(Formally operational 20 September 2010, but proceedings dealt with in manner consistent with this Rule from 17 May 2010—see Practice Direction 21.)

- (1) Except for referrals from other authorities which are governed by sub-rule (24), an application pursuant to Section 106 shall be made in accordance with the approved form, and shall be lodged in the Registry personally or by post, facsimile transmission or email.
- (2) Subject to sub-rule (25), the Commission will fix a time and place for the conference required by Section 155B of the Act and provide the applicant and respondent with a notice confirming the hearing.
- (3) Where the Commission has determined that the conference will be conducted outside of the metropolitan area of Adelaide, the proceedings will be conducted at a place that is as far as practicable within reasonable proximity of the location where the employment of the applicant was based.
- (4) Unless otherwise directed by the President and subject to sub-rule (25), the Registrar must provide a copy of the Section 106 application to the respondent as identified in the application by any means contemplated by Rule 13.
- (5) The respondent named in a Section 106 application must, within 10 days of being provided with a copy of the application, file a response in accordance with the approved form. This response is to be lodged in the Registry personally or by post, facsimile transmission or email.
- (6) The Registrar must cause to be provided to the applicant at his or her address for service a copy of any Form 4 lodged in accordance with these rules.
- (7) Where the respondent objects to the jurisdiction of the Commission and does not consent to conciliation, the jurisdictional objection is to be heard at a time and location determined by the Member assigned to initially deal with the application.
- (8) The conference conducted for the purposes of Section 155B may be held by utilising video and/or telephone facilities if directed by the Member who is to preside over the conference.
- (9) All parties to the proceedings shall attend a conference pursuant to Section 155B to be presided over by a Member of the Commission at a date, time and place specified in the notice of sitting for the purpose of:
 - (a) exploring the possibility of resolving the matters in issue by conciliation;
 - (b) ensuring that the parties are fully informed of the possible consequences of taking the proceedings further; and

- (c) if the proceedings are to progress further and the parties are involved in 2 or more sets of proceedings under the Act, exploring the possibility of hearing and determining some or all of the proceedings concurrently.
- (10) The respondent shall be represented at the conference by a duly authorised employee or officer who is familiar with the matters in issue and who has the authority to bind the respondent to any agreement.
 - (11) The Commission Member presiding at the conference will determine the manner in which the proceedings are to be conducted and in so doing may give directions as to the conduct of the parties and their representatives. The Member may also adjourn the conference to other times and places as the needs of the matter require.
 - (12) Subject to sub-rules (14), (15), (19) and (20) nothing said or done at the conference by either party or any other person attending is admissible on the hearing of the arbitration except by the consent of the parties; save that it will become admissible in relation to any application for costs in respect of the proceedings.
 - (13) If the conference resolves some or all of the matters in issue between the parties, the Member of the Commission may make and sign a written memorandum of the terms of settlement which shall be filed in the Registry and may be received in evidence in any proceedings.
 - (14) If the application is not discontinued or settled and the Member of the Commission presiding at the conference considers that further conciliation would not be appropriate, then the Member will conclude the conference by issuing a written memorandum in accordance with the approved form, which may also contain:
 - (a) an order requiring the parties to confirm the assertions and the basis of their positions as outlined in the Form 3 and Form 4 as lodged.
 - (b) an order requiring the applicant to provide better particulars concerning the Section 106 application or as to an application pursuant to Section 167 of the Act, a copy of which shall be filed in the Registry;
 - (c) an order that the respondent employer provide better particulars including written reasons for the dismissal of the employee, given at the time, or to be relied upon to the applicant if not already given, or if there is a denial of a dismissal then the grounds upon which the dismissal is denied, a copy of which shall be filed in the Registry;
 - (d) an order requiring the respondent employer to confirm the basis of any jurisdictional challenge to the application being heard and determined, a copy of which shall be filed in the Registry;

- (e) a statement confirming the relevant costs provisions under the Act;
 - (f) an order that all parties provide discovery in accordance with Rule 25.
- (15) Before, or not more than 3 business days after the conclusion of the conference, the Member of the Commission must prepare a memorandum -
- (a) which will include a preliminary assessment of the merits of the claim (or, if there is more than 1 claim, of each claim) and any defence of the claim (or claims); and
 - (b) recommending to the parties how best to proceed to resolution of the questions in issue between them (or, if in the Member's opinion the application patently lacks merit, recommending that the claim be withdrawn),
- and forward it to the parties, provided that any memorandum so prepared is subject to sub-rule (12).
- (16) Upon the filing of Form 5, the Commission will give directions as to the date, time and place of the hearing and determination of the application and the parties will be given notice.
- (17) Nothing in this rule shall prevent the Commission making procedural and interlocutory orders as are reasonable for the effective conduct of proceedings.
- (18) Nothing in this rule shall derogate from the power of the President to direct that the application be heard forthwith or at some other time or before some other Member of the Commission.
- (19) The application lodged pursuant to sub-rule (1) and the response lodged pursuant to sub-rule (5) will not be taken to be formal pleadings. The Commission may where appropriate, including during proceedings conducted pursuant to Section 155B of the Act, grant leave to amend an application or a response lodged pursuant to the relevant sub-rule. This may include for example the alteration of particulars and with the consent of the parties, the name of the respondent so as to cite the correct employer of the applicant.
- (20) A breach of either the terms of a memorandum to which sub-rule (13) applies or any other written agreement reached between the parties in consequence of the Section 155B conference, will allow the aggrieved party to approach the Commission for further and other relief by lodging an application for directions.

- (21) Where an applicant in a proceeding relating to a Section 106 application fails to attend the proceeding in person or by a representative, the Commission may, if satisfied that the applicant had reasonable notice and a reasonable opportunity to be heard, dismiss the application.
- (22) Nothing in this rule will prevent the Commission from waiving compliance with the Rule or making directions for the processing of an application in a manner not contemplated in the relevant Rule where the circumstances warrant.
- (23) For the purposes of Section 155B proceedings under this Rule, reference to the Commission will where appropriate include the Court or a Stipendiary Magistrate where the President so directs.
- (24) Where an authority under another Act purports to refer a matter to the Commission pursuant to Chapter 3 Part 6 of the Act, the proceedings will be commenced by the filing of a statement by the authority setting out the nature of the matter and the parties said to be involved. Any such matter will then be conducted in a manner as directed by the Commission including where appropriate, as otherwise contemplated by this rule.
- (25) Where an applicant lodges an application under this Rule and in response to any clarification sought by the Registrar or a Member regarding their intention to proceed does not confirm such an intention within 10 days, the matter may be deemed to be discontinued without further notice.

NATIONAL ELECTRICITY (SOUTH AUSTRALIA) ACT 1996
PURSUANT to section 41 (3) of the National Electricity Law (NEL), the Australian Energy Market Commission (AEMC) hereby publishes the following Ministerial Council on Energy (MCE) direction:

MCE direction to the AEMC

Section 41 of the NEL enables the MCE to direct the AEMC to review any matter relating to the National Electricity Market (NEM) or any other market for electricity.

Pursuant to section 41 of the NEL, the MCE directs the AEMC to conduct a review of the arrangements for the provision and utilisation of electricity transmission services and the implications for the market frameworks governing transmission investment in the NEM, particularly in light of the anticipated impacts of climate change policies and the potential impact of extreme weather events.

The AEMC's review should focus on identifying any inefficiencies or weaknesses in the inter-relationship between transmission and generation investment and operational decisions under the current market frameworks and amendments recently approved, having due regard for the limited time some of them have been in place. Where appropriate, the AEMC should recommend changes which would better align incentives for efficient generation and network investment and operation with a view to promoting more efficient and reliable service delivery across the integrated electricity supply chain.

Where deficiencies are identified in the incentives provided by the market frameworks, the AEMC should consider whether they could be satisfactorily addressed by incremental changes to the transmission arrangements or whether more fundamental changes are required, noting recent and ongoing reforms to the transmission framework. If the AEMC concludes that fundamental changes are essential, it shall consider whether there are any implications for the existing arrangements in the NEM and, if required, identify relevant options for change for consideration by the MCE.

In reviewing the existing arrangements and identifying any options for reform, the AEMC shall have regard to the National Electricity Objective in the NEL and the Council of Australian Governments (CoAG) agreed principles detailed above*. When considering potential proposals to amend the market frameworks, the AEMC should also have regard to the implications for trading and contracting risks and for investment and regulatory uncertainty, as well as the need for transitional and other arrangements to mitigate or manage such impacts.

This work should also take into account potential impacts of new transmission-related measures recommended in the Review of Energy Market Frameworks in Light of Climate Change Policies. The MCE notes in its response to that Review that any future work should take into account the interaction of initiatives, including Scale Efficient Network Extensions and Inter-Regional Transmission Charging.

Specific areas for consideration

In conducting its review, the AEMC shall have regard to the key areas outlined below, as well as any other matters it considers relevant.

These key areas should be considered together in a holistic manner, including assessment of the appropriate future role for transmission in providing efficient services to the competitive sectors of the NEM. The AEMC shall examine the nature, incentive properties and effectiveness of the existing access arrangements and alternative approaches to transmission service provision to the extent necessary for the purpose of this review. This should include consideration of the appropriate allocation and management of costs and risks across the market.

Transmission investment. The AEMC shall consider the extent to which the regulatory framework provides appropriate financial incentives on transmission businesses to ensure efficient and timely service provision. The AEMC should also assess the extent to which the planning framework is effectively aligned with the regulatory process governing transmission investment, including whether sufficiently robust information is provided to inform regulatory decision making. In addressing these issues, the AEMC should consider the impacts of climate change policies and the introduction of the National Transmission Network Development Plan and Regulatory Investment Test for Transmission.

Network operation. The AEMC shall consider the nature, transparency and effectiveness of the current incentive arrangements governing network operation, availability and efficient service delivery. In particular, the AEMC shall assess whether these arrangements provide network businesses with sufficient financial incentives to operate their networks in a manner that optimises overall network availability and market efficiency.

Management of network congestion. The AEMC shall consider and, as appropriate, develop mechanisms that promote more efficient bidding and pricing behaviour by generators in congested parts of the network. It is key that, in developing mechanisms that address network congestion, the AEMC should assess the extent to which congestion, and measures to manage congestion, may impact on generation investment and the liquidity of forward markets (including intra- and inter-regional contracting). In particular, the AEMC should consider how dispatch and price risks might be mitigated with the objective of providing an increased level of certainty to all market participants.

Network charging, access and connection. The AEMC shall consider the effectiveness of the existing transmission network charging and access arrangements. In particular, the AEMC shall consider the development of improved locational signals for generators, and, if necessary, any implications for transmission pricing more broadly, including transmission pricing for load. The AEMC shall also examine the impacts of the existing access regime on generator investment decisions, and should assess the effectiveness of the current arrangements for connection services for generators.

Establishing a Consultative Committee

In tasking the AEMC to undertake this review, the MCE notes the importance of engaging with the energy sector and drawing upon relevant technical expertise.

In this regard, the AEMC is to establish a Consultative Committee comprising representatives from:

- the Australian Energy Market Operator;
- the Australian Energy Regulator;
- industry groups and representatives from electricity networks, electricity generators (including renewable generation), and electricity retailers; and
- energy user representatives.

Timing and process

The MCE requires that the AEMC:

- undertake a formal stakeholder consultation process, including the release at least one interim report consulting on its interim conclusions and recommendations;
- if considered appropriate by the AEMC, hold a public forum; and
- provide a final report setting out its policy conclusions and recommendations to the MCE by 30 November 2011.

The AEMC must publish a copy of the final report on its website once MCE has had at least two weeks to consider its recommendations.

* The CoAG agreed principles as outlined in the Terms of Reference relate to reforms to the framework supporting network investment that have been, and are continuing to be, implemented. These principles are:

- accountability for jurisdictional transmission investment, operation and performance will remain with transmission network service providers;
- where possible, the new regime must at a minimum be no slower than the present time taken to gain regulatory approval for transmission investment; and
- the new regime must not reduce or adversely impact on the ability for urgent and unforeseen transmission investment to take place.

Further details on the above matter are available on the AEMC's website www.aemc.gov.au. All documents in relation to the above matter are published on the AEMC's website and are available for inspection at the offices of the AEMC.

7—Compliance with Standards 3.2.2 and 3.2.3 of *Food Standards Code*

An accredited producer must ensure that the activities under the accreditation are carried on in compliance with Standards 3.2.2 and 3.2.3 of the *Food Standards Code* (despite the fact that those Standards exclude food businesses that fall under the definition of *primary food production* from compliance with those Standards).

10—Annual fees and returns

- (1) For the purposes of section 17 of the Act, for each year, an accredited producer must, not later than the day and month specified by the Minister by notice in writing to the accredited producer—
 - (a) pay to the Minister the annual fee fixed by Schedule 1; and
 - (b) lodge with the Minister a return that conforms to the requirements of the Minister about its form, contents and the manner in which it is made.
- (2) The penalty for default in payment of an annual fee or lodging an annual return is as set out in Schedule 1.

11—Fee payable before grant of accreditation

Before a person is granted accreditation, the person must pay a fee of an amount calculated by multiplying—

- (a) the annual fee that would have been payable by or on behalf of the person had the person been an accredited producer at the last date for payment of the annual fee; and
- (b) the proportion that the number of whole months between the grant of accreditation and the next date for payment of the annual fee bears to 12 months.

12—Fees generally

- (1) Further fees are payable as set out in Schedule 1.
- (2) The Minister may waive or reduce a fee payable under these regulations if the Minister considers that appropriate in the circumstances.
