Primary Industries and Resources South Australia— Draft Aquaculture Revocation Policy 2009

PURSUANT to section 12 of the Aquaculture Act 2001, notice is hereby given that the Minister for Agriculture, Food and Fisheries has released the draft Aquaculture Revocation Policy 2009 for public consultation. This policy has been developed in accordance with the provisions of Part 4 of the Aquaculture Act 2001.

The draft Aquaculture Revocation Policy 2009 has been developed to revoke nine administrative policies which were developed in 2003 and 2004 prior to the development of the Aquaculture Regulations 2005 and the Livestock (Restrictions on Entry of Aquaculture Stock) Notice 2008.

Many of the provisions contained in the policies proposed for revocation have since been incorporated into the Aquaculture Regulations 2005 and the Livestock (Restrictions on Entry of Aquaculture Stock) Notice 2008. Section 11 of the Aquaculture Act 2001, sets out the nature and content of aquaculture policies and the types of policies that can be developed; policies describing administrative procedures are not considered to be contemplated by this section of the Aquaculture Act 2001.

The policy aims to assist in the provision of certainty for industry stakeholders and improve community confidence by revoking policies which are out of date and inconsistent with current legislative and administrative arrangements.

The draft policy and policy report will be available on Friday, 23 October 2009, from PIRSA Aquaculture, 14th Floor, 25 Grenfell Street (G.P.O. Box 1625), Adelaide, S.A. 5001, on the internet at www.pir.sa.gov.au/aquaculture, by telephoning (08) 8226 0314 or by faxing (08) 8226 0330.

Written submissions in relation to the draft policy are invited from the public and should be made to PIRSA Aquaculture, G.P.O. Box 1625, Adelaide, S.A. 5001. Submissions must be received by 5 p.m. on Thursday, 24 December 2009.

Dated 7 October 2009.

DEVELOPMENT ACT 1993, SECTION 48: DECISION BY THE DEVELOPMENT ASSESSMENT COMMISSION AS DELEGATE OF THE GOVERNOR

Preamble

1. The decision of the Governor under section 48 of the Development Act 1993, to approve the development of the Ceduna Keys multi-component residential marina and community centre near Ceduna, on the West Coast, was published in the *Gazette* on 15 December 2005.

2. The development was the subject of an Environmental Impact Statement and an Assessment Report under sections 46 and 46B of the Development Act 1993.

3. On 13 December 2007, the Development Assessment Commission, as delegate of the Governor under section 48 of the Development Act 1993, granted approval for a variation of the development authorisation which provided that if development was not commenced by substantial work on the site within four years of the date of the authorisation, the Governor may cancel the authorisation by written notice.

4. Application has now been made to the Development Assessment Commission, as delegate of the Governor under section 48 of the Development Act 1993, for a variation of the development authorisation which provided that if development was not commenced by substantial work on the site within four years of the date of the authorisation, the Governor may cancel the authorisation by written notice.

5. The proposed variation is to reword the development authorisation to provide that if development is not commenced by substantial work on the site by 15 December 2010 (within five years of the date of the original authorisation), the Governor may cancel the authorisation by written notice.

6. The application for a variation of the development authorisation is contained in the letter from Andrew & Associates Pty Ltd to the Department of Planning and Local Government dated 23 September 2009.

7. The Development Assessment Commission has, in considering the application for variation of the development authorisation, had regard to all relevant matters under section 48 (5) of the Development Act 1993.

8. The Development Assessment Commission is satisfied that the variation of the development authorisation does not require the preparation of a further or amended Environmental Impact Statement.

9. For ease of reference the conditions attached to the Ceduna Keys multi-component residential marina and community centre development are republished in full.

21. The wastewater collection and treatment system shall be designed to ensure that the general obligations of the Environment Protection (Water Quality) Policy 2004 are met, and to ensure that effluent does not overflow or escape from drains, pipes, sumps, tanks, storage/treatment basins into any watercourse, or into stormwater drains which do not drain into the effluent collection, treatment and disposal system, except where the effluent complies with criteria in the above Policy.

22. The proponent shall provide undergrounded public lighting, power supply, water supply, television antenna and telephone supply to each allotment in accordance with, and to engineering design standard plans approved by the electricity, mains water and telephone public utility authorities.

23. The applicant shall ensure that there is no direct discharge of stormwater into the marina basins, waterways or marine environment for rainfall less than, and including, 1:20 year ARI events.

24. The land to be used for land-based allotments shall be forced to prevent stormwater flows entering into the waterways.

25. Water-sensitive urban design measures and practices shall be adopted for the management of run-off, including stormwater capture and re-use.

26. Undeveloped allotments shall be left in a neat and tidy condition, with soil surfaces stabilised to minimise erosion.

27. Road, drainage, footpath and intersection designs (i.e. engineering construction plans) shall be finalised in accordance with the requirements of the Department for Transport, Energy and Infrastructure and the Ceduna District Council, prior to construction commencing. Drainage arrangements for existing roads and the railway line easement must not be altered unless agreed by the owner of the road. Road and drainage designs shall include water table levels, drainage inverts and pavement details. The roads and drainage works shall be built in accordance with these designs.

28. Road and associated kerbing shall be designed and constructed to avoid stormwater flows entering into the waterways by directing flows to inland disposal areas.

29. Road designs shall not affect existing natural drainage lines in such a way as to cause flooding.

30. A set-back distance of 2 m from the top of waterway edge treatments shall be provided for the construction of further coastal protection works if required in the future.

31. The design of the Eyre Highway realignment shall avoid spills of toxic materials from entering the marina basins, waterways or marine environment.

32. Appropriate navigational aids shall be erected in prominent locations, in consultation with the Department for Transport, Energy and Infrastructure, prior to use of the facility for boating purposes.

33. Further engineering designs for breakwaters, edge treatments and other waterway-related structures, commercial and recreational moorings, public boat ramp (including associated car parking and access), hardstand, wash-down, travel lift, boat refuelling facility and marine toilet pump-out/treatment facility shall be prepared and independently certified by a registered engineer, to the reasonable satisfaction of the Department for Transport, Energy and Infrastructure. A certificate as to the structural soundness of the proposed structures shall be submitted to the Development Assessment Commission, prior to the commencement of their construction.

34. Access systems for all floating boat moorings shall be capable of adjustment or be readily adaptable to projected long-term sea level rise and all marina mooring structures shall be designed in accordance with the Australian Standard AS3962—1991 Guidelines for Design of Marinas.

35. The public boat ramp facility shall be generally designed in accordance with the South Australian Boating Advisory Committee's Guidelines for Planning, Design and Construction of Boat Launching Facilities.

36. The boat refuelling dock and marine toilet pump-out facility shall be designed to meet the requirements of the Environment Protection Authority, the Department for Transport, Energy and Infrastructure and the Department of Health respectively.

37. The proponent shall ensure satisfactory oil spill and fire-fighting facilities and contingencies, determined in consultation with the Department for Transport, Energy and Infrastructure and the Metropolitan Fire Service (MFS) and/or the Country Fire Service (CFS) respectively, are in place prior to commencement of operation of the marina.

38. The water contained in the marina basin shall be kept to a quality appropriate for secondary contact recreation, public amenity and the maintenance of marine aquatic ecosystems, as stipulated from time to time by the ANZECC Australian Water Quality Guidelines for Fresh and Marine Waters.

39. The acoustic protection mound shall be designed and maintained to ensure stormwater run-off is suitably managed to minimise soil erosion and flooding, to provide public access and to result in noise levels from the Eyre Highway and railway that do not exceed:

- (a) 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) 45 dB(A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (c) a short-term typical maximum noise level of 60 dB(A) when measured at the nearest existing residential property.

40. The acoustic protection mound shall be planted with indigenous species and be constructed using suitable materials that are of a quality that would sustain the long-term growth of vegetation.

41. Landscaping and streetscaping of the site shall commence prior to the issuing of Certificates of Title for each stage of the land division, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased. A weed control program shall also be implemented.

42. The Ceduna District Council shall be given seven days notice, prior to the commencement of works, and be provided with the name and contact facilities for the person responsible for co-ordinating site works covered by this approval.

NOTES TO APPLICANT

1. Approvals will be required for all components of the development not hereby approved, including:

- the land division;
- the marina moorings and other marina facilities;
- the public boat ramp, travel lift, hardstand, boat repair/maintenance facility and carpark areas;
- the boat refuelling and boat effluent disposal facility;
- the installation of navigational aids;
- the community/cultural centre; and
- all residential, commercial, retail, tourist-related and other buildings.

2. Further design and infrastructure/service plans (i.e. subject to separate applications to Council in the future) would be required should further development approval be sought for the community/cultural centre and for commercial, retail and tourist-related buildings.

3. Pursuant to Development Regulation 64, the applicant is advised that the Ceduna District Council or private certifier conducting a Building Rules assessment must:

- (a) provide to the Minister a certification in the form set out in Schedule 12A of the Development Regulations 1993, in relation to the building works in question; and
- (b) to the extent that may be relevant and appropriate:
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.

Regulation 64 of the Development Regulations 1993, provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Urban Development and Planning.

4. The Ceduna District Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including any Conditions or Notes that apply in relation to this provisional development authorisation).

5. Should the applicant wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Environmental Impact Statement and Assessment Report referred to in this provisional development authorisation. If an application variation involves substantial changes to the proposal, pursuant to section 47 of the Development Act 1993, the applicant may be required to prepare an amended Environmental Impact Statement for public inspection and purchase. An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to section 48 of the Development Act 1993.

6. Pursuant to the Harbours and Navigation Act 1993, the Council will need to enter into a licence agreement with the Minister for Transport over adjacent and subjacent land on terms acceptable to the Minister prior to the commencement of construction. Such agreement will require completion of the works to the satisfaction of the Minister, at which time the responsibility and control of the area will be transferred so as to minimise the Minister's ongoing responsibilities. It is currently anticipated that the transfers will be via a sales agreement pertaining to the reclaimed residential, tourist and commercial portions of the land, and undertakings by the Council to accept the groyne/breakwaters as reserve and the remaining area under long-term lease.

7. The applicant's CEMMP and OEMMP should be prepared taking into consideration, and with explicit reference to, relevant EPA policies and guideline documents, including, but not limited to: the Environment Protection (Air Quality) Policy 1994, the Environment Protection (Water Quality) Policy 2003, the Occupational Health and Safety Regulations, EPA Guidelines on Odour Assessment, using odour source modelling 2003, EPA Handbook for Pollution Avoidance on Commercial and Residential Building Sites 2004, EPA Bunding and Spill Management Guidelines 2004 and the EPA Stormwater Pollution Prevention Codes of Practice, in addition to other legislative requirements and Guidelines/Australian Standards requiring compliance.

8. The following activities in relation to the components of the development hereby approved and/or requiring future approval will require licences under the Environment Protection Act 1993:

- **Earthworks Drainage:** The conduct of earthworks operations in the course of which more than 100 kilolitres of waste water containing suspended solids in a concentration exceeding 25 milligrams per litre is discharged directly or indirectly to marine waters or inland waters.
- **Marinas and Boating Facilities:** The conduct of:
 - (a) facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 50 or more powered vessels at any one time; or

- (b) works for the repair or maintenance of vessels with the capacity to handle five or more vessels at any one time or vessels 12 m or more in length.

- **Dredging:** Removing solid matter from the bed of any marine waters by any digging or suction apparatus, but excluding works carried out for the establishment of a visual aid to navigation and any lawful fishing or recreational activity.

9. It is likely that as a condition of such licences the Environment Protection Authority will require the licensee to carry out specified environmental monitoring of water quality and to make reports of the results of such monitoring to it.

10. It is also likely that the Environment Protection Authority will require the identification to it of any vessels that visit the marina from international ports or from ports beyond Adelaide and the surrounding area, together with details of the routes travelled by such vessels (for the purpose of identifying the potential introduction of harmful marine species).

11. All works associated with the rehabilitation and remediation of the site must be undertaken in accordance with the General Environmental Duty as defined in Part 4, section 25 (1) of the Environment Protection Act 1993, the Environment Protection (Water Quality) Policy 2004 and other relevant Environment Protection Policies made under Part 5 of the Environment Protection Act 1993, the ANZECC Best Practice Guidelines for Waste Reception Facilities at Ports, Marinas and Boat Harbours in Australia and New Zealand, draft guideline Environmental Management of On-Site Remediation and other relevant EPA publications and guidelines.

12. The proponent is advised of the General Environmental Duty under section 25 of the Environment Protection Act 1993, which requires that a person must not undertake any activity, which pollutes, or may pollute, without taking all reasonable and practical measures to prevent or minimise harm to the environment.

13. The management plan for acid sulphate soils should comply with Guidelines issued by the Coast Protection Board.

14. The applicant is reminded of its obligations under the Aboriginal Heritage Act 1988, whereby any 'clearance' work, which may require permission to disturb, damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs and Reconciliation, according to section 23 of the Aboriginal Heritage Act 1988.

15. The applicant, and all agents, employees and contractors, such as construction crews, must be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Department of Aboriginal Affairs and Reconciliation in the event that archaeological items (especially skeletal material) are uncovered during earthmoving.

16. The applicant, and Council after hand-over of infrastructure, must comply with the Public and Environmental Health Act 1987, in regard to the maintenance of suitable water quality within the marina basin (and any stormwater holding ponds) to protect public health and amenity.

17. The expression 'secondary contact recreation' includes activities such as wading, boating and fishing in which some human contact with the water may occur, but in which the probability of bodily immersion or the intake of significant amounts of water is minimal.

18. If foreign vessels are allowed to berth in the marina the proponent would need to consult with Transport SA (Marine Safety Section) to address any requirements of the Australian Quarantine Inspection Service (AQIS) and Australian Customs Service.

19. It is recommended that the applicant approach the Ceduna District Council with a view to the Council enacting of by-laws to manage activities associated with:

- the entrance channel and waterways to ensure safe navigation and to protect water quality;
- the boat ramp, wash-down, slip-way and hardstand;
- the refueling facility and marine toilet pump-out facility;
- the residential development and reserves (including stormwater management devices).

20. The Ceduna District Council will need to review and amend the zoning and policies in the relevant Development Plan to reflect any development approved by the Governor and for future assessment and decision-making for buildings and structures not part of this development authorisation.

21. Noise generated from the non-residential components of the development should not exceed:

- (a) 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) 45 dB(A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994.
- (c) a short-term typical maximum noise level of 60 dB (A) when measured at the nearest existing residential property.

22. When preparing development plan policies for the marina site, the Ceduna District Council will need to adopt the following EPA recommended noise criteria for the design of buildings used for residential or tourist accommodation that are potentially affected by noise impacts from the Eyre Highway and railway:

- (a) internal noise levels ranging from 30-40 dB(A) and 35-45 dB(A) for bedrooms and living areas respectively;
- (b) indoor noise levels between 30-45 dB(A) for sleep disturbance.

23. When preparing development plan policies for the marina site, the Ceduna District Council will need to consider the following design requirements for buildings used for residential or tourist accommodation that are affected by noise impacts from the Eyre Highway and railway:

- Use of separation, building orientation, sheds, continuous fencing and mounding to reduce noise levels outside of the residence.
- Locating noise sensitive spaces of the proposed residence away from the highway and railway (with the windows and openings directed away from the noise source) and less sensitive areas such as the kitchen, storage areas and laundry towards the noise source.
- Minimising the size and numbers of windows oriented towards the traffic noise source.
- Windows to noise sensitive spaces be closed during the night time.
- Replacing conventional pitched roof/eaves designs with flat roof/parapet designs.

- Using construction techniques that seal air gaps around doors and windows.
- Relocate conventional wall air vents to areas not facing the traffic noise source.
- Using solid core doors in conjunction with rubber seals and internal doors with rubber seals into habitable rooms to provide an 'acoustic air lock' arrangement.
- Using thicker window glass or double-glazing to noise sensitive spaces, such as bedrooms.
- Providing alternative means of ventilation for rooms where elements such as windows in the dwelling facade are to be closed to provide a minimum acoustic performance.

24. Land division creating allotments extending into the water over the sea bed need to negotiate tenure arrangements with the Minister for Transport. Current policy is that Freehold Title would not be granted if the seabed is alienated. Leasing arrangements are the standard form of tenure for private moorings.

25. It is unlikely that a land division will be approved unless provision is made for a set back distance of 2 m from the top of the edge treatments (for the construction of coastal protection works if required in the future).

26. A common building scheme encumbrance or equivalent device for the purpose of ensuring compliance with design standards for residential and other buildings will be required at the land division stage.

27. Binding legal arrangements (e.g. easements, encumbrances, charge-back arrangements etc. as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar-General for the issue of new Certificates of Title, to ensure financial and management responsibilities related to the maintenance of edge treatments, the design and appearance of structures and the installation of future coast protection works are clearly allocated. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.

28. A site audit report will be required to be completed by an Environmental Auditor (Contaminated Land) and submitted to the relevant planning authority, prior to the issue of Certificates of Title. The site audit report should be presented to purchasers of allotments.

29. The Minister has a specific power to require testing, monitoring and auditing under section 48C of the Development Act 1993.

Given under my hand at Adelaide, 20 October 2009.

T. BYRT, Secretary, Presiding Member,
Development Assessment Commission

NOTICE TO MARINERS

NO. 52 OF 2009

South Australia—River Murray—Purnong Ferry Crossing

MARINERS are advised that due to low water levels, extreme caution must be used at the Purnong Ferry Crossing. As this crossing is relatively narrow, with low water levels, the ferry cables are now at or close to the river surface while the ferry is moving.

It is important not to pass in front of any moving ferry. In the case of the Purnong Ferry, vessel operators must wait until the ferry is secured to the river bank before crossing the cables.

The available channel is about 30 m from the bank and 30 m from the ferry. This available channel moves depending on which side of the river the ferry is secured.

If large vessels are navigating the available channel it may be necessary to wait until it is clear before proceeding.

Adelaide, 20 October 2009.

Because of regulation 12(1), a dealing mentioned in this Part is not a notifiable low risk dealing if it is also a dealing of a kind mentioned in Part 3 of this Schedule.

2.1—Kinds of dealings

The following kinds of notifiable low risk dealings may be conducted in physical containment level 2 facilities:

- (a) a dealing involving whole animals (including non-vertebrates) that—
 - (i) involves genetic modification of the genome of the oocyte or zygote or early embryo by any means to produce a novel whole organism; and
 - (ii) does not involve any of the following:
 - (A) a genetically modified laboratory mouse;
 - (B) a genetically modified laboratory rat;
 - (C) a genetically modified *Caenorhabditis elegans*;
- (aa) a dealing involving a genetically modified laboratory mouse or a genetically modified laboratory rat, if—
 - (i) the genetic modification confers an advantage on the animal; and
 - (ii) the animal is not capable of secreting or producing an infectious agent as a result of the genetic modification;
- (ab) a dealing involving a genetically modified *Caenorhabditis elegans*, if—
 - (i) the genetic modification confers an advantage on the animal; and
 - (ii) the animal is not capable of secreting or producing an infectious agent as a result of the genetic modification;
- (b) a dealing involving a genetically modified plant (including a genetically modified flowering plant), if the dealing occurs in a facility that is designed to prevent the escape from the facility of—
 - (i) pollen, seed, spores or other propagules which may be produced in the course of the dealing; and
 - (ii) invertebrates that are capable of carrying the material mentioned in subparagraph (i);
- (ba) a dealing involving a genetically modified flowering plant, if, before flowering, all inflorescences are wholly enclosed in bags designed to prevent escape of viable pollen and seed;

- (c) a dealing involving a host and vector that are not mentioned as a host/vector system in Part 2 of Schedule 2, if—
 - (i) the host has not been implicated in, or had a history of causing, disease in human beings, animals, plants or fungi; and
 - (ii) the vector has not been implicated in, or had a history of causing, disease in human beings, animals, plants or fungi;
- (d) a dealing involving a host and vector that are not mentioned as a host/vector system in Part 2 of Schedule 2, if—
 - (i) either—
 - (A) the host has been implicated in, or has a history of causing, disease in human beings, animals, plants or fungi; or
 - (B) the vector has been implicated in, or has a history of causing, disease in human beings, animals, plants or fungi; and
 - (ii) the donor nucleic acid is characterised and is not known to alter the host range or mode of transmission, or increase the virulence, pathogenicity or transmissibility of the host or vector;
- (e) a dealing involving a host/vector system mentioned in Part 2 of Schedule 2, if the donor nucleic acid—
 - (i) encodes a pathogenic determinant; or
 - (ii) is uncharacterised nucleic acid from an organism that has been implicated in, or has a history of causing, disease in human beings, animals, plants or fungi;
- (f) a dealing involving a host/vector system mentioned in Part 2 of Schedule 2 and producing more than 10 litres of GMO culture in each vessel containing the resultant culture, if—
 - (i) the dealing is undertaken in a facility that is certified by the Regulator—
 - (A) as a large scale facility; and
 - (B) to at least physical containment level 2; and
 - (ii) the donor nucleic acid satisfies the conditions set out in item 4 of Part 1 of Schedule 2;
- (g) a dealing involving complementation of knocked out genes, if the complementation does not alter the host range or mode of transmission, or increase the virulence, pathogenicity, or transmissibility of the host above that of the parent organism before the genes were knocked out;

- (h) a dealing involving shot-gun cloning, or the preparation of a cDNA library, in a host/vector system mentioned in item 1 of Part 2 of Schedule 2, if the donor nucleic acid is derived from either—
 - (i) a pathogen; or
 - (ii) a toxin-producing organism;
- (i) a dealing involving the introduction of a replication defective viral vector able to transduce human cells into a host mentioned in Part 2 of Schedule 2 if—
 - (i) the donor nucleic acid is incapable of correcting a defect in the vector leading to production of replication competent virions; and
 - (ii) either—
 - (A) the vector is a retroviral vector; or
 - (B) the donor nucleic acid confers an oncogenic modification.

Part 3—Dealings that are not notifiable low risk dealings

Note 1—

The following list qualifies the list in Part 1 and Part 2, and is not an exhaustive list of dealings that are not notifiable low risk dealings.

Note 2—

A dealing that is not a notifiable low risk dealing, or an exempt dealing, can be undertaken only by a person who is licensed, under the Act, for the dealing (see section 32 of the Act).

3.1—Kinds of dealings

A dealing of any of the following kinds, or involving a dealing of the following kinds, is not a notifiable low risk dealing:

- (a) a dealing (other than a dealing mentioned in clause 2.1(h)) of Part 2 of this Schedule) involving cloning of nucleic acid encoding a toxin having an LD₅₀ of less than 100 µg/kg;
- (b) a dealing involving high level expression of toxin genes, even if the LD₅₀ is 100 µg/kg or more;
- (c) a dealing (other than a dealing mentioned in clause 2.1(h) of Part 2 of this Schedule) involving cloning of uncharacterised nucleic acid from a toxin-producing organism;
- (d) unless the viral vector is part of a host/vector system mentioned in Part 2 of Schedule 2 or in clause 1.1(c) of Part 1 or clause 2.1(i) of Part 2 of this Schedule—a dealing involving donor nucleic acid in a viral vector if the donor nucleic acid—
 - (i) confers an oncogenic modification; or
 - (ii) encodes—

- (A) immunomodulatory molecules; or
 - (B) cytokines; or
 - (C) growth factors, or components of a signal transduction pathway, that, when expressed, may lead to cell proliferation;
- (e) a dealing involving, as host or vector, a micro-organism that has been implicated in, or has a history of causing, disease in humans, animals, plants or fungi, unless—
 - (i) the host/vector system is a system mentioned in Part 2 of Schedule 2; or
 - (ii) the donor nucleic acid is characterised and is not known to alter the host range or mode of transmission, or increase the virulence, pathogenicity or transmissibility of the host or vector; or
 - (iii) the dealing is a dealing mentioned in clause 2.1(g) of Part 2 of this Schedule;
- (f) a dealing involving the introduction, into a micro-organism, of nucleic acid encoding a pathogenic determinant, unless—
 - (i) the dealing is a dealing mentioned in clause 2.1(g) of Part 2 of this Schedule; or
 - (ii) the micro-organism is a host mentioned in Part 2 of Schedule 2;
- (g) a dealing involving the introduction into a micro-organism, other than a host mentioned in Part 2 of Schedule 2, of genes whose expressed products have a heightened risk of inducing an autoimmune response;
- (h) a dealing involving use of a viral or viroid genome, or fragments of a viral or viroid genome, to produce a novel replication competent virus with altered host range or mode of transmission, or increased virulence, pathogenicity or transmissibility in relation to any parent or donor organism;
- (i) a dealing involving a lentiviral vector able to transduce human cells unless—
 - (i) all structural and accessory genes have been removed from the vector to render it incapable of replication or assembly into a virion without these functions being supplied *in trans*; and
 - (ii) the vector includes a deletion that results in a transcriptionally inactive vector which, even when packaging functions are supplied *in trans*, cannot be converted into full length viral RNA; and
 - (iii) the packaging cell line and packaging plasmids used contain only viral genes *gag*, *pol*, *rev* and a gene encoding an envelope protein;

- (j) a dealing involving a genetically modified animal, plant or fungus that is capable of secreting or producing infectious agents as a result of the genetic modification;
- (k) a dealing producing, in each vessel containing the resultant GMO culture, more than 10 litres of that culture, other than a dealing mentioned in clause 2.1(f) of Part 2 of this Schedule;
- (l) a dealing that is inconsistent with a policy principle issued by the Ministerial Council;
- (m) a dealing involving the intentional introduction of a GMO into a human being;
- (n) a dealing involving a genetically modified pathogenic organism, if the practical treatment of any disease or abnormality caused by the organism would be impaired by the genetic modification.
