## PUBLIC AND FINANCE AUDIT ACT 1987

### TREASURER'S QUARTERLY STATEMENT

*Commentary to the Statement of the Amounts Credited to and Issued from the Consolidated Account for the Quarters ended 31 December 2019 and 31 December 2018*

#### Receipts

##### Taxation

Payroll tax receipts in the December quarter 2019 were higher compared to the corresponding prior year period, but the six months ended December 2019 were lower due to a change in timing associated with the presentation of cash in the Consolidated Account. On an underlying basis, payroll tax receipts in both the December quarter 2019 and the six months ended December 2019 were higher than the corresponding prior year period, reflecting growth in taxable payrolls, partially offset by the introduction of policy measures including the removal of payroll tax for businesses with total annual payrolls below \$1.5 million from 1 January 2019.

Stamp duty receipts in both the December quarter 2019 and six months ended December 2019 were lower compared to the corresponding prior year periods due to a change in timing associated with the presentation of cash in the Consolidated Account. On an underlying basis, stamp duty receipts in the December quarter 2019 and six months ended December 2019 were higher compared to the corresponding prior year period. This was mainly due to higher receipts from the foreign ownership surcharge, insurance duty and conveyance duty on primary production transactions.

Gambling tax receipts in the December quarter 2019 and six months ended December 2019 were lower compared to the corresponding prior year period due to a change in timing associated with the presentation of cash in the Consolidated Account. On an underlying basis, gambling tax receipts in the six months ended December 2019 were slightly higher than the corresponding prior year period, but receipts in the December quarter 2019 were lower mainly due to the timing of payments to the Consolidated Account associated with gaming machine taxation from hotels/clubs.

Land tax receipts in the December quarter 2019 were lower compared to the corresponding prior year period while receipts in the six months ended December 2019 were higher than the corresponding prior year period but these variations are impacted by the timing of land tax payments.

##### Fees and charges

Fees and charges in the December quarter 2019 were higher compared to the corresponding prior year period, mainly due to the timing of guarantee payments and land regulatory fees to the Consolidated Account.

##### Royalties

Royalty receipts in the December quarter 2019 were lower compared to the corresponding prior year period. This was mainly due to a delay in the timing of payments to the Consolidated Account in the September quarter 2018, which led to these royalties being recognised in the December 2018 quarter. Underlying royalty receipts in the December quarter 2019 are largely consistent with collections in the corresponding prior year period. Underlying royalty receipts for the six months ended December 2019 were higher than the corresponding prior year period due to strong mineral royalty receipts.

*Commonwealth – General Purpose Payments*

Growth in general purpose grants in 2019-20 compared to 2018-19 is not indicative of underlying Goods and Services Tax (GST) revenue growth. This is because monthly grants are paid according to a payment schedule prepared by the Commonwealth Government rather than actual emerging monthly GST collections.

In its 2019-20 Mid-Year Economic and Fiscal Outlook, the Commonwealth Government estimated that the GST pool available for distribution to jurisdictions would grow by 0.4 per cent in 2019-20.

*Commonwealth – Specific Purpose Payments*

Specific Purpose Payments in the December quarter 2019 were in line with the corresponding prior year period. In the six months ended December 2019, they were lower compared to the corresponding prior year period due to a change in timing associated with the presentation of cash in the Consolidated Account. On an underlying basis, Specific Purpose Payments in the December quarter 2019 and six months ended December 2019 were broadly in line with the corresponding prior year periods.

*Commonwealth – National Partnership Payments*

National Partnership Payments in the December quarter and six months ended December 2019 were lower than the corresponding prior year period mainly due to changes in the scope of National Partnership Payments that are paid to the Consolidated Account. From 2019-20, the payments relating to the Disability Care Australia Fund are passed on to the Department of Human Services instead of being paid into the Consolidated Account.

*Other receipts*

Other receipts in the December quarter were lower compared to the corresponding prior year, mainly due to the timing of receipts to the Consolidated Account.

**Payments**

Payments were made pursuant to the Appropriation Act 2019 and also in accordance with other Acts for which specific appropriation has been authorised. The timing of the payments is based on agreed agency drawdown schedules and may change from period to period on specific agency requirements.

**Note**

The following points should be considered when reviewing the quarterly statement of Consolidated Account transactions.

- Unlike the State Budget, which comprises transactions on an accrual basis, the information reflected in the quarterly statements is limited to cash transactions.
- The Consolidated Account does not capture all the transactions undertaken by the general government sector (in particular, it does not record receipts to and payments from special deposit accounts).
- The timing of receipts and payments could be volatile within a particular year. As a result, large movements between years may only be due to changes in the timing of receipts and payments and therefore may not have consequences for the underlying budget position.

Treasurer of South Australia
