*Explanatory Notes:*

1. Default contract price categories will only apply to small customers (that is, those customers who consume less than 160MWh of electricity per annum) who are purchasing electricity under TRUenergy's default contract terms and conditions. The above default contract prices apply in accordance with the following principles:

- (a) Daily Consumption is the total electricity consumption for the period to which the customer's bill relates, divided by the number of days in that period.
- (b) Residential Default Pricing applies to residential customers in premises used wholly or principally as private residences based on Domestic 110 tariff\* meter configuration and, in the case of off peak, Off Peak Controlled Load Domestic 116 tariff\* meter configuration (refer to explanatory note 1 (e) below for the circumstances in which off peak rates apply).
- (c) Business Default Pricing—General Supply applies to non-residential customers in premises that are not used wholly or principally as private residences based on General Supply 126 tariff\* meter configuration.
- (d) Business Default Pricing—Time of Use applies to non-residential customers in premises that are not used wholly or principally as private residences based on General Supply Time of Use 128 tariff\* meter configuration.
- (e) Off Peak Controlled Load for electricity used in permanently installed storage water heaters with a rated delivery of not less than 125 litres, storage space heaters and other approved thermal storage applications. The hours of application are fixed from time to time with control by time switch or other means. This price does not apply to electricity used outside those hours.

2. The term 'peak' used in the above table means 0700 hours to 2100 hours from Monday to Friday (Central Standard Time) for all tariffs other than Domestic 110 tariff\* meter configuration, except where the network meters do not recognise specific tariff days. In these situations 'peak' means 0700 hours to 2100 hours (Central Standard Time) each day for meter types other than Domestic 110 tariff\* meter configuration.

3. The term 'Off peak' used in the above table means all times other than peak period which is described in explanatory note 2.

4. Where prices change during a billing cycle the bill for that billing cycle will be calculated on a *pro rata* basis using:

- (a) the old price up to and including the date of change; and
- (b) the new price from the date of change to the end of the billing cycle.

\* *These tariff descriptions refer to tariffs published by AGL South Australia Pty Limited.*
