## DEVELOPMENT ACT 1993, SECTION 48: DECISION BY THE DEVELOPMENT ASSESSMENT COMMISSION AS DELEGATE OF THE GOVERNOR

### *Preamble*

1. On 21 January 1999 notice of the Governor's decision to grant a development authorisation under Section 48 of the Development Act 1993, in respect of a solid waste landfill (Northern Adelaide Waste Management Authority—Balefill (Smithfield Quarry Landfill facility)) at Medlow Road, Uleybury was published in the *South Australian Government Gazette* at page 483.

2. Simultaneously, the Governor delegated his power to grant a variation to the solid waste landfill development authorisation to the Development Assessment Commission pursuant to Section 48 (8) of the Development Act 1993.

3. A variation to the authorisation relating to the landfill lining system was notified in the *Gazette* on 21 October 2004 at page 3891.

4. A variation to the authorisation relating to the construction of a third leachate pond was notified in the *Gazette* on 9 January 2014 at page 3.

5. By letter dated 9 October 2015 Northern Adelaide Waste Management Authority, being the beneficiary of the development authorisation, sought a variation to the authorisation so as to permit an extension of the closure date from 21 October 2024 to 30 June 2027.

6. For ease of reference the conditions attached to the Northern Adelaide Waste Management Authority solid waste landfill development authorisation are republished in full hereunder.

#### *Decision*

Pursuant to Section 48 (7) (b) (ii) of the Development Act 1993, and having due regard to the matters set out in Section 48 (5) and all other relevant matters, the Development Assessment Commission exercising the power of the Governor delegated by notice in the *South Australian Government Gazette* dated 21 January 1999 pursuant to Section 48 (8), varies the Northern Adelaide Waste Management Authority solid waste landfill development authorisation dated 9 January 2014 as subsequently varied on the date set out in paragraph 4 of the preamble to this decision, in accordance with the following conditions.

#### CONSOLIDATED VERSION OF CONDITIONS OF AUTHORISATION

1. Except where minor amendments may be required by other legislation, or by conditions imposed herein, the proposed major development shall be undertaken in strict accordance with:

- (a) the drawings contained with the Development Application dated 9 February 1996 (and amended by the application and plans dated 18 November 1998) and supporting documentation in the Development Application, except as varied by the conditions listed below or to the extent that they are varied by the plans described in paragraphs 1 (b - c);
- (b) the drawings contained in the Report on Equivalency of Liner System, Base Liner System—NAWMA Uleybury Landfill, prepared by Golder Associates Pty Ltd (Report Number 04663305/006, dated 29 June 2004), the letter from Golder Associates Pty Ltd dated 17 August 2004 and the letter from NAWMA dated 30 August 2004, except as varied by the conditions listed below or to the extent that they are varied by the plans described in paragraph 1 (c);
- (c) the drawings and construction methods contained in the letter from the Northern Adelaide Waste Management Authority titled 'Application for Variation to Development Approval for NAWMA Uleybury Landfill (EPA Licence #12979)—proposal to construct third leachate pond' dated 29 July 2013 and attached report titled 'Uleybury Landfill Leachate Pond Technical Specification' dated 24 July 2013 (Report Number 137665016-001-SP-Rev1), prepared by Golder Associates Pty Ltd.

#### *Listed Wastes*

2. No Listed Waste as prescribed in Schedule 1, Part B of the Environment Protection Act 1993, or contaminated soil and material or asbestos containing material, will be permitted to be disposed of without further development authorisation.

#### *Management Committee*

3. A Management Committee to monitor the landfill site and its operations, report regularly to NAWMA and Council, and receive reports and instructions from NAWMA must be established prior to the commencement of landfill operations. The Management Committee must be maintained for the duration of the construction and operation of the facility with a review of the need for the committee in the post closure phase.

#### *Traffic*

4. Removal and appropriate recycling/disposal of stockpiles along the edge of Adams Road formation must be carried out during upgrading works.

5. NAWMA must pay for the work of upgrading and sealing both Smith Road (making provision for waste trucks to pull off the road in the event of a funeral procession) and Adams Road prior to the receipt of waste at the balefill site.

6. The proponent must bear the cost of Transport SA providing a 'simple left turn treatment' into Smith Road from Main North Road and modify the median nose. These works must comply with the Austroads 'Guide to Traffic Engineering—Part 5' and must be funded by the proponent. The proponent must liaise further with Transport SA on these issues.

#### *Infrastructure*

7. Any water tanks installed on the site must be screened from the surrounding area.

#### *Groundwater*

8. A detailed design of the proposed groundwater protection system (including modelling and monitoring) and the surface water management system must be prepared prior to the issuing of a licence by the Environment Protection Authority.

9. Monitoring bores must be established in a closely spaced network and at varying depths as required at each location to provide satisfactory assurance that groundwater quality beneath adjoining properties will be protected. The location of such bores will be determined in the Landfill Environmental Management Plan and licensing process.

10. The Landfill Environmental Management Plan must provide processes for detecting, monitoring and remedying any impact of the development on groundwater, and such processes must be in place before any waste is received.

#### *Surface Water*

11. The construction of a stormwater sediment control dam proposed on the southern creek must be located 'off-stream' to minimise the potential for mixing of clean stormwater run-off with dirty run-off from the balefilling.

#### *Groundwater Interception and Leachate Management*

12. A leachate monitoring bore must be installed within each stage to assist with leachate management, particularly if leachate recirculation is incorporated into the management strategy.

13. Certification from a geotechnical consultant that the proposed side slopes of the balefill will be suitable for the installation of the side liner system from a stability aspect must be obtained prior to commencement of site preparation.

14. The quarry walls in the northern and southern portions of the quarry must be left intact due to the close proximity of the drainage lines and re-profiling of these areas must be conducted by utilising clean fill.

15. External sources for construction materials must be identified and available at least six months in advance of need. The suitability of clay for lining and capping must be certified by a geotechnical consultant.

#### *Odour*

16. The Landfill Environmental Management Plan must provide for monitoring and reporting of landfill gas, odour and dust incursions at the site.

#### *Operational lifespan*

17. The landfill operation must cease from the date of 30 June 2027, or when the quarry has been filled to match the natural contours of the land, which ever first occurs.

#### *Heritage*

18. The party with the benefit of this approval must ensure that operators and construction personnel are made aware of the requirements under the Aboriginal Heritage Act 1988, that any burial site skeletal material or significant artefact discovery is reported to the Department of the Premier and Cabinet Environment (Division of Aboriginal Affairs and Reconciliation).

#### *Post Closure Aspects*

19. The natural level of the original hill on the eastern face of the quarry must be used as the reference to determine the final height of the balefill and achieve the original contours.

20. The slope of the final capping layer must use design options such as centre furrowing or the formation of contour banks (designed to collect moisture for improved plant growth) to control run-off.

#### *Building Rules*

21. Work constituting building work under the Development Act 1993, must be certified by the City of Playford or a private certifier, as complying with the Building Rules. Copies of the relevant certification documentation shall be provided to the Minister for Planning, as outlined in Regulation 64 of the Development Act 1993. No building works shall commence until a favourable decision has been notified in writing to the applicant by the Governor or the Development Assessment Commission as delegate of the Governor.

*Base Liner*

22. The base liner shall be constructed with the following specifications:

- (a) the HDPE membrane shall have a minimum average thickness of 1.8 mm with tolerance of no more than +/- 10% with 95% confidence;
- (b) the clay liner shall be compacted to a minimum of 300 mm thickness with a permeability of  $1 \times 10^{-8}$  m/s or less;
- (c) the clay shall be laid in two layers of 150 mm compacted thickness;
- (d) the sub-grade shaping layer shall have a minimum thickness of 100 mm; and
- (e) the liner shall be constructed under level 1 supervision.

## NOTES TO APPLICANT

1. The Environment Protection Authority may require the proponent to amend the Landfill Environmental Management Plan (LEMP) to satisfy the Authority's licensing requirements, including review of the following:

- (a) A Vegetation Management and Revegetation Plan, prepared in consultation with the City of Playford and the local community. It is to have regard to the measures suggested in the Assessment Report for the Environmental Impact Statement (as amended) for the Northern Adelaide Waste Management Authority Bafill project (particularly in Sections 3.2 and 4.1).
- (b) A comprehensive Pest Plant and Animal Management Plan to be implemented prior to the landfill operations commencing, to ensure the site is free of as many pest species as possible from the beginning of operations. Adequate monitoring and follow-up control shall occur.
- (c) A detailed Groundwater and Leachate Management Plan prepared by the proponent, to the satisfaction of the Environment Protection Authority, prior to receipt of any waste.
- (d) A Soil Erosion and Drainage Management Plan (SEDMP), to minimise and control any on-site soil erosion (particularly of stockpiled material) as described in the Environment Protection Agency's 'Stormwater Pollution Prevention Codes of Practice'.
- (e) A Surface Water Management Plan. The plan should address the collection and management of all on-site surface water, including any contaminated run-off originating from roadways, car parks and hardstands, the vehicle workshop or wheel washing facility, and management of all surface water flows entering the site from land external to the site.
- (f) The indicative location of topsoil and cover material stockpiles, in particular the location of storage areas during stages 3 and 4 and the details of erosion measures.
- (g) Provisions for a regular review of waste treatment and disposal methods to facilitate implementation of continuous improvement programs. It should also include provisions for the implementation of corrective actions in the event of any failure of the leachate and liner.
- (h) Additional data concerning the site geology as it becomes available which could necessitate minor changes to landfill design or method of operation and the installation of additional groundwater monitoring bores.
- (i) Details of monitoring and reporting of meteorological parameters required at the site.
- (j) Monitoring and reporting of landfill gas, odour and dust incursions at the site.
- (k) Details of the gas flaring system to be designed to ensure that there is a high quality combustion (if not used for power generation) and that fire risks to surrounding properties is eliminated.
- (l) An upgraded landfill gas contingency plan for on-site buildings, to include provisions for evacuation and ongoing monitoring until safe concentrations are present.
- (m) Contain details on on-site vehicle parking and truck wheel wash.

2. Control over the types of waste to be received at the site will be exercised by the Environment Protection Authority. This will be done through conditions of environmental authorisation or requirements under a relevant Environment Protection Policy rather than through conditions of development authorisation.

3. Financial Assurance Strategy in accordance with the provisions of Section 51 of the Environment Protection Act 1993, may be required by the Environment Protection Authority as a condition of licence.

4. For the purposes of any licensing the Environment Protection Authority shall be provided with the details on the timing and construction aspects of the third leachate pond.

5. Post closure management responsibilities should be established.

6. A more sustainable after-use for the site that would encourage the regeneration and rehabilitation of natural communities should be considered during future post closure planning.

7. The City of Playford may need to commit financial and other resources in future to alleviate noise and visual impacts from waste trucks if present and future residential areas are impacted. These costs may need to be recouped from NAWMA. While it is not possible to quantify these costs at present, provision should be made between the Council and NAWMA to ensure that appropriate revenue can be raised to address the costs.

8. Provision of an alternative water supply if groundwater users in the area find supplies affected shall be addressed as part of the contingency planning.

9. If blasting is required during construction, explosion vibration characteristics and monitoring requirements shall be determined, prior to commencement, in consultation with the Environment Protection Authority and the City of Playford.

Given under my hand at Adelaide on 19 November 2015.

QUARTERLY STATEMENT**

**GOVERNMENT OF SOUTH AUSTRALIA****COMMENTARY TO THE STATEMENT OF THE AMOUNTS CREDITED TO AND ISSUED  
FROM THE CONSOLIDATED ACCOUNT FOR THE QUARTERS ENDED  
30 JUNE 2015 AND 30 JUNE 2014*****Receipts******Taxation***

Payroll tax receipts in 2014-15 were higher than in 2013-14, mainly due to growth in taxable payrolls.

Stamp duty receipts in 2014-15 were higher than in 2013-14. This was mainly due to conveyance duty, reflecting growth in the average price of property transactions and increased receipts from large transactions. Insurance duty collections were also higher in 2014-15 than in 2013-14, reflecting growth in average premiums.

Gambling tax receipts in 2014-15 were slightly lower than in 2013-14 mainly due to lower net gambling revenue from electronic gaming machines. In the June quarter 2015 gambling tax receipts were lower than a year earlier due to the timing of payments to the Consolidated Account.

Land tax receipts for the final quarter and full year were lower than in 2013-14, due to the timing of some large individual land tax payments.

***Royalties***

Royalty receipts in 2014-15 were lower than in 2013-14, mainly due to lower commodity prices.

***Fees and charges***

Fees and charges in 2014-15 are higher than in 2013-14, mainly due to higher guarantee fees and higher regulatory fees which are in line with the increase in budget in 2014-15.

***Commonwealth – General Purpose Payments***

Growth in general purpose grants in 2014-15 compared to 2013-14 is not indicative of underlying Goods and Services Tax (GST) revenue growth. This is because monthly grants are paid according to a payment schedule prepared by the Commonwealth Government rather than in accordance with the actual emerging monthly GST collections.

In its 2014-15 Final Budget Outcome, the Commonwealth Government indicated that the GST pool available to the States grew by 6.4 per cent in 2014-15.

Receipts in 2014-15 are slightly higher than originally anticipated, mainly due to the annual adjustment for actual collections received by the Commonwealth in 2013-14.

***Commonwealth—Specific Purpose Payments***

Specific Purpose Payments (SPPs) for 2014-15 were lower than 2013-14, mainly because the recurrent SPP for Government schools is now being paid directly to the Department of Education and Child Development under the new National Education Reform Agreement.

### *Commonwealth—National Partnership Payments*

National Partnership (NP) payments in 2014-15 were lower than in 2013-14, largely due to the Commonwealth Government no longer funding the NP on Certain Concessions for Pensioner Concession Card and Senior Card Holders, and the NP on Low Socio-Economic Status School Communities being superseded by changes as part of the National Education Reform Agreement. Payments for the NP on Remote Indigenous Housing were also lower in 2014-15 than in 2013-14, mainly due to the payment profile of the NP.

### *Other receipts*

Other receipts for the 12 months to June 2015 were higher than the same period in 2014, mainly due to the return of equity from SA Water.

### **Payments**

Payments pursuant to the Appropriation Act (i.e. to agencies) are \$120 million higher than forecast in the original 2014-15 Budget. Greater than budgeted payments were made to the following:

- Department for Communities and Social Inclusion (\$47 million)
- Department for Correctional Services (\$16 million)
- Department of Environment, water and Natural Resources (\$16 million)
- Department of Planning, Transport and Infrastructure (\$44 million)
- Department of State Development (\$36 million)
- Administered Items for Department of Treasury and Finance (\$14 million)

This was partially offset by lower than budgeted payments to:

- Administered Items for the Attorney-General's Department (\$48 million)

All appropriations were paid within approved limits established under the various acts.

### **Note**

Caution should be exercised in interpreting the quarterly statement of Consolidated Account transactions. Unlike the State Budget, which comprises transactions on an accrual basis, the information reflected in the quarterly statements is limited to cash transactions. Also, the Consolidated Account does not capture all the transactions undertaken by the general government sector (in particular, it does not record receipts to and payments from special deposit accounts). Finally, the timing of receipts and payments could be volatile within a particular year. As a result, apparently large movements between years may only be due to changes in the timing of receipts and payments and therefore may not have consequences for the underlying budget position.
