- construction shall not commence until an amended 'Construction Environmental Management Plan' and 'Environmental Management and Monitoring Plan' has been prepared by the proponent to the reasonable satisfaction of the Environment Protection Authority and approved by Governor or his delegate;

17. Mould pouring and cooling shall occur within the Furnace Building whereby fumes, odours and particulates from cooling moulds are extracted to pollution control equipment.

18. Used foundry sand shall be stored within a designated bunker or within an enclosure.

19. Where material is stored within a bunker, the material shall remain below the height of the storage bunker walls.

20. The materials stored in bunkers shall be suitably conditioned by moisture or by some other means to prevent the generation of fugitive emissions during handling.

Compaction specifications (certified by a registered engineer), shall be prepared to the reasonable satisfaction of the Ceduna District Council, for the areas for residential allotments, commercial development, retail development, tourist development, carparks, public boat ramp and hardstand shall be submitted to the Development Assessment Commission.

17. Stockpiled soils shall be suitably managed to control dust emissions, erosion and weed infestation.

18. Armour rock used for breakwaters and revetments shall not be contaminated by fine sediment.

19. No construction activities or building works shall commence until designs for the proposed effluent disposal system for the development site and connection to the town's STED Scheme are to be finalised and implemented.

20. Arrangements for the expansion of the town's effluent lagoons to cater for the increased demand from the development shall ensure suitable standards and facilities (with adequate capacities) are adopted and located for effluent disposal, including the potential long-term demand from the possible residential, commercial, retail and tourist related uses of the site.

21. The wastewater collection and treatment system shall be designed to ensure that the general obligations of the Environment Protection (Water Quality) Policy 2004 are met, and to ensure that effluent does not overflow or escape from drains, pipes, sumps, tanks, storage/treatment basins into any watercourse, or into stormwater drains which do not drain into the effluent collection, treatment and disposal system, except where the effluent complies with criteria in the above Policy.

22. The proponent shall provide undergrounded public lighting, power supply, water supply, television antenna and telephone supply to each allotment in accordance with, and to engineering design standard plans approved by the electricity, mains water and telephone public utility authorities.

23. The applicant shall ensure that there is no direct discharge of stormwater into the marina basins, waterways or marine environment for rainfall less than, and including, 1:20 year ARI events.

24. The land to be used for land-based allotments shall be formed to prevent stormwater flows entering into the waterways.

25. Water-sensitive urban design measures and practices shall be adopted for the management of run-off, including stormwater capture and re-use.

26. Undeveloped allotments shall be left in a neat and tidy condition, with soil surfaces stabilised to minimise erosion.

27. Road, drainage, footpath and intersection designs (i.e. engineering construction plans) shall be finalised in accordance with the requirements of the Department for Transport, Energy and Infrastructure and the Ceduna District Council, prior to construction commencing. Drainage arrangements for existing roads and the railway line easement must not be altered unless agreed by the owner of the road. Road and drainage designs shall include water table levels, drainage inverts and pavement details. The roads and drainage works shall be built in accordance with these designs.

28. Road and associated kerbing shall be designed and constructed to avoid stormwater flows entering into the waterways by directing flows to inland disposal areas.

29. Road designs shall not affect existing natural drainage lines in such a way as to cause flooding.

30. A set-back distance of 2 m from the top of waterway edge treatments shall be provided for the construction of further coastal protection works if required in the future.

31. The design of the Eyre Highway realignment shall avoid spills of toxic materials from entering the marina basins, waterways or marine environment.

35. The public boat ramp facility shall be generally designed in accordance with the South Australian Boating Advisory Committee's Guidelines for Planning, Design and Construction of Boat Launching Facilities.

36. The boat refuelling dock and marine toilet pump-out facility shall be designed to meet the requirements of the Environment Protection Authority, the Department for Transport, Energy and Infrastructure and the Department of Health respectively.

37. The proponent shall ensure satisfactory oil spill and fire-fighting facilities and contingencies, determined in consultation with the Department for Transport, Energy and Infrastructure and the Metropolitan Fire Service (MFS) and/or the Country Fire Service (CFS) respectively, are in place prior to commencement of operation of the marina.

38. The water contained in the marina basin shall be kept to a quality appropriate for secondary contact recreation, public amenity and the maintenance of marine aquatic ecosystems, as stipulated from time to time by the ANZECC Australian Water Quality Guidelines for Fresh and Marine Waters.

39. The acoustic protection mound shall be designed and maintained to ensure stormwater run-off is suitably managed to minimize soil erosion and flooding, to provide public access and to result in noise levels from the Eyre Highway and railway that do not exceed:

- (a) 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) 45 dB(A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (c) a short term typical maximum noise level of 60 dB(A) when measured at the nearest existing residential property.

41. Landscaping and streetscaping of the site shall commence prior to the issuing of Certificates of Title for each stage of the land division, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased. A weed control program shall also be implemented.

42. The Ceduna District Council shall be given seven days notice, prior to the commencement of works, and be provided with the name and contact facilities for the person responsible for co-ordinating site works covered by this approval.

#### NOTES TO APPLICANT

1. Approvals will be required for all components of the development not hereby approved, including:

- the land division;
- the marina moorings and other marina facilities;
- the public boat ramp, travel lift, hardstand, boat repair/maintenance facility and carpark areas;
- the boat refuelling and boat effluent disposal facility;
- the installation of navigational aids;
- the community/cultural centre; and
- all residential, commercial, retail, tourist related and other buildings.

2. Further design and infrastructure/service plans (i.e. subject to separate applications to Council in the future) would be required should further development approval be sought for the community/cultural centre and for commercial, retail and tourist related buildings.

3. Pursuant to Development Regulation 64, the applicant is advised that the Ceduna District Council or private certifier conducting a Building Rules assessment must:

- (a) provide to the Minister a certification in the form set out in Schedule 12A of the Development Regulations 1993, in relation to the building works in question; and
- (b) to the extent that may be relevant and appropriate:
  - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
  - (ii) assign a classification of the building under these regulations; and
  - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.

Regulation 64 of the Development Regulations 1993, provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Urban Development and Planning.

4. The Ceduna District Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including any Conditions or Notes that apply in relation to this provisional development authorisation).

5. Should the applicant wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Environmental Impact Statement and Assessment Report referred to in this provisional development authorisation. If an application variation involves substantial changes to the proposal, pursuant to section 47 of the Development Act 1993, the applicant may be required to prepare an amended Environmental Impact Statement for public inspection and purchase. An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to section 48 of the Development Act 1993.

6. Pursuant to the Harbors and Navigation Act 1993, the Council will need to enter into a licence agreement with the Minister for Transport over adjacent and subjacent land on terms acceptable to the Minister prior to the commencement of construction. Such agreement will require completion of the works to the satisfaction of the Minister, at which time the responsibility and control of the area will be transferred so as to minimise the Minister's ongoing responsibilities. It is currently anticipated that the transfers will be via a sales agreement pertaining to the reclaimed residential, tourist and commercial portions of the land, and undertakings by the Council to accept the groynes/breakwaters as reserve and the remaining area under long term lease.

7. The applicant's CEMMP and OEMMP should be prepared taking into consideration, and with explicit reference to, relevant EPA policies and guideline documents, including, but not limited to: the Environment Protection (Air Quality) Policy 1994, the Environment Protection (Water Quality) Policy 2003, the Occupational Health and Safety Regulations, EPA Guidelines on Odour Assessment, using odour source modelling 2003, EPA Handbook for Pollution Avoidance on Commercial and Residential Building Sites 2004, EPA Bunding and Spill Management Guidelines 2004 and the EPA Stormwater Pollution Prevention Codes of Practice, in addition to other legislative requirements and Guidelines/Australian Standards requiring compliance.

8. The following activities in relation to the components of the development hereby approved and/or requiring future approval will require licences under the Environment Protection Act 1993:

- **Earthworks Drainage:** The conduct of earthworks operations in the course of which more than 100 kilolitres of waste water containing suspended solids in a concentration exceeding 25 milligrams per litre is discharged directly or indirectly to marine waters or inland waters.

- **Marinas and Boating Facilities:** The conduct of:

- (a) facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 50 or more powered vessels at any one time; or
- (b) works for the repair or maintenance of vessels with the capacity to handle five or more vessels at any one time or vessels 12 m or more in length.

- **Dredging:** removing solid matter from the bed of any marine waters by any digging or suction apparatus, but excluding works carried out for the establishment of a visual aid to navigation and any lawful fishing or recreational activity.

9. It is likely that as a condition of such licences the Environment Protection Authority will require the licensee to carry out specified environmental monitoring of water quality and to make reports of the results of such monitoring to it.

10. It is also likely that the Environment Protection Authority will require the identification to it of any vessels that visit the marina from international ports or from ports beyond Adelaide and the surrounding area, together with details of the routes travelled by such vessels (for the purpose of identifying the potential introduction of harmful marine species).

11. All works associated with the rehabilitation and remediation of the site must be undertaken in accordance with the General Environmental Duty as defined in Part 4, section 25 (1) of the Environment Protection Act 1993, the Environment Protection (Water Quality) Policy 2004 and other relevant Environment Protection Policies made under Part 5 of the Environment Protection Act 1993, the ANZECC Best Practice Guidelines for Waste Reception Facilities at Ports, Marinas and Boat Harbours in Australia and New Zealand, draft guideline Environmental Management of On-Site Remediation and other relevant EPA publications and guidelines.

12. The proponent is advised of the General Environmental Duty under section 25 of the Environment Protection Act 1993, which requires that a person must not undertake any activity, which pollutes, or may pollute, without taking all reasonable and practical measures to prevent or minimise harm to the environment.

13. The management plan for acid sulphate soils should comply with Guidelines issued by the Coast Protection Board.

14. The applicant is reminded of its obligations under the Aboriginal Heritage Act 1988, whereby any 'clearance' work, which may require permission to disturb damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs and Reconciliation, according to section 23 of the Aboriginal Heritage Act 1988.

15. The applicant, and all agents, employees and contractors, such as construction crews, must be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Department of Aboriginal Affairs and Reconciliation in the event that archaeological items (especially skeletal material) are uncovered during earthmoving.

16. The applicant, and Council after hand-over of infrastructure, must comply with the Public and Environmental Health Act 1987, in regard to the maintenance of suitable water quality within the marina basin (and any stormwater holding ponds) to protect public health and amenity.

17. The expression 'secondary contact recreation' includes activities such as wading, boating and fishing in which some human contact with the water may occur, but in which the probability of bodily immersion or the intake of significant amounts of water is minimal.

18. If foreign vessels are allowed to berth in the marina the proponent would need to consult with Transport SA (Marine Safety Section) to address any requirements of the Australian Quarantine Inspection Service (AQIS) and Australian Customs Service.

19. It is recommended that the applicant approach the Ceduna District Council with a view to the Council enacting of by-laws to manage activities associated with:

- the entrance channel and waterways to ensure safe navigation and to protect water quality;
- the boat ramp, wash-down, slip-way and hardstand;
- the refueling facility and marine toilet pump-out facility;
- the residential development and reserves (including storm-water management devices).

20. The Ceduna District Council will need to review and amend the zoning and policies in the relevant Development Plan to reflect any development approved by the Governor and for future assessment and decision-making for buildings and structures not part of this development authorisation.

21. Noise generated from the non-residential components of the development should not exceed:

- (a) 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994.
- (b) 45 dB(A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994.
- (c) a short term typical maximum noise level of 60 dB(A) when measured at the nearest existing residential property.

22. When preparing development plan policies for the marina site, the Ceduna District Council will need to adopt the following EPA recommended noise criteria for the design of buildings used for residential or tourist accommodation that are potentially affected by noise impacts from the Eyre Highway and railway:

- (a) internal noise levels ranging from 30-40 dB(A) and 35-45 dB(A) for bedrooms and living areas respectively;
- (b) indoor noise levels between 30-45 dB(A) for sleep disturbance.

23. When preparing development plan policies for the marina site, the Ceduna District Council will need to consider the following design requirements for buildings used for residential or tourist accommodation that are affected by noise impacts from the Eyre Highway and railway:

- Use of separation, building orientation, sheds, continuous fencing and mounding to reduce noise levels outside of the residence.
- Locating noise sensitive spaces of the proposed residence away from the highway and railway (with the windows and openings directed away from the noise source) and less sensitive areas such as the kitchen, storage areas and laundry towards the noise source.
- Minimising the size and numbers of windows oriented towards the traffic noise source.
- Windows to noise sensitive spaces be closed during the night time.
- Replacing conventional pitched roof/eaves designs with flat roof/parapet designs.
- Using construction techniques that seal air gaps around doors and windows.
- Relocate conventional wall air vents to areas not facing the traffic noise source.
- Using solid core doors in conjunction with rubber seals and internal doors with rubber seals into habitable rooms to provide an 'acoustic air lock' arrangement.
- Using thicker window glass or double-glazing to noise sensitive spaces, such as bedrooms.

- Providing alternative means of ventilation for rooms where elements such as windows in the dwelling facade are to be closed to provide a minimum acoustic performance.

24. Land division creating allotments extending into the water over the sea bed need to negotiate tenure arrangements with the Minister for Transport. Current policy is that Freehold Title would not be granted if the seabed is alienated. Leasing arrangements are the standard form of tenure for private moorings.

25. It is unlikely that a land division will be approved unless provision is made for a set back distance of 2 m from the top of the edge treatments (for the construction of coastal protection works if required in the future).

26. A common building scheme encumbrance or equivalent device for the purpose of ensuring compliance with design standards for residential and other buildings will be required at the land division stage.

27. Binding legal arrangements (e.g. easements, encumbrances, charge-back arrangements etc. as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar-General for the issue of new Certificates of Title, to ensure financial and management responsibilities related to the maintenance of edge treatments, the design and appearance of structures and the installation of future coast protection works are clearly allocated. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.

28. A site audit report will be required to be completed by an Environmental Auditor (Contaminated Land) and submitted to the relevant planning authority, prior to the issue of Certificates of Title. The site audit report should be presented to purchasers of allotments.

29. The Minister has a specific power to require testing, monitoring and auditing under section 48C of the Development Act 1993.

1. Standing and default contract price categories will only apply to small customers (that is, those customers who consume less than 160MWh of electricity per annum) who are purchasing electricity under AGL SA's standing or default contract terms and conditions. Standing and default contract prices apply in accordance with the following principles:

- (a) 'Daily Consumption' is the total electricity consumption for the period to which the customer's bill relates, divided by the number of days in that period.
- (b) Domestic Light/Power 110:
  - applicable to all residential consumption (excluding Off-Peak Controlled Load Tariff 116) in premises used wholly or principally as private residences.
- (c) Charitable Institutions 112:

- (d) Controlled Load 116:
  - for electricity used in permanently installed storage water heaters with a rated delivery of not less than 125 litres, storage space heaters and other approved thermal storage applications; the hours of application are fixed from time to time by AGL SA with control by time switch or other means. This price does not apply to electricity used outside those hours;
  - customers who were taking supply under this tariff, or who had applied to do so, as at 30 June 2003 are subject to the conditions which were applicable at that date;
  - this price is only available in conjunction with tariffs 110, 112, 126, 126M, 128, 128M, 140 or 140M.
- (e) General Supply 126:
  - available only to non-residential customers.

- 
- (f) General Supply 126M (Monthly Meter Reading):
- available only to non-residential customers;
  - applies to customers whose meters are scheduled to be read monthly, and who are billed monthly;
  - a monthly meter reading fee applies to this tariff in addition to the above prices.
- (g) General Supply Time of Use 128:
- available only to non-residential customers with appropriate metering;
  - includes customers previously on tariffs 120 + 121 and 130 + 131 who were taking supply under those tariffs, or who had applied to do so, as at 30 June 1997. Those customers are subject to the conditions which were applicable to those tariffs at that date, in addition to the current conditions.
- (h) General Supply Time of Use 128M (Monthly Meter Reading):
- available only to non-residential customers with appropriate metering;
  - includes customers previously on tariffs 120 + 121 and 130 + 131 who were taking supply under those tariffs, or who had applied to do so, as at 30 June 1997. Those customers are subject to the conditions which were applicable to those tariffs at that date, in addition to the current conditions;
  - applies to customers whose meters are scheduled to be read monthly, and who are billed monthly;
  - a monthly meter reading fee applies to this tariff in addition to the above prices.
- (i) Obsolete Tariff 140 (formerly Farm Tariff 140):
- applies only to small customers that were taking supply under Obsolete Tariff 140, or who had applied to do so, as at 30 June 1997. Conditions applicable at that date apply, in addition to the current conditions.
- (j) Obsolete Tariff 140M (Monthly Meter Reading):
- applies only to small customers that were taking supply under Obsolete Tariff 140, or who had applied to do so, as at 30 June 1997. Conditions applicable at that date apply, in addition to the current conditions;
  - applies to customers whose meters are scheduled to be read monthly, and who are billed monthly;
  - a monthly meter reading fee applies to this tariff in addition to the above prices.
2. Peak period is 0700 hours to 2100 hours from Monday to Friday (Central Standard Time) for all tariffs other than tariff 110 except where the network meters do not recognise specific tariff days. In these situations peak period is 0700 hours to 2100 hours (Central Standard Time) each day for tariffs other than tariff 110.
3. Off peak period is all times other than peak period.
4. Where prices change during a billing cycle the bill for that billing cycle will be calculated on a *pro-rata* basis using:
- (a) the old price up to and including the date of change; and
  - (b) the new price from the date of change to the end of the billing cycle.

- (1) For the quota period commencing on 1 November 2008, an eligible licence in respect of the fishery may be allocated a number of pipi units calculated in accordance with this clause.

- (2) First, the following formula is to be applied:

$$A = \left( \left( \frac{B}{C} \times 680 \right) + \frac{320}{32} \right) \times \left( \frac{947}{1000} \right) \pm D$$

where—

*A* is the number of pipi units to be allocated to the licence

*B* is the catch history of the person who held that licence on 31 July 2007

*C* is the sum of the catch histories of all persons who held eligible licences in respect of the fishery and the Marine Scalefish Fishery on 31 July 2007

*D* is the total number of pipi units deducted from or added to the licence by way of variation of the unit entitlement under the licence during the quota period commencing on 13 December 2007.

- (3) If the unit entitlement under a licence is varied under clause 7 and the variation is not expressed to be only for the balance of the quota period during which it is made, the formula prescribed by subclause (2) must be applied as follows:
- (a) if the variation resulted in the unit entitlement under the licence being increased, the number of pipi units in the increase (as denoted by "D") must be added;
  - (b) if the variation resulted in the unit entitlement under the licence being decreased, the number of pipi units in the decrease (as denoted by "D") must be deducted.
- (6) Second, in the case of a licence specified in column 1 of the table below, the number of pipi units specified alongside in column 2 is to be added to the number of pipi units to be allocated to the licence, as calculated under subclause (2), to arrive at the total number of pipi units that may be allocated to the licence for the quota period commencing on 1 November 2008.

### **6—Allocation of pipi units to eligible licences—subsequent quota periods**

For the quota period commencing on 1 November 2009 or 1 November in a subsequent year, an eligible licence in respect of the fishery may be allocated a number of pipi units equal to the number of pipi units allocated to the licence immediately before the commencement of that quota period.

## Part 3—Variation of pipi quota entitlements

### 7—Variation of pipi quota entitlements

- (1) The Minister may vary conditions of eligible licences as follows:
  - (a) on joint application made to the Minister by the holders of any 2 licences in respect of the fishery subject to a condition fixing a pipi quota entitlement, the conditions of the licences may be varied so as to increase the unit entitlement under 1 of the licences and decrease the unit entitlement under the other licence by a corresponding number of units;
  - (b) on joint application made to the Minister by the holder of a licence in respect of the fishery subject to a condition fixing a pipi quota entitlement (the *first licence*) and the holder of a licence in respect of the Lakes and Coorong Fishery subject to such a condition (the *second licence*)—
    - (i) the conditions of the first licence may be varied so as to decrease the unit entitlement under that licence and the conditions of the second licence may be varied so as to increase the unit entitlement under that licence by a corresponding number of units; or
    - (ii) the conditions of the first licence may be varied so as to increase the unit entitlement under that licence and the conditions of the second licence may be varied so as to decrease the unit entitlement under that licence by a corresponding number of units;
  - (c) if the total catch of pipi taken by the holder of a licence in respect of the fishery during a quota period exceeded the pipi quota entitlement under the licence for that quota period, the conditions of the licence may be varied so as to decrease the pipi quota entitlement—
    - (i) if the catch exceeded the quota entitlement by not more than 500 kilograms—by 1 kilogram for each kilogram taken in excess of the quota entitlement; or
    - (ii) if the catch exceeded the quota entitlement by more than 500 kilograms but not more than 2 000 kilograms—by 2 kilograms for each kilogram taken in excess of the quota entitlement;
  - (d) if—
    - (i) the holder of a licence in respect of the fishery is convicted of an offence of contravening a condition of the licence fixing a pipi quota entitlement; and
    - (ii) the conduct constituting the offence involved the taking of more than 2 000 kilograms of pipi in excess of the quota entitlement,

the conditions of the licence may be varied so as to decrease the pipi quota entitlement under the licence for 3 quota periods following the conviction by 1 kilogram for each kilogram taken in excess of the quota entitlement for the quota period during which the offence was committed.

- (2) If a variation of a unit entitlement is to have effect only for the balance of the quota period during which the variation is made, the variation must be expressed to have such effect.
- (3) An application to vary unit entitlements must—
  - (a) be made in a manner and form approved by the Minister; and
  - (b) be signed by the applicants and completed in accordance with the instructions contained in the form; and
  - (c) be accompanied by the appropriate fee fixed in the *Fisheries Management (Fees) Regulations 2007*.
- (4) If an eligible licence in respect of the fishery is transferred to the holder of another such licence before 1 November 2009 and 1 of those licences is surrendered, the conditions of the remaining licence may be varied so as to increase the unit entitlement under that licence by the number of pipi units allocated to the surrendered licence immediately before its surrender.
