ATTACHMENT A

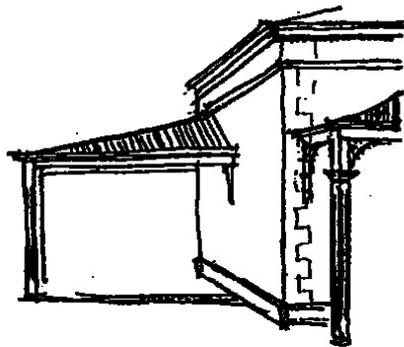

7. CARPORTS, GARAGES AND OTHER OUTBUILDINGS

Houses built prior to the 1920s did not incorporate garages or carports. Many earlier houses had stables, but these have mostly been removed.

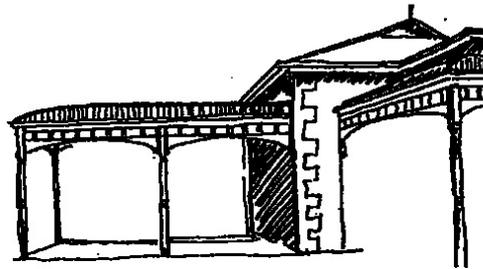

New carports, garages and other outbuildings should be designed to complement the original house and be located so they do not detract from the original form and style of the house.

Carports attached to the original house should be set back from the line of the building to allow the original form of the structure to be read clearly, and can repeat the roof level and detailing of a verandah.

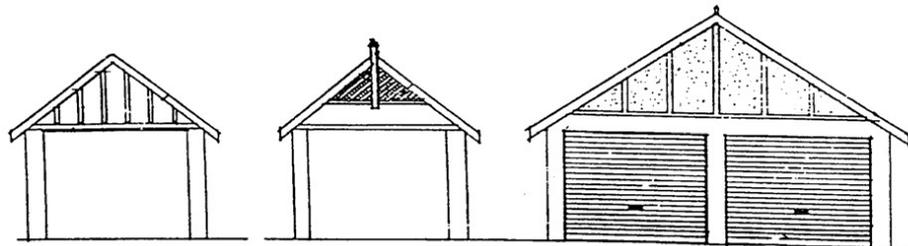

Free standing garages should preferably be located towards the rear of the property.

Single Carport - with hipped roof

Double Carport - with bullnose roof

Appropriate free standing garages or carports with pitched roof, and detailed to suit the house

8. FENCES AND GARDENS

Fences to property boundaries should be compatible in height, design and materials to the existing buildings on the site.

The Residential Historic (Conservation) Zones retain excellent examples of original fences which were constructed with the houses on the property. These should be retained and repaired where possible.

Where evidence regarding the original fence is not available, a fence of a style sympathetic to the design of the house should be erected. Victorian and Edwardian houses had pickets, paling, masonry and cast iron and other traditional fence forms. Houses from the 1920s used capped timber paling, post and wire or woven wire fences.

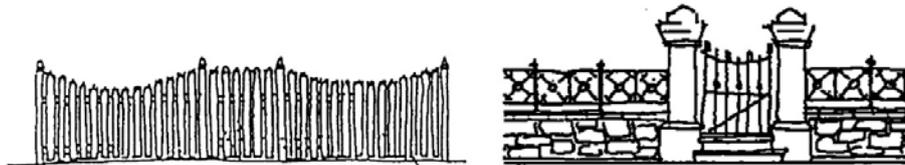

Hedges were an acceptable alternative to constructed fences and the many hedges which remain should be retained, restored and where appropriate extended, utilising the same species of planting currently in existence. *Duranta*, *coprosma*, *plumbago*, *cypress* and other bushy shrubs were used in Angaston.

High solid masonry or profile metal sheeting should not be used as fence material, as these would compromise the open character of the residential zone.

Many gardens within the zones contain mature trees which form landmarks within the area, these should be retained, wherever possible.

Planting and gardens around public buildings within the zone should be carefully designed, landscaped and maintained.

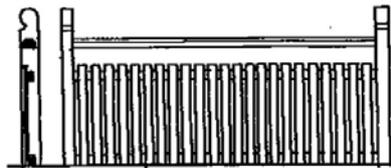

Typical 1870s – 1890's fence forms

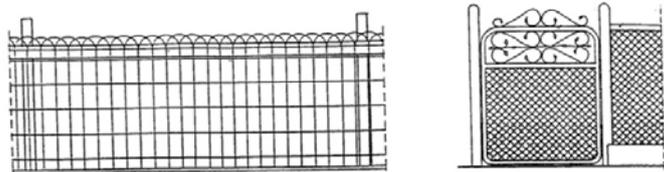

Timber picket (height 1200 to 1500mm)

Stone, brick, cast iron (height 1300 to 1650mm)

Timber paling fence for turn-of-century residences

Fences and gates appropriate for 1920s residences

Woven wire and timber fences and gates appropriate for 1920s residences

DEVELOPMENT ACT 1993

SECTION 48

*Decision by the State Commission Assessment Panel**Preamble*

1. The decision of the Governor under Section 48 of the Development Act 1993, to approve the development of the solid waste landfill (Northward Fill Landfill Depot) at Inkerman, was published in the *South Australian Government Gazette* on 21 January 1999.
2. The proposal has been the subject of an Environmental Impact Statement and an Assessment Report under Section 46 and 46B of the Development Act 1993.
3. The development was the subject of further applications to amend the development authorisation, and associated amendments to the Environmental Impact Statement were made under Section 47 of the Development Act 1993.
4. Variations to the development authorisation were notified in the *South Australian Government Gazette* on 17 June 2004 at p 2191 (for an alteration to the method of waste transport and transfer to the disposal area, alteration of the maintenance workshop and removal of the long haul vehicle fuel storage area), 14 October 2004 at p 3847 (related to the landfill lining and leachate collection system), 13 April 2006 at p 1036 (related to the leachate collection system and a change to the operating hours), 20 September 2007 at p 3727 (for the receipt of additional waste materials), 5 June 2008 at p 1827 (related to the recycling of waste materials), 20 August 2009 at p 3676 (to allow the receipt of low level contaminated waste at the approved landfill and disposal of these wastes into cells that are separate from those used to dispose of solid wastes), 4 March 2010 at p 930 (for the receipt and disposal of non-metropolitan construction and demolition waste that is not required to go through a waste recovery and waste transfer facility; and an updated design of the liner system for low level contaminated waste cells) and 8 December 2011 at 4802 (for a modification to the design of the existing maintenance shed).
5. On 8 June 2018, Cleanaway Waste Management Ltd, the company now having the benefit of the development authorisation, applied for a variation to the development authorisation comprising an increase of the final landfill height from the approved height of 27 metres AHD to a new height of 32 metres AHD – an increase of 5 metres. The variation application was the subject of an Amended Environmental Impact Statement (dated June 2018) under Section 47 of the Development Act 1993.
6. The State Commission Assessment Panel has, in considering the application for a variation of the development authorisation, had regard to all relevant matters under Section 48 (5) of the Development Act 1993.
7. For ease of reference, the State Commission Assessment Panel has decided to revoke all conditions and substitute therefore the conditions contained herein. Requirements that pertain to the variation have been added to Condition 1.

 - (i) maintain procedures and records, to the reasonable satisfaction of the Environment Protection Authority, that describe details for each load of waste received and disposed to ensure it does not contain recyclable materials.

PART B: NOTES TO PROPONENT

Building Rules

- The proponent must obtain a Building Rules assessment and certification for any building work from either the Wakefield Regional Council or a private certifier (at the proponent's option) and forward to the Minister for Planning all relevant certification documents as outlined in Regulation 64 of the Development Regulations 2008.
- Pursuant to Development Regulation 64, the proponent is especially advised that the Wakefield Regional Council or private certifier conducting a Building Rules assessment must:
 - o provide to the Minister for Planning a certification in the form set out in Schedule 12A of the Development Regulations 2008 in relation to the building works in question; and
 - o to the extent that may be relevant and appropriate:
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.

- Regulation 64 of the Development Regulations 2008 provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Planning. The Wakefield Regional Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this development authorisation (including its Conditions and Notes).

EPA Licensing and General Environmental Duty of Care

- The applicant is reminded of its general environmental duty, as required by Section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that the activities on the whole site, including during both construction and operation, do not pollute the environment in a way which causes or may cause environmental harm.
- Environmental authorisation in the form of an amended licence may be required for the construction and/or operation of this development. The applicant is advised to contact the Environment Protection Authority before acting on this approval to ascertain licensing requirements.
- The Environment Protection Authority will require the proponent to review and amend where necessary the current Landfill Environmental Management Plan (LEMP) to satisfy the Authority's licensing requirements. Such a plan will be required to include provisions for the review, from time to time, of waste treatment and disposal methods to facilitate implementation of continuous improvement programs. The LEMP will be required to incorporate specific plans in relation to groundwater, leachate and, surface water management. It will also be required to include provisions for implementation of corrective actions in the event of any failure of the leachate and groundwater management systems.
- Control over the types of waste to be received at the site will be exercised by the Environment Protection Authority. This will be done through conditions of environmental authorisation or requirements under a relevant Environment Protection Policy rather than through conditions of development authorisation.
- It is likely that as a condition of such a license the Environment Protection Authority will require the licensee to carry out specified environmental monitoring of air and water quality and to make reports of the results of such monitoring to it.
- A financial assurance in accordance with the provisions of Section 51 of the Environment Protection Act 1993 will be required by the Environment Protection Authority as a condition of license.
- In regard to Conditions of Development Authorisation 3-5, a Geosynthetic Clay Liner may be used in the construction of a liner for a low level contaminated waste cell (such as in place of an upper 600 mm compacted clay liner) provided it has a specification equivalent to ELCOSEAL X3000 made by Geofabrics Australia or its equivalent.
