MINING ACT 1971

NOTICE is hereby given in accordance with Regulations 86 (1), (3), (4) and (7) of the Mining Regulations 2011, determining the reporting periods and minimum information required to be provided in a compliance report for a mineral lease and any associated miscellaneous purposes licence for metallic and industrial minerals (excluding extractive minerals, coal and uranium).

1. *Compliance Reports*

The compliance report must summarise the lease or licence holders own compliance monitoring activities, and provide evidence that mining operations are compliant with the approved program for environment protection and rehabilitation (PEPR), mineral lease and/or miscellaneous purposes licence and the Mining Act 1971.

The compliance report will replace the mining and rehabilitation compliance report formerly required in some lease or licence conditions.

2. *Requirement for Submission and Reporting Period*

Unless otherwise agreed by the Director Mining Regulation in writing:

- A compliance report is required for all mineral leases and any associated miscellaneous purposes licences.
- The reporting period is one year, based on the anniversary of the lease or licence grant or the part of the final year if the lease or licence has been surrendered or cancelled.
- The period after the reporting period to submit the compliance report is two months.

3. *Content of Compliance Report*3.1 *Required elements of Regulation 86 (4)*

The compliance report must include all elements of Regulation 86 (4) (a-i).

If the mine has been closed and all rehabilitation was completed during the previous reporting period, only relevant sections of Regulation 86 (4) are required to be addressed.

3.2 *Other Information Required*

The information listed in Sections 3.2.1 to 3.2.11 must be included.

3.2.1 *Identification*

The report must clearly identify:

- tenement number(s);
- name of the mine operation;
- general location details;
- name(s) of the mine owner and mine operator(s);
- reference and approved date of relevant PEPR being reported against;
- person accepting responsibility for the report;
- dates of the reporting period for the report; and
- date of preparation of the report.

3.2.2 *Changes to Mining Operations and Emerging Environmental Hazards*

Describe any changes made to the mining operations since the previous compliance report or current approved PEPR.

If any changes to the site footprint have occurred since the current approved PEPR, include a plan of the current site extent of the mine operations.

Describe any new knowledge about the environment at the mine operation if this is different from the current approved PEPR.

If any changes to the mining operation or new knowledge has been obtained about the environment, an analysis of potential new environmental risks in accordance with Regulation 86 (4) (h) must be included.

If a new risk is identified that may materially alter the existing approved outcomes or criteria (including the introduction of new outcomes to be achieved), the report must outline a plan to review the PEPR and/or apply for a change to the lease conditions.

3.2.3 *Operations Summary Table*

Provide a table (as per Table 1) and a scale plan showing disturbed and rehabilitated areas for all tenements associated with the mining operation.

Table 1—Operations Summary Table

Domain	Last reporting period		Current reporting period		Proposed next 12 months	
	Disturbed (ha)	Rehabilitated (ha)	Disturbed (ha)	Rehabilitated (ha)	Disturbed (ha)	Rehabilitated (ha)
(List domain)						

3.2.4 *Rehabilitation and Environmental Management Activities*

Details to be provided must include:

- the amount of land disturbed;
- vegetation cleared;
- new measures implemented to avoid or control environmental impact;
- revegetation or rehabilitation earthworks conducted;
- evidence (by using closure and rehabilitation criteria in the current approved PEPR) of the effectiveness of rehabilitation being progressively undertaken; and
- any problems or potential improvements learned from previous rehabilitation.

An assessment of risks that rehabilitation may or may not be achieved as planned must be included. If a risk of failure is identified, detail new strategies to be undertaken to achieve environmental outcomes in the current approved PEPR.

3.2.5 *Ore Reserves and Mine Life*

A summary must be included of any new delineation or exploration drilling activities on or off the lease, review of reserves, or other potential sources of ore (e.g. from nearby mines) that have a significant effect on the future production levels or mine life.

3.2.6 *Compliance with Outcomes*

This section must include a clear statement that operations were, or were not, compliant with each environmental outcome (for construction, operation and post mine closure) stated in the lease or licence conditions and the current approved PEPR. The statement must be supported by a summary of compliance criteria data that clearly demonstrates the conclusion that the outcome was (or was not) fully achieved.

Where native vegetation has been approved for clearance, the compliance report must include:

- a reconciliation between the approved maximum clearance in hectares;
- the amount cleared in the reporting period;
- the total amount cleared to date; and
- an estimated amount to be cleared in the next reporting period.

3.2.7 *Rectification of Non-compliances*

Where instances of non-compliance with either the environmental outcomes in the current approved PEPR or lease conditions have been noted in the compliance report, each non-compliance must state:

- date of the incident;
- state if the incident was a reportable incident under Regulation 87. If so, the report must also state the date the incident was initially reported to the Minister and the date the written report was provided to the Minister;
- who detected the non-compliance;
- what environmental outcome or lease condition was breached;
- if and how the non-compliance was, or is planned to be, rectified; and
- what measures, if any, will be taken to prevent recurrence.

Where non-compliances have previously been reported, in compliance reports (under Regulation 86) or incident reports (under Regulation 87) and not fully rectified at the time of reporting, a progress report must be included to assess the effectiveness of rectification.

3.2.8 *Compliance with Leading Indicator Criteria*

This section must summarise data relating to any leading indicator criteria approved in the PEPR.

If any leading indicator criteria have been triggered, the report must state the actions that were taken and if the relevant control strategies continue to be effective.

3.2.9 *Management System Audits*

If an audit of any part of the operation management system was conducted during the reporting period, the following information on the audit must be included:

- when the audit was undertaken;
- who undertook the audit;
- what aspect(s) of the management system was/were audited;
- what issues, or recommendations for improvement, were noted;
- an assessment of the potential for any issues identified in the audit to lead to a noncompliance with approved environmental outcomes; and
- what corrective action has been, or will be, taken to address any issues.

3.2.10 *Environment Protection and Biodiversity Conservation Act Reporting*

If the lease or licence was the subject of an approval under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999, a section must be included demonstrating compliance with all Environment Protection and Biodiversity Conservation Act approval conditions.

3.2.11 *Liaison with Affected Parties*

For rural areas either:

- Provide landholding details and a description of land use/type for both the directly affected landowner and any adjacent landowner; or
- Summarise any concerns or complaints raised by landowners and how these were addressed.

For mines adjacent to urban areas:

- summarise the land use;
- indicate how concerns or complaints raised by third parties were addressed;
- where applicable, indicate the class of exempt land where mining activities were undertaken; and
- where applicable, provide a statement that all waivers for exempt land required for the current operation are in place in accordance with the Mining Act.

3.3 *Maps and Plans*

If maps or plans are included in the report, these must conform to the following standards:

- be based on the Australian Height Datum (AHD);
- state the relevant datum (e.g. GDA94, WGS84);
- use metric units;
- include title, north arrow, scale bar, text and legend;
- state date prepared and author; and
- be of appropriate resolution and scale for represented information.

4. *Submission of Reports*

Two hard copies and an electronic version of the compliance report must be submitted; the information in all must be identical.

Each page, plan or other separate sheet must include the lease number(s), date of the compliance report preparation and sequential page numbering.

The electronic version must be submitted in either Acrobat PDF or Microsoft Word compatible files.

A single report may be submitted that reports on a group of leases and licences that are worked under a single approved PEPR.

Compliance reports can only be submitted by the tenement holder(s). Reports submitted by consultants or agents will not be accepted unless accompanied by a signed statement from the leaseholder endorsing the content.

SPECIAL CONDITIONS

Licence Term

The PELs will be offered for a five-year term with a right of renewal for two further five-year terms at the end of the initial term, with compulsory relinquishment of 33⅓% of the original area at each renewal, subject to prevailing Petroleum and Geothermal Energy Act 2000 provisions.

Security

A minimum \$50 000 security (amount subject to review) will be required to be lodged by the licensee prior to entering a year of the licence term in which seismic or well activities are planned, or prior to undertaking earlier seismic or well activities.

Applications

Applications lodged under Section 65(1) of the Petroleum and Geothermal Energy Act 2000 are required to be made in the approved form as identified on the DVD "Cooper Basin CO2012-A Acreage Release, Otway Basin OT2012-A Acreage Release" (can be ordered from: <http://www.petroleum.dmitre.sa.gov.au/> or the Executive Director, Energy Resources Division at the address below).

Applications:

- must satisfy the requirements of Regulation 4 of the Regulations under the Petroleum and Geothermal Energy Act 2000;
- must be accompanied by a proposed work program for the first five year term of the licence;
- must be accompanied by a statement of the financial and technical resources available to the applicant; and
- must be accompanied by the scheduled application fee.

Applications close at 4 p.m. on Thursday, 4 April 2013 (Australian Central Time)

The following special instructions for lodgement of applications should be observed:

- the application and supporting data, together with the scheduled application fee (currently \$3 862 per PEL application), payable to the Department for Manufacturing, Innovation, Trade, Resources and Energy, should be sealed in a plain envelope or package and clearly marked as 'Application for Area CO2012-A—Commercial-in-Confidence' or 'Application for Area OT2012-A—Commercial-in-Confidence'; and
- the envelope or package should then be enclosed in another envelope and posted, or delivered by hand to:

Executive Director,
Energy Resources Division,
Department for Manufacturing, Innovation, Trade,
Resources and Energy,
Level 7, 101 Grenfell Street,
Adelaide, S.A. 5000.

Copies of the basic exploration data pertaining to the area comprising this notice are available from the Energy Resources Division of the Department for Manufacturing, Innovation, Trade, Resources and Energy. Enquiries may be directed to Barry Goldstein, Executive Director, Energy Resources Division (Telephone (08) 8463 3200; email: barry.goldstein@sa.gov.au).

Criteria for Assessment of Applications

The winning bidder will be selected on the basis of the five year work program bid. The work program must include a statement of exploratory operations the applicant proposes to carry out in each year of the first five-year licence term. The aim of the work program is to evaluate the prospectively of the licence area and discover regulated resources. It is expected that at least one petroleum exploration well would be included in the five-year work program.

Bids will be assessed taking account of the criteria listed below. It is important to note that the timing of well drilling and seismic acquisition will be taken into account. The most important criteria for assessment of CO2012-A or OT2012-A work programs are:

- the number of exploration wells to be drilled in the licence area (development wells are not considered);
- the number of years the applicant is prepared to guarantee the program;
- the extent to which proposed wells are supported by seismic data;
- the amount and nature of seismic surveying to be carried out and its timing;
- other data acquisition (e.g. gravity, aeromagnetic or geochemical surveys);
- seismic reprocessing to be carried out;
- adequacy of financial resources and technical expertise available to the applicant; and
- the applicant's past performance in fulfilling work program commitments elsewhere in Australia.

The Minister is expected to announce the winning bidder, together with details of the work program in May 2013.

RULES OF COURT

District Court Civil Rules 2006 (Amendment No. 20)

BY virtue and in pursuance of Section 51 of the *District Court Act 1991* and all other enabling powers, we, Geoffrey Louis Muecke, Dean Ernest Clayton and Anne Elizabeth Bampton, Judges of the District Court of South Australia, make the following Rules of Court.

1. These Rules may be cited as the *District Court Civil Rules 2006 (Amendment No. 20)*.

2. The *District Court Civil Rules 2006* are amended as set out below.

3. This amendment will commence on 1 October 2012, or upon its gazettal, whichever is the later.

4. Rule 310B applies to actions and proceedings commenced after the commencement of these Rules.

5. Rule 33 is amended by:

- (1) deleting the words 'A plaintiff must, at least 90 days before commencing an action to which this rule applies give the defendant' in subrule (2) and inserting in their place:

'In actions to which this rule applies the plaintiff must, at least 90 days before commencing an action for damages for personal injuries, and at least 21 days before commencing an action in all other cases, give to the defendant or the defendant's insurer';

- (2) deleting from subrule (3) the words 'the plaintiff must send a copy of the notice and the accompanying materials to the insurer' and inserting in their place:

'the plaintiff may send a copy of the notice and the accompanying materials to the insurer, and not to the defendant';

- (3) deleting subrule (4) and inserting in its place:

'(4) The defendant or the defendant's insurer, as the case may be, must, within 60 days after receiving a notice in relation to a claim for damages for personal injuries and within 14 days in all other cases, respond in writing to the notice by—

- (a) accepting the plaintiff's offer of settlement; or
- (b) making a counter-offer which is accompanied by sufficient details and supporting material to enable the plaintiff to assess the offer and to make an informed response to it; or
- (c) stating that liability is denied and the grounds on which it is denied.'

- (4) deleting subrule (9).

6. Rule 229 is amended by:

- (1) inserting a Note at the foot of subrule (1) as follows:

Note—A party seeking the entry of judgment by default under Section 15 (4) or Section 16 (4) of the *Building and Construction Industry Security of Payment Act 2009* (SA) will have to satisfy the Court by evidence of the circumstances referred to in Section 15 (1) or Section 16 (1) of that Act. Rule 316C(4) provides that that evidence may be provided by means of affidavit.'

- (2) inserting a new subrule (2) as follows:

'(2) In the cases to which subrule (1) refers, any non-compliance by a plaintiff with rule 33 does not preclude the plaintiff from entering judgment in default without first obtaining the Court's permission.'

- (3) renumbering subrules (2), (3) and (4) as subrules (3), (4) and (5) respectively.

7. Rule 264 is amended by inserting a new subrule (3E) immediately after subrule (3D) as follows:
