## DEVELOPMENT ACT 1993: SECTION 48

### *Decision by the Development Assessment Commission*

#### *Preamble*

1. The decision by the Governor under section 48 of the Development Act 1993, to approve the development of a waste management facility in the form of a solid waste landfill (Northward Fill (Inkerman Landfill Depot)) at Inkerman was published in the *Gazette* on 21 January 1999.

2. The development was the subject of an Environmental Impact Statement under section 46 of the Development Act 1993 and amended under section 47 of the Development Act 1993.

3. Amendments to the development authorisation were granted by the Development Assessment Commission as delegate of the Governor on 17 June 2004, 14 October 2004 and 13 April 2006.

4. Further amendments have been under consideration by the Development Assessment Commission as delegate of the Governor under Division 2 of Part 4 of the Development Act 1993.

5. The proposed amendments relate to the receipt of additional waste materials and are contained in the application from Transpacific Waste Management Pty Ltd dated May 2007 and letter from QED Pty Ltd dated 16 July 2007.

7. The Development Assessment Commission is satisfied that the amendments do not require the preparation of a further or amended Environmental Impact Statement.

8. The Development Assessment Commission has, in considering the matter, had regard to all relevant matters under section 48 (5) of the Development Act 1993.

#### *Decision*

PURSUANT to section 48 of the Development Act 1993, the Development Assessment Commission, as delegate of the Governor, grants development authorisation to the amended waste management facility in the form of a solid waste landfill (Northward Fill (Inkerman Landfill Depot)) at Inkerman, subject to conditions.

#### *Conditions*

1. Except where minor amendments may be required by other legislation, or by conditions imposed herein, proposed the solid waste landfill (Northward Fill (Inkerman Landfill Depot)) shall be undertaken in accordance with the plans in the application (dated 4 March 1997 and 'Supporting Documentation for Development Application' dated 24 November 1998), except as varied by the conditions listed below, the letters from Waste Management Pacific Pty Ltd dated 19 April 2004 and 19 May 2004, the application from Transpacific Waste Management Pty Ltd dated May 2007 and letter from QED Pty Ltd dated 16 July 2007 and the following drawings:

- Drawing No. 40033003/0080 dated 27 April 2004;
- Drawing No. 40033003/009 dated 27 April 2004;
- Drawing No. 40033003/013 dated 27 April 2004;
- Drawing No. 40033003/014 dated 27 April 2004,

or as amended by the following drawings:

- Northward Fill Detailed Design, Leachate Management—Edge Sump Arrangement, Sheet 13 (Revision D)—dated 10 May 2005.
- Northward Fill Stages 2 and 3, Detailed Design Pipework Layout, Sheet 15 (Revision A)—dated 7 February 2006.

#### *Groundwater*

2. Monitoring shall be undertaken over two successive winter seasons to determine the maximum seasonal watertable level for that period starting prior to the landfill operations starting.

3. An internal leachate-level monitoring bore network within each stage of the landfill shall be established to allow early identification of any problem with the leachate collection system before excessive leachate heads develop.

4. Groundwater monitoring bores shall be established down gradient of the leachate collection ponds to the satisfaction of the Environment Protection Authority.

#### *Leachate Management*

5. A construction report shall be provided to the Environment Protection Authority by a geotechnical consultant certifying that the liner and drainage system has been constructed in accordance with the design principles together with *in-situ* testing to demonstrate that the required permeability has been achieved prior to operations commencing, except as varied by conditions 5a, 5b, 5c and 5d.

5a. The high density polyethylene (HDPE) membrane and geotextile portion of the liner shall extend a minimum of 5 m laterally from the sump (measured from the toe of the sump side slope to the outer edge of the lining system) and the underlying clay outside the sump area must have a minimum thickness of 1 m.

5b. The drainage slopes towards drainage lines and along drainage lines shall be a minimum of 2% and 1% respectively.

5c. Construction of the landfill liner and polylock system shall be undertaken and certified in accordance with Level 1 supervision and Construction Quality Assurance (CQA) procedures. A report documenting the results of the Level 1 supervision and construction quality control tests for the compacted clay liner, HDPE membrane and polylock system shall be prepared to the reasonable satisfaction of the Environment Protection Authority.

5d. Appropriate procedures and controls shall be implemented on site to address potential risks or damage which may compromise the integrity of the leachate extraction system, including from vehicle traffic, Ultraviolet Radiation and any movements of the overland pipework including interim flexible pipework used while cells are operational.

5e. Contingency procedures shall be developed to address the potential for and response to any pipe rupture and leachate emission from the leachate pipes and extraction system.

5f. The LEMP shall be updated to incorporate conditions 5d and 5e.

#### *Landfill Gas*

6. Landfill gas extraction wells shall be installed progressively as filling of the cell proceeds, to the satisfaction of the Environment Protection Authority.

7. All fire control measures proposed at the site shall be approved by the Country Fire Service prior to operations commencing.

#### *Buffers and Landscaping*

8. The maximum height of the landfill including rehabilitation shall be restricted to 27 m AHD (generally 7 m above the existing natural surface) to be consistent with the existing maximum topographic levels in the region.

9. All perimeter plantings shall be started as early as practicable after the date of this approval to achieve maximum amelioration of visual impacts.

10. Screening by suitable plantings where adequate natural screening is not provided, shall be provided for the perimeter fence, all built structures, stockpiles and internal roads (where practicable) using suitable species in accordance with the Vegetation Management and Revegetation Plan proposed as part of the Landfill Environmental Management Plan (LEMP).

#### *Noise and Dust*

11. The proponent shall comply with the provisions of the Environment Protection (Industrial Noise) Policy (1994, SA Government).

12a. The maximum hours of operation shall be 6 a.m. to 7.30 p.m., seven days per week and waste shall only be received between 6 a.m. and 7 p.m.

12b. The Applicant shall ensure that close proximity and low impact directional reverse beepers are installed and utilised on all mobile plant associated with waste disposal operations.

12c. Noise levels shall not exceed 40 dB(A) in accordance with EPA Fact Sheet 424/04 between the hours of 10 p.m. and 7 a.m.

#### *Infrastructure*

13. The proponent shall pay all reasonable costs of the detailed design and construction of any public roadworks made necessary by this development and to the satisfaction of Transport SA.

#### *Building Rules*

14. Work constituting building work under the Development Act 1993, shall be certified by the Wakefield District Council or a private certifier, as complying with the Building Rules. Copies of the relevant certification documentation shall be provided to the Minister for Urban Development and Planning, as outlined in Regulation 64 of the Development Act 1993. No building works shall commence until a favourable decision has been notified in writing to the applicant by the Governor or the Development Assessment Commission as delegate of the Governor.

#### *Heritage*

15. The party with the benefit of this approval shall ensure that operators and construction personnel are made aware of the requirements under the Aboriginal Heritage Act 1988 that any burial site, skeletal material or significant artefact discovery is reported to the Division of State Aboriginal Affairs, Department of Environment, Heritage and Aboriginal Affairs.

#### *Wastes*

16. No Listed Waste as prescribed in Schedule 1, Part B of the Environment Protection Act 1993, or contaminated soil and material or asbestos containing material, shall be permitted to be disposed of without further development authorisation except as varied by the conditions listed below.

17. The proponent may receive and dispose of wastes from different regions as follows:

(a) Waste from the Adelaide Metropolitan Area that has gone through a Resource Recovery and Waste Transfer Facility; or

(b) Waste from regional areas outside the Adelaide Metropolitan area that has undergone a three bin kerbside recycling system or through an authorised Resource Recovery and Waste Transfer Facility.

18. The proponent may receive and dispose of the following additional wastes:

(a) Shredded tyres with other approved waste for a period of three years after which the proponent must apply for additional development approval.

(b) Non-friable asbestos subject to handling and disposal procedures for non-friable asbestos, including the Environmental Management procedures as discussed in detail in Appendix F of the variation proposal.

(c) Quarantine waste subject to approval from AQIS to receive and dispose of quarantine waste. In addition, the proponent shall:

(i) Receive quarantine waste that is accompanied by a completed Quarantine Waste Form developed by the Licensee.

(ii) Dispose of quarantine waste immediately upon receipt.

(iii) Ensure a minimum of 2 m of cover is placed over the waste immediately after disposal.

(iv) Dispose of waste in accordance with requirements of AQIS (including supervision, deep burial and tracking).

(v) Maintain records that describe details for each load of quarantine waste received and disposed including the following items:

- location of disposal;
- date and time of receipt and disposal;
- volume of waste;
- type of waste;
- producer of the waste;
- transporter of the waste and driver name;
- name of person supervising disposal of waste.

(vi) Maintain procedures for the notification, handling, supervision, records management and disposal of quarantine waste and tracking systems to prevent the re-excitation of quarantine wastes.

(d) Foundry sands—the proponent shall:

(i) Assess the Used Foundry Sand in accordance with EPA Guidelines for Used Foundry Sand (UFS)—classification and disposal (EPA 329/03—September 2003).

(ii) Ensure that the Used Foundry Sands have been classified prior to disposal according to the maximum concentrations in mg/kg (dry weight), and the maximum leachate concentration in mg/L, of the contaminants listed in the above referenced Guideline.

(iii) Ensure that only Used Foundry Sand classified and certified as Class 1 (or with lower contaminant levels) is received and disposed at the Premises.

#### NOTES

1. The Environment Protection Authority will require the proponent to prepare a Landfill Environmental Management Plan (LEMP) to satisfy the Authority's licensing requirements. Such a plan will be required to include provisions for the review, from time to time, of waste treatment and disposal methods to facilitate implementation of continuous improvement programs. The LEMP will be required to incorporate specific plans in relation to groundwater and leachate management, surface water management, vegetation and revegetation, soil erosion and

drainage and the management of pest plants and animals as outlined in the amendment to the Assessment Report. It will also be required to include provisions for implementation of corrective actions in the event of any failure of the leachate and groundwater management systems.

2. Control over the types of waste to be received at the site will be exercised by the Environment Protection Authority. This will be done through conditions of environmental authorisation or requirements under a relevant Environment Protection Policy rather than through conditions of development authorisation (see Condition 16).

3. A financial assurance in accordance with the provisions of section 51 of the Environment Protection Act 1993 will be required by the Environment Protection Authority as a condition of licence.

4. The outstanding stormwater management issues discussed in relation to section 25 of the Environment Protection Act 1993 must be clarified as part of the LEMP if approval is given to the project.

5. A comprehensive proposed groundwater monitoring and protection system would need to be finalised in the LEMP.

6. A landfill gas monitoring program should be prepared to the satisfaction of the Environment Protection Authority and incorporated into the LEMP.

7. As part of the LEMP a contingency plan for landfill gas extraction and combustion systems would be required.

8. A low flame multi-burn flaring system to be incorporated in the landfill gas management system would be required. The flaring system should be enclosed in a cage unit to prevent debris from going through the flame.

9. The acceptance criteria and frequency of monitoring for odours needs to be specified in the development of the LEMP

based on the conduct of modelling and approved management practices.

10. In order to achieve satisfactory environmental outcomes the use of a force-fed mechanical waste shredding system at the transfer station (as a means of reducing the potential for litter) is recommended. The Authority will require all waste to go through an Environment Protection Authority approved resource recovery centre which has a high percentage of re-use and resource recovery.

11. The Environment Protection Authority as part of the licence condition will state that litter will not be allowed to discharge off the proponent's property.

12. As part of the LEMP a surface water management system, which collects run-off from road surfaces, stockpile areas and other locations where saline water has been used for dust suppression, should be prepared. This water is to be directed to specific ponds for collection and disposal into the leachate collection system or alternative treatment approved by the Environment Protection Authority.

13. The polylock system for anchoring the HDPE membrane may form part of the liner if the design and proposed construction method can demonstrate that the performance of the liner system is not compromised.

14. The proponent is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that the activities on the whole site, including during construction, do not pollute the environment in a way which causes or may cause environmental harm.

Dated 21 September 2007.
