The DPA is proposing to amend current policies at the council-wide level in relation to renewable energy facilities, in particular wind farms. It is also introducing both new and amended policies for wind farms and ancillary development, at the council-wide level and in certain zones where such facilities are best located to take advantage of the natural resource (wind) upon which they rely.

The policies in the DPA are aimed at providing greater clarity for the development of wind farm facilities by recognising them as an envisaged form of development in some zones. The policy will recognise that wind farms may need to be located in prominent locations to take advantage of the wind required for effective operations.

The DPA will be on public consultation from 19 October 2011 to 13 December 2011.

Copies of the DPA are available during normal office hours at the Department of Planning and Local Government, Level 5, 136 North Terrace, Adelaide (telephone: (08) 8303 0791) and the following locations:
