FISHERIES MANAGEMENT ACT 2007

Items Seized

Notice is hereby given pursuant to Section 90 (2) of the *Fisheries Management Act, 2007*, that the following items have been seized by Officers of the Department of Primary Industries and Regions SA, Fisheries and Aquaculture.

at OUTER HARBOR on 12/03/2018

5 drop nets: 1 x light green with thin rope; 1 x red and black rope; 1 x white and black rope; 2 x dark green rope

The above items were suspected to have been used, or intended to be used, in contravention of the *Fisheries Management Act, 2007*, and were taken into possession at:

OUTER HARBOR

After the expiration of one month from the date of this notice the items listed above shall, on the order of the Minister for Agriculture, Food and Fisheries, be forfeited to the Crown and shall be either disposed of by sale or destruction.

The above items may be viewed at the **Largs North** office of the Department of Primary Industries and Regions SA, Fisheries and Aquaculture.

FISHERIES MANAGEMENT ACT 2007

Items Seized

Notice is hereby given pursuant to Section 90 (2) of the *Fisheries Management Act, 2007*, that the following items have been seized by Officers of the Department of Primary Industries and Regions SA, Fisheries and Aquaculture.

at ROBE on 10/03/2018

1) 1 x Rock Lobster pot, Red neck, 2 x hi-fry bait baskets, stainless steel mesh, 2 x 4 litre floats, orange & red rope.

The above items were suspected to have been used, or intended to be used, in contravention of the *Fisheries Management Act, 2007*, and were taken into possession at:

ROBE

After the expiration of one month from the date of this notice the items listed above shall, on the order of the Minister for Agriculture, Food and Fisheries, be forfeited to the Crown and shall be either disposed of by sale or destruction.

The above items may be viewed at the **Kingston** office of the Department of Primary Industries and Regions SA, Fisheries and Aquaculture.

MINING ACT 1971

NOTICE is hereby given in accordance with Regulations 30 (3) and 49 (3) of the *Mining Regulations 2011*, determining the minimum information required to be provided in a Mining Proposal or Management Plan for an Extractive Minerals Lease (EML) and any associated Miscellaneous Purposes Licence (MPL) applications:

1 REQUIREMENT FOR DECLARATION OF ACCURACY

The mining proposal and/or management plan must include a signed statement by the applicant in accordance with Regulation 30(4) and/or Regulation 49(4) that the content of the mining proposal and/or management plan has been reviewed and is accurate.

2 DESCRIPTION OF THE EXISTING ENVIRONMENT

Each of the elements of the existing environment listed in Sections 2.1–2.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed mining operations. If the element is not likely to be impacted by the operation, a statement to that effect must be included (note: the environment is defined in Section 6(4) of the Mining Act 1971).

2.1 Topography and landscape

Provide a description and map (as per 8.1.1.1) of the topography and landscape, detailing the:

- application area; and
- general surroundings.

2.2 Climate

Provide a summary from the nearest weather station of:

- annual rainfall and temperature patterns; and
- prevailing wind directions and speed (including maximum wind gusts).

2.3 Topsoil and subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the application area (show this information on a map as per 8.1.1.2 if there is a variation in soils over the application area); and
- identify any soil characteristics that may be an issue for disturbance or rehabilitation.

2.4 Geological Environment

Provide:

- local geological or site map (as per 8.1.1.2), showing location and dimensions of the deposit and structure (dip and strike where appropriate);
- representative cross sections (as per 8.2.1.1) of the proposed quarry area that identify the extent of the resource and estimate any overlying overburden; and
- a description and results of any geological evaluation work carried out.

2.5 Geohazards

Provide detail on the potential for any of the following natural geohazards to be present in the application area:

- structural instability including slips, faults, karst features or geological unit boundaries;
- minerals that may occur in the material to be quarried (including overburden) and are hazardous to human health specifically radioactive minerals, asbestiform minerals or have the potential to produce respirable silica; and
- minerals that may occur in the material to be quarried (including overburden) that may have the potential to pollute the environment in particular sulphide minerals that may generate acid.

2.6 Groundwater

Provide:

- a statement describing if the application area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*;
- a map (as per 8.1.1.3) showing groundwater wells in the surrounding area, highlighting those used to determine the groundwater level;
- a cross section (as per 8.2.1.2) showing the proposed depth of mining and the depth to groundwater in metres Australian Height Datum (AHD); and
- evidence to validate the estimated depth to groundwater.

If the proposed quarry has the potential to intersect the water table the following must be provided:

- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations), recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer and static water level of any other known drill holes; and
- an assessment of any current use of this water by the landowner (including adjacent landowners) and groundwater dependent ecosystems.

2.7 Hydrology

Provide a Topographic Map (as per 8.1.1.1) and description of the current drainage patterns for the application area and water catchment including:

- location of watercourses, drains, dams and wetlands;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- a statement describing if the application area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*, and provide details on the current availability of water resources within the prescribed area;
- a statement describing if the application area is within a water protection area including areas under the *River Murray Act 2003*; and
- a statement as to whether the application area falls within the Murray Darling Basin.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the proposed mining operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

2.8 Vegetation, weeds and plant pathogens

Provide:

- a description and map (as per 8.1.1.1) of existing flora (native and introduced) in the application area and surroundings;
- the State conservation status and habitat value of native vegetation present in the application area;
- a description of the presence of *Commonwealth Environment Protection and Biodiversity Conservation Act 1999* listed species and ecological communities;
- a description of the extent the application area and adjoining land is affected or potentially affected by pathogens and prescribed weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation or natural regrowth arising from previous clearance.

2.9 Fauna

Describe the native and feral fauna that may be present in the application area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

2.10 Caves

If the application area is within, or near to, known caves or significant limestone formations a survey for the presence of caves must be performed.

Provide a summary of the results of the survey and describe the presence of any caves in karst (limestone) areas within, or near to, the application area and show on a map (as per 8.1.1.5).

2.11 Land use

Provide a description of:

- land use (historical, current and potential) for the application area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- policies relevant to the application area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- other interests or restrictions on the application area, including:
 - public utility easements;
 - if the application is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the *Mining Act 1971* or *Petroleum and Geothermal Energy Act 2000*; and
 - the status of negotiations with Native Title holders or claimants, if the application area includes non-freehold land.

2.12 Proximity to infrastructure and housing

Provide information and a map (as per 8.1.1.4):

- identifying residences within and near the application area;

- identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, telephone and communication lines (both underground and above ground); and
- identifying public roads to be utilised or affected as part of proposed mining operations, including an estimate of the existing traffic movements.

2.13 Exempt Land

Provide a description and map (as per 8.1.1.4) of any applicable:

- exempt land under Section 9 of the *Mining Act 1971*; and
- any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the *Mining Act 1971*.

2.14 Amenity

Provide a summary description of scenic or aesthetic values for the application area and immediate surrounds.

2.15 Air quality

Provide a description of the existing levels of dust and contributors to air quality (both natural and anthropogenic).

2.16 Noise

Provide a description of existing noise levels and contributors to noise (both natural and anthropogenic).

2.17 Heritage (Aboriginal, European, Geological)

Detail and show on a map (as per 8.1.1.1):

- any registered heritage sites in or adjacent to the application areas that are protected under legislation (in so far as may be permitted under the relevant legislation).

2.18 Proximity to conservation areas

Provide information and a map (as per 8.1.1.1) showing:

- proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

2.19 Pre-existing site contamination and previous disturbance

Provide information and show on a map (as per 8.1.1.1) any known existing contamination of the site and/or any disturbance by previous mining operations or other activities.

3 DESCRIPTION OF THE PROPOSED MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.8 must be described only to the extent that they apply to the proposed mining operation. If the element (or part of the element) is not applicable to the proposed mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General description and maps/plans of operations

A summary description of all elements of the proposed operation must be included.

3.2 Resource and Products

3.2.1 Resource

Provide:

A statement of the current estimated resource and a brief description of the basis of this estimate.

A statement of all the following standard extractive minerals proposed to be extracted and sold:

- Basalt;
- Calcrete;
- Clay (other than fire clay, bentonite or kaolin);
- Dolerite;
- Dolomite;
- Gabbro;
- Gneiss;
- Granite;
- Gravel (natural);
- Ironstone;
- Limestone;
- Marble;
- Pegmatite;
- Quartzite;
- Rhyolite;
- Sand;
- Sandstone;
- Schist;
- Shale;
- Shell Grit;
- Siltstone; and
- Slate.

3.2.2 Production Rate and Products

State:

- the potential end use for all extractive minerals proposed to be sold.

Provide estimates of the:

- annual production rate (product and overburden);
- life of the quarry; and
- material movement over life of quarry (product and overburden).

3.3 Quarrying Activities

3.3.1 Type or types of proposed quarry operation to be carried out

Provide:

- a summary and map (as per 8.1.2.1) of the proposed site layout;
- a description of the proposed quarrying method; and
- conceptual dimensions and depth of proposed pit(s).

3.3.2 Sequence of quarrying and progressive rehabilitation

Describe conceptually and show on a map (as per 8.1.2.2):

- staging and description of each progressive quarrying stage;
- milestones that will instigate progressive rehabilitation; and
- staging and description of each progressive rehabilitation stage including:
 - use of overburden;
 - battering of mining faces and other earthworks;
 - topsoil management; and
 - revegetation.

3.3.3 Stockpiles

3.3.3.1 Topsoil and Subsoil Stockpiles

Describe and show on a map (as per 8.1.2.1):

- conceptual location, size, shape and height of topsoil/subsoil stockpiles.

3.3.3.2 Product Stockpile

Describe and show on a map (as per 8.1.2.1):

- conceptual location and height of product stockpiles.

3.3.4 Use of explosives

If explosives are used, describe:

- estimated frequency of blasting; and
- whether explosives will be stored onsite.

3.3.5 Modes and hours of operation

State if the proposed quarry operation will be operated on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the proposed quarry operation is to be operated on a regular periodical basis or campaign basis, specify:

- proposed period(s) (daily, weekly and public holidays) to be worked
- proposed start and finish hours the site is to be worked per period.

3.4 Crushing, processing and product transport

3.4.1 Fixed plant

The following conceptual information must be provided on the specifications of fixed plant:

- area, size, and location of fixed plant and associated structures including as applicable concrete batching plant, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage proposed to be used for processing the extractive minerals on site;
- a description of rock or sand processing; in particular crushing, washing, drying, screening and separation; and
- the type(s) of processing/value adding used on the raw material and conducted onsite including as applicable concrete, bitumen, separation and drying.

3.4.2 Hours of operation

The proposed hours of crushing, processing and product transport activities must be provided.

3.4.3 Processing wastes

If processing wastes are to be generated provide a conceptual description of:

- management of any proposed chemical additives to prevent environmental harm;
- management and disposal of processing wastes;
- construction and/or geotechnical details of proposed storage facilities; and
- construction details/design of evaporation ponds and proposed use of waste material.

3.4.4 Industrial and domestic wastes

A description of management of any of the following industrial and domestic wastes must be provided:

- putrescible waste;
- oil;
- other onsite waste disposal or recycling; e.g. workshop waste, tyres, drums, oil filters;
- offsite disposal; and
- a description of the type, area and layout of sewage systems installed at the site, and if the system is required to be approved by the relevant authority.

3.5 Supporting surface infrastructure

3.5.1 Access and Roads

Describe:

- access route to the site and show on a map (as per 8.1.2.3);
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded; and
- transport system(s) used to and from the site and the estimated number of vehicle movements per day.

3.5.2 Accommodation and offices

The following information must be provided regarding onsite personnel accommodation and offices:

- number, area, size, type of construction and location of accommodation building, caravans or camp, and associated structures (e.g. car parks, office buildings, water tanks, etc.) to be used on site; and
- if temporary or permanent.

3.5.3 Public services and utilities used by the operation

Describe:

- sources of public services or utilities that are supplied to the proposed site, such as power, water, telecommunications etc.;
- if new connections to public services and utilities are required, the proposed routes for connection; and
- the effects to any existing public services or utilities that have been or may be affected by the mining operations.

3.5.4 Visual screening

Describe the type of screening, including existing or proposed vegetation (i.e. species and density of plantings) and show on a map (as per 8.1.2.1).

3.5.5 Fuel and chemical storage

For all fuels and chemicals stored on site show the proposed location of storage on a map (as per 8.1.2.1) and provide detail on:

- types of bulk chemicals and the volumes of each; and
- proposed bunding and containment for all chemical and fuel storage vessels.

3.5.6 Site security

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including, but not limited to:

- fencing; and
- signage.

3.5.7 Erosion, Sediment and Silt Control

Describe and show on a map (as per 8.1.2.1):

- location and design of sediment management structures;
- management and disposal of silt;
- strategies to control runoff on disturbed areas and rehabilitated areas; and
- storage, diversion and disposal of clean water.

3.6 Vegetation clearance

If clearance of native vegetation is proposed, a description of the vegetation type to be cleared and map (as per 8.1.2.2) showing the proposed clearance area must be provided.

State the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the proposed clearance and describe how the SEB will be provided.

3.7 Description of Quarry Site at Completion

Provide a map (as per 8.1.2.4), cross-section (as per 8.3.1.2) and a conceptual description of the quarry site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- potential land use options;
- landforms;
- proposed vegetation covers (including native vegetation that will not be disturbed due to proposed quarrying operations);
- any quarrying infrastructure that may remain on site and become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas, proposed surface contours and revegetation; and
- location of surface water infrastructure including ponds and diversions.

Provide a description of the proposed mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.8 Site Water Management

Provide an estimate of the quantity of water to be used and the proposed source of that water.

If processing water is to be used, provide a water balance including:

- approximate water volumes required for processing; and
- a summary of all water inputs and outputs.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods; and
- minimum freeboard to be maintained.

4. Description of Potential Benefits

4.1 Social

Describe:

- number of full-time employee positions that would be directly created by the proposal (not to include existing positions);
- the proportion of the workforce that would reside in the local community and the estimated impact on local employment;
- any programs to target and assist Indigenous or local employment at the quarry;
- training to be provided to employees and potential employees;
- approximate timelines for creation of the positions;
- potential for local business participation, and procurement of local goods and services; and
- any other potential social benefits and opportunities proposed during the development of the quarry, operation of the proposed quarry and post quarry completion.

4.2 Economic

Describe:

- goods and services used in the local community, state and external to state;
- wages and other employee benefits;
- economic benefits derived from local employment;
- approximate royalty payments and other direct state government taxes ; and
- any other potential economic benefits and opportunities proposed during the development of the quarry, operation of the proposed quarry and post quarry completion.

4.3 Environmental

Describe:

- the new baseline data that will be collected as part of operations; and
- any other potential environmental benefits and opportunities proposed during the development of the quarry, operation of the proposed quarry and post quarry completion.

5 CONSULTATION

This section must summarise the results of any attempted consultation that has been undertaken on the proposed mining operation.

The summary must include:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the proposed mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders; and
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns / issues raised;
 - the response (if any) that is proposed to address those concerns;
 - if any individual or group of similar affected persons were not able to be consulted, what steps were taken to consult with them; and
 - the extent to which the outcomes proposed in Section 6.2.3 have been developed in consultation with the landowner and any other person who may be directly affected by the proposed mining operations.

6 MANAGEMENT OF ENVIRONMENTAL IMPACTS

6.1 Assessment of environmental impacts

6.1.1 Elements of the environment

Describe the specific elements of the environment (the environment is defined in Section 6(4) of the Mining Act 1971) that may reasonably be expected to be impacted on by the proposed quarry operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, and any relevant legislated or recognised standards in relation to the element of the environment;
- describe all potential environmental receptors; and
- undertake an impact assessment of how the element could be potentially impacted by proposed mining operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 6.1.2.

6.1.2 Potential impact events

Describe potential impact events associated with each phase of the proposed mining operations (construction, operation and post mine completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 6.1.2, provide:

6.1.2.1 Source

A description of the source of the potential impact event, which alone or in combination has the potential to cause harm to an environmental receptor.

6.1.2.2 Pathway

A description of the potential pathway (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

6.1.2.3 Environmental receptor

A description of the environmental receptors that may reasonably be expected to be adversely impacted by the source, taking into account the considerations for the element of the environment described under 6.1.1

6.1.2.4 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

6.1.2.5 Confirmation of potential impact events

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, or if it remains uncertain, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

6.2 Control measures, uncertainty assessment, statement of environmental outcomes and criteria

For each impact event confirmed in Section 6.1.2.5, the information listed in Sections 6.2.1 – 6.2.5 must be provided:

6.2.1 Control measures

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

6.2.2 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

6.2.3 Statement of proposed environmental outcomes

Provide a statement of the proposed environmental outcome(s) (including mine completion outcomes) for each impact event confirmed in Section 6.1.2.5.

The statement of environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the proposed mining operations subsequent to the implementation of the control measures described in Section 6.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are proposed, and third parties who may be directly affected by the proposed mining operations in the development of each environmental outcome.

Where clearance to native vegetation is proposed, the environmental outcome must state a commitment to compliance with the *Native Vegetation Act 1991* and *Native Vegetation Regulations 2017*.

Mine completion outcomes must at least address the following issues listed under Regulation 30(1)(d):

- external visual amenity;
- risks to the health and safety of the public and fauna;
- physical, ecological and chemical stability;
- surface and groundwater quality and quantity.

6.2.4 Draft measurement criteria

Provide a draft statement of the criteria to be adopted to measure each of the proposed environmental outcomes. The draft criteria must comply with Regulation 65(2)(d), including details about:

- what is to be measured and the form of the measurements that are to be used;
- the locations where the relevant measurements are to be taken, or how such locations are to be determined;
- what is proposed to be taken to constitute the achievement of the relevant outcomes (with consideration given to any inherent errors of measurement);
- the frequency of any measuring or monitoring; and
- any background or control data that is to be used, or how any such data is to be acquired.

Where native vegetation is proposed to be cleared, the criteria must include demonstration of the successful implementation of the significant environmental benefit.

7 FORMAT OF THE MINING PROPOSAL

Unless otherwise specified by the Director of Mines or other authorised officer:

- two hardcopies and an electronic version of the mining proposal must be submitted; the information in all must be identical;
- each page, plan or other separate sheet must include the mineral claim number(s), date of the mining proposal submission and sequential page numbering; and
- the electronic version must be submitted in one single Acrobat PDF file. Microsoft WORD compatible files must be submitted if requested by the Director of Mines or other authorised officer.

8 MAPS AND CROSS-SECTIONS

All maps and plans must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

All cross-sections must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

8.1 List of Maps

Following is a list of all maps required in the mining proposal and/or management plan based on the relevant sections of this determination:

8.1.1 Maps required for Description of the Existing Environment (as per section 2)

8.1.1.1 Topographic Map showing:

- mineral claim boundaries;
- existing surface contours;

- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams, wetlands and any man-made water management structures;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- location and extent of all previously disturbed areas associated with previous mining; and
- location and extent of any adjacent conservation reserves, heritage sites or any other significant areas.

8.1.1.2 Local Geological Map showing:

- mineral claim boundaries;
- location and dimensions of the deposit; and
- topsoil/subsoil variation if there is a variation in soils over the application area.

8.1.1.3 Groundwater Map showing:

- groundwater wells in the surrounding area highlighting those used to determine the groundwater level.

8.1.1.4 Land Access Map showing:

- mineral claim boundaries;
- proposed tenement boundary if an area smaller than the mineral claim is proposed
- any exempt land;
- location of residences within and near the application area; and
- human infrastructure as per 2.14.

If relevant:

8.1.1.5 Caves Map showing:

- mineral claim boundaries; and
- location of the cave(s).

8.1.2 Maps required for Description of the Proposed Quarrying Operations (as per 3)

8.1.2.1 Proposed Site Layout Map showing all components of the proposed quarry operation including, but not limited to:

- tenement boundaries;
- location of sediment management infrastructure;
- if relevant location of process water dams;
- location of haul roads;
- if relevant location of fixed plant;
- location of mobile plant for stage 1 of mining; and
- location and extent of topsoil/subsoil and product stockpiles.

8.1.2.2 Sequence of Quarrying and Progressive Rehabilitation Map showing:

- proposed tenement boundaries;
- conceptual staging of each progressive mining stage;
- proposed native vegetation clearance; and
- conceptual staging of each progressive rehabilitation stage.

8.1.2.3 Access Route Map showing:

- proposed access route for heavy vehicles;
- proposed exit route for heavy vehicles; and
- new roads to be constructed if relevant.

8.1.2.4 Mine Completion Map showing:

- final landforms (including rehabilitated and non-disturbed areas); and
- proposed topographical contours of the entire site (including rehabilitated and non-disturbed areas).

8.2 Summary of Cross-Sections

Following is a summary of all cross-sections required in the mining proposal and/or management plan:

8.2.1 Cross-Sections required for Description of the Existing Environment (as per 2)

8.2.1.1 Geological Cross-Section(s) showing:

- a representation of the geological profile within the application area; and
- depth of the resource and any overlying overburden.

8.2.1.2 Groundwater Cross-Section(s) showing:

- the proposed depth of mining; and
- the depth to groundwater.

8.2.2 Cross-Sections required for Description of the Proposed Mining Operations (as per 3)

8.2.2.1 Proposed Quarry Operation Cross-Section(s) showing:

- proposed pit depth; and
- proposed pit dimensions (length and width).

8.2.2.2 Quarry Completion Cross Section(s) showing:

- pre quarrying natural surface; and
- proposed final rehabilitated surface.

In accordance with Regulation 30(3) and 49(3) of the Mining Regulations 2011, this notice will have effect from 4 April 2018.

GREG MARSHALL
Director
Mining Regulation

MINING ACT 1971

NOTICE is hereby given in accordance with Regulation 65 (7) of the Mining Regulations 2011, determining the minimum information required to be provided in a Program for Environment Protection and Rehabilitation (PEPR) for an Extractive Minerals Lease (EML) and any associated Miscellaneous Purposes Licence (MPL).

1 REQUIREMENT FOR DECLARATION OF ACCURACY

The PEPR must include a signed statement by the tenement holder in accordance with Regulation 65(8).

2 DESCRIPTION OF THE ENVIRONMENT

Any changes to the environment or information about the environment since the previous description of the environment was provided (be it as a mining proposal or management plan or PEPR) must be included.

This must include an update in relation to the status of all waivers of exemption required for exempt land.

This must include any new baseline data relevant to the measurement criteria set out in Section 5.

3 DESCRIPTION OF MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.10 must be described only to the extent that they apply to the mining operation. If the element (or part of the element) is not applicable to the mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General description and maps/plans of operations

A summary description and maps of all elements of the quarrying operation must be included.

3.2 Resource and Products**3.2.1 Resource**

Provide:

A statement of the current estimated resource and a brief description of the basis of this estimate.

A statement of all the following standard extractive minerals proposed to be extracted and sold:

- Basalt;
- Calcrete;
- Clay (other than fire clay, bentonite or kaolin);
- Dolerite;
- Dolomite;
- Gabbro;
- Gneiss;
- Granite;
- Gravel (natural);
- Ironstone;
- Limestone;
- Marble;
- Pegmatite;
- Quartzite;
- Rhyolite;
- Sand;
- Sandstone;
- Schist;
- Shale;
- Shell Grit;
- Siltstone; and
- Slate.

3.2.2 Production Rate and Products

State:

- the end use for all extractive minerals proposed to be sold.

Provide estimates of the:

- annual production rate (product and overburden);
- life of the quarry; and
- material movement over life of quarry (product and overburden).

3.3 Quarrying Activities**3.3.1 Type or types of quarry operation to be carried out**

Provide:

- a summary and map (as per 9.1.2.1) of the site layout;
- a description of the proposed quarrying method; and
- dimensions and depth of proposed pit(s).

3.3.2 Sequence of quarrying and progressive rehabilitation

Describe and show on a map (as per 9.1.2.2):

- staging and description of each progressive quarrying stage;
- milestones that will instigate progressive rehabilitation; and
- staging and description of each progressive rehabilitation stage including:
 - use of overburden;
 - battering of mining faces and other earthworks;
 - topsoil management; and
 - revegetation.

3.3.3 Stockpiles

3.3.3.1 Topsoil and Subsoil Stockpiles

Describe and show on a map (as per 9.1.2.1):

- location, size, shape and height of product of topsoil/subsoil stockpiles.

3.3.3.2 Product Stockpile

Describe and show on a map (as per 9.1.2.2):

- location and height of product of product stockpiles.

3.3.4 Use of explosives

If explosives are used, describe:

- estimated frequency of blasting; and
- whether explosives will be stored onsite.

3.3.5 Modes and hours of operation

State if the quarry operation will be operated on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the quarry operation is to be operated on a regular periodical basis or campaign basis, specify:

- period(s) (daily, weekly and public holidays) to be worked
- start and finish hours the site is to be worked per period.

3.4 Crushing, processing and product transport

3.4.1 Fixed plant

The following information must be provided on the specifications of fixed plant:

- area, size, and location of fixed plant and associated structures including as applicable concrete batching plant, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage proposed to be used for processing the extractive minerals on site;
- a description of rock or sand processing; in particular crushing, washing, drying, screening and separation; and
- the type(s) of processing/value adding used on the raw material and conducted onsite including as applicable concrete, bitumen, separation and drying.

3.4.2 Hours of operation

The hours of crushing, processing and product transport activities must be provided.

3.4.3 Processing wastes

If processing wastes are to be generated provide a description of:

- management of any proposed chemical additives to prevent environmental harm;
- management and disposal of processing wastes;
- construction and/or geotechnical details of proposed storage facilities; and
- construction details/design of evaporation ponds and proposed use of waste material.

3.4.4 Industrial and domestic wastes

A description of management of any of the following industrial and domestic wastes must be provided:

- putrescible waste;
- oil;
- other onsite waste disposal or recycling; e.g. workshop waste, tyres, drums, oil filters;
- offsite disposal; and
- a description of the type, area and layout of sewage systems installed at the site, and if the system is required to be approved by the relevant authority.

3.5 Supporting surface infrastructure

3.5.1 Access and Roads

Describe:

- access route to the site and show on a map (as per 8.1.2.3);
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded; and
- transport system(s) used to and from the site and the estimated number of vehicle movements per day.

3.5.2 Accommodation and offices

The following information must be provided regarding onsite personnel accommodation and offices:

- number, area, size, type of construction and location of accommodation building, caravans or camp, and associated structures (e.g. car parks, office buildings, water tanks, etc.) to be used on site; and
- if temporary or permanent.

3.5.3 Public services and utilities used by the operation

Describe:

- sources of public services or utilities that are supplied to the proposed site, such as power, water, telecommunications etc.;
- if new connections to public services and utilities are required, the proposed routes for connection; and
- the effects to any existing public services or utilities that have been or may be affected by the mining operations.

3.5.4 Visual screening

Describe the type of screening, including existing or proposed vegetation (i.e. species and density of plantings) and show on a map (as per 8.1.2.1).

3.5.5 Fuel and chemical storage

For all fuels and chemicals stored on site show the proposed location of storage on a map (as per 9.1.2.1) and provide detail on:

- types of bulk chemicals and the volumes of each; and
- proposed bunding and containment for all chemical and fuel storage vessels.

3.5.6 Site security

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including, but not limited to:

- fencing; and
- signage.

3.5.7 Erosion, Sediment and Silt Control

Describe and show on a map (as per 9.1.2.1):

- location and design of sediment management structures;
- management and disposal of silt;
- strategies to control runoff on disturbed areas and rehabilitated areas; and
- storage, diversion and disposal of clean water.

3.6 Vegetation clearance

If clearance of native vegetation is to occur, a description of the vegetation type to be cleared and map (as per 9.1.2.2) showing the proposed clearance area must be provided.

State the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the clearance and describe how the SEB will be provided.

3.7 Description of Quarry Site at Completion

Provide a map (as per 9.1.2.4), cross-section (as per 9.3.1.2) and a description of the quarry site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- potential land use options;
- landforms;
- proposed vegetation covers (including native vegetation that will not be disturbed due to proposed quarrying operations);
- any quarrying infrastructure that may remain on site and become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas, proposed surface contours and revegetation; and
- location of surface water infrastructure including ponds and diversions.

Provide a description of the proposed mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.8 Site Water Management

Provide an estimate of the quantity of water to be used and the source of that water.

If processing water is to be used, provide a water balance including:

- approximate water volumes required for processing; and
- a summary of all water inputs and outputs.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods; and
- minimum freeboard to be maintained.

4 CONSULTATION

This section must summarise the results of any attempted consultation that has been undertaken on the proposed mining operation.

The summary must include:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the proposed mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders; and
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns / issues raised;
 - the response (if any) that is proposed to address those concerns;
 - if any individual or group of similar affected persons were not able to be consulted, what steps were taken to consult with them; and
 - the extent to which the outcomes proposed in Section 11.2.3 have been developed in consultation with the landowner and any other person who may be directly affected by the proposed mining operations.

5 ENVIRONMENTAL OUTCOMES, STRATEGIES, CRITERIA AND MONITORING

5.1 Environmental Outcomes

Set out environmental outcomes (including mine completion outcomes) as required by section 70B(2)(b)(i) of the *Mining Act 1971* and Regulation 65(2)(b), and/or as required by the lease/licence, and/or determined as a result of a review of a PEPR in accordance with Regulation 114(9).

For each environmental outcome, the information described in Sections 5.2, 5.3, 5.4 and 5.5 must be provided.

5.2 Control and Management Strategies

5.2.1 Control and Management Strategies

Set out the control and management strategies adopted to demonstrate that the environmental outcomes can be and will continue to be achieved. Demonstrate that the control and management strategies are commensurate with the impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

5.2.2 Uncertainty Assessment

Describe any significant degree of uncertainty pertaining to the likely effectiveness of control and management strategies, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

5.3 Measurement Criteria

Set out the measurement criteria for each environmental outcome (including quarry completion outcomes). The measurement criteria must comply with Regulation 65(2)(d), including details about:

- what is to be measured and the form of the measurements that are to be used;
- the locations where the relevant measurements are to be taken, or how such locations are to be determined;
- what is proposed to be taken to constitute the achievement of the relevant outcomes (with consideration given to any inherent errors of measurement);
- the frequency of any measuring or monitoring; and
- any background or control data that is to be used, or how any such data is to be acquired.

The measurement criteria must also include details about:

- responsibility (who will measure);
- record keeping; and
- frequency of reporting to management and any external parties.

Where groundwater modelling is to be relied upon to demonstrate achievement of groundwater completion outcomes, a process must be provided for validation of predictive modelling, including a description of the model and assumptions used.

Where native vegetation clearance is planned, criteria must demonstrate the successful implementation of the native vegetation management plan.

5.4 New Environmental Impacts

Where there has been a change in the description of the environment or a change in the description of operations from those detailed in the mining proposal, management plan or currently approved PEPR, the tenement holder must undertake an assessment of the environmental impacts for the site to determine if the current environmental outcomes (as included in the lease/licence and/or the currently approved PEPR) are appropriate and if new or modified environmental outcomes are required. If new or modified environmental outcomes are required, additional information (as appropriate for the new environmental impact(s)) must be provided as specified in Section 11 of this Determination.

6 OPERATOR CAPABILITY

This section must include sufficient information to demonstrate that the operator has appropriate experience, processes and procedures in place to be able to operate the tenement to meet the environmental outcomes.

7 LEASE/LICENCE

Where the lease or licence includes specific conditions or requirements that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant) or demonstrates how otherwise they have or will be complied with.

8 FORMAT OF THE PEPR

Unless otherwise specified by the Director of Mines or other authorised officer:

- two hardcopies and an electronic version of the PEPR must be submitted; the information in all must be identical;
- each page, plan or other separate sheet must include the tenement number(s), date of the PEPR preparation and sequential page numbering; and
- the electronic version must be submitted in one single Acrobat PDF file. Microsoft WORD compatible files must be submitted if requested by the Director of Mines or other authorised officer.

The PEPR must be submitted by the holder(s) of the related mining tenements, or by a person acting on behalf of the tenement holder when accompanied by either a signed statement from the tenement holder endorsing the content, or a signed agency agreement that authorises the agent to provide a PEPR on behalf of the tenement holder.

9 MAPS AND CROSS-SECTIONS

All maps and plans must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

All cross-sections must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

9.1 List of Maps

Following is a list of all maps required in the PEPR based on the relevant sections of this determination:

9.1.1 Maps required for Description of the Existing Environment (as per 10)

9.1.1.1 Topographic Map showing:

- Tenement boundaries;
- existing surface contours;

- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams, wetlands and any man-made water management structures;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- location and extent of all previously disturbed areas associated with previous mining; and
- location and extent of any adjacent conservation reserves, heritage sites or any other significant areas.

9.1.1.2 Local Geological Map showing:

- Tenement boundaries;
- location and dimensions of the deposit; and
- topsoil/subsoil variation if there is a variation in soils over the application area.

9.1.1.3 Groundwater Map showing:

- groundwater wells in the surrounding area highlighting those used to determine the groundwater level.

9.1.1.4 Land Access Map showing:

- Tenement boundaries;
- any exempt land;
- location of residences within and near the application area; and
- human infrastructure as per 10.14.

If relevant:

9.1.1.5 Caves Map showing:

- Tenement boundaries; and
- location of the cave(s).

9.1.2 Maps required for Description of the Proposed Quarrying Operations (as per 2)

9.1.2.1 Site Layout Map showing all components of the quarry operation including (but not limited to):

- Tenement boundaries;
- location of sediment management infrastructure;
- if relevant location of process water dams;
- location of haul roads;
- if relevant location of fixed plant;
- location of mobile plant for stage 1 of mining;
- location and extent of topsoil/subsoil and product stockpiles.

9.1.2.2 Sequence of Quarrying and Progressive Rehabilitation Map showing:

- Tenement boundaries;
- staging of each progressive mining stage;
- proposed native vegetation clearance; and
- staging of each progressive rehabilitation stage.

9.1.2.3 Access Route Map showing:

- access route for heavy vehicles;
- exit route for heavy vehicles; and
- new roads to be constructed if relevant.

9.1.2.4 Mine Completion Map showing:

- final landforms (including rehabilitated and non-disturbed areas); and
- proposed topographical contours of the entire site (including rehabilitated and non-disturbed areas).

9.2 Summary of Cross-Sections

Following is a summary of all cross-sections required in the PEPR:

9.2.1 Cross-Sections required for Description of the Existing Environment (as per 10)

9.2.1.1 Geological Cross-Section(s) showing:

- a representation of the geological profile within the application area; and
- depth of the resource and any overlying overburden.

9.2.1.2 Groundwater Cross-Section(s) showing:

- the proposed depth of mining; and
- the depth to groundwater.

9.2.2 Cross-Sections required for Description of Mining Operations (as per 3)

9.2.2.1 Quarry Operation Cross-Section(s) showing:

- Proposed pit depth; and
- Proposed pit dimensions (length and width).

9.2.2.2 Quarry Completion Cross Section(s) showing:

- Pre quarrying natural surface; and
- Proposed final rehabilitated surface.

In accordance with Regulation 114 (9), where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Sections 10 and 11 must be included.

10 DESCRIPTION OF THE EXISTING ENVIRONMENT

Each of the elements of the existing environment listed in Sections 10.1–10.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed quarry operations. If the element is not likely to be impacted by the operation, a statement to that effect must be included (note: the environment is defined in Section 6(4) of the Mining Act 1971).

10.1 Topography and landscape

Provide a description and map (as per 9.1.1.1) of the topography and landscape, detailing the:

- application area; and
- general surroundings.

10.2 Climate

Provide a summary from the nearest weather station of:

- annual rainfall and temperature patterns; and
- prevailing wind directions and speed (including maximum wind gusts).

10.3 Topsoil and subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the application area (show this information on a map as per 9.1.1.2 if there is a variation in soils over the application area); and
- identify any soil characteristics that may be an issue for disturbance or rehabilitation.

10.4 Geological Environment

Provide:

- local geological or site map as per 9.1.1.2, showing location and dimensions of the deposit and structure (dip and strike where appropriate);
- representative cross sections as per 9.2.1.1 of the proposed quarry area that identify the extent of the resource and estimates of any overlying overburden; and
- a description and results of any geological evaluation work carried out.

10.5 Geohazards

Provide detail on the potential for any of the following natural geohazards to be present in the application area:

- structural instability including slips, faults, karst features or geological unit boundaries;
- minerals that may occur in the material to be quarried (including overburden) and are hazardous to human health specifically radioactive minerals, asbestiform minerals or have the potential to produce respirable silica; and
- minerals that may occur in the material to be quarried (including overburden) that may have the potential to pollute the environment in particular sulphide minerals that may generate acid.

10.6 Groundwater

Provide:

- a statement describing if the application area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*;
- a map (as per 9.1.1.3) showing groundwater wells in the surrounding area, highlighting those used to determine the groundwater level;
- a cross section (as per 9.2.1.2) showing the proposed depth of mining and the depth to groundwater in metres Australian Height Datum (AHD); and
- evidence to validate the estimated depth to groundwater.

If the proposed quarry has the potential to intersect the water table the following must be provided:

- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations), recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer (shown on a plan) and static water level of any other known drill holes; and
- an assessment of any current use of this water by the landowner (including adjacent landowners) and groundwater dependent ecosystems.

10.7 Hydrology

Provide a Topographic Map (as per 9.1.1.1) and description of the current drainage patterns for the application area and water catchment including:

- location of watercourses, drains, dams and wetlands;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- a statement describing if the application area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*, and provide details on the current availability of water resources within the prescribed area;
- a statement describing if the application area is within a water protection area including areas under the *River Murray Act 2003*; and
- a statement as to whether the application area falls within the Murray Darling Basin.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the proposed mining operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

10.8 Vegetation, weeds and plant pathogens

Provide:

- a description and map (as per 9.1.1.1) of existing flora (native and introduced) in the application area and surroundings;
- the State conservation status and habitat value of native vegetation present in the application area;
- a description of the presence of *Commonwealth Environment Protection and Biodiversity Conservation Act 1999* listed species and ecological communities;
- a description of the extent the application area and adjoining land is affected or potentially affected by pathogens and prescribed weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation or natural regrowth arising from previous clearance.

10.9 Fauna

Describe the native and feral fauna that may be present in the application area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

10.10 Caves

If the application area is within, or near to, known caves or significant limestone formations a survey for the presence of caves must be performed.

Provide a summary of the results of the survey and describe the presence of any caves in karst (limestone) areas within, or near to, the application area and show on a map (as per 9.1.1.5).

10.11 Land use

Provide a description of:

- land use (historical, current and potential) for the application area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- policies relevant to the application area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- other interests or restrictions on the application area, including:
 - public utility easements;
 - if the application is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the *Mining Act 1971* or *Petroleum and Geothermal Energy Act 2000*; and
 - the status of negotiations with Native Title holders or claimants, if the application area includes non-freehold land.

10.12 Proximity to infrastructure and housing

Provide information and a map (as per 9.1.1.4):

- identifying residences within and near the application area;
- identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, and telephone lines (both underground and above ground); and
- identifying public roads to be utilised or affected as part of proposed mining operations, including an estimate of the existing traffic movements.

10.13 Exempt Land

Provide a description and map (as per 9.1.1.4) of any applicable:

- exempt land under Section 9 of the *Mining Act 1971*; and
- any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the *Mining Act 1971*.

10.14 Amenity

Provide a summary description of scenic or aesthetic values for the application area and immediate surrounds, where relevant including caves or karst features.

10.15 Air quality

Provide a description of the existing levels of dust and contributors to air quality (both natural and anthropogenic).

10.16 Noise

Provide a description of existing noise levels and contributors to noise (both natural and anthropogenic).

10.17 Heritage (Aboriginal, European, Geological)

Detail and show on a map (as per 9.1.1.1):

- any registered heritage sites in or adjacent to the application areas that are protected under legislation (in so far as may be permitted under the relevant legislation).

10.18 Proximity to conservation areas

Provide information and a map (as per 9.1.1.1) showing:

- proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

10.19 Pre-existing site contamination and previous disturbance

Provide information and show on a map (as per 9.1.1.1) any known existing contamination of the site and/or any disturbance by previous mining operations or other activities.

11 MANAGEMENT OF ENVIRONMENTAL IMPACTS**11.1 Assessment of environmental impacts****11.1.1 Elements of the environment**

Describe the specific elements of the environment (the environment is defined in Section 6(4) of the *Mining Act 1971*) that may reasonably be expected to be impacted on by the proposed quarry operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, and any relevant legislated or recognised standards in relation to the element of the environment
- describe all potential environmental receptors
- undertake an impact assessment of how the element could be potentially impacted by proposed quarrying operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 11.1.2.

11.1.2 Potential impact events

Describe potential impact events associated with each phase of the proposed mining operations (construction, operation and post quarry completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 11.1.2, provide:

11.1.2.1 Source

A description of the source of the potential impact event, which alone or in combination has the potential to cause harm to an environmental receptor.

11.1.2.2 Pathway

A description of the potential pathway, (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

11.1.2.3 Environmental receptor

A description of the environmental receptors that may reasonably be expected to be adversely impacted by the source, taking into account the considerations for the element of the environment described under 11.1.1

11.1.2.4 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

11.1.2.5 Confirmation of potential impact events

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, or if it remains uncertain, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

11.2 Control measures, uncertainty assessment, statement of environmental outcomes and criteria

For each impact event confirmed in Section 11.1.2.5, the information listed in Sections 11.2.1 – 11.2.5 must be provided:

11.2.1 Control measures

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

11.2.2 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

11.2.3 Statement of proposed environmental outcomes

Provide a statement of the proposed environmental outcome(s) (including mine completion outcomes) for each impact event confirmed in Section 11.1.2.5.

The statement of proposed environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the proposed mining operations subsequent to the implementation of the control measures described in Section 11.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are proposed, and third parties who may be directly affected by the proposed mining operations in the development of each environmental outcome.

Where clearance to native vegetation is proposed, the environmental outcome must state a commitment to compliance with the *Native Vegetation Act 1991* and *Native Vegetation Regulations 2017*.

Mine completion outcomes must at least address the following issues listed under Regulation 30(1)(d):

- external visual amenity;
- risks to the health and safety of the public and fauna;
- physical, ecological and chemical stability;
- surface and groundwater quality and quantity.

11.2.4 Measurement criteria

Provide the information specified in Section 5.3 of this Determination.

In accordance with Regulation 65(7) of the Mining Regulations 2011, this notice will have effect from 4 April 2018.

MINING ACT 1971

Section 15(5)

PURSUANT to Section 15(5) of the *Mining Act 1971* ('the Act'), I advise that the Mineral Resources Division of Department of the Premier and Cabinet, will be undertaking geoscientific investigations/reviews commencing on or after 4 April 2018 and concluding on 1 July 2018.

The area of interest is in the Yunta area - approximately 100km northeast of Peterborough and covers an approximate area of 2,387 km².

Pursuant to Section 15(7) of the Act, the Minister may refuse to receive or consider an application for a mining tenement in respect of the land described in the notice until the completion date of 1 July 2018.

Please note that the completion date may be extended and/or the area may be altered by further notice in the gazette. Copies of the plan are available by phoning the Mineral Tenements on telephone 08 8463 3097.

DESCRIPTION OF AREA

YUNTA AREA – Approximately 100 km northeast of Peterborough, bounded as follows:

AREA A

Commencing at a point being the intersection of latitude 31°57'S and longitude 139°17'E, then east to longitude 139°20'E, south to latitude 31°59'S, east to longitude 139°24'E, south to latitude 32°01'S, east to longitude 139°30'E, south to latitude 32°09'S, west to longitude 139°23'E, north to latitude 32°08'S, west to longitude 139°19'E, south to latitude 32°10'S, west to longitude 139°13'E, south to latitude 32°21'S, west to longitude 138°57'E, north to latitude 32°00'S, east to longitude 139°12'E, south to latitude 32°02'S, east to longitude 139°17'E, and north to the point of commencement.

AREA B

Commencing at a point being the intersection of latitude 32°17'S and longitude 139°30'E, then east to longitude 139°35'E, south to latitude 32°19'S, east to longitude 139°47'E, south to latitude 32°24'S, east to longitude 139°48'E, south to latitude 32°25'S, east to longitude 139°56'E, south to latitude 32°29'S, west to longitude 139°20'E, north to latitude 32°20'S, east to longitude 139°30'E, and north to the point of commencement.

AREA C

Commencing at a point being the intersection of latitude 32°23'S and longitude 139°56'E, then east to longitude 140°02'E, south to latitude 32°28'S, west to longitude 139°57'E, north to latitude 32°25'S, west to longitude 139°56'E, and north to the point of commencement.

All the within latitudes and longitudes are geodetic and expressed in terms of the Australian Geodetic Datum as defined on p. 4984 of Commonwealth Gazette number 84 dated October 6, 1966 (**AGD66**).

CITY OF ONKAPARINGA
ROADS (OPENING AND CLOSING) ACT 1991

Road Opening and Closing – Saltfleet Street, Port Noarlunga

NOTICE is hereby given, pursuant to section 10 of the Roads (Opening and Closing) Act 1991, that the CITY OF ONKAPARINGA proposes to make a Road Process Order to:

- (i) open as road portion of Allotment 61 in Deposited Plan 64183, more particularly delineated and numbered '1' on Preliminary Plan 18/0011, forming a re-alignment of the adjoining public roads.
- (ii) close portion of Saltfleet Street adjoining Allotment 61 in Deposited Plan 64183 more particularly delineated and lettered 'A' on Preliminary Plan 18/0011. Closed road 'A' to be merged with Allotment 61 in Deposited Plan 64183 in exchange for land taken for new road '1' (above).

A copy of the plan and a statement of persons affected are available for public inspection at the office of the Council at City of Onkaparinga, Ramsay Place, Noarlunga Centre and the Adelaide Office of the Surveyor-General during normal office hours.

Any application for easement or objection must set out the full name, address and details of the submission and must be fully supported by reasons.

The application for easement or objection must be made in writing to the Council at City of Onkaparinga, PO Box 1, Noarlunga Centre 5168 WITHIN 28 DAYS OF THIS NOTICE and a copy must be forwarded to the Surveyor-General at GPO Box 1354, Adelaide 5001. Where a submission is made, the Council will give notification of a meeting at which the matter will be considered.

NOTICE SUBMISSION

The weekly *South Australian Government Gazette* is issued on Tuesday afternoon, except where Executive Council meets on Wednesday, wherein publishing will occur on that day.

The next scheduled publication date is displayed on the website: www.governmentgazette.sa.gov.au.

Notices for gazettal, along with enquiries, can be directed to:

EMAIL governmentgazettesa@sa.gov.au
PHONE (08) 8207 1025

Gazette notices should be emailed in the following formats:

- Notices as individual Word files
- Maps, images, and diagrams as single, complete objects within the Word files
- Content containing official signatures for authorisation—notices as Word files and the signed documentation as PDF files

Please provide the following information in your email:

- Date the notice is to be gazetted
- Email address and phone number of the person authorising the submission
- Notification of whether a quote is required for chargeable notices
- Name of the person and organisation to be charged for the notice, if applicable
- A purchase order if required
- Details that may impact on publication of the notice

Notices must be submitted before 4 p.m. Friday, the week preceding intended gazettal.

Proofs of formatted content are supplied for all notices, with necessary alterations to be returned before 4 p.m. on the day preceding publication.

Submitted notices will be gazetted unless notification is received before 10 a.m. on the day of publication.
