PAUL HOLLOWAY, Minister for Urban
Development and Planning

DEVELOPMENT ACT 1993, SECTION 48: DECISION BY THE MINISTER FOR URBAN DEVELOPMENT AND PLANNING ON BEHALF OF THE GOVERNOR

Preamble

1. On 17 April 2008, the Minister for Urban Development and Planning gave notice in the *Government Gazette* that he was of the opinion that it was appropriate for the proper assessment of development of major environmental, social or economic importance that section 46 of the Development Act 1993, applied to any development of a kind listed in Schedule 1 of that notice in the parts of the State listed in Schedule 2 of that notice.

2. The Minister subsequently amended the declaration in the *Government Gazette* on 24 July 2008, to expand the gazetted marine boundaries to allow for greater flexibility in the design of the intake and outfall pipelines.

3. On 26 February 2009, a provisional development authorisation was granted under section 48 (6) of the Development Act 1993 and a final authorisation was given by *Gazette* notice of 12 March 2009, subject to conditions there set out.

4. The final authorisation specified all matters in relation to the authorisation as matters in relation to which the conditions of the authorisation might be varied, or new conditions attached.

5. As the Governor's delegate, I have decided to alter certain conditions to give effect to the acceptance of the proponent's landscaping plan and to correct various typographical and other minor errors appearing in the conditions.

6. For ease of reference, I have decided to revoke all conditions and substitute therefore the conditions contained herein.

Decision

PURSUANT to section 48 (7) (b) of the Development Act 1993, as the Governor's delegate I:

- (a) revoke all conditions and notes to the authorisation appearing in the *Gazette* of 12 March 2009;
- (b) impose the following conditions (together with notes) in lieu thereof; and
- (c) specify all matters herein as matters which may be varied or revoked, or in respect of which new conditions attached.

PART A: CONDITIONS OF DEVELOPMENT AUTHORISATION

General Conditions

1. Except where minor amendments may be required by other legislation, or by conditions imposed herein, the proposed Major Development shall be undertaken in strict accordance with the following documents:

- Development application dated 23 June 2008.
- Environmental Impact Statement (Volumes 1 and 2), Proposed Adelaide Desalination Plant EIS dated November 2008.
- The Environmental Objectives and Performance Criteria prescribed in Table 3.1 EIS or as modified in the conditions below, but in the case of conflict with a specific condition below the specific condition will apply.
- The detailed stormwater and runoff measures proposed in Tables 8.9 and 8.10 of the EIS or as modified in the conditions below but in the case of conflict with a specific condition below the specific condition will apply.
- Response to Submissions, Proposed Adelaide Desalination Plant by SA Water Corporation dated 22 January 2009, but in the case of conflict with a specific condition below the specific condition shall apply.
- Correspondence from SA Water to Department of Planning and Local Government dated 4 February 2009, containing additional information including a statement from the Independent Technical Review Panel information including ecotoxicology studies and marine water quality.
- Correspondence from SA Water to Department of Planning and Local Government dated 24 April 2009 and the attached Landscape Plan submitted with the letter, subject to variations if and to the extent necessitated by any changes in the location of structures as design of the desalination plant is refined and finalised.

2. Before any building work is undertaken on the site, the building work is to be certified by a private certifier, or by some person determined by the Minister for Urban Development and Planning, as complying with the provisions of the Building Rules (or the Building Rules as modified according to criteria prescribed by the Regulations).

Construction Phase

3. All works and site activities shall be undertaken in accordance with an approved Construction Environmental Management and Monitoring Plan (CEMMP) prepared to the satisfaction of the EPA before the commencement of construction activities. The CEMMP must include measures that at a minimum address:

- Groundwater management and monitoring, including disposal of groundwater if dewatering is required during construction.
- Site contamination management issues, including measures for the assessment, management, remediation or removal of any contaminated material, including soil and/or groundwater.
- A Soil Erosion and Drainage Management Plan on the construction site, including:
 - o minimising areas disturbed;
 - o appropriate location of stockpiles to protect drainage lines;
 - o installation of erosion control measures;

- o maintenance of erosion control devices and sediment control measures;
- o progressive rehabilitation and stabilisation (including revegetation) of disturbed areas;
- o minimising entry/exit points to the site; and
- o stabilisation of entry/exit points and the installation of devices (truck grates) to minimise the amount of soil and sand deposited on roads.
- A Noise and Vibration Management Plan, including:
 - o controlling noise at source;
 - o scheduling noisy activities between 7 a.m. and 10 p.m. and in accordance with the general environmental duty as described in section 25 of the Environment Protection Act 1993;
 - o equipment maintenance and use of mufflers and silencers;
 - o use of noise barriers;
 - o management of underwater noise to minimise adverse impact on marine fauna.
- A Construction Air Quality Management Plan, including:
 - o minimising the area and extent of earthworks required and ensure disturbed areas are protected and revegetated in a timely manner;
 - o specific measures to manage dust and limit emissions, including covered construction vehicles to prevent any loss of load; and
 - o management of any odours from any organic and other sources.
- A Waste Management and Minimisation Plan, that provides:
 - o mixed construction and demolition wastes to be stored in an undercover area or within skip bins with removable lids capable of preventing the infiltration and ponding of stormwater within the waste body and removed to an appropriately licensed waste depot;
 - o descriptions of on-site storage waste facilities;
 - o waste loading and off-loading areas;
 - o routes taken by waste disposal vehicles;
 - o locations for off-site waste disposal;
 - o steps taken to minimise waste generation and maximise re-use and recycling; and
 - o waste oil is to be stored in a bunded enclosure preventing the infiltration of stormwater into that bund in accordance with EPA Guideline Bunding and Spill Management June 2007.
- Identification of 'no go' zones for construction, including a 10 m buffer along the coastal cliff.
- Entry/exit points to the site should be minimised, stabilised and devices installed (i.e. truck gates) to minimise the amount of soil and sand leaving the site.

4. Access to and egress from the site (including internal movements within the site) shall be undertaken in accordance with an approved Traffic Management Plan prepared to the satisfaction of Department for Transport, Energy and Infrastructure and in consultation with the Onkaparinga Council (as appropriate) prior to commencing construction works. The Traffic Management Plan must identify:

- (a) the preferred access route;
- (b) outline measures to manage and mitigate traffic impacts to the local community and businesses during construction; and
- (c) the internal access route and on-site parking arrangements for at least 550 vehicles.

5. All upgrading works required to improve transport infrastructure shall be designed and constructed to the satisfaction of DTEI and in consultation with the Onkaparinga Council (as appropriate) with all costs (including the design, construction and project management) being the responsibility of the proponent.

6. The Onkaparinga and Marion Councils shall be given seven days notice, before the commencement of works, and shall be provided with the name and contact details of a person responsible for co-ordinating site works by this approval.

Operational Phase

7. The operation of the plant shall be undertaken in accordance with an approved Operational Environmental Management and Monitoring Plan (OEMMP) prepared to the satisfaction of the EPA prior to operation of the plant commencing. The OEMMP must include measures that at a minimum address:

- Ongoing management of environmental controls to protect stormwater quality, including:
 - o diversion of clean water away from potentially contaminated water;
 - o excavation of sediment from detention basins as required;
 - o regular inspection of bunded areas to assess the integrity of bunds;
 - o assessment of pollutant concentrations prior to re-use or off-site discharge from detention facilities; and
 - o regular inspection and maintenance of drainage channels.
- The re-use or recycle water including rainwater harvesting and stormwater recycling.
- The minimisation and validation of underwater noise levels during the operational phase.
- The minimisation of noise generation from the plant, equipment, machinery and vehicles on site.
- Commitment to solid waste management strategies, with a preference given to implementation of the waste hierarchy (in order of preference): avoid, reduce, re-use, recycle, recover, treat and dispose.
- Ongoing protection of groundwater.
- Emergency response and contingency procedures for dealing with spillages of chemicals and contaminants to the terrestrial and/or marine environment.
- Potential dust and odour generation.
- Measures that ensure marine sediments and debris that collect and accumulate along the fine screens in the pumping station are stored in skip bins with removable lids or in an undercover area capable of preventing the infiltration and ponding of stormwater within the waste body. Marine sediments and debris should be stored for a maximum period of 72 hours prior to removal to an appropriately EPA licensed compost facility or waste depot to reduce potential impacts associated with odour generation and the attraction of vermin.

8. A report should be prepared by an experienced and suitably qualified environmental consultant for approval by the EPA, in relation to any potential site contamination, prior to the operational phase of the plant commencing.

Design of Intake and Outfall Infrastructure

Intake Structure

9. The proponent shall design, construct and operate the intake infrastructure in accordance with design parameters provided in the Environmental Objectives and Performance Criteria (or as modified by the EPA through licensing requirements) including the following parameters:

- (a) location of the intake structure must be within the mid to deep benthic zone (envelope/zone shown on Figures 3.4 and 3.5 of the EIS);
- (b) intake structure to be located at a sufficient distance from the subtidal reef area to minimise the risk of entrainment or entrapment of reef species;
- (c) seawater intake velocity at the entry to the intake structure should not exceed 0.15 m/s under any operating condition;
- (d) seawater intake to incorporate screen/grill to restrict ingress of marine biota with a maximum clear grill spacing of 75 mm (as installed); and

- (e) any chlorination (or approved biocide) dosing system from the intake structure must ensure that there is no backflow of chemical dosing into the marine environment.

In addition to the above performance criteria, the proponent shall design the intake infrastructure as follows (or as modified by the EPA through licensing requirements):

- (f) installation of the full tunnel option (and not the hybrid tunnel option) for the intake and outfall infrastructure.

Outfall Structure

10. The proponent shall design, construct and operate the outfall infrastructure in accordance with design parameters provided in the Environmental Objectives and Performance Criteria (or as modified by the EPA through licensing requirements) including the following parameters:

- (a) location of the outfall structure must be positioned within the envelope zone shown on Figures 3.4 and 3.5 of the EIS and far enough from the intake to avoid any short circuiting;
- (b) the outfall system must terminate with diffusers designed to promote rapid dispersion of the saline concentrate into the surrounding seawater;
- (c) the outfall must achieve the required initial dilution of 50:1 (or the dilution rate identified by ecotoxicity assessments, if higher) at the seabed, under all current scenarios for the full range of operating conditions/flows and the plume height must not reach the water surface at any time;
- (d) the design of the outfall system should include consideration of the use of bypass flows or other measures to ensure the achievement of the target dilution requirements, particularly under low discharge flows;
- (e) the outfall diffuser shall be capable of:
- being extended; and
 - being modified to reduce the number of diffuser outlets and/or to adjust dispersion rates from each diffuser outlet; and
- (f) the saline concentrate discharge must not contain Cleaning in Place (CIP) chemicals or any other preservation chemicals, unless permitted by the EPA through licensing requirements.

Built Form

11. The proponent shall design, build and operate the built form structures in accordance with design parameters provided in the Environmental Objectives and Performance Criteria. In addition the proponent shall:

- (a) all landscaping shall be maintained in good health and condition at all times. A plant shall be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased; and
- (b) all lighting required on-site must use low profile lighting.

PART C: NOTES TO PROPONENT

EPA Licensing and General Environmental Duty of Care

- The applicant is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that the activities on the whole site, including during both construction and operation, do not pollute the environment in a way which causes or may cause environmental harm.
- Environmental authorisation in the form of a licence may be required for the construction and/or operation of this development. The applicant is advised to contact the Environment Protection Authority before acting on this approval to ascertain licensing requirements.
- The following activities in relation to the components of the development hereby approved and/or requiring future approval will require licences under the Environment Protection Act 1993:

- o Earthworks Drainage: the conduct of earthworks operations in the course of which more than 100 kilolitres of waste water containing suspended solids in a concentration exceeding 25 milligrams per litre is discharged directly or indirectly to marine waters or inland waters.

- o Dredging: removing solid matter from the bed or any marine waters by any digging or suction apparatus, but excluding works carried out for the establishment of a visual aid to navigation and any lawful fishing or recreational activity. SA Water already holds a five year dredging licence under the Environment Protection Act 1993, initiated in 2008 as part of the pilot desalination plant. A dredging licence will be required from the EPA prior to commencing any dredging activities associated with the full scale plant. To approve such a licence the EPA will require the preparation of a Dredge Management Plan which incorporates but is not limited to:

- sediment turbidity control including a monitoring plan and turbidity trigger that when exceeded will cease work;
- management of spoil from dredging works, including any spoil to be disposed of in accordance with the National Ocean Disposal Guidelines for Dredged Material;
- timing of any dredging to avoid dodeg tides and recruitment periods for key reef species (July to December) where feasible;
- address contingency, spill management and emergency responses associated with potential spillage of chemicals and contaminants to the marine environment; and
- address solid waste management strategies.

If the EPA's preferred option is disposal of any dredge spoil to land, the proponent must consider suitable sites.

If dredged soil is deposited to land with large volumes of waste water especially with cutter suction method of dredging needing to be placed in settlement ponds and returned to marine waters, it is likely that a licence under the Environment Protection Act 1993, for the activity of Earthworks Drainage will be required.

All excess fill material generated during the excavation taken off-site for re-use or disposal to an EPA licensed waste depot will require appropriate classification prior to removal from the site. Any re-use of material (on or off-site) should include an assessment of the potential adverse impacts associated with the fill material.

Fill material that exceeds EPA waste fill classification criteria will require approval and sign off by an appropriately qualified environmental consultant indicating that the material is suitable for that purpose. Alternatively, if there is no beneficial re-use option for the fill material it will require disposal at an appropriately licensed waste depot:

- o discharge to Marine or Inland Waters when the volume of discharge exceeds 50 kilolitres per day.

- It is likely that as a condition of such licences the Environment Protection Authority will require the licensee to carry out specified environmental monitoring of water quality and to make reports of the results of such monitoring to it. For the purposes of the Discharge Licence the EPA will require, at a minimum, for the operator to monitor and report on:
 - o discharge water quality, including whole effluent ecotoxicity testing;
 - o diffuser performance validation;
 - o process monitoring to confirm that performance is within the acceptable range as originally designed;
 - o water quality and ecological impacts on the marine environment (including the use of reference sites); and
 - o identify management responses to exceedences of the trigger values/criteria used in association with monitoring programs.

- All works associated with the rehabilitation and remediation of the site are required by law to be undertaken in accordance with:
 - section 25 (1) of the Environment Protection Act 1993, which requires that a person must not undertake any activity, which pollutes, or may pollute without taking all reasonable and practical measures to prevent or minimise harm to the environment;
 - the Environment Protection (Water Quality) Policy 2003; and
 - other relevant Environment Protection Policies made under Part 5 of the Environment Protection Act 1993.

Building Rules

- The proponent must obtain a Building Rules assessment and certification referred to in Condition 2 from either the Onkaparinga Council or a private certifier (at the proponent's option) and forward to the Minister for Urban Development and Planning all relevant certification documents as outlined in Regulation 64 of the Development Regulations 2008.
- Pursuant to Development Regulation 64, the proponent is especially advised that the Onkaparinga Council or private certifier conducting a Building Rules assessment must:
 - provide to the Minister for Urban Development and Planning a certification in the form set out in Schedule 12A of the Development Regulations 2008, in relation to the building works in question; and
 - to the extent that may be relevant and appropriate:
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.
- Regulation 64 of the Development Regulations 1993, provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Urban Development and Planning. The Onkaparinga Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including its Conditions and Notes).

Construction Environmental Management and Monitoring Plan

- Construction activities must be undertaken in accordance with the approved CEMMP. In addition, the proponent must comply with:
 - o Stormwater Pollution Prevention Code of Practice for the Building and Construction Industry (1999); and
 - o Environment Protection (Water Quality) Policy 2003.

In addition:

- o Marine construction activities must not impact upon existing shipping lanes and works will be undertaken in accordance with the Harbours and Navigation Act 1993.

Operational Environmental Management and Monitoring Plan

- It is likely that license conditions imposed by the EPA will require the proponent to appoint an independent acoustic consultant (other than the company that prepared the acoustic report) to monitor noise levels at two localities at least; at one noise sensitive receiver adjacent to the boundary of the nearest residential zone to the north of the site, and the nearest noise sensitive receiver to the west from the site. The noise monitoring should be executed in accordance with Environmental Protection (Noise) Policy 2007 procedures where all of the noise sources associated with the desalination plant are in operating mode. The results of the monitoring should be submitted to the EPA no later than two months from the date of the plant commissioning.

- All marine ecological monitoring needs to be conducted as a beyond Before After Control Impact (BACI) design and the hypothesis of the monitoring needs to be explicitly detailed before the monitoring is undertaken. This monitoring needs to be undertaken using multiple control sites in order to allow for seasonal differences at Port Stanvac not being confused with impacts from the desalination plant.
- There is a need to keep large vessels clear of the area as the vessels may have a deep enough draft to hit the intake pipes at 13 m below the surface. This has already been addressed for the pilot plant by establishing an exclusion zone around the infrastructure in the water with temporary navigation markers. A new exclusion zone will need to be established for the full scale plant when the design is finalised taking into account the shipping channels and the Harbours and Navigation Act 1993. Furthermore, notices to mariners will have to be issued highlighting the new exclusion zone and statutory navigation markers will need to be installed, wherever necessary. Signage should be installed on shore (near boat ramp) showing a plan of 'exclusion zone' including plant infrastructure in the water and other important information to mariners.
- A detailed plan of infrastructure drawn to scale should be submitted to DTEI to enable the details to be inserted on navigational charts.

Traffic Management Plan

- The Traffic Management Plan shall include details for Restricted Access Vehicle (RAV) routes. Should RAV's access the site (i.e. B-doubles, over-dimensional vehicles) it will be necessary for the route to be assessed and appropriate upgrades made prior to DTEI issuing approval for these vehicles to utilise the surrounding road network.
- The following additional analysis shall be undertaken in consultation with DTEI prior to the completion of the Traffic Management Plan and commencement of construction:
 - o Modelling of the Sheriffs/Lonsdale Road signalised intersection assuming that a link road between Sheriffs Road and Meyer Road is provided and will be utilised by construction traffic. The modelling (SIRDA analysis) is to be done utilising the most up to date SCATS report and phasing operation.
 - o Modelling of the Lonsdale/Meyer Road junction as a fully signalised T junction rather than a partially signalised junction, assuming that the link road is not provided. The analysis must look at both a single (i.e. existing situation) and dual right turn lanes on the Meyer Road approach to Lonsdale Road.
 - o The analysis shall include a cost comparison between upgrading the Meyer/Lonsdale Road junction to signals, or the creation of a suitable roadway to link the proposed site to Sheriffs Road. The analysis for upgrading Lonsdale/Meyer Road to signals should consider the additional accidents likely to occur as a result of the signals, operating costs and the ongoing maintenance/operational costs.

Engineering construction plans for roads, drainage, footpaths and intersections

- These plans shall be finalised in accordance with the requirements of the DTEI and the Onkaparinga Council prior to its submission to the Minister for approval.

Land Management Plan

- This plan shall be approved by the Environment Protection Authority, the Department of Water, Land and Biodiversity Conservation (including consideration by the Onkaparinga Council) prior to its submission to the Minister for approval.

Pest and Weed Management Plan

- This plan should address both weeds and feral animals and shall be considered by the Onkaparinga Council and approved by the Minister.

Sustainability Management Plan

- The design, construction and operational Sustainability Management Plans shall be approved by the Environment Protection Authority and the Department of Premier and Cabinet (Sustainability and Climate Change Office) prior to its submission to the Development Assessment Commission for approval.

Cultural Heritage Management Plan

- This plan shall be approved by the Department of Premier and Cabinet (AARD Division) prior to its submission to the Minister for approval.
- The proponent is reminded of its obligations under the Aboriginal Heritage Act 1988, whereby any 'clearance' work, which may require permission to disturb damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs and Reconciliation, according to section 23 of the Aboriginal Heritage Act 1988.
- The proponent, and all agents, employees and contractors, such as construction crews, should be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Department of Premier and Cabinet (Aboriginal Affairs and Reconciliation) in the event that archaeological items (especially skeletal material) are uncovered during earth-moving.

Emergency Response Management Plan

- The proponent shall ensure satisfactory chemical spill and fire-fighting facilities and contingency plans in the form of an, determined in consultation with responsible officers within the Department for Transport, Energy and Infrastructure and the Metropolitan Fire Service (MFS) or the Country Fire Service (CFS) (as applicable), are in place prior to commencement of operation of the ADP.

General Advice

- Should the proponent wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Environmental Impact Statement and Assessment Report referred to in this development authorisation. If an application for variation involves substantial changes to the proposal, it will be processed pursuant to section 47 (2) (b) of the Development Act 1993.

FISHERIES MANAGEMENT ACT 2007: SECTION 115

Exemption for SARDI Employees and Specified Affiliates of SARDI

TAKE notice that pursuant to section 115 of the Fisheries Management Act 2007, the Chief Scientist and employees of the South Australian Research and Development Institute (SARDI) and in certain cases Specified Affiliates of SARDI (hereinafter referred to as the 'exemption holder'), are exempt from sections 70, 71, 72, 73, 74 (1) (b), 76, 77, 79, 127, 128 and 129 of the Fisheries Management Act 2007 (the 'exempted activity'), subject to the conditions specified in Schedule 1, from 2 June 2009 until 2 June 2010, unless varied or revoked earlier.

SCHEDULE 1

1. All fish shall be taken, released or imported for research purposes only.

2. The exemption holder may take any species of fish using any type of device, except explosives, from any waters of the state.

3. The exemption holder, whilst engaged in activities pursuant to this exemption, must carry an identification card issued by SARDI.

4. At least one hour before conducting the exempted activity, the exemption holder must contact the PIRSA Fisheries Compliance Unit on 1800 065 522 and answer a series of questions about the exempted activity. The exemption holder will need to have a copy of this notice in their possession at the time of making the call, and be able to provide information about the area and time of the exempted activity, the vehicles and/or boats involved, and other related issues. Exemption No. 9902132.

5. Before conducting the proposed exempted activity within the Adelaide Dolphin Sanctuary, the exemption holder must inform the Adelaide Dolphin Sanctuary on 0400 998 656 of the nature of the proposed activity.

6. While engaged in the exempted activity, the exemption holder must be in possession of a copy of this exemption. Such exemption must be produced to a PIRSA Fisheries Compliance Officer if requested.

7. The exemption holder must not contravene or fail to comply with the Fisheries Management Act 2007, or any regulations made under that Act, except where specifically exempted by this notice.

8. This exemption will only apply to Specified Affiliates of SARDI (including, but not limited to, independent contractors, research students, volunteers and other affiliates) provided the following additional pre-conditions are met:

- the affiliates are at all times in the presence of, and under the direct supervision of, a SARDI employee whilst undertaking the exempted activity;
- at least one clear business day (the 'consideration period') prior to undertaking the exempted activity the Chief Scientist of SARDI (or his delegate) notifies the Director of Fisheries (or his delegate) in writing of the names of the affiliates together with any other identifying information about the affiliates that may be specifically required from time to time;
- no objection is taken to the affiliates nominated by SARDI during the consideration period (with any such objection being communicated to the Chief Scientist of SARDI or his delegate during the consideration period).

9. For the purpose of this instrument the delegate of the Director of Fisheries is:

Mark Ayliffe
Project Officer
Telephone: (08) 8226 2934
Fax: (08) 8226 0434

Dated 2 June 2009.

PAUL CAICA, Minister for Agriculture
Food and Fisheries

FISHERIES MANAGEMENT ACT 2007: SECTION 115

TAKE notice that pursuant to section 115 of the Fisheries Management Act 2007, Nicholas Payne, 20 Halifax Street, Hilton, S.A. 5033 (the 'exemption holder') or a person acting as his agent, is exempt from sections 78 (2) and 79 of the Fisheries Management Act 2007, but only insofar as the exemption holder shall not be guilty of an offence when taking giant cuttlefish eggs and capture and release of adult giant cuttlefish (*Sepia apama*) from the waters specified in Schedule 1 (the 'exempted activity'), subject to the conditions specified in Schedule 2, from 5 June 2009 until 30 July 2009, unless varied or revoked earlier.

SCHEDULE 1

The closure for the taking of cephalopoda near Whyalla made under section 79 of the Fisheries Management Act 2007.

SCHEDULE 2

1. A maximum of 70 eggs may be taken pursuant to this exemption.

2. The specimens collected pursuant to the exemption notice can only be used for research purposes and the eggs and hatchlings (if applicable) must not be sold.

3. A maximum of 70 adult giant cuttlefish may be taken from the water for measuring metabolic capacity by placing into a swim tunnel and measuring the individuals swimming ability. Any giant cuttlefish must, upon completion of any measuring activity, as soon as possible be returned to the water as near as possible to the place of capture.

4. The exemption holder or a person acting as an agent must notify PIRSA Fisheries on 1800 065 522 at least two hours prior to conducting the exempted activity and answer a series of questions about the exempted activity. The exemption holder will need to have a copy of the exemption notice at the time of making the call, and be able to provide information about the area and

time of the exempted activity, the vehicles and boats involved, the number of agents undertaking the exempted activity and other related questions. Exemption No. 99022244.

5. The exemption holder must provide a written report to the Director of Fisheries (G.P.O. Box 1625, Adelaide, S.A. 5001) within seven days of the completion of each collection made pursuant to this exemption, providing details of the numbers, location, time, conditions of the collection and any mortalities.

6. While engaged in the exempted activity the exemption holder or agent must be in possession of a copy of this notice and such a notice must be produced to a PIRSA Fisheries Compliance Officer if requested.

7. The exemption holder must not contravene or fail to comply with the Fisheries Management Act 2007, or any regulations made under that Act, except where specifically exempted by this notice.

Dated 8 June 2009.

NOTICE TO MARINERS

NO 30 OF 2009

*South Australia—River Murray—General Notice on
Navigational Hazards*

MARINERS are advised that some locations on the River Murray, downstream of Lock One have become unsuitable for large vessels or high speed traffic.

DTEI have undertaken buoyage of those areas to delineate the safest navigable channel. Buoyage will be in accordance with IALA Buoyage System A, with smaller round green or red coloured buoys as intermediate marks.

In some areas, DTEI may for expediency use only 30 cm round buoys coloured red or green. These should be considered as lateral buoys in accordance with their respective colours.

Vessel operators are advised that depths of less than 1 m exist in these shallow areas and that navigating outside of the marked channel may be hazardous.

Details of these hazards are available on the DTEI River Murray Navigational Hazards website www.transport.sa.gov.au.

Adelaide, 4 June 2009.

These regulations may be cited as the *Natural Resources Management (Financial Provisions) (2008-2009 Levy Exemption) Variation Regulations 2009*.

2—Commencement

These regulations come into operation on the day on which they are made.

3—Variation provisions

In these regulations, a provision under a heading referring to the variation of specified regulations varies the regulations so specified.

Part 2—Variation of *Natural Resources Management (Financial Provisions) Regulations 2005*

4—Substitution of regulation 19

Regulation 19—delete the regulation and substitute:

19—Exemption from levy—2008/2009

- (1) Subject to subregulation (2), a person who is the holder of a water licence that—
 - (a) has been granted in respect of a well in the prescribed area; and
 - (b) is endorsed with a water (taking) allocation for irrigation purposes,

is exempt from the requirement to pay a levy declared under section 101 of the Act for the 2008-2009 financial year in relation to the licence to the extent that the levy is based on the right to take water for irrigation purposes under the licence.

- (2) An exemption under subregulation (1) is subject to the following conditions:

- (a) that the holder of the licence pay to the Minister an amount calculated as follows:

$$A = WA (LR - OS)$$

where—

A is the amount to be paid

WA is the amount of water (expressed in megalitres) allocated to the person for irrigation purposes under the licence for the 2008-2009 financial year

LR is the relevant levy rate (per megalitre) that applies under Column C of Table 1

OS is—

- (i) if the water allocation is from the Coonalpyn management area—\$0.0312 per megalitre of allocation;
- (ii) if the water allocation is from the Sherwood management area—\$0.1086 per megalitre of allocation;
- (iii) if the water allocation is from the Tauragat management area—\$1.05 per megalitre of allocation;
- (iv) if the water allocation is from the Tintinara management area—\$0.0640 per megalitre of allocation;
- (v) if the water allocation is from any other area—nil,

and if the holder of the licence has an allocation that will relate to more than 1 crop during the 2008-2009 financial year (as determined by the Minister for the purposes of making the allocation), then there will be an amount payable with respect to each of the relevant circumstances that apply under Table 1;

- (b) that any amount payable under paragraph (a) be paid by the holder of the licence to the Minister by a date and in a manner specified by the Minister by a notice served on the holder of the licence for the purposes of this regulation.

- (3) In this regulation—

megalitre means 1 000 kilolitres;

prescribed area means the Tintinara Coonalpyn Prescribed Wells Area (see the *Water Resources (Tintinara Coonalpyn Prescribed Wells Area) Regulations 2000*).

14—Variation of regulation 42—Fees

- (1) Regulation 42(3)(a)—delete "an environmental donations licence" and substitute:
a water licence that is to be an environmental donations entitlement
- (2) Regulation 42(3)(b)—delete paragraph (b) and substitute:
 - (b) an application made by the holder of a water licence or a water allocation, and granted by the Minister, to vary the conditions attached to the licence or water allocation so that the licence or water allocation will become an environmental donations entitlement;
- (3) Regulation 42(3)(c)—delete "environmental donations licence" and substitute:
environmental donations entitlement
- (4) Regulation 42(3)—after paragraph (c) insert:
 - (ca) an application to transfer a water access entitlement, or part of a water access entitlement, under a water licence to the holder of another water licence that is an environmental donations entitlement (for water to be used for environmental purposes);
- (5) Regulation 42(3)(d)—delete paragraph (d) and substitute:
 - (d) an application to transfer the whole or a part of a water allocation where the South Australian Murray Darling Basin Natural Resources Management Board is satisfied—
 - (i) that the transfer constitutes the donation of the water allocation;
and
 - (ii) that the water will be used for environmental purposes under or in connection with an environmental donations entitlement.

15—Variation of regulation 42A—Tagged interstate water trades

- (1) Regulation 42A(a), (b) and (c)—delete paragraphs (a), (b) and (c) and substitute:
 - (a) a transfer of a water allocation is being undertaken under an Interstate Water Entitlements Transfer Scheme; and
 - (b) the transfer is (or is anticipated to be) part of a series of transfers (including a series of 2) to occur during the same financial year; and
 - (c) the person who is to obtain the benefit of each transfer—
 - (i) is the same person each time; and
 - (ii) holds an entitlement under a corresponding law of another jurisdiction (being an entitlement that is relevant to the transfer of the water allocation either by giving rise to the water allocation or by receiving the benefit of the water allocation); and
- (2) Regulation 42A(e)—delete "or variation of licence (as the case may be)"
- (3) Regulation 42A(f)—delete "or variation"

16—Insertion of regulation 43A

After regulation 43 insert:

43A—The Water Register—transfers

For the purposes of paragraph (a) of clause 7(2) of Schedule 3A of the Act, the Minister will give effect to the transfer by approving the transfer under Chapter 7 of the Act.

17—Insertion of regulations 47 and 48

After regulation 46 insert:

47—Transitional provision—Water licences—2007 Amendments

- (1) Until the designated day for a prescribed water resource—
 - (a) a water licence granted in respect of the water resource need not make express provision for a water access entitlement in the manner contemplated by section 146(2) of the Act (as enacted by the 2007 Amendment Act); and
 - (b) a water licence granted in respect of the water resource may include a quantity of water determined under the provisions of the relevant water allocation plan or section 164N of the Act (and this may be taken to be a water access entitlement); and
 - (c) the holder of a water licence granted in respect of the water resource is entitled to obtain a water allocation equal to the relevant amount provided on the licence (subject to the operation of a succeeding subregulation); and
 - (d) the holder of a water licence granted in respect of the water resource—

- (i) may proceed to construct, maintain or operate any works for the purposes of taking water or surface water (as the case may be) under the terms of the licence without the authority of a water resource works approval; and
 - (ii) may use water or surface water (as the case may be) under the terms of the licence without the authority of a site use approval,

but the licence may be subject to conditions that relate to how water is taken or the purposes for which water may be used; and
 - (e) a water levy under section 101 of the Act may be declared with respect to the right to take water or with respect to the water taken or both rather than with respect to an allocation of water under the terms of a water access entitlement or the allocation of water under the terms of a water access entitlement (see section 101(5) of the Act); and
 - (f) a water levy declared with respect to the right to take water will be a Category A levy for the purposes of section 104 of the Act and a water levy declared with respect to water taken will be a Category B levy for the purposes of section 104 of the Act.
- (2) For the purposes of subregulation (1), the designated day for a prescribed water resource is a day determined by the Minister in relation to the particular prescribed water resource and published in the Gazette for the purposes of that subregulation.
- (3) The Minister will make a determination under subregulation (2) when the Minister is satisfied that the water allocation plan for the prescribed water resource has been amended to take into account the operation of Part 3 of the 2007 Amendment Act.
- (4) If the relevant water allocation plan provides for payment for a water allocation, an allocation obtained from the Minister in conjunction with the operation of subregulation (1) must be sold by the Minister by public auction in accordance with subregulation (5) or by tender or, if either of those methods fail, by private contract.
- (5) A public auction undertaken for the purposes of subregulation (4) must comply with the following provisions:
- (a) the Minister must, by notice published in a newspaper circulating generally throughout the State, give at least 14 days notice of the time and place at which the auction will be held; and
 - (b) the Minister may refuse to sell an allocation if bidding for the allocation does not reach the reserve price fixed by the Minister.
- (6) In connection with the operation of clause 5(2)(a)(iii) of Schedule 1 of the 2007 Amendment Act, the holder of a licence within the ambit of clause 5(1) of that Schedule will, until a water allocation may be obtained on account of a water access entitlement, be entitled to receive a water allocation equal to the relevant amount provided on the licence.
- (7) This regulation does not apply in relation to the River Murray prescribed watercourse.

(8) In this regulation—

2007 Amendment Act means the *Natural Resources Management (Water Resources and Other Matters) Amendment Act 2007*.

(9) This regulation will expire on 1 July 2011.

48—Transitional provision—The Water Register

(1) A water licence issued under the Act before the commencement of section 39 of the 2007 Amendment Act—

(a) will be taken to be a Schedule 3A entitlement; and

(b) will be registered on The Water Register under Schedule 3A of the Act as a water management authorisation.

(2) In this regulation—

2007 Amendment Act means the *Natural Resources Management (Water Resources and Other Matters) Amendment Act 2007*.

18—Variation of Schedule 6—Water efficiency plans

(1) Schedule 6, clause 2(a)—delete paragraph (a) and substitute:

(a) a description of the current use of the water at the site;

(2) Schedule 6, clause 2(b)—delete "that the licence" and substitute:

that the person submitting the plan

(3) Schedule 6, clause 2(c)—delete "the licensee" and substitute:

the relevant person

CITY OF NORWOOD PAYNEHAM & ST PETERS

Review of Elector Representation

NOTICE is hereby given that pursuant to the provisions of section 12 (7) of the Local Government Act 1999, the City of Norwood Payneham & St Peters is undertaking a review to determine whether alterations are required in respect to its elector representation, including ward boundaries and the composition of the Council.

The Council currently comprises a Mayor and 15 Elected Members, with the City divided into seven wards. The Representation Review will explore whether the Council should retain this structure and the current number of Elected Members, have a lesser number of Elected Members or a different ward structure.

Representation Options Paper

The Council has prepared a Representation Options Paper that examines the advantages and disadvantages of the various options available in regards to the composition and structure of the Council and the division of the Council area into wards.

Copies of the Representation Options Paper can be obtained from:

- The Norwood Town Hall, 175 The Parade, Norwood.
- The Council's Libraries:
 - Norwood, 110 The Parade, Norwood.
