slope toe of the stockpile; and
- Provision is made on site for the collection and temporary storage of all site debris and waste. Storage facilities used to store waste materials must be located away from all drainage paths to prevent litter and debris from entering the stormwater system, be covered to prevent the entry of stormwater or dispersal by wind, and be sealed to prevent leakage.

17. Areas containing materials such as fuels and chemicals that have the potential to contaminate stormwater must be adequately banded. (This requirement would be satisfied by compliance with Australian Standards (AS3780.8) for storage tank and bund design).

NOTES TO THE APPLICANT:

The Environment Protection Authority recommended that the attached notes be included in any decision notification that may be issued.

Licensing Requirements

The proposed facility will require licensing under the Environment Protection Act 1993. Scheduled activities under the Act (Schedule 1—Activities of Environmental Significance) that would occur as a result of this proposal includes, but may not be limited to:

- 1 (1) Chemical Storage and Warehousing Activities
- 2 (4) Ceramic works
- 3 (4) Activities producing Listed Waste
- 8 (2) Fuel Burning
- 7 (6) Earthworks Drainage (may be required during the construction phase)

It should be noted that the onus is on the person proposing to undertake an activity of environmental significance to seek an environmental authorisation (works approval and/or licence) before undertaking any such activity (Refer to Schedule 1 of the Environment Protection Act 1993).

It is recommended that any licence required under the Environment Protection Act be applied for at least six months prior to the planned commencement of commissioning of the plant.

The Environment Protection Authority may attach any relevant conditions to any licence granted under the Environment Protection Act 1993. Licence conditions would include the following, as indicated above:

Recommended Licence Condition 1: Noise monitoring shall occur during commissioning and annually thereafter at positions nominated by the EP Authority. The indices L_{Amax} , L_{Aeq} and $LA90$ shall be measured as a minimum over consecutive 15 minute periods to record at least the equivalent of 7 days of data. Weather conditions sufficient to determine the Pasquill-Gifford stability category shall be recorded for the measurement period. Attended measurements of the above indices shall occur on two separate occasions during the automatic logging night period. The attended measurements shall also include measurements of the indices in the $1/3$ Octave band spectrum format. A report summarising the results of the noise monitoring shall be submitted to the nominated EP Authority Licence Co-ordinator within 14 days of completion of the monitoring.

Recommended Licence Condition 2: Where noise monitoring indicates that operation of the facility and ancillary equipment exceeds an equivalent noise level of 38 dB(A) when measured and adjusted in accordance with the Environmental Protection (Industrial Noise) Policy 1994, a noise reduction program shall be carried out. The noise reduction program will comprise identification of the responsible noise sources, determination of the reasonable and practicable measures available and implementation of these measures following approval of the report by the EP Authority. An acoustic engineer shall manage the program.

Recommended Licence Condition 3: Install aerators on the stormwater ponds if odorous conditions arise. Include the Gutteridge Haskins and Daveys (GHD) Report recommendations as part of the final design of the stormwater ponds, irrigation and landscaping plan. To be dealt with as a condition of licence.

General Environmental Duty

The applicant is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act, to take all reasonable and practical measures to ensure that its activities on the whole site, including during construction, do not pollute the environment in a way which causes or which may cause environmental harm.

Traffic Management

The applicant is advised to contact Transport SA in regard to proposed transport routes for the delivery of raw materials and the distribution of finished product, so that any possible traffic impacts on the Gawler township and the local road network are satisfactorily addressed and minimised.

**Gas Regulations 1997
(Regulation 6)**

Functions and powers of the Essential Services Commission

I PATRICK CONLON, Minister for Energy, by this notice, pursuant to regulation 6 of the Gas Regulations 1997, specify that:

- (a) in addition to ESCOSA's functions and powers under the Gas Act 1997 and the Essential Services Commission Act 2002, ESCOSA has the function of determining disputes between Origin Energy and one or more gas entities that falls within the range of matters that arise from:

a claim by one or more gas entities that have requested access from Origin Energy to fully contracted infrastructure or for the provision of gas from the Katnook gas basin, that Origin Energy is not complying with the requirements of the Memorandum of Understanding; and

- (b) ESCOSA is to make its determination in accordance with the mediation process as specified in Schedule 1 to this notice.

For the purposes of this notice and Schedule 1 to this notice (but not Schedule 2):

"gas entity" has the same meaning as used in the Gas Act 1997;

"ESCOSA" means the Essential Services Commission of South Australia established under the Essential Services Commission Act 2002;

"Origin Energy" means Origin Energy Retail Limited; and

"the Memorandum of Understanding" is a reference to the memorandum of understanding between myself and Origin Energy dated 10 May 2004, a copy of which is set out as Schedule 2 to this notice; and

"fully contracted infrastructure" has the same meaning as used in the Memorandum of Understanding.

**HON PATRICK CONLON MP
MINISTER FOR ENERGY**

Dated: 23 September 2004

Schedule 1

Mediation process

1. Disputes subject to mediation conducted by ESCOSA

- 1.1 If one or more gas entities who have requested access from Origin Energy to fully contracted infrastructure or for the provision of gas from the Katnook gas basin, claim that Origin Energy is not complying with the requirements of the Memorandum of Understanding then Origin Energy's alleged non-compliance is a dispute that may be the subject of mediation conducted by ESCOSA.
- 1.2 For the purposes of clause 1.1, a claim that Origin Energy is not complying with the requirements of the Memorandum of Understanding includes any of the following allegations:
- 1.2.1 that Origin Energy is not complying with the guiding principles for negotiations as stated in clause 2 of the Memorandum of Understanding;
 - 1.2.2 that Origin Energy is not complying with the requirements for pricing as stated in clause 5 of the Memorandum of Understanding;
 - 1.2.3 that Origin Energy is not complying with the requirements to provide information as stated in clause 6 of the Memorandum of Understanding; and
 - 1.2.4 that Origin Energy is not complying with the process for access requirements as stated in clause 7 of the Memorandum of Understanding.

2. Request for mediation

- 2.1 A gas entity that claims to be in dispute with Origin Energy in relation to a matter that may be the subject of mediation conducted by ESCOSA may, by notice in writing to ESCOSA, refer that dispute to ESCOSA for mediation.
- 2.2 A notice to ESCOSA under clause 2.1 must include a description of:
- 2.2.1 the request made to Origin Energy for access to fully contracted infrastructure or for the provision of gas from the Katnook gas basin; and
 - 2.2.2 Origin Energy's alleged non-compliance with the Memorandum of Understanding.

3. Interested parties may make submissions

- 3.1 An interested party may seek to make submissions to ESCOSA in relation to a dispute that is the subject of mediation conducted by ESCOSA.
- 3.2 An interested party is a party whose rights under an existing contract may be adversely affected by Origin Energy granting a request in an application for access to fully contracted infrastructure or for the provision of gas from the Katnook gas basin.

4. Time lines for mediation

- 4.1 Mediation must commence no later than 20 business days after the date upon which ESCOSA receives a request for it to mediate a dispute made pursuant to clause 2.

THIS MEMORANDUM is dated 10th May 2004.

BETWEEN:

AND

RECITALS:

- A. It is intended that the gas market in South Australia be fully competitive by July 2004 (“**Gas FRC**”).
- B. To enable Gas FRC to occur, all market entrants must be able to access the metropolitan and regional gas distribution infrastructure to deliver gas to end users.
- C. Currently, gas transported through the Moomba to Adelaide pipeline is transferred into the metropolitan and regional distribution systems via twenty-five gate stations and associated laterals.
- D. It is understood that access to the gate stations and associated laterals listed in Schedule 1, is the subject of contractual arrangements between EPIC Energy South Australia Pty Limited (ABN 54 068 599 815) (“**EPIC Energy**”) and Origin Energy.
- E. It is also understood that the haulage capacity on the Katnook transmission pipeline, and all infrastructure required to transport gas from the transmission pipeline to the distribution system in the South East of South Australia (“**associated infrastructure**”), is subject to contractual arrangements between EPIC Energy and Origin Energy.
- F. The gate stations and laterals listed in Schedule 1, the Katnook transmission pipeline and associated infrastructure (referred to in Recital E) that are the subject of contractual arrangements with Origin Energy, will hereinafter be referred to as the “fully contracted infrastructure”.

- G. It is further understood that Origin Energy has entered into contractual arrangements with the Katnook Producers [Omega Oil NL, SAGASCO Southeast Inc and Origin Energy Resources] for the purchase of gas in the South East of South Australia.
- H. In order to facilitate Gas FRC, all market entrants will have to negotiate with Origin Energy for access to the fully contracted infrastructure and may have to negotiate for the provision of gas from the Katnook gas basin.
- I. This MoU establishes the guiding principles and a process framework for negotiations between Origin Energy and all market entrants relating to those matters referred to in Recital H of this MoU.

1. **INTENTION TO CREATE LEGAL RELATIONS:**

8. **PROCESS DISPUTES:**

8.1 If Origin Energy does not comply with any of the requirements in this MoU then that failure to comply will be deemed to be a dispute.

8.2 Once a dispute has arisen, a request may be made by the party to the application this MoU, to ESCOSA to act as a mediator in the dispute.

8.2.1 Mediation must begin no later than 20 business days after a request to mediate is received by ESCOSA; and

SECTION 25 (5) (b)

Variation of Petroleum Exploration Licence—PEL 113

NOTICE is hereby given that under the provisions of the Petroleum Act 2000, pursuant to delegated powers dated 28 March 2002, *Gazetted* 11 April 2002, page 1573, the conditions of the abovementioned Exploration Licence have been varied as follows:

1. During the term of the licence, the Licensee shall carry out or cause to be carried out exploratory operations on the area comprised in the licence in accordance with such work programs as are approved by the Minister from time to time. Years one to five exploratory operations are guaranteed. These exploratory operations shall include but not necessarily be limited to:

Year of Term of Licence	Minimum Work Requirements
One	200 km seismic; geological and geophysical studies

Three	4 wells; 300 km 2D seismic
Four	4 wells; 100 km 2D seismic
Five	4 wells

This variation provides some flexibility in the timing of drilling wells and the substitution of some 3D seismic for part of the original 2D. The revised work requirements as a result of this variation would not have altered the outcome of the original competitive tender process.
